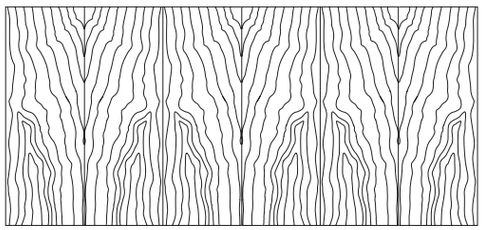
Collective®Presentation Product Information

Collective®Presentation Product Information

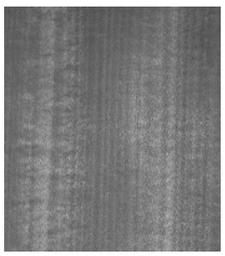
Exterior Wood Materials
Exterior surfaces are made from the finest selected veneers to achieve clarity and consistency in the Collective®Presentation product line. To attain a pleasing, symmetrical pattern, all veneers in Collective®Presentation are book-matched. All exterior solid lumber is matched to coordinate with the veneer.



Book Matched Example

Alternating pieces of veneer are flipped over so they face each other like the pages within a book

Collective Presentation is available in flat cut cherry, maple, and walnut veneer.



Makore veneer is also available on Collective®Presentation at no upcharge. Makore is also known as African Cherry veneer. When makore veneer is quarter cut it has a nice straight grain pattern with a pinkish brown cast and is a good alternative for cherry veneer for Collective®Presentation.

Anegre veneer is a premium veneer choice and is quarter cut to have a figure cut (fiddle back) pattern. There is a 15% upcharge applied to the list for Anegre veneer

A wide range of wood stains have been formulated to enhance the beauty of the veneer.

Solid painted finishes on MDF are also offered on drawer and door fronts to provide an accent to the Collective Presentation product.

Work Surface Construction
Tops are 3-ply balanced construction, 1½" thick with solid matching hardwood 1.5mm rims.

Matching or coordinating high pressure laminate in a veneer grain can be applied to the top surface and is available at no additional charge for some finishes.

Case Construction
Outside panels are 13⁄16" and joined together by mortise and tenon construction. In addition to mortise and tenon joint construction, pedestal joints are reinforced with screws, cleats, brackets and glue. Tops are secured to the chassis with top fastening cleats screwed to the inside of the panels.

Cabinet doors have 110˚ swing hinges to allow adequate access into the interior of the cabinet.

Leveling glides are provided in both plinth base or telescopic foot.

Extruded Aluminum Components
Telescopic Feet, Valance Rails, Tool Rails, and Spacers all are made from an alloy aluminum compound, made up of 10% post consumer scrap, 60% post industrial scrap and 30% primary aluminum. The aluminum meets or exceeds the guidelines of USGBC – LEED V2.2. The parts are precisely machined and then processed in a clear anodized finish for a natural aluminum appearance.

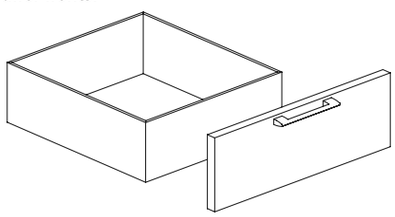
Fabricated or Casted Metal Components
The metal is laser cut, bended and robotically welded to the exact specifications, polished and powder coated to blend with the anodized aluminum.

Access Kneespace Panel
Wall stud construction style frame is made from 16-gauge steel, stamped and laser cut. Pop-rivets are used to combine frames and create various widths. Frames are coated with silver powder coat. The back is open and is designed to sit up against a wall, to allow for wiring access.

Aluminum Glass Doors
Aluminum glass doors and modesty panels have extruded aluminum frames with 4mm thick smudge resistant frosted glass or clear glass back painted in bright white.

Drawer Box Construction
The unidirectional drawer box is a durable mitre-fold drawer system which is mitered, glued and doweled. The ½" thick drawer sides are wrapped in a high grade maple vinyl. The drawer bottom is secured into a ¼" deep groove. All of these elements combine to create an extremely durable drawer box.

The drawer fronts are wood rimmed MDF core and are attached to the drawer box. The drawer boxes offer the benefit of field interchangeability of drawer fronts.



Drawer Suspension
The high quality black drawer suspensions carry a lifetime warranty. Slides feature steel ball bearings for longer life with cushioned in/out stops. File and box drawers have 100% full extension with over travel.

Collective®Presentation Product Information

Locking
Credenzas feature door locking option to provide maximum security and flexibility.

Units are shipped randomly keyed as standard (units tagged in the grouping are keyed alike). Keyed alike units are available if requested at no upcharge. Removable cores for in-field re-keying are standard.

Finish - Stain/Colors
We offer a wide variety of wood stains and paint colors on the Collective®Presentation. Please see the chart below. Samples are available upon request, through our website or by contacting Customer Service. Former finish names are listed in parentheses for reference.

Collective®Presentation Product Information

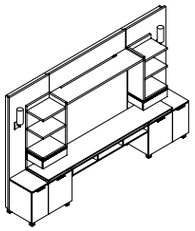
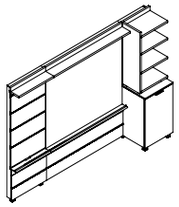
Wall Options

Collective®Presentation addresses today's information and presentation environments. Technology integration and collaborative solutions benefit reception areas, private offices, open plan spaces, conference or casual meeting rooms. Collective®Presentation consists of two separate groupings: Media Walls and Interactive Walls. Due to different heights and width variations the two are not interchangeable. Walls require specification of left and right end panels or towers, and a center wall panel.



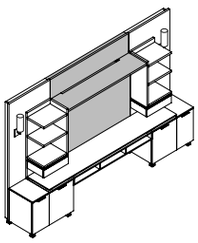
Media Wall



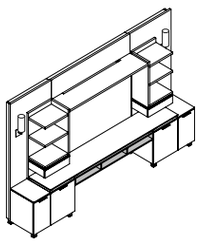
Interactive Wall

Media Wall

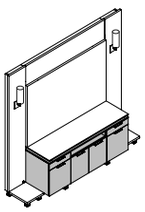
The Media Wall supports various technology applications including plasma display, laptop, receiver/DVD, projector, speakers and video conferencing. The Media Wall creates 86" and 71" heights and includes a center wall panel, technology niche storage with back panel, technology credenza, end towers, glass and wood tops. Panels and towers are always wall mounted.



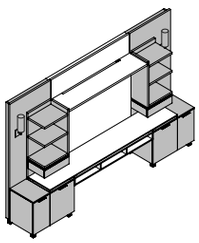
Center Wall Panel



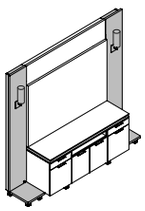
Technology Console

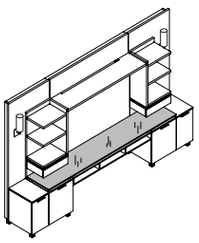


Technology Credenza

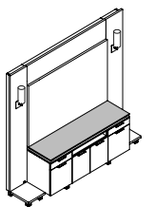


End Towers





Glass and Wood Tops



Interactive Wall

The Interactive Wall features marker board for meetings and presentations. Tackable panels are used for collateral materials and more. The Interactive Wall is available in 86" and 74" heights and has a center wall with marker board, tackable panel on one or both sides, or end tower on one or both sides. Interactive wall towers and center walls are always wall mounted.

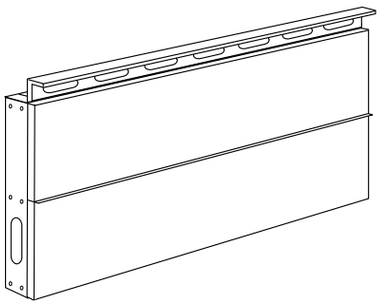
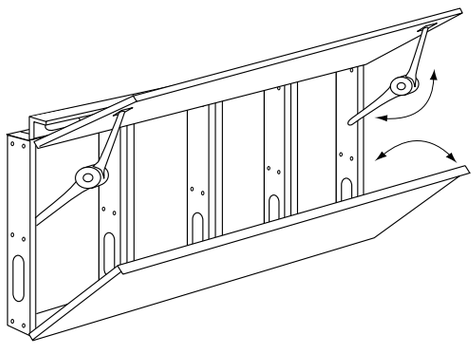
Access Panel Wiring

The access panel consist of two hinged panels with a lid stay mechanism on upper panel. The panel allows access to building power and communication and features concealed lay-in cable channel, and optional modular power distribution system.





Installation of the Data Adapter Kit & Base Plate

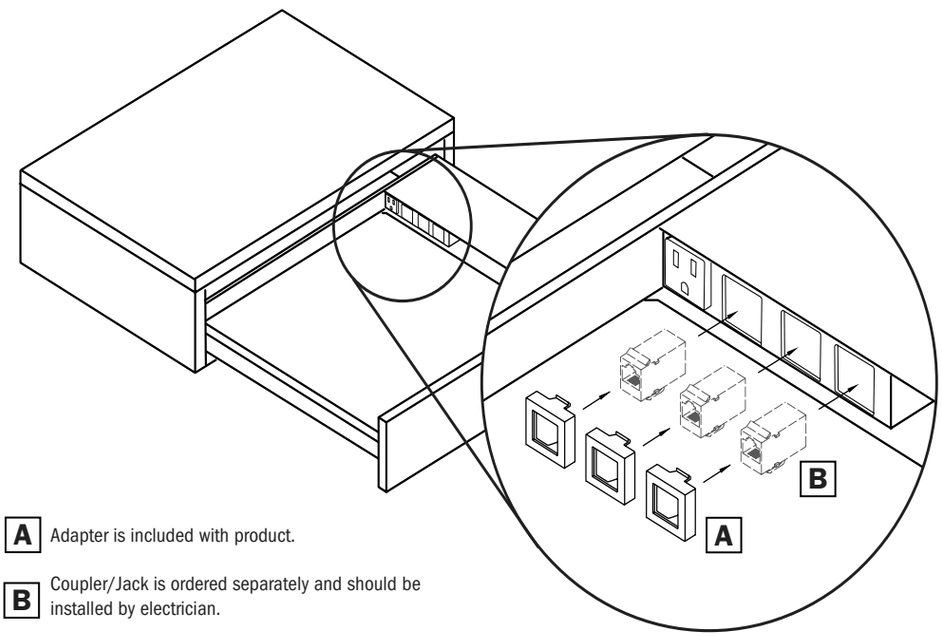
1. Select the appropriate adapter.

2. Snap jack into adapter following the instructions provided with the jack.

3. Once assembled, snap adapter into the notched, square holes in the orientation shown.

4. If provided, snap adapter into any 1⅜" x 2¾" opening.

Note: Verify fit of jack in adapter before ordering large quantities as manufacturer designs may change without notice.



A Adapter is included with product.

B Coupler/Jack is ordered separately and should be installed by electrician.

Finale Conference Product Information

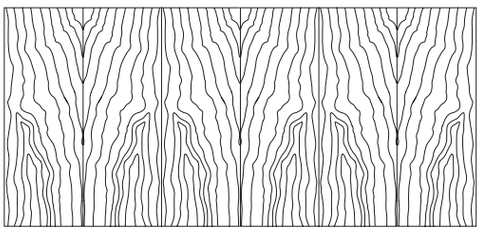
Exterior Wood Materials
Exterior surfaces are made from the finest selected veneers to achieve clarity and consistency in the Finale product line. To attain a pleasing, symmetrical pattern, all veneers in Finale are book-matched. All exterior solid lumber is matched to coordinate with the veneer.



