# Component Pricing

SitOnIt • Seating®

## UNDERSTANDING COMPONENT PRICING

This SitOnIt Seating Price Guide features component pricing. Component pricing puts you in the driver's seat: it is designed to show you exactly what you are paying for.

The following pages provide the specific product information that will help you price and create a custom model number for your chair or stool.

Begin at step 1 and work your way through the worksheet by choosing a frame, back, seat, arm, mechanism and base. Select the accessories, material and packaging method you desire (sequence and number of steps will vary depending on product).

The choices you make will either add to or subtract from the prominently listed base price. Standard features add nothing to the base price, and some choices are even a deduction! At the Final Price Calculation step simply enter the item codes and add up the pricing.

Specify the quantity desired and your requested delivery date and fax the worksheet along with your P.O. number and contact information to (714) 995-4855 or email to purchaseorder@exemplis.com. Or transfer the information to your own company's order form.

All products, prices and codes are subject to change. For the most current information see the SitOnIt Seating Price Guide online at sitonit.net.

## LEAD TIME
We have thousands of carded textiles – including vinyl and leather – that ship in two, five or ten days. For a complete listing of textile lead times, see the Carded Textile Program section of the Textile Information Guide or visit the Textiles tab on our websites. Graded-in, COM and COL orders start production when the textile arrives from the manufacturer.

**SitOnIt Seating**
Lead time is 2, 5 or 10 days based on the textile. Plastic shell colors are available in two-days to three-weeks. Tablet arms require 3-weeks.

**IDEON**
Lead time is 10-days. Products specified with Stain to Match have a lead time of 15 days. See page 17 for details.

Orders received by 10 a.m. Pacific Time begin assembly the next day. Orders that are "On Hold" will begin production only when all holds are released. Types of holds include:
- Credit Hold for issues related to billing and invoicing.
- Incomplete Hold if the purchase order is incomplete or illegible.
- Pricing Hold if the price on the purchase order does not match the pricing shown in the Price Guide or in our computer system.
- New Fabric Hold for non-standard textile orders without an inventory part number.
- Graded Hold is placed by the Purchasing Department while confirming delivery of graded fabric from the vendor.

Customer Service will notify you of any holds placed on your order.

## MULTI-UPHOLSTERY
The multi-upholstery option allows one fabric to be selected for the back and a different fabric for the seat. Multi-upholstery pricing is different for SitOnIt Seating and IDEON.

**SitOnIt Seating**
Upholstery pricing is based on both seat and back being the same textile. Otherwise:
- If two fabrics of the same grade are chosen, one grade level will be added to the upholstery price. Example: grade 4 for the seat and a different grade 4 for the back, the upholstery price will be grade 5 for both.
- If two fabrics of different grades are chosen, the final upholstery price will be based on the highest grade. Example: grade 2 for the seat and grade 3 for the back, the upholstery price will be grade 3. For both.

**IDEON**
A standard upcharge applies to all multi-upholstery orders. Different fabrics and grades may be combined because back, seat, arm and valance are separately priced.
- Add the single multi-upholstery upcharge to the cost of the components. Example: upcharge + any grade price for the seat + any grade price for the back + any grade price for the arm.

## PRODUCT AND DESIGN CHANGES
We reserve the right to discontinue product lines, models and parts at any time. We also reserve the right to make changes in design and material when such action is deemed to be an improvement in design, function and/or construction.

# CAL 133

Fire safety is a top priority for us. SitOnIt Seating and IDEON strongly support CAL 133 standards and makes it easy for designers and buyers to specify CAL 133 chairs.

## CAL 133 VS. TB-117

Under California law all upholstered furniture must meet TB-117-2013 by January 1, 2015. At a minimum all SitOnIt Seating and IDEON fabrics, vinyl, leathers, and resilient filling material (i.e., foam and Dacron) meet TB-117. Unlike TB-117, which tests only the inner upholstery components, with CAL 133 the entire piece of furniture must withstand ignition from a gas burner inside a testing chamber.

## WHAT IS CAL 133?

CAL 133 is a standard of furniture flammability required by the California Bureau of Home Furnishings and Thermal Insulation for furniture used in public buildings such as healthcare facilities, convalescent homes, public assembly areas of hotels and motels, hospitals, board and care homes, stadiums, licensed child care facilities, prisons and jails.

