**The educational requirements for the following positions are all the same**:

**BAU SERVICE TECHNICIAN**
**BAU INSTALL (SOLUTIONS) TECHNICIAN**
**FIRE/SECURITY SERVICE TECHNICIAN**
**FIRE/SECURITY INSTALL TECHNICIAN**
**ELECTRICAL INSTALLER**
Associate's degree or 1-2 years of vocational technical training preferred. HS diploma or equivalent required. Specialized skill training/certification may be required.

The work responsibilities are listed below for each position type in categories "Service" and "Solutions":

## SERVICE:

### BAU SERVICE SPECIALIST AND FIRE/SECURITY SERVICE TECHNICIAN

The Service Specialist/Technician performs the following functions: Testing and inspection of the applicable system (either fire alarm system, security or direct digital control systems) to assure it is working as required and expected and, in some cases repair work is performed. This involves running programs within the panel that will trigger events within each system. If the triggered responses are appropriate to expectations, the system will "pass" each portion of the test. If a triggered response is not what is expected, then the specialist/technician will troubleshoot the system and try to identify the reason for the failure. If it is determined that repair work must be performed, then the specialist/technician will make needed repairs to the system. This will include the removal and replacement of incendiary devices and equipment, re-programming of the replaced equipment at the panel and then re-testing to assure it works as required. The fire systems may include fire alarm panels, wet and dry sprinkler systems, fire pump panels, fire extinguishers, kitchen hood systems, back flow preventers and pre-action systems.

## SOLUTIONS:

### BAU INSTALL (SOLUTIONS) SPECIALIST

The work performed by the BAU Specialist is - System Preparation & Design Coordination: drives the engineering group to create and/or verify point database; creates/reviews job specific programming via computer for BAU systems; creates and uploads point database, creates graphics in the Central Processing Unit (CPU). Network Technologies: verifies point database and programming operations are consistent with scope of work for the intended integration and sequence; backs up data from data servers and/or creates automated backup procedure; troubleshoots and resolves inconsistencies in the functions or sequence of operations; contacts Original Equipment Manufacturer (OEM) for technical support as/when needed; drives issues to resolution. Sets up and configures PC workstations, user interfaces; data servers, IP Networking devices, protocols, routers, switches, mass storage devices and hubs. Confirm proper network performance. Works with customers on their integrated networks to resolve communication problems.

Project Site Communication and Coordination: Schedules with trade contractors to coordinate startup services as needed; coordinates network drops, IP addresses and monitoring tools with customer's IT Department personnel; works with equipment vendors to coordinate communication protocols, encryption, and database requirements for integration to their systems. Operational Testing, Verification and Acceptance: Runs reports to analyze system operation, works with customer to demonstrate system operation and verify consistency with the contracted scope of work (IE Commissioning Agents or test and balance contractors, others); participates in final inspection and testing; assures customer acceptance; trains customers on system operations. Completes and submits written reports; provides Plans & Control System Documents to engineering for as-built drawings.

### FIRE/SECURITY INSTALL TECHNICIAN

In addition to programming requirements above, the fire/security technicians may: Performs equipment installation; installs control and distribution apparatus such as switches, relays and panels, fastening in place with screws or bolts using hand tools and power tools. Creates connections to various sensors and electrically powered devices; validates connections to power source and/or terminates wiring, mounting of parts and testing connections.

### ELECTRICAL INSTALLER

An electrical installer will support the work of the BAU/Fire/Security Specialists/Technicians and will perform any hands on wiring that is needed for which we have not subcontracted the work out. The Electrical installer will run wiring, attach equipment to the power source and assure that the power is feeding properly. They will also perform the function of terminating wires at the head end of the panel.

### DESIGN ENGINEER

Completes drawings to suit engineering changes and initiates engineering changes. Completes the creation of complex design layouts and detail drawings of complex products. Performs compilation of materials and specification sheets. Performs dimensions/specification determination necessary on complex drawings for effective manufacturing. Performs the designs of cost-effective complex products with adherence to applicable industry and customer standards/specifications. Completes complex investigations related to product design and maintenance. Performs review of complex engineering drawings and supporting documents for adherence to drafting standards. Completes planning test programs. Selects material based on application; may coordinate procurement. Associate's degree or 1-2

years of vocational technical training preferred. HS diploma or equivalent required. Specialized skill training/certification may be required.