Book Matched Example

Alternating pieces of veneer are flipped over so they face each other like the pages within a book.

Finale is available in flat cut cherry, maple and walnut veneer. A wide range of wood stains have been formulated to enhance the beauty of the veneer.

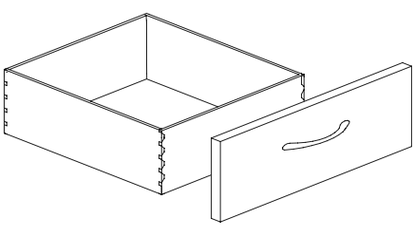
Solid painted finishes on the veneer are also offered to provide an accent to the Finale product.

Work Surface Construction
Tops are 5-ply balanced construction, 1 3⁄16″ thick with solid matching hardwood edges. Tops are available in six edge profile.

Matching or coordinating high pressure laminate in a veneer grain can be applied to the top surface and is available at no additional charge.

Base Construction
Panels are joined together by mortise and tenon construction. In addition to mortise and tenon joint construction. Leveling glides are set into solid hardwood with t-nut inserts, which helps to prevent the leveling glide from tear out. Tops are secured to the bases with top fastening cleats screwed to the inside of the panels.

Drawers
The 9ply unidirectional hardwood sides of the drawer box are 7⁄16″ thick assembled with English dovetail construction at each corner of the box. The drawer bottom panel is ¼″ thick fitting into a groove machined into the side of the box. Interiors are sanded and coated with clear U.V. finish to protect against shrinking, swelling or warping, and to provide a clean, smooth feel and appearance.



Drawer Suspension
The high quality black drawer suspensions carry a lifetime warranty. Slides feature steel ball bearings for longer life with cushioned in/out stops. File and box drawers have 100% full extension with over travel.

Finish - Stain/Colors
We offer a variety of wood stains and paint colors on Finale. Please see the chart below. Samples are available upon request. Former finish names are listed in parentheses for reference.

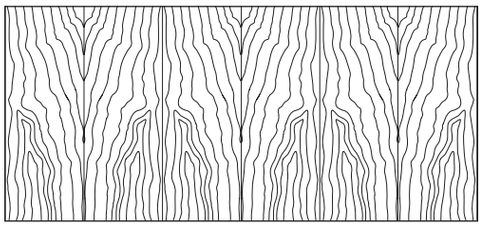
Exterior surfaces are made from the finest selected veneers to achieve clarity and consistency in the iXY product line. To attain a pleasing, symmetrical pattern, all veneers in iXY are book-matched. All exterior solid lumber is matched to coordinate with the veneer.

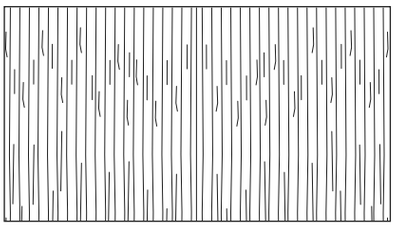


Book Matched Example

Alternating pieces of veneer are flipped over so they face each other like the pages within a book. The diagram above shows book-matched flat cut veneer.

iXY is available in flat cut cherry, maple and walnut veneer. A wide range of wood stains have been formulated to enhance the beauty of the veneer.

Double Cut veneer is another choice on iXY product. This veneer is a processed product that has at least two cuttings to create the final veneers. These cuts of veneer strands are dyed and layered into a block to create variation of patterns from a very tight grain pattern to an exotic figure grain pattern. The diagram below show the tight pattern used on iXY.



Solid painted finishes on MDF are also offered to provide an accent to the iXY product.

Table Frames
Die-cast aluminum corners with receivers for table rails and legs, attached to underside of the top. Table rails are extruded aluminum with allowance for optional features. Legs, die-cast aluminum with wire cavity and clip features to secure the wires. Glide has approximately 1″ of adjustment and shroud ring to conceal threads.

Veneer Table Tops
Tops are 1¼″ thick 3 ply with MDF core. Edges on table tops are undercut bevel with the ⅜″ flat having a 1.5 mm matching self rim. Tops are secured with core fastening screws to the table rails. Two inch radius corners are on top shapes.

Primary Height Case Tops
Tops are 1 3⁄16″ thick, 3 ply construction with a solid lumber band on user side and 1.5 mm veneer tape. Tops are securely fastened with screws through the pedestal stretcher and metal connecting plates.

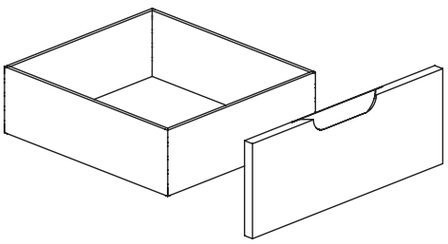
Table with Glass Tops
Tops can be either clear or back painted opaque where applicable. Glass is 10 mm thick with a 1⁄32″ bevel on both the top and bottom edges. Glass is low iron and tempered for safety. A series of small pucks are attached to the underside with an adhesive. These pucks then rest on the table rails.

Case Construction
Cases are constructed with a combination of mortise-tenon and dowels to secure joints of the case. Panels are ¾″ thick 3 ply construction. Reinforced metal corner braces secure corners and house the leveler.

Back of cases can be fixed ¾″ thick stationary or ¼″ thick removable. (Check individual items specification listing) Backs of cases are always finished.

Glides have a full adjustment 1½″ to allow for proper leveling.

Drawers
Standard V-fold drawer interior is a ½″ durable, miter-fold drawer system. The four sided box is mitered, glued and doweled with an attached front. The drawer front is veneer rimmed MDF core and is attached to the four sided box. Routed bevel pull creates a self pull. Prism pull is available as an option



Drawer Suspension
High quality black drawer suspension carries a lifetime warranty. Ball bearing provide a smooth effortless access to the drawers. All drawers have soft close feature with the exception of lateral files. File drawers have provisions for legal and letter filing. Lateral file drawers have reinforced bottoms.

Locking
All drawers have locks as standard. The locks are pedestal locking, located in the upper right corner of the top drawer. Locks are optional on most door compartments.

Units are shipped randomly keyed as standard (units in the grouping are keyed alike). Keyed alike units available if requested at no upcharge. Removable cores for in-field re-keying are standard.

Doors
Hinge doors have a 110° swing with the soft close feature.

Sliding doors have a single pass hidden roller wheel with guide tracks. Locking is not available on sliding door units.

Overheads can be ordered with the optional back painted glass doors in a thin profile aluminum frame. Locks are not available on glass doors.

iXY Product Information

Adjustable Height Worksurface
Single lift column adjust worksurface up to 42 ¼" height. Control is flush mounted into the top of pedestal. Control for the Table Desk can be mounted either left or right of the top's center. Aluminum profile housing encloses the UL® certified driver and mechanism.

Pull-Out Shelf
Equipment can easily be accessed by specifying the pull out shelf option. This shelf is always located at the bottom of the cabinet and has a front stop rail incorporated as part of the shelf. The slide extensions are undermounts to provide a clean appearance.

Finish - Stain/Colors
We offer a variety of wood stains and paint colors on iXY. Please see the chart below. Samples are available upon request. Former finish names are listed in parentheses for reference.

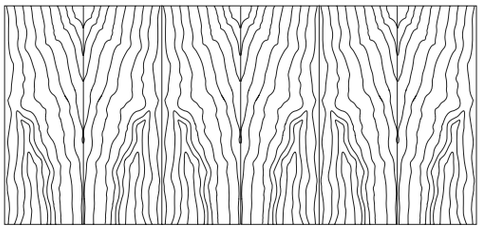
Exterior Wood Materials
Exterior surfaces are made from the finest selected veneers to achieve clarity and consistency in the Shuffle product line. To attain a pleasing, symmetrical pattern, all veneers in Shuffle are book-matched. All exterior solid lumber is matched to coordinate with the veneer.



Book Matched Example

Alternating pieces of veneer are flipped over so they face each other like the pages within a book.

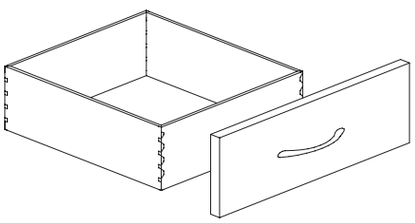
Shuffle is available in flat cut cherry veneer. A wide range of wood stains have been formulated to enhance the beauty of the veneer.

Work Surface Construction
Tops are 5-ply balanced construction, 1 3⁄16″ thick with solid matching hardwood edges. Tops are available in six edge profile.

Matching or coordinating high pressure laminate in a veneer grain can be applied to the top surface and is available at no additional charge.

Base Construction
Panels are joined together by mortise and tenon construction. In addition to mortise and tenon joint construction. Leveling glides are set into solid hardwood with t-nut inserts, which helps to prevent the leveling glide from tear out. Tops are secured to the bases with top fastening cleats screwed to the inside of the panels.

Drawers
The 9ply unidirectional hardwood sides of the drawer box are 7⁄16″ thick assembled with English dovetail construction at each corner of the box. The drawer bottom panel is ¼″ thick fitting into a groove machined into the side of the box. Interiors are sanded and coated with clear U.V. finish to protect against shrinking, swelling or warping, and to provide a clean, smooth feel and appearance.



Drawer Suspension
The high quality black drawer suspensions carry a lifetime warranty. Slides feature steel ball bearings for longer life with cushioned in/out stops. File and box drawers have 100% full extension with over travel.

Vision Laminate Conference Product Information

Vision Laminate Conference Product Information

Laminates
Vision Laminate features TFL (thermally fused laminate) chassis and components. *Worksurfaces* are available in a HPL (high pressure laminate) or in the TFL surface, when indicated by the pricing column

Edges of the worksurface are impact resistant (PVC) on TFL and HPL tops. The laminate is offered in 10 wood grain patterns and 7 solid colors. The wood grain laminate features an embossed grain to hide finger prints and light scratches. The solid laminate is smooth to the touch with a semi-matte finish. All Vision Laminate products are indoor-air certified by GreenGuard.

The chart below lists the laminates available on the Vision product. Former laminate names are listed in parentheses for reference.

TFL - HPL ***Veneer Grain Pattern Laminates***

AUT	Autumn *(Autumn Cherry)*	HGL	High Line
BLO	Blond Echo	SHE	Shea *(Natural Maple)*
BBN	Bourbon *(Natural Cherry)*	STU	Studio Teak
BZW	Brazilwood	WLH	Walnut Heights
BRG	Brighton *(Brighton Cherry)*	VIN	Vintage *(Vintage Cherry)*

TFL - HPL ***Solid Laminates***

ALB	Alabaster	SHD	Shadow
BBL	Bridal Blanco	SLG	Slate Grey
DWH	Designer White	TAU	Taupe
DOV	Dove Grey		

Select models are available in the NOW! quickship program if a veneer grain pattern laminate is selected.

Top Surfaces *(Conference Tops and Credenza Tops)*
Tops have a 3-ply balanced construction. Tops are 1-3⁄16" thick with coordinating PVC edges.

Conference Tops feature 3mm PVC edges on all sides and are available in HPL only.

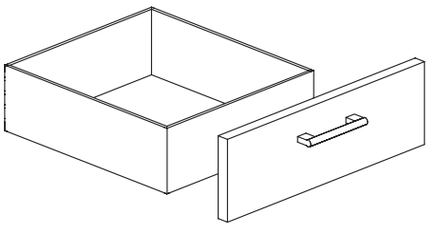
Credenza Tops feature 3mm PVC edges on the user side only. Remaining edges are banded with 1mm PVC which allows for a seamless appearance when units are mated end-to-end or back-to-back. Some laminates have a choice of 3 edge profiles, see the next page. Credenza Tops are offered in TFL or HPL.