## CHOOSING CAL 133 TEXTILES

Consult the individual SitOnIt Seating and IDEON fabric cards to review the specifications for each fabric offered. Because we offer such a vast array of fabrics with varying degrees of flame retardancy, we suggest you consult the published technical data of the fabric supplier when making your fabric selection.

Specify CAL 133 textiles in the Material section of the Final Price Calculation worksheet or on your purchase order.

SitOnIt Seating and IDEON assume no responsibility for the flame retardancy of any customer provided textile.

## CAL 133 TESTING

CAL 133 is a full scale fire test for furniture manufactured for use in public buildings. The standards do not specify how to construct furniture, but only how it should perform when tested. To pass this fire standard test, a fire blocking liner is sandwiched between the foam and the fabric of our chairs. This liner acts as a fire extinguisher by smothering the flame.

COM/COL compliance for CAL 133 models listed above can be determined by specifying upholstery with the exact characteristics as approved textiles or by conducting a full chair burn test. There is a non-discountable test fee for each chair-textile combination plus the cost of the chair. The lead time for testing is 4 weeks.

**SitOnIt Seating**
$600

**IDEON**
$800

For more information on TB-117 and CAL 133 visit the State of California Department of Consumer Affairs website.

## TO ORDER CAL 133

Allow a ten-day lead time. There is a 3-week lead time for inflex black, bisque, salsa, navy, pebble, chocolate and slate. There is a 4-week lead time for Torsa desert, desert stripe, fog, fog stripe, electric blue, fire and navy. Clearly specify CAL 133 on your order. For each chair add the appropriate additional charge (see Price Guide).

## CAL 133 COM/COL

COM/COL compliance for CAL 133 models listed above can be determined by specifying upholstery with the exact characteristics as approved SitOnIt Seating fabrics and leathers or by conducting a full chair burn test. The non-discountable test fee for each chair-textile combination is $600 net plus the cost of the chair. The lead time for testing is 4 weeks.

## CAL 133 LEATHER

Volo leather meets CAL 133 when applied to @Work, Focus, Freelance, Glove Active, Glove Executive, Leader Knit Back and Sona.

## CAL 133 PLASTIC

Black plastic meets CAL 133 and is available on the following models at standard SitOnIt Seating lead times: Achieve, Anytime, Freelance, InFlex, OnCall, Relay, Rowdy and Volley. Bisque and Slate meet CAL 133 and is available on InFlex.

## CAL 133 TEXTILES

Over a thousand CAL 133 approved textiles in all grades, colors and styles are listed on the SitOnIt Seating website. Visit sitonit.net and search textiles by CAL 133 compliance, manufacturer, grade, lead time and other attributes.

## TO CHECK PURCHASED SEATING FOR CAL 133

To determine whether your current SitOnIt Seating chair meets CAL 133, or to check an order you have recently received, check the bottom of the chair seat pan for the label shown below. If your chair does not have this tag, your chair does not meet CAL 133.

### NOTICE

This article is manufactured for use in public occupancies and meets the flammability requirement of california bureau of home furnishings technical bulletin 133. Care should be exercised near open flame or with burning cigarettes.

## MOISTURE BARRIER

Accidents happen. To help protect your investment moisture barrier for seats and backs is an option on all IDEON seating products.

Specify moisture barrier seats and/or backs in the Material section of the Final Price Calculation worksheet or on your purchase order. Note that specification and pricing is separate for seat and back and applies to each single seat or back position

# FABRIC & COM/COL

## UNMATCHED PATTERN MATCHING

IDEON is the industry leader in pattern matching. Our PatternMatch™ expertise links patterns to chair components for a unified look across the back, front, seat and valance. Fabric for the right and left arms are cut to be mirror images. With this technology, every chair is a perfect match.

And the match can be replicated, even years later. If a replacement seat, back, valance – or even a complete chair – is needed, PatternMatch ensures the replacement perfectly matches the original.

## FABRIC DIRECTION

Patterned fabric may be oriented to your liking. Each upholstered component (seat, back, arm, valance) can be positioned independently.

Dotted lines on the chair images on the next page represent how we judge directional patterns travel. If you wish the pattern to travel according to our standard direction for each component do nothing or add "S" to the manufacturer/pattern/colorway information on your order. If you wish the pattern to be rotated select "Rotate Fabric Direction 90 Degrees" in the Final Price Calculation worksheet or add "R" to the manufacturer/pattern/colorway information on your order.

| ☐ Rotate Fabric Direction 90 Degrees | | |

To ensure desired fabric direction use the form on page 8.

All fabric will be applied in the standard direction unless otherwise specified. Since some fabrics may be bi-directional with a subjective dominate direction, IDEON reserves the right to use its own judgment and will apply the fabric in what is determined to be the best manner. To assure we meet your expectations, some upholstery selections may require visual verification prior to production. Visual verification orders will not be scheduled for production or acknowledged with a ship date until the customer has approved the visual image.

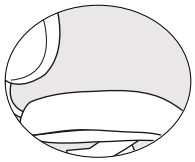
# ARMS & ARM ADJUSTMENTS

SitOnIt Seating offers a wide variety of arm styles and adjustments to accommodate all types of users doing a wide variety of tasks. The general adjustments for each arm type are described below. See the website or the product hang tag for specifics.

## ARMLESS

Any discussion of arm styles must begin with armless. Armless chairs and stools are less expensive and are easy to get into and out of. However, they do not provide ergonomic support for long-term sitting and task functions.

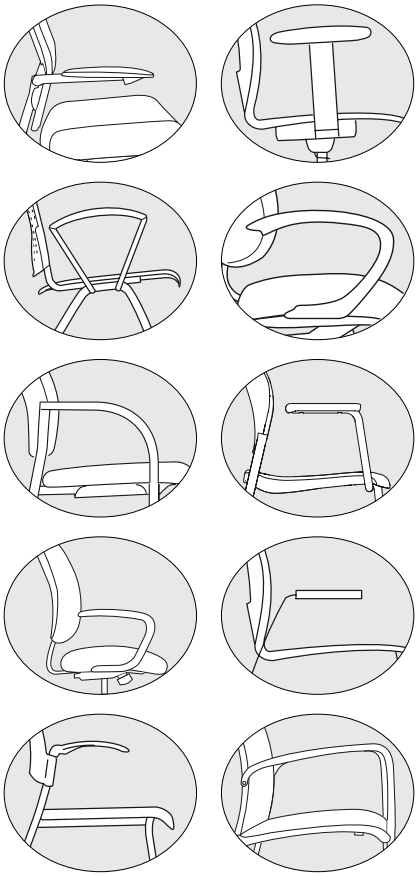
Every SitOnIt Seating collection offers armless chairs and stools, but the selection may be limited to specific models. For instance, Freelance multipurpose chairs and stools can be specified armless, but not Freelance bariatric chairs.



## FIXED

As the name implies, fixed arms cannot be adjusted. Also known as loop arms, cantilever arms and other names, these arms are commonly found on side and multi-seating as well as basic task seating.

Height adjustable arms are available for @Work, Amplify, Focus Work, Glove Active, Knack, Leader Knit Back, Non-Stop Heavy Duty, Novo, ReAlign, TR2 and Wit.



## HEIGHT ADJUSTABLE

This is the most basic adjustable arm. The arm adjusts up or down. Height adjustable arms are best for basic task work.

Height adjustable arms may operate slightly different for some collections.

- For @Work, Glove Active, Knack, Leader Knit Back, Non-Stop Heavy Duty, ReAlign and TR2:
  - To increase or decrease the arm height, press the button and pull up or push down on the arm.
- For Focus Work and Focus Sport:

  - To decrease arm height, press the button located under the front of the arm pad and push the arm down.

# CUSTOM FINISH PROGRAM

Our Stain-to-Match Program is designed to match your distinctive wood stain finish on our wood surfaces.

## PRICING

First-time custom stains must be approved before acceptance of an order. A one-time net fee applies if stains are not in our library. Thereafter, a stain-to-match upcharge is applied to each chair. The upcharge is waived if 50 or more units are ordered.

**SitOnIt Seating**
Stain not in our library: $350
Stain-to-match upcharge: $55

**IDEON**
Stain not in our library: $275
Stain-to-match upcharge: $70

## APPROVAL PROCESS

Since all new stains must be approved before they can be applied to seating or tables allow extra time. Custom finishes generally require at least one to two weeks to create a matched sample and then we'll need the signed Approval form before we can accept your order, schedule it for production and acknowledge a ship date. We reserve the right to decline the opportunity to match a finish color.