TFL features on *Conference Top Surfaces**
- fused to the 45 pound density substrate of the top for a durable surface
- tops are laminated on both sides
- available in all the wood grain and solid patterns

HPL features on *Conference Top Surfaces**
- fusion of multiple layers create a higher impact resistant surface
- tops are 3-ply balanced construction
- matched to the TFL wood grain and solid patterns

Case Construction
Panels for chassis consist of a ¾" thick substrate with TFL surfaces and PVC bands on exposed edges. Pedestals and cabinets are constructed with dowels reinforced with screws, cleats and metal fasteners for increased stability. Leveling glides are installed into the panels to prevent tear-outs.

Drawers
The unidirectional V- Fold drawer box is a durable miter-fold drawer structure which is glued and doweled. The ½" thick drawer sides are wrapped in a high grade maple vinyl, with an attached front. The drawer front is attached to the four sided box.



Drawer Suspension
High quality black drawer suspension carries a lifetime warranty. File and box drawers have 100% full extension with over travel. Slides feature steel ball bearings for longer wear and positive, cushioned in/out stops.

Locking
All free standing credenzas, and bench height credenza feature pedestal locking.

Units are shipped randomly keyed as standard. Key alike units are available upon request for no additional charges. Removable cores for in-field re-keying are standard.

Special Construction and Sizes
Vision Laminate offers large offering of top sizes and shapes. Contact Customer Service if you are having trouble with finding the table to complete the desired configuration. Special request may be denied because of material limitations.

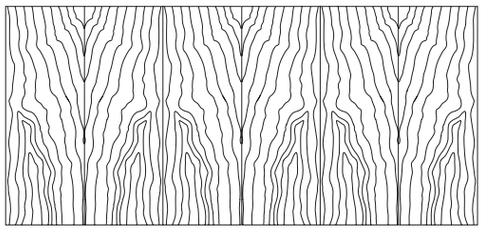
Vision Veneer Conference Product Information

Vision Veneer Conference Product Information

Exterior Wood Materials
Exterior surfaces are made from the finest selected veneers to achieve clarity and consistency in the Vision Veneer product line. To attain a pleasing, symmetrical pattern, all cherry, maple, walnut veneers in Vision Veneer are book-matched. All exterior solid lumber is matched to coordinate with the veneer.

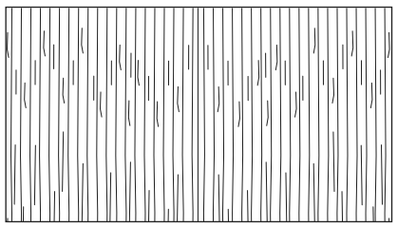


Book-Matched Example

Alternating pieces of veneer are flipped over so they face each other like the pages within a book

Vision Veneer is available in flat cut cherry, maple and walnut veneer. A wide range of wood stains have been formulated to enhance the beauty of the veneer.

Double Cut veneer is another choice on Vision Veneer product. This veneer is a processed product that has at least two cuttings to create the final veneers. These cuts of veneer strands are dyed and layered into a block to create variation of patterns from a very tight grain pattern to an exotic figure grain pattern. The diagram below show the tight pattern used on Vision Veneer. Use the appropriate pricing column when specifying Double Cut veneer.



Solid painted finishes on MDF are also offered to provide an accent to the Vision Veneer product.

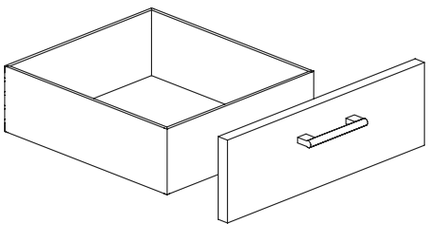
Cherry veneer is the only veneer species available in the NOW! quickship program on the select models.

Work Surface Construction
Tops are 5-ply balanced construction, 1 3⁄16" thick with solid matching hardwood edges. Surfaces are available in wood veneer or high pressure laminate. No additional charge for using our coordinating high pressure laminate with a veneer grain pattern with finish wood edges.

Case Construction
Outside panels are 13⁄16" and joined together with dowels reinforced with screws, cleats and metal fasteners for increased stability. Leveling glides are set into solid hardwood blocks, which helps to prevent the leveling glide from tear out. Tops are secured to the chassis with top fastening cleats screwed to the inside of the panels.

Cabinet doors have 110˚ swing hinges to allow adequate access into the interior of the cabinet.

Drawers
The unidirectional V- Fold drawer box is a durable miter-fold drawer structure which is glued and doweled. The ½" thick drawer sides are wrapped in a high grade maple vinyl, with an attached front. The drawer front is attached to the four sided box.



Optional four corner dovetailed wood drawers are available. Specify and add 10% per unit.

Drawer Suspension
High quality black drawer suspension carries a lifetime warranty. File and box drawers have 100% full extension with over travel. Slides feature steel ball bearings for longer wear and positive, cushioned in/out stops.

Locking
Locking
All free standing credenzas, and bench height credenza feature pedestal locking.

Units are shipped randomly keyed as standard. Key alike units are available upon request for no additional charges. Removable cores for in-field re-keying are standard.

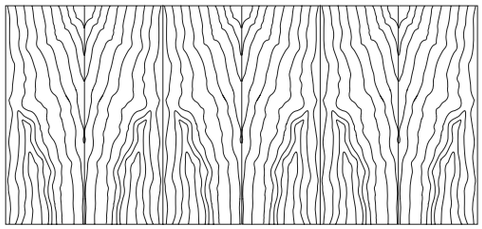
Brogan Conference Product Information

Brogan Conference Product Information

Exterior Wood Materials
Exterior surfaces are made from the finest selected veneers to achieve clarity and consistency in the Brogan product line. To attain a pleasing, symmetrical pattern, all veneers in Brogan are book-matched. All exterior solid lumber is matched to coordinate with the veneer.



Book Matched Example

Alternating pieces of veneer are flipped over so they face each other like the pages within a book.

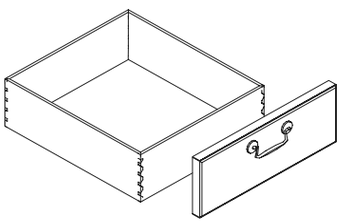
Brogan is available in flat cut cherry and walnut veneer. A wide range of wood stains have been formulated to enhance the beauty of the veneer.

Work Surface Construction
Tops are 5-ply balanced construction, 1 3⁄16″ thick with solid matching hardwood edges. Tops are available in six edge profile.

Matching or coordinating high pressure laminate in a veneer grain can be applied to the top surface and is available at no additional charge.

Base Construction
Panels are joined together by mortise and tenon construction. In addition to mortise and tenon joint construction. Leveling glides are set into solid hardwood with t-nut inserts, which helps to prevent the leveling glide from tear out. Tops are secured to the bases with top fastening cleats screwed to the inside of the panels.

Drawers
The 9ply unidirectional hardwood sides of the drawer box are 7⁄16″ thick assembled with English dovetail construction at each corner of the box. The drawer bottom panel is ¼″ thick fitting into a groove machined into the side of the box. Interiors are sanded and coated with clear U.V. finish to protect against shrinking, swelling or warping, and to provide a clean, smooth feel and appearance.



Drawer Suspension
The high quality black drawer suspensions carry a lifetime warranty. Slides feature steel ball bearings for longer life with cushioned in/out stops. File and box drawers have 100% full extension.

Finish - Stain/Colors
We offer a variety of wood stains and paint colors on Brogan. Please see the chart below. Samples are available upon request. Former finish names are listed in parentheses for reference.

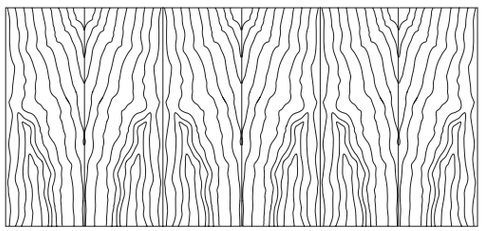
Walden Conference Product Information

Walden Conference Product Information

Exterior Wood Materials
Exterior surfaces are made from the finest selected veneers to achieve clarity and consistency in the Walden product line. To attain a pleasing, symmetrical pattern, all veneers in Walden are book-matched. All exterior solid lumber is matched to coordinate with the veneer.



Book Matched Example

Alternating pieces of veneer are flipped over so they face each other like the pages within a book.

Walden is available in flat cut cherry veneer and walnut veneer. A wide range of wood stains have been formulated to enhance the beauty of the veneer.

Work Surface Construction
Tops are 3-ply balanced construction, 1 3⁄16″ thick with solid matching hardwood edges. Tops are available in federal edge style profile.

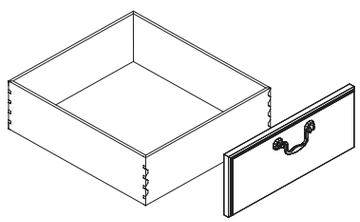
Matching or coordinating high pressure laminate in a veneer grain can be applied to the top surface and is available at no additional charge.

Base Construction
Panels are joined together by mortise and tenon construction. In addition to mortise and tenon joint construction. Leveling glides are set into solid hardwood with t-nut inserts, which helps to prevent the leveling glide from tear out. Tops are secured to the bases with top fastening cleats screwed to the inside of the panels.

Drawers
he standard Baltic Birch drawer is constructed with ½″ thick high quality Baltic Birch plywood with a durable finish. This five sided drawer box features fully glued dovetail construction ensuring a solid, warp resistant drawer box.

Veneered bottoms are framed into grooves on four sides. Bottoms are then glued, stapled, and reinforced with a continuous band of glue.

The optional V-fold drawer interior is a ½″ durable, miter-fold drawer system. The V-fold vinyl wrapped drawer sides form a mitered box. The box is glued and doweled, the drawer fronts attached to the box.



Drawer Suspension
The high quality black drawer suspensions carry a lifetime warranty. Slides feature steel ball bearings for longer life with cushioned in/out stops. File and box drawers have 100% full extension.

Wellington Conference Product Information

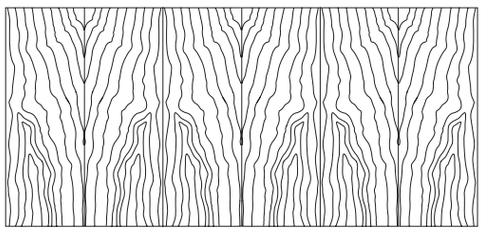
Exterior Wood Materials
Exterior surfaces are made from the finest selected veneers to achieve clarity and consistency in the Wellington product line. To attain a pleasing, symmetrical pattern, all veneers in Wellington are book-matched. All exterior solid lumber is matched to coordinate with the veneer.



Book Matched Example

Alternating pieces of veneer are flipped over so they face each other like the pages within a book.

Wellington is available in flat cut cherry veneer and walnut veneer. A wide range of wood stains have been formulated to enhance the beauty of the veneer.

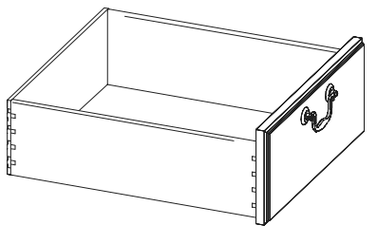
Work Surface Construction
Tops are 3-ply balanced construction, 1 3⁄16" thick with solid matching hardwood edges. Tops are available in federal edge style profile.

Matching or coordinating high pressure laminate in a veneer grain can be applied to the top surface and is available at no additional charge.

Base Construction
Panels are joined together by mortise and tenon construction. In addition to mortise and tenon joint construction. Leveling glides are set into solid hardwood with t-nut inserts, which helps to prevent the leveling glide from tear out. Tops are secured to the bases with top fastening cleats screwed to the inside of the panels.

Drawers
All drawer fronts are 5-ply construction with a hardwood core. Veneer grain runs in a vertical direction. Drawer sides and backs are solid wood with top edges of sides completely rounded. Drawers are joined at front using a French dovetail and the back by an English dovetail. Veneered bottoms are framed into grooves on four sides and heavily glue blocked. All drawer interiors are finished with special toner and covered with a clear coat. Drawer bottoms are sanded and hand-rubbed.

All drawer bottoms are glued, stapled and reinforced with hand-fitted glue blocks.



Drawer Suspension
The high quality black drawer suspensions carry a lifetime warranty. Slides feature steel ball bearings for longer life with cushioned in/out stops. File and box drawers have 100% full extension.

Locking
Locking is standard in all credenzas and modular units. Door locks are available as an option.

Units are shipped randomly keyed as standard. Key alike units are available upon request for no additional charges. Removable cores for in-field re-keying are standard.

Finish - Stain/Colors
We offer a variety of wood stains and paint colors on Waldon. Please see the chart below. Samples are available upon request. Former finish names are listed in parentheses for reference.

Swivel Seating Specifications *(Unique features for a model will be cited on the price pages for that model).*

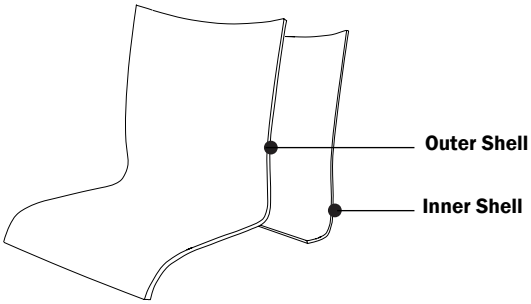
Rights and Lefts
The handedness of the chair is determined by seated position.

Exterior Wood Materials
All solid lumber materials used in our swivel seating are kiln dried from suppliers practicing forest sustainability. Any defects in the wood that are removed during our process are utilized in other areas of production.

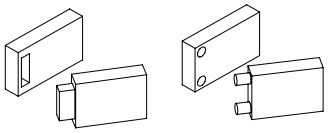
Wood Arms and Base Caps are profiled or carved to shape out of solid lumber which complement our casegood product lines.

Interior Frame Materials
A combination of materials are used to create interior frame components, including solid lumber, plywood, metal plates, and high grade upholstery board.

Some of our swivel seating is made of plywood shell construction. These shells are layers of hardwood veneers molded and cured to shape. Shells can contain one or two pieces.



Construction
Tenon style joinery is used in most frame construction for our seating products; however, dowel pin joinery may also be used. Engineering will determine, based on design which joinery is best for the frame of each particular design. Critical joints are reinforced with mechanical fastening.



Upholstery Details
On frame seating, the webbing is applied to the frame, along with high resilience upholstery foam to create the seat foundation. The swivels with molded plywood, have a highly fabricated or molded foam which is applied directly to the plywood shell. This foam is contoured to the shell to create comfort and support, such as the back lumbar area. Arm and other frame members are covered with a high grade upholstery foam.

Finish
Each of the wood components that goes into a chair will have unique characteristic; the process of shaping and machining these parts may expose additional natural characteristics. To accentuate the beauty of the wood, special care is taken in selecting the frame component and base caps or each finish color.

Finish colors may vary slightly when comparing solid wood product finish to our casegoods veneer product finish. Exceptional care is taken to assure a uniform color on solid wood products.

Former finish names are listed in parentheses for reference.

Protective Top Coat
We are proud that our finish is GreenGuard certified. To reduce hazardous formaldehyde emission we use our proprietary specially designed top coat, DuraTex™. Our DuraTex™ top coat offers exceptional hardness along with abrasion and impact resistance, but has been formulated to eliminate the hazardous and harmful gases that are normally associated with wood finish.

DuraTex™ Features
Safety - Significantly reduces hazardous formaldehyde emissions which help improve the quality of the of the indoor air we breathe.

Quality - Developed to be tough and durable with special attention to appearance. The DuraTex™ finish provides a safe solution and still preserves the natural beauty of wood.

Durability - Designed to meet a wide range of demanding performance and environmental standards to withstand even the highest wear and tear.

Swivel Seating Specifications *(Unique features for a model will be cited on the price pages for that model)*

Chair Mechanisms

Swivel Tilt
This mechanism provides for a balanced ride and for standard tilt travel. Tilt tension can be adjusted by the center knob.

Mid-Pivot Tilt
This mechanism provides a synchronized ride that cradles the occupant as they recline along with the ergonomic benefit of a reduced front seat rise. The tilt travel is greater than a standard swivel tilt and allows users to achieve a wide variety of positions. Center tension knob is a way of regulating spring force.

Full Synchronized Tilt
This unique mechanism configuration takes full advantage of seat to back synchronized ratio geometry and successfully combines the benefits gained from a forward-based pivot location. Two-piece, swivel tilt seating allows separate seat and back adjustment capability with a tension adjustable spring that offers reduced front edge rise. The tension spring gives the ability to maintain even support throughout the entire travel range, satisfying a variety of user sizes and weights.

Seat Slider
Some models have an option to provide additional seat depth with a seat slider mechanism working in conjunction with the tilt mechanism.

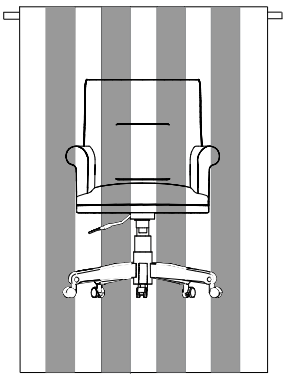
Height Adjustable Back
A mechanism installed in the back to allow lumbar region to be adjusted to the user needs.

Jury Base
A substitution for 5 star base, providing a platform that can be bolted to the building floor.

Some models offer the pneumatic lift jury base for height adjustment, this option is not self centering. The mechanical height adjustment option is self-centering.

Conference Height Mechanism
Replacing the pneumatic gas cylinder, this mechanism provides for a fixed seat height.

Upholstery Cover Application
Unless a customer specifies the fabric to be run "railroad", the fabric will be "cut up the roll". Additional seaming may be needed, pending fabric width and textile repeat match. Contact Customer Service with questions.



Care of Upholstery Surfaces
Cleanability will vary based on the fabric type. For best results, a professional service is recommended. Dirt and crumbs may be gently brushed or vacuumed off. Spills should be wiped up immediately with a cloth. Vinyl textiles can be cleaned with warm soapy water and wiped down with a warm damp cloth. For more details on any JSI carded fabric and vinyl, please visit our website at jsifurniture.com or consult the back of the appropriate swatch card for cleaning codes and any specific instructions. For COM materials, consult with the individual textile manufacturer for cleaning codes and any specific instructions pertaining to your particular fabric.

Care of Wood Edges and Veneer Surfaces
Clean all surfaces frequently with water dampened soft cloth, moving the cloth with the grain direction. Immediately remove any liquids that come in contact with wood surfaces, with a blotting action to absorb liquid. Buff dry. Lift objects to move them, never pull them across the finished surface. Avoid exposure of furniture to extremes of heat, cold, and wide variance of humidity. Avoid exposure of furniture to strong sunlight. Avoid exposure of furniture to harsh solvents such as nail polish remover, acetates, etc., as it will cause finish deterioration.

Wipe smooth powder coat finishes and textured metals with a damp cloth. For stubborn stains and grease marks, use soap and water. Lightly brush textured metals with a soft, dry brush to remove dirt.

Guest Seating Specifications *(Unique features for a model will be cited on the price pages for that model).*

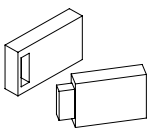
Rights and Lefts
The handedness of the chair is determined by seated position.

Exterior Wood Materials
All materials used in our guest seating are kiln dried lumber from suppliers practicing forest sustainability. Any defects in the wood that are removed during our process are utilized in other areas of production.

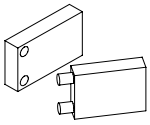
Some of our guest seating may contain steam bent lumber from our proprietary process. Steam bending allows us to provide additional strength, increase our lumber yield, and provide seamless beauty in the chair.

Interior Frame Materials
A combination of materials are used to create interior frame components, including solid lumber, plywood, metal plates, and high grade upholstery board.

Construction
Tenon style joinery is used in most frame construction for our seating products; however, dowel pin joinery may also be used. Engineering will determine, based on design which joinery is best for the frame design of each particular design. Critical joints are reinforced with mechanical fastening.



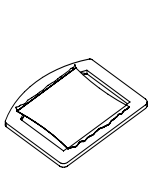
Tenon

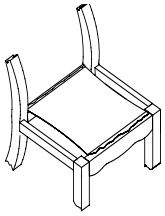


Dowels

Upholstery Details
Seat webbing is either applied to a seat pan or frame depending upon the style. High resilience foam rides on the sheet webbing suspension. Several of our guest seating models utilize solid plywood for the seat platform and this is done to meet a needed criteria.

High density foam is used on back, arms and deck. Dual density foam is also used to provide for additional comfort.





Finish
Each of the wood components that goes into a chair will have unique characteristic; the process of shaping and machining these parts may expose additional natural characteristics. To accentuate the beauty of the wood, special care is taken in selecting the frame component for each finish color.

Finish colors may vary slightly when comparing solid wood product finish to our casegoods veneer product finish. Exceptional care is taken to assure a uniform color on solid wood products.

Former finish names are listed in parentheses for reference.

Protective Top Coat
We are proud that our finish is GreenGuard certified. To reduce hazardous formaldehyde emission we use our proprietary specially designed top coat, DuraTex™. Our DuraTex™ top coat offers exceptional hardness along with abrasion and impact resistance, but has been formulated to eliminate the hazardous and harmful gases that are normally associated with wood finish.

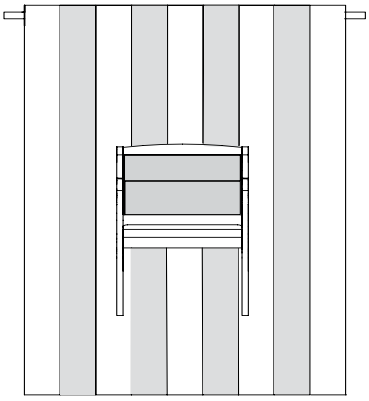
DuraTex™ Features
Safety - Significantly reduces hazardous formaldehyde emissions which help improve the quality of the of the indoor air we breathe.

Quality - Developed to be tough and durable with special attention to appearance. The DuraTex™ finish provides a safe solution and still preserves the natural beauty of wood.

Durability - Designed to meet a wide range of demanding performance and environmental standards to withstand even the highest wear and tear.

Guest Seating Specifications *(Unique features for a model will be cited on the price pages for that model)*

Upholstery Cover Application
Unless a customer specifies the fabric to be run "railroad", the fabric will be "cut up the roll". Additional seaming may be needed, pending fabric width and textile repeat match. Contact Customer Service with questions.



Care of Upholstery Surfaces
Cleanability will vary based on the fabric type. For best results, a professional service is recommended. Dirt and crumbs may be gently brushed or vacuumed off. Spills should be wiped up immediately with a cloth. Vinyl textiles can be cleaned with warm soapy water and wiped down with a warm damp cloth. For more details on any JSI carded fabric and vinyl, please visit our website at jsifurniture.com or consult the back of the appropriate swatch card for cleaning codes and any specific instructions. For COM materials, consult with the individual textile manufacturer for cleaning codes and any specific instructions pertaining to your particular fabric.