1. Send a 3" x 4" or 4" x 6" sample of the stain, along with the model numbers and options to which the finish will be applied, to:

   Customer Support
   Custom Finish Program
   6415 Katella Avenue
   Cypress, CA 90630

   Include dealer name, contact and project reference.

2. Once approved, we will send a finish sample to you along with any caveats that may apply. We will keep an identical sample in our files for future orders. Custom finishes generally require at least a week to create a matched sample.

3. Carefully review the sample. Note the STAIN ID# (example: SM#070214-1); this will be needed for your order. Return the signed approval form to Customer Support along with your order. We need your approval before we can accept the order, schedule it for production or acknowledge a ship date.

4. IDEON orders using our stain-to-match program will have a lead time of 15 days.

## ORDERING

When ordering, enter the approved STAIN ID# in the Material section of the Final Price Calculation worksheet or on your purchase order.

## CUSTOM FINISH TERMS & CONDITIONS

Wood is inherently beautiful because of natural variations in color, grain and texture. There may be minor differences from one chair to the next, even though they are finished at the same time. We cannot guarantee exact matches of grain or natural wood color.

Graded-in, COM and COL orders start production when the textile arrives from the manufacturer.

**SitOnIt Seating**
Lead time is 2, 5 or 10 days based on the textile. Plastic shell colors are available in two-days to three-weeks. Tablet arms require 3-weeks.

**IDEON**
Lead time is 10-days.

Orders received by 10 a.m. Pacific Time begin assembly the next day.
Orders that are “On Hold” will begin production only when all holds are released.
Types of holds include:
- Credit Hold for issues related to billing and invoicing.
- Incomplete Hold if the purchase order is incomplete or illegible.
- Pricing Hold if the price on the purchase order does not match the pricing shown in the Price Guide or in our computer system.
- New Fabric Hold for non-standard textile orders without an inventory part number.
- Graded Hold is placed by the Purchasing Department while confirming delivery of graded fabric from the vendor.

Customer Service will notify you of any holds placed on your order.

## MULTI-UPHOLSTERY
The multi-upholstery option allows one fabric to be selected for the back and a different fabric for the seat. Multi-upholstery pricing is different for SitOnIt Seating and IDEON.

**SitOnIt Seating**
Upholstery pricing is based on both seat and back being the same textile. Otherwise:
- If two fabrics of the same grade are chosen, one grade level will be added to the upholstery price. Example: grade 4 for the seat and a different grade 4 for the back, the upholstery price will be grade 5 for both.
- If two fabrics of different grades are chosen, the final upholstery price will be based on the highest grade. Example: grade 2 for the seat and grade 3 for the back, the upholstery price will be grade 3. For both.

**IDEON**
A standard upcharge applies to all multi-upholstery orders. Different fabrics and grades may be combined because back, seat, arm and valance are separately priced.
- Add the single multi-upholstery upcharge to the cost of the components. Example: upcharge + any grade price for the seat + any grade price for the back + any grade price for the arm.

## PRODUCT AND DESIGN CHANGES
We reserve the right to discontinue product lines, models and parts at any time. We also reserve the right to make changes in design and material when such action is deemed to be an improvement in design, function and/or construction.

# CAL 133

Fire safety is a top priority for us. SitOnIt Seating and IDEON strongly support CAL 133 standards and makes it easy for designers and buyers to specify CAL 133 chairs.

## CAL 133 VS. TB-117

Under California law all upholstered furniture must meet TB-117-2013 by January 1, 2015. At a minimum all SitOnIt Seating and IDEON fabrics, vinyl, leathers, and resilient filling material (i.e., foam and Dacron) meet TB-117. Unlike TB-117, which tests only the inner upholstery components, with CAL 133 the entire piece of furniture must withstand ignition from a gas burner inside a testing chamber.

## WHAT IS CAL 133?

CAL 133 is a standard of furniture flammability required by the California Bureau of Home Furnishings and Thermal Insulation for furniture used in public buildings such as healthcare facilities, convalescent homes, public assembly areas of hotels and motels, hospitals, board and care homes, stadiums, licensed child care facilities, prisons and jails.