Care of Wood Edges and Veneer Surfaces
Clean all surfaces frequently with water dampened soft cloth, moving the cloth with the grain direction. Immediately remove any liquids that come in contact with wood surfaces, with a blotting action to absorb liquid. Buff dry. Lift objects to move them, never pull them across the finished surface. Avoid exposure of furniture to extremes of heat, cold, and wide variance of humidity. Avoid exposure of furniture to strong sunlight. Avoid exposure of furniture to harsh solvents such as nail polish remover, acetates, etc., as it will cause finish deterioration.

Wipe smooth powder coat finishes and textured metals with a damp cloth. For stubborn stains and grease marks, use soap and water. Lightly brush textured metals with a soft, dry brush to remove dirt will cause finish deterioration.

Seating
Wood Materials
Exterior surfaces are laminated veneers either in plain sliced walnut or rift cut white oak.

Seating exterior components are made up of layers of hardwood veneer molded to shape and RF cured. Outer veneers are matched for a uniform grain pattern. Exterior plywood is 5/8 " thick.

Interior seating frame and support components are made from 3/4 " interior grade plywood.

Metal Materials
Exterior feet and leg frames are fabricated from 14 gauge steel tubing and welded to pre-set standards.

Construction
Seating interior frames are constructed with upholstery grade plywood with precisely cut interlocking joints. All joints are glued and reinforced with staples. Critical joints are fastened with screws to reinforce the joint. Frame components are assembled using t-nuts for metal to metal connection.

Upholstery Details
Seating suspension for modular units has a 3-1/2" high-resilience seat foam placed onto sheet webbing for comfort and durability. Back and arm foam is a high density foam for comfort and durability.

Freestanding upholstered units have 6" thick high-resilience seat foam for durability. The bottom of the seat plywood is ventilated to allow the seat foam to breathe. Back and arm foam is a high density foam for comfort and durability.

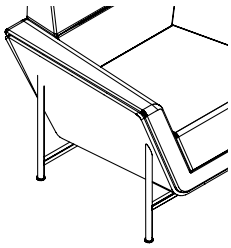
Single needle top stitch is used on all BeSPACE models.

Exterior Metal Components
Leg frame is welded to pre-set standards and then the outer surfaces are prepared for powder coating. Leg frame and glide will be same color.

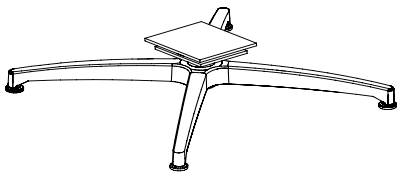
Three powder coat finishes are available:

Matte Black	MBK
Soft Nickel	SNK
Stardust Silver	STS

Legs with adjustable glides are mounted with internal connections which are embedded into the plywood exterior. The angular cut matches up with the plywood exterior for a floating appearance.



Special Features
Model BS-1 Lounge Chair with the swivel mechanism and four prong base with non-adjustable push-in glides features a 360° swivel. The standard 3.5° rearward tilt is welded in to the spindle of the mechanism plate, the spindle sits into a passive hub of the prong base.



Finish
To accentuate the beauty of the walnut or white oak veneers a clear finish coat is applied to the exposed plywood shells and platforms.

Exterior Seating Plywood Shell and Platforms are available in two finishes:

Clear Coat on Walnut	CLW
Clear Coat on Rift Cut White Oak	CLK

To reduce hazardous formaldehyde emission we use our proprietary specially design top coat, DuraTex™. We are proud that our finish is GreenGuard certified.

DuraTex™, offers exceptional hardness along with abrasion and impact resistance , but has been formulated to eliminate hazardous and harmful gases that are normally associated with wood finish.

DuraTex™ Features
Safety - Significantly reduces hazardous formaldehyde emissions which help improve the quality of the of the indoor air we breathe.
Quality - Developed to be tough and durable with special attention to appearance. The DuraTex™ finish provides a safe solution and still preserves the natural beauty of wood.
Durability - Designed to meet a wide range of demanding performance and environmental standards to withstand even the highest wear and tear.

Care and Maintenance
Care of Upholstery Surfaces
Cleanability will vary based on the fabric type. For best results, a professional service is recommended. Dirt and crumbs may be gently brushed or vacuumed off. Spills should be wiped up immediately with a cloth. Vinyl textiles can be cleaned with warm soapy water and wiped down with a warm damp cloth. For more details on any JSI carded fabric and vinyl, please visit our website at www.jsifurniture.com or consult the back of the appropriate swatch card for cleaning codes and any specific instructions. For COM materials, consult with the individual textile manufacturer for cleaning codes and any specific instructions pertaining to your particular fabric.

Maintenance of Mechanical Parts
Clean any lint or debris from the moving parts of the base mechanisms. Mechanisms have been designed and tested to not require lubrication under normal conditions however lubricant can be used if needed.

Metal Components
Wipe smooth powder coat finishes and textured metals with a damp cloth. For stubborn stains and grease marks, use soap and water. Lightly brush textured metals with a soft , dry brush to remove dirt.

Casegoods

Wood Materials

Exterior surfaces are laminated veneers either in plain sliced walnut or rift cut white oak.

Casegood tops are made up of layers of hardwood veneers molded to shape and RF cured. Outer veneers are matched for uniform grain patterns. All casegood tops are 3/4 " thick plywood.

Casegood chassis, doors and drawer fronts consist of veneer over composite wood core; all wood core components are 3/4 " thick.

Metal Materials

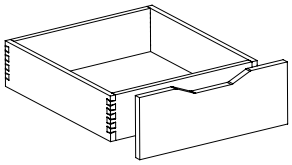
Exterior feet are fabricated using 14 gauge steel tubing and 14 gauge flat stock.

Construction

Casegoods are constructed with a series of glued wood dowels and metal-to -wood fastening hardware to reinforce critical joints.

Feet are field installed to prevent shipping damage, pre-bored holes make installation easy. Instructions, feet, and other hardware will be packed inside the carton.

Drawer boxes are constructed from plywood components with dovetail joinery, providing superior tensile strength to the box. Under-mount drawer suspensions are "full extension" which allows the drawers to open fully. The "soft-close" mechanism allows the drawers to close with a slight push. Drawer and door fronts feature a finger pull and are non-locking. Drawers in the BeSPACE product line are not intended for filing.



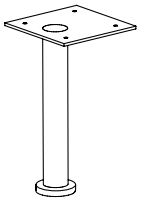
5-sided drawer box

Casegood Feet

Feet are fabricated with a flat plate which is screwed to the bottom of the casegoods. The feet have an adjustable glide for ease of leveling.

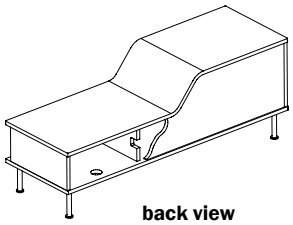
Three powder coat finishes are available.

Matte Black	MBK
Soft Nickel	SNK
Stardust Silver	STS



Glide matches powder coat finish selected on feet.

Credenza units have wire pass through incorporated into the interior dividers and bottom panels to allow for wiring to pass easily through the unit. A metal stress-bar runs the full length on the bottom side of the credenzas providing additional support.



back view

Optional matte black grommets are available in the back panel but must be specified. Grommets are located as shown, center on single height units and two locations on transition height units.

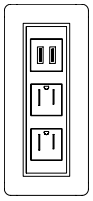
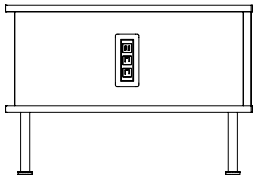
Optional Data/Electrical Components

EC22 Power Center- Flush Mount

EC22 unit provides electric for two 110 devices and one USB 2-Port Simplex for charging. This factory installed unit is mounted in the front or back panel(s) of modular closed tables. When ordering specify color and location, see below. Power is connected to the building supply with 10' standard three prong cord. Access and storage of excess power cord is provided in the cavity of the tables.

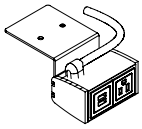




Note: Power Center color, Black (B) or White (W) must be specified.

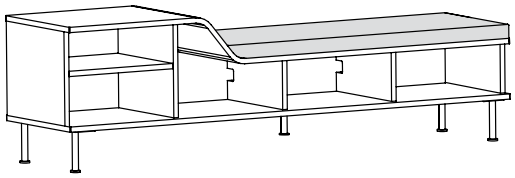
EC21 Power Center - Under Mount

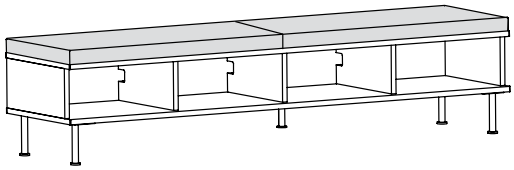
This accessory item features one 110 device and one USB 2-Port Simplex for charging. The EC21 unit is ordered separately and can be mounted on the bottom platform of casegoods and lounge seating, see "Power Center Under Mount" on page 176.



Credenza with Optional Cushions

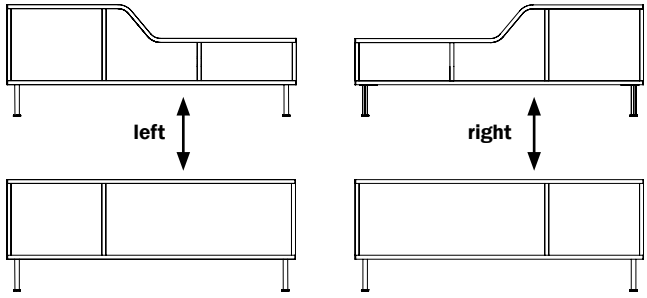
Bench Height and Transitional Height credenza units can be ordered with an optional factory installed cushion. (Select appropriate fabric grade when pricing the unit). Cushion should not be removed due to permanent attachment.





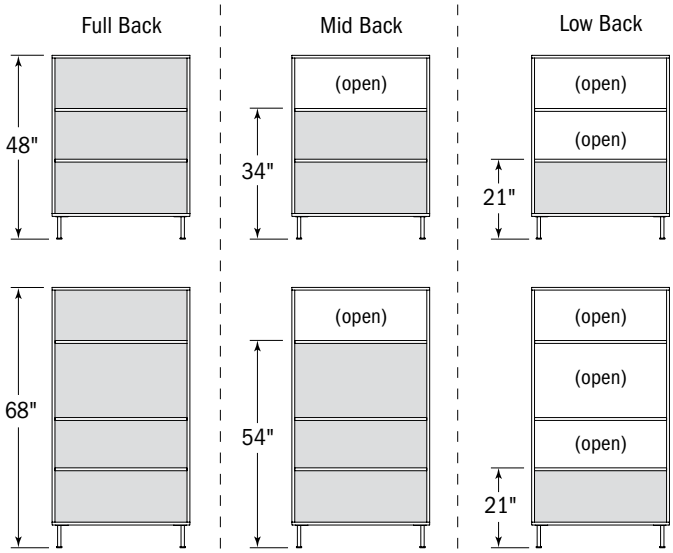
How to determine Left and Right

Left and right is determined by facing the unit; the transitional height unit determines the left or right orientation.



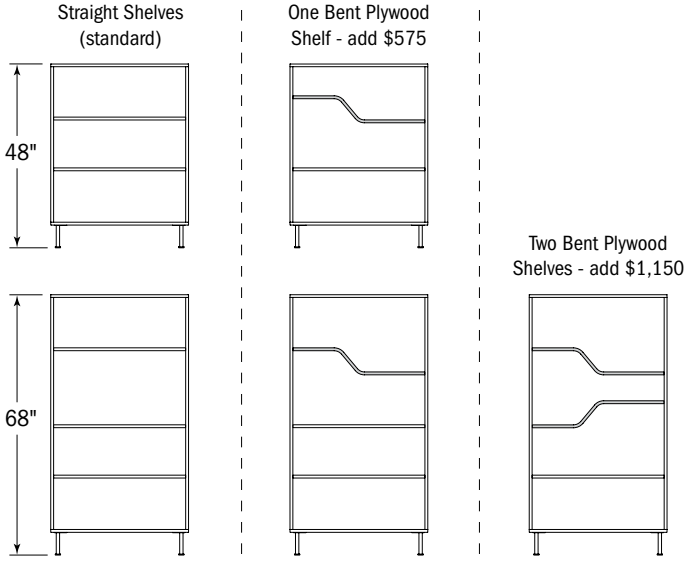
▲ ***Bookcase Back Heights***

Bookcases are available in two heights, 48 and 68 inches tall. When ordering, please specify one of the three back height options; Full Back, Mid Back or Low Back.



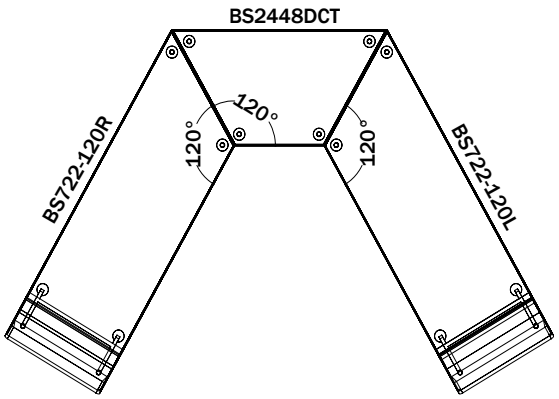
▲ ***Bookcase Shelving***

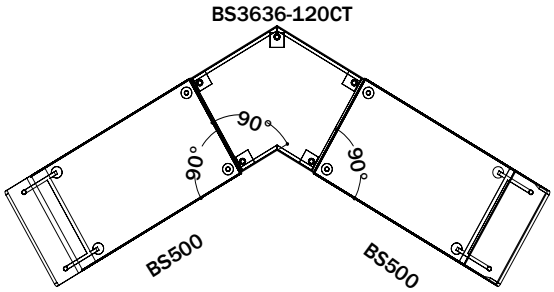
All bookcase shelves are offered straight as standard. The lowest shelf is always fixed and straight. Upper shelves are adjustable and available with optional bent plywood. The bent plywood shelves are reversible, they can slope in either direction. When ordering bookcases with bent plywood shelves, please specify and add $575 per shelf to list price.

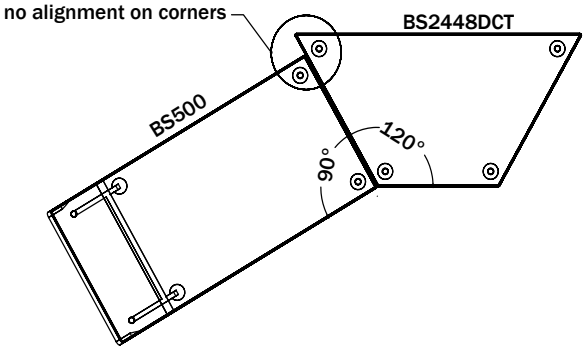


Modular Tables and Modular Lounge - Connecting

1. To create turns with in a product run, connect 120° units with other 120° units or 90° (square end) units with other 90° (square end) units to create turns.

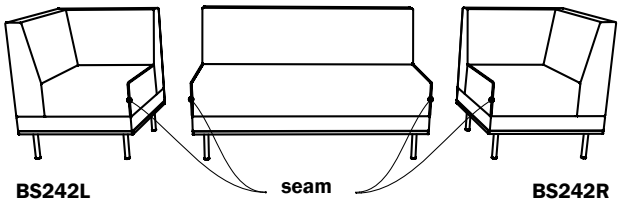


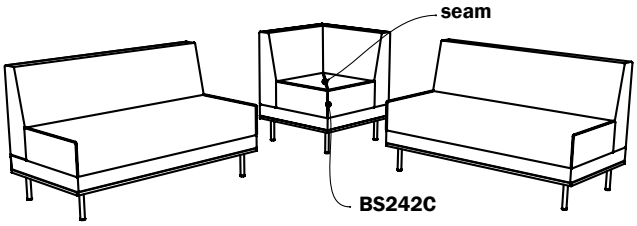




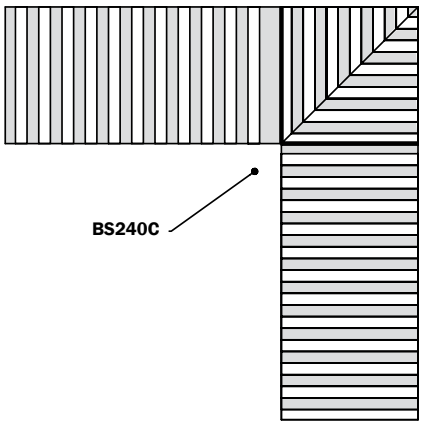
Note: 120° and 90° (square end) units cannot be connected to one another

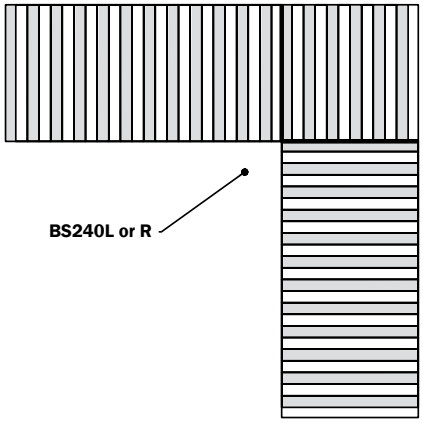
2. For a flat tailored surface corner units will have a seam on the linking side.



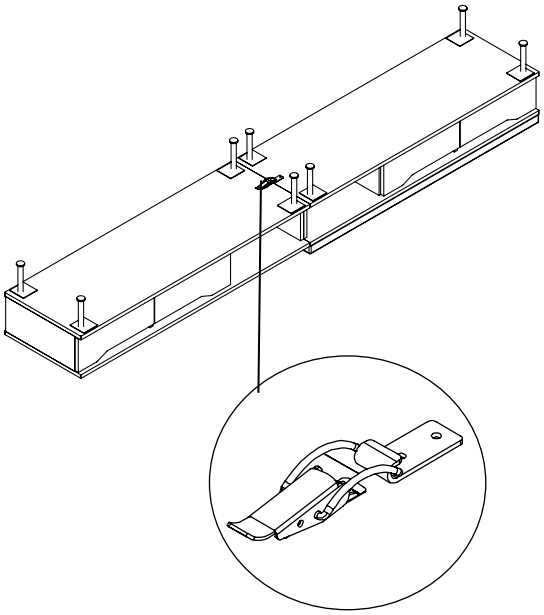


3. When using textiles with a pattern or large repeats we recommend specifying the corner units with “C” at the end of the model number. Note there will be a diagonal seam allowing for a textile match. If the upholstery cover is non-directional the diagonal seam will be eliminate

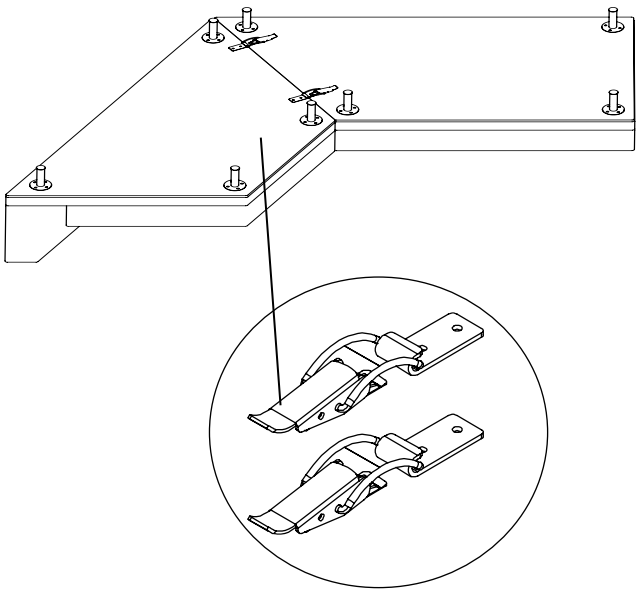




4. Modular tables are shipped with connecting hardware to secure units together. The draw catch style hardware makes connection easy. Pre-bore holes are standard.

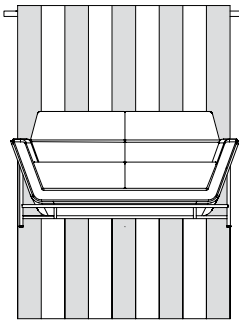


5. Modular lounge units are shipped with two sets of connecting hardware to secure them together. The draw catch style hardware makes connection easy. Pre-bore holes are standard.

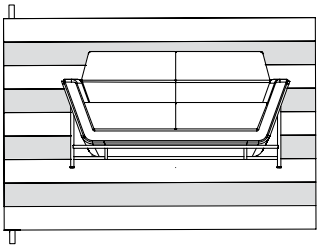


Upholstery Application
Unless the customer specifies the fabric to be "railroaded", the fabric will be "cut up the roll". Additional seaming may be needed pending fabric width and textile repeat match, contact Customer Service with questions.

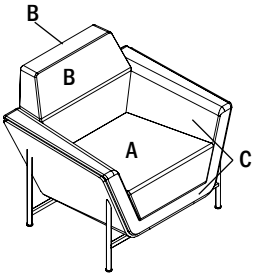
"Nap" or "Up the Roll" (standard)

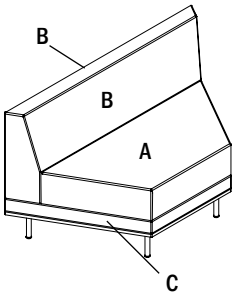


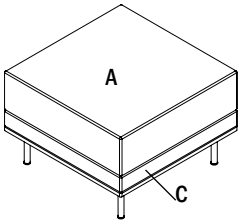
Railroaded (upon request)

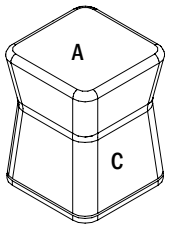


Contrasting Upholstery
Units can be specified with a contrasting upholstery feature. When this feature is desired the unit **will be priced based on the highest grade fabric**. At the time of ordering identify the location of each textile according to the following code.



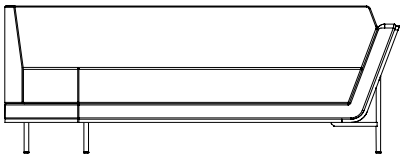




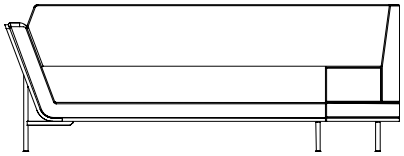


A = Seat
B = Front Back/Extreme Back
C = Deck or Deck and Arm (s)

How to Determine Left and Rights
Left and right is determined as you are seated in the chair.