## CHOOSING CAL 133 TEXTILES

Consult the individual SitOnIt Seating and IDEON fabric cards to review the specifications for each fabric offered. Because we offer such a vast array of fabrics with varying degrees of flame retardancy, we suggest you consult the published technical data of the fabric supplier when making your fabric selection.

Specify CAL 133 textiles in the Material section of the Final Price Calculation worksheet or on your purchase order.

SitOnIt Seating and IDEON assume no responsibility for the flame retardancy of any customer provided textile.

## CAL 133 TESTING

CAL 133 is a full scale fire test for furniture manufactured for use in public buildings. The standards do not specify how to construct furniture, but only how it should perform when tested. To pass this fire standard test, a fire blocking liner is sandwiched between the foam and the fabric of our chairs. This liner acts as a fire extinguisher by smothering the flame.

COM/COL compliance for CAL 133 models listed above can be determined by specifying upholstery with the exact characteristics as approved textiles or by conducting a full chair burn test. There is a non-discountable test fee for each chair-textile combination plus the cost of the chair. The lead time for testing is 4 weeks.

| SitOnIt Seating | IDEON |
|---|---|
| $600 (4 weeks lead time) | $800 (6 week lead time) |

For more information on TB-117 and CAL 133 visit the State of California Department of Consumer Affairs website.

## TO ORDER CAL 133

Allow a ten-day lead time. There is a 3-week lead time for inflex black, bisque, salsa, navy, pebble, chocolate and slate. There is a 4-week lead time for Torsa desert, desert stripe, fog, fog stripe, electric blue, fire and navy. Clearly specify CAL 133 on your order. For each chair add the appropriate additional charge (see Price Guide).

## CAL 133 COM/COL

COM/COL compliance for CAL 133 models listed above can be determined by specifying upholstery with the exact characteristics as approved SitOnIt Seating fabrics and leathers or by conducting a full chair burn test. The non-discountable test fee for each chair-textile combination is $600 net plus the cost of the chair. The lead time for testing is 4 weeks.

| SitOnIt Seating | IDEON |
|---|---|
| $600 (4 weeks lead time) | $800 (6 week lead time) |

## CAL 133 LEATHER

Volo leather meets CAL 133 when applied to @Work, Focus, Freelance, Glove Active, Glove Executive, Leader Knit Back and Sona.

## CAL 133 PLASTIC

Black plastic meets CAL 133 and is available on the following models at standard SitOnIt Seating lead times: Achieve, Anytime, Freelance, InFlex, OnCall, Relay, Rowdy and Volley. Bisque and Slate meet CAL 133 and is available on InFlex. CAL 133 is available for all colors for Lumin and Rio .

## CAL 133 TEXTILES

Over a thousand CAL 133 approved textiles in all grades, colors and styles are listed on the SitOnIt Seating website. Visit sitonit.net and search textiles by CAL 133 compliance, manufacturer, grade, lead time and other attributes.

## TO CHECK PURCHASED SEATING FOR CAL 133

To determine whether your current SitOnIt Seating chair meets CAL 133, or to check an order you have recently received, check the bottom of the chair seat pan for the label shown below. If your chair does not have this tag, your chair does not meet CAL 133.

### NOTICE

This article is manufactured for use in public occupancies and meets the flammability requirement of California Bureau of Home Furnishings technical bulletin 133. Care should be exercised near open flame or with burning cigarettes.

## MOISTURE BARRIER

Accidents happen. To help protect your investment moisture barrier for seats and backs is an option on all IDEON seating products.

Specify moisture barrier seats and/or backs in the Material section of the Final Price Calculation worksheet or on your purchase order. Note that specification and pricing is separate for seat and back and applies to each single seat or back position

# Fabric & COM/COL

## UNMATCHED PATTERN MATCHING

IDEON is the industry leader in pattern matching. Our PatternMatch™ expertise links patterns to chair components for a unified look across the back, front, seat and valance. Fabric for the right and left arms are cut to be mirror images. With this technology, every chair is a perfect match.

And the match can be replicated, even years later. If a replacement seat, back, valance – or even a complete chair – is needed, PatternMatch ensures the replacement perfectly matches the original.

## FABRIC DIRECTION

Patterned fabric may be oriented to your liking. Each upholstered component (seat, back, arm, valance) can be positioned independently.