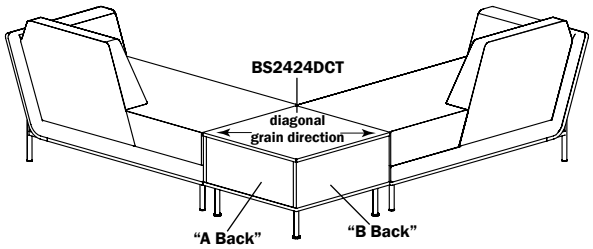


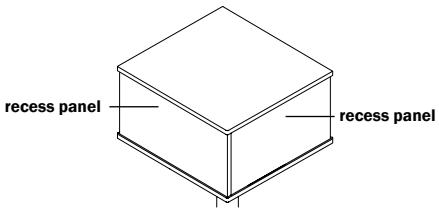
left shown



right shown

BS2424DCT Table
This corner table is designed to create a 90° (square end) turn with two modular components as shown in the example below. The "A" or "B" back panels are identified to help specify the location of the EC22 power data unit. When ordering an EC22 specify "A" and/or "B" location. The two back panels are slightly recessed. The grain runs diagonal on the table top.





BS2424SCT Table
This table is designed to create a straight run of modular components as shown in the example below. The EC22 can be installed in the front or back panel. The front and back panel are slight recessed. The grain on this top runs side to side.

Connect Modular Lounge Order Check List (cont.):

6. Metal Leg Color:
Available in Black Sandtex **(BSX)**, Soft Nickel **(SNK)** or Stardust Silver **(STS)** powdercoat.

7. Wood Back Rail

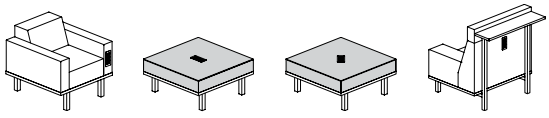
For added elegance Connect Low Back units with two arms may be specified with the Wood Back Rail option. The 6" tall wood back rail enhances the back detail as you approach the units from the rear making this a nice feature for "freestanding" applications. This option reduces the back depth by 1⅛". The back rail will be in the same finish color as the rest of the unit. Specify Wood Back Rail and add $129 list per unit.

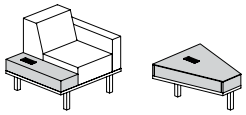
8. Power Center - Flush Mount:

Units with arms, end table, console, linking table or stand up surface can be specified with the Power Center Flush Mount option featuring two waterproof 110 outlets and one dual USB port. Power is connected to the building supply with a 10' long standard three prong cord. Access and storage of excess power cords is provided in the base of the arm or console. Power Center is not available on Corner Seats or Corner Tables.

Power Center (EC22):
- Left or right arm with one Power Center per arm mounted vertically in the front; add $480 list each, indicate left or right arm (as seated)
- End, console, straight or wedge linking table with one Power Center mounted front to back in top; add $480 list each
- Single seat unit with a stand up surface and one Power Center located 7¼" under the surface and centered in the back; add $480 list
- Two seat units with a stand up surface and two Power Centers located 7¼" under the surface and centered in each back; add $960 list
- Three seat units with a stand up surface and two Power Centers located 7¼" under the surface and centered in the back of the left and right backs; add $960 list

NOTE: Power Center color, Black (B) or White (W) must be specified.





Power Center (EC21) - Under Mount:
This accessory item featuring one 110 volt power receptacle and one dual USB port mounts to the underside of units. See page 274 for additional information.

9. Drink Holder

Units with an arm, end table, console or linking table can be specified with the drink holder option. The drink holder features a plastic base with rubber coaster and a metal trim cap.

Drink Holder (DH):
- Left or right arm with **one** drink holder per arm; add $80 list each and indicate left or right arm as seated)
- End table, console or linking table with **two** drink holders; add $160 list

NOTE: Metal trim cap color will match the Metal Leg Color. Drink holder cannot be ordered on an arm with a tablet arm.

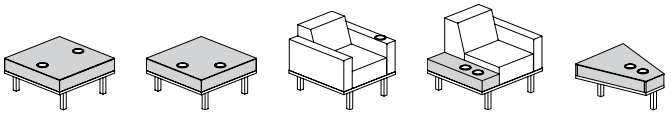


Table Power Center and Drink Holder Standard Locations:

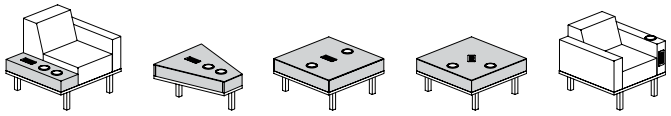

10. Tablet Arm:

- rotating
- 10" x 18" veneer surface
- Specify Tablet Arm option left (TBL) or right (TBR) and add $453 list for each tablet arm specified

11. Product Options:
High Pressure Matching Wood Grain Laminate Surfaces: No additional upcharge
(For wood cap arm, tables or tablet arm)
Optional Nylon Glides: No additional upcharge
Special Finish: $275 list upcharge

Connect Modular Lounge Order Check List (cont.):

Features:

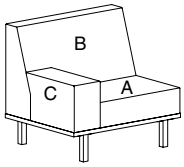
- 20" and 30" seat widths
- four back heights available on units with a 30" seat width
- arm models with a 20" seat width have an arm width of 5"
- arm models with a 30" seat width have an arm width of 10"
- all units have a 1¼" wood base platform
- end table, console and linking tables are made of plywood construction with maple veneer surface
- metal legs are 1¾" x 1¾" x 8¼" 16 guage steel tube with metal leveling glides

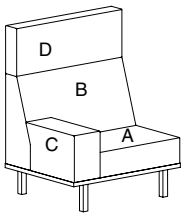
Linking Brackets:

Each unit ships with two sets of link brackets; two latches and two hooks providing quick connection to form limitless configurations.

Contrasting Upholstery:

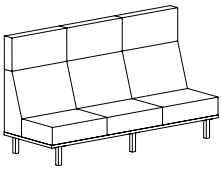
Units can be specified with a contrasting upholstery feature. When this feature is desired the unit **will be priced based on the highest grade fabric** selected for the seat, back, arm(s) or headrest. Specify the seat (A), back (B), arm (C) and headrest (D) fabric on your order.

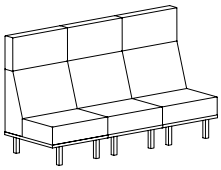




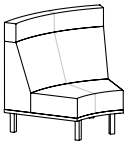
Planning Section:

Modularity:
Modularity and versatility allows you to fit Connect into any footprint using large and small scale components or a mix of both. The use of wider and fewer units will diminish the number of legs in a configuration. More units shorter in width will increase the number of legs in a configuration.



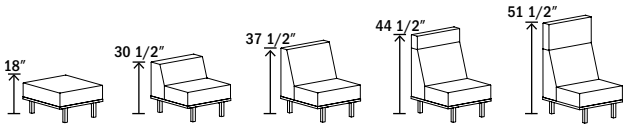


Curved Units:
Curved units in varying radius degrees are available to help aid in creating configurations with different twists and turns. Typicals showing each of these units in a semi-circular configuration are shown on pages 212–217.

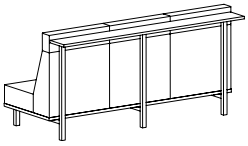


Back Heights:
Units with a 20" seat width are available with low back height or bench style.

Units with a 30" seat width are available in bench style or four different back heights; low, mid, high and privacy. 7" and 14" headrest are included on the High and Privacy back respectfully.



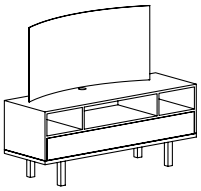
Complementary Components
Units with a 30" seat width and a high or privacy back are available with a 10" deep stand up laminate surface with a coordinating 3mm PVC edge. These surfaces may be used as touch down spaces or to provide tiered type seating.



Laminate Color Selection for Stand Up Surface:

ALB	Alabaster	SHD	Shadow
BBL	Bridal Blanco	SLG	Slate Grey
DWH	Designer White	TAU	Taupe
DOV	Dove Grey		

Media Cabinets
20" deep x 60" wide straight and curved Media Cabinets with and without acrylic screens can be used for presentation and training sessions. 20" deep straight and curved media benches are available to compliment the configuration.



Media Activity Center
For meetings and presentations with an overall footprint of 60" x 72" or 60" x 84", the Media Activity Center is available with either a bullet or rectangular shaped top. These units may also be ordered with or without a back panel. The back panel feature includes a TV mount. For all of your media collaboration needs the DropShare unit can be ordered. DropShare is sold separately, see page 274.

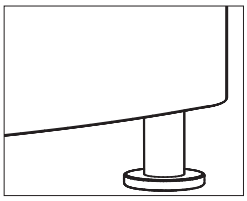
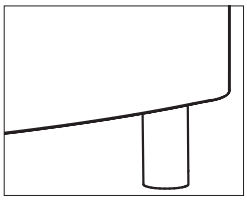
Foot Options

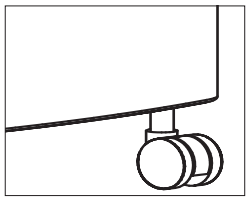
Moto offers two foot styles or casters. The metal foot is standard on seating, casegoods and linking drum tables. An optional wood foot is available at an additional upcharge on lounge, linking drum tables and casegoods. Casters are available on seating with an additional upcharge. Casters are non-locking.



Metal Foot - Standard
Fabricated Metal
Arctic Silver Powder Coat
Adjustable Glide



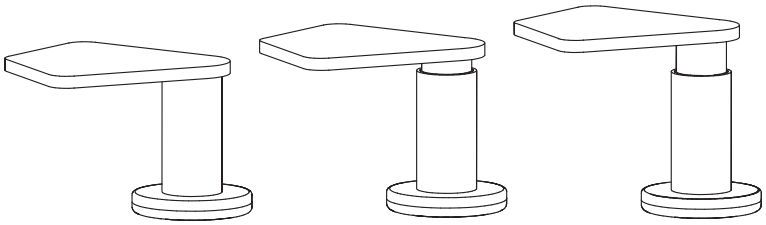
Wood Foot - Optional
Maple Species
Adjustable Glide



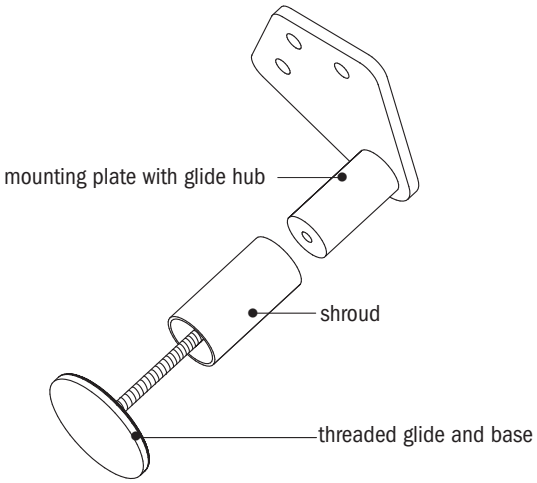
Casters - Optional
Black Dual Wheel
Four Caster Set
Non-locking

Adjustable Foot - Leveling

The standard foot has integrated leveling, which is beneficial when connecting units together in long runs on uneven floors. As the glide is turned to adjust leveling an attached shroud drops to hide the threads of the bolt.



The maximum recommended adjustment is no more than 1 ¾".



Upholstery Application

The fabric will be applied "up the roll" unless railroad is specified.

The Concave Corner unit will have a diagonal seam on all fabric applications. Shown below is an example of a directional textile on the Corner Club unit.

Additional seaming may be needed pending fabric width and fabric repeat match, contact Customer Service with questions. JSI will strive to match fabric patterns but cannot guarantee a match on repeats greater than 15" on the Moto product line.