Dotted lines on the chair images on the next page represent how we judge directional patterns travel. If you wish the pattern to travel according to our standard direction for each component do nothing or add "S" to the manufacturer/pattern/colorway information on your order. If you wish the pattern to be rotated select "Rotate Fabric Direction 90 Degrees" in the Final Price Calculation worksheet or add "R" to the manufacturer/pattern/colorway information on your order.

To ensure desired fabric direction use the form on page 8.

All fabric will be applied in the standard direction unless otherwise specified. Since some fabrics may be bi-directional with a subjective dominate direction, IDEON reserves the right to use its own judgment and will apply the fabric in what is determined to be the best manner. To assure we meet your expectations, some upholstery selections may require visual verification prior to production. Visual verification orders will not be scheduled for production or acknowledged with a ship date until the customer has approved the visual image.

# Custom Finish Program

Our Stain-to-Match Program is designed to match your distinctive wood stain finish on our wood surfaces.

## PRICING

We will gladly do our best to match any stain in your color scheme, such as flooring, trim and other furniture. The stain-to-match upcharge is applied to each chair or table requiring the custom finish.

**Custom Stain Match**

If the desired stain is not one of the standard finishes listed in a Price Guide, a custom stain match fee will apply. Our custom finish process requires extra time to create a perfectly matched sample for your personal approval. Since stain reacts differently on different woods, and color batches vary, it is important to perform this test. This one-time net fee applies the first time a request is made for that particular stain color. The charge does not apply to reorders of the same product by the same customer. Once the custom stain has been approved, a stain-to-match upcharge is applied to every chair ordered with the new stain.

**SitOnIt Seating**
Stain matching fee (net): $350
Stain-to-match upcharge: $55 (waived for 50 or more units)

**IDEON**
Stain matching fee (net): $275
Stain-to-match upcharge: $70

## APPROVAL PROCESS

Since all new stains must be approved before they can be applied to seating or tables allow extra time. Custom finishes generally require two weeks to create a matched sample and then we'll need your written approval to schedule the order into production and acknowledge a ship date. We reserve the right to decline the opportunity to match a finish color.

1. Send a 3” x 4” or 4” x 6” sample of the stain, along with the model numbers and options to which the finish will be applied, to:

   **SitOnIt Seating**
   Customer Support
   SitOnIt Seating Custom Finish Program

   Cypress, CA 90630

   **IDEON**
   Customer Support
   IDEON Custom Finish Program
   6415 Katella Avenue
   Cypress, CA 90630

   Include dealer name, contact and project reference.

2. We will send a finish sample to you along with any caveats that may apply. We will keep an identical sample in our files for future orders. Custom finishes generally require two weeks to create a matched sample.

3. Carefully review the sample. Note the STAIN ID# (example: SM#070214-1); this will be needed for your order. We'll need your written approval to schedule the order into production and acknowledge a ship date.

## ORDERING

When ordering, enter the approved STAIN ID# in the Material section of the Final Price Calculation worksheet or on your purchase order.

## CUSTOM FINISH TERMS & CONDITIONS

Wood is inherently beautiful because of natural variations in color, grain and texture. There may be minor differences from one chair to the next, even though they are finished at the same time. We cannot guarantee exact matches of grain or natural wood color.

## LEAD TIME

The lead time after stain-to-match approval is:

# Component Pricing

## COMPONENT PRICING

This IDEON Price Guide features component pricing. Component pricing puts you in the driver's seat: it is designed to show you exactly what you are paying for.

The following pages provide the specific product information that will help you price and create a custom model number for your chair, settee, sofa, ottoman or bench.

Begin at step 1 by choosing a model. Work your way through the worksheet by choosing arm, back, valance and foot styles. Select the accessories and textiles you desire (sequence and number of steps will vary depending on product).

The choices you make will either add to or subtract from the prominently listed base price. Standard features add nothing to the base price, and some choices are even a deduction! At the Final Price Calculation step simply enter the item codes and add up the pricing.

Specify the quantity desired and your requested delivery date and fax the worksheet along with your P.O. number and contact information to (714) 995-4855 or email to purchaseorder@exemplis.com. Or transfer the information to your own company's order form.

All products, prices and codes are subject to change. For the most current information see the IDEON Price Guide online at ideondesign.com.

For instance, a table can link to a Guest or Patient chair on one side and a Pre-Configured, Freespan, Start or End element on the other.