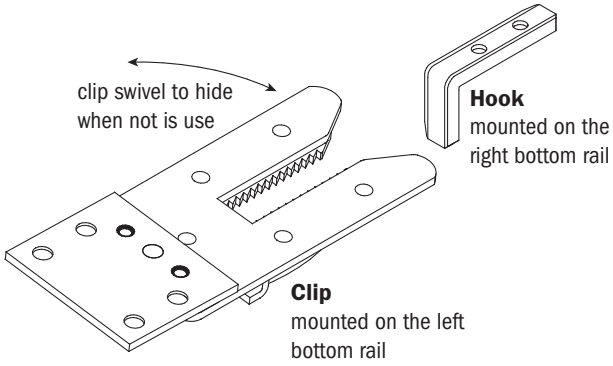
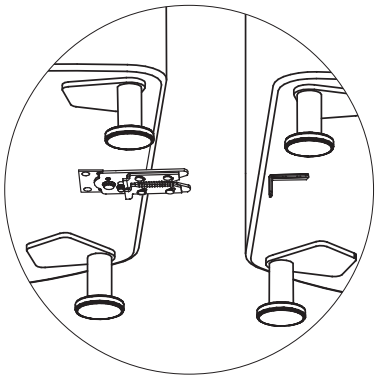
Modular Lounge and Linking Drum Tables

An Alligator Clip assembly is installed to connect lounge and linking drum tables. The clip is installed on the left bottom side rail and the hook is installed on the right bottom side rail. The bottom chair rails are bored to accept either the clip or hook for field re-configurations.





Note: Linking Table Tops are permanent bolt thru attachment and do not use the above clip.

Lounge Seating - Seam Detail

Seats have a seam detail in the center of the seat. This seam detail is standard and will help keep the tailored look of Moto. Please note that fabrics and leathers are all different (fiber content, yarn elasticity and yarn weight) which can affect the tailoring of the Moto Lounge. The aesthetic seam helps with variations in the upholstery cover. Contact Customer Service with fabric and leather information if a concern exists with a certain upholstery cover.

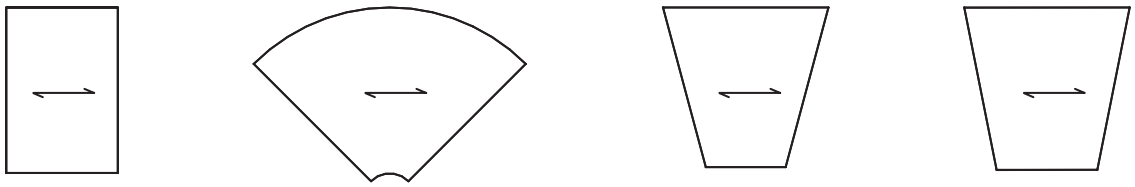
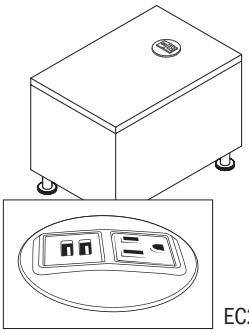
Linking Tables - Grain Direction

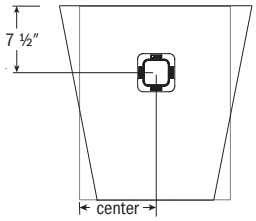


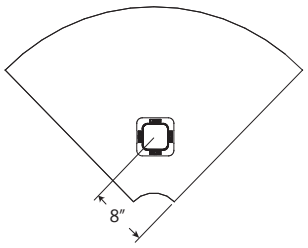
Linking Drum Tables - Power Location

The EC24 or EC23 are available on linking drum tables. Wire management moves through the bottom cavity. The location shown below is for all table shapes.



EC24

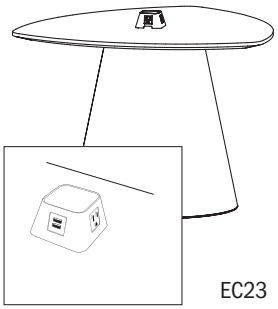




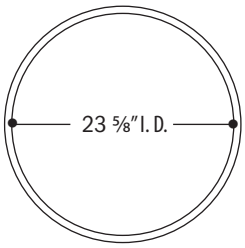
Added 11/1/15

Work Tables - Power and Wire Management

The optional EC23 or EC24 is recommended for the work tables. When electrical units are used on the work tables with a conical base, the base allows wires to run through to a floor outlet. The unrestricted opening at the bottom of the base allows the base to be placed over the floor electrical monument.



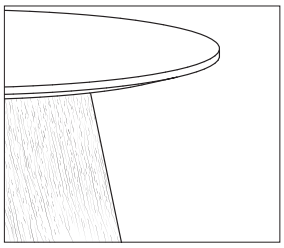
EC23



Both the EC23 and EC24 are centered on the top under the base.

Conical Table Base - Material and Grain Direction

The conical base on the pull-up and work tables is polystyrene material with a wood grain texture. This base is available in wood finishes and paint colors. Color Coordinate Finishes are intended to coordinate with select laminates. Adjustable leveling glides are included.



Media Tables and Media Credenzas - Wire Management and Power/Data

Easy access to wiring is provided in the Moto Media products. Well placed grommets, doors, and allowance inside the cabinets makes it easy to outfit these units quickly. The recommended EC25 brings power and data access to the top.

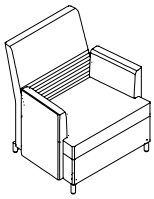
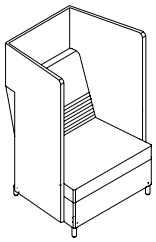
Overview

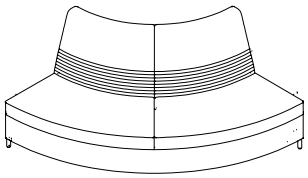
Ziva is a comprehensive collection of freestanding and configurable seating with an offering of occasional and work tables.



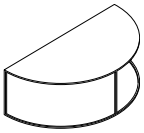
Freestanding



Freestanding Surround



Modular



Table

Features

Functional details are integrated into the high design of Ziva. The linear stitch pattern in the lumbar area creates interest, while adding comfort. End and middle arm options allow for optional tablet. The custom foot allows for leveling and supports the caster option, if mobility is needed.

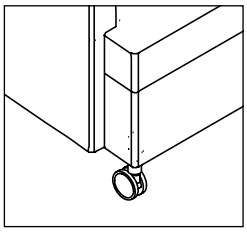
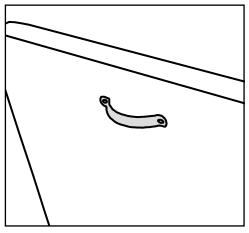
Stand Alone Options

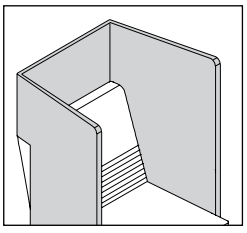
The freestanding units come with a variety of options. The front casters and back handle on the single seat provides for mobility. An upper privacy surround on the single or two seater has acoustical capabilities, creating visual and audible privacy for the seated user.



Front Casters

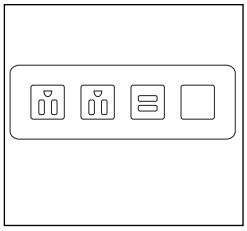


Pull on Outside Back



Privacy Surround

Ziva's stand alone lounge may be specified with a white power outlet on the side, in the arm, or the privacy surround. The unit has two 120 volt outlets and two USB power outlets capable of powering two small devices. The fourth section is open and can be field fitted with a custom selected port.



Power Outlet
2- 120 volt
2- USB Power

Configurable

Ziva's modular lounge is comprised of wedge and quarter round units in addition to three sizes of in-line units. The backs on the round units are offered on the inside or outside to allow for concave or convex configurations. Modular bench, available in round or in-line, enhance the layout possibilities while creating an open plan solution.

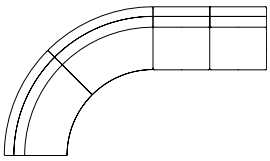
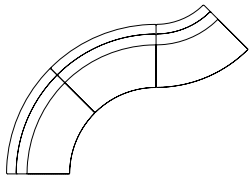
Recommended Combinations

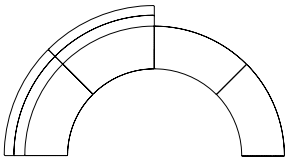
Ziva is designed to fit the user's preference. To uphold the design statement of Ziva, it is recommended that adjacent layouts have backs on the same side *(example 1 & 2)* or attached to a bench *(example 3)*. Opposite facing configurations may be achieved by placing a bench or benches in between the two directions *(example 4)*.



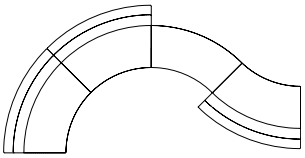
(example 1)



(example 2)



(example 3)



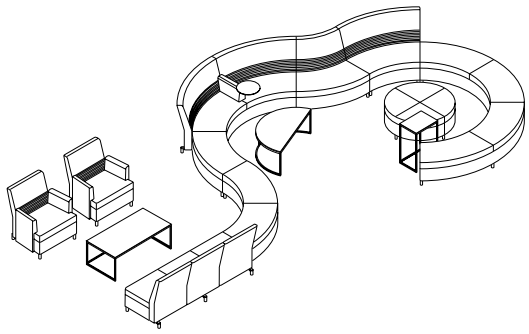
(example 4)

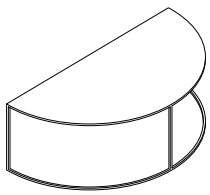
Ottomans and Tables

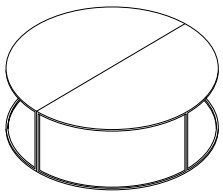
Ottomans and tables can complete a layout and provide functionality. The ottomans are available in three diameters.

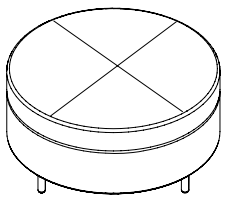
The light scale tables have an Arctic Silver powder coat frame with wood or optional Glacier White solid surface top. The versatile work height tables serve as an end table and arm rest. They can be positioned over benches or the seated user to be used as a work surface. Tables are available in square, rectangle, or half round. They are designed to be used individually or paired up with a matching table.

Both the ottoman or the half round coffee table fit perfectly inside round configurations.









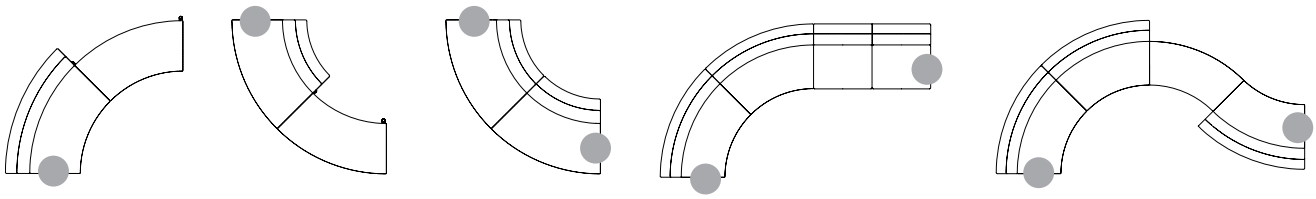
End Arm

Units which are armless on one or both sides may be specified with an optional end arm. Information for the optional arm is listed on page 418. When available, it is best to specify a model number that includes arms instead of adding the arms as an option. **Arms cannot be field installed.**

End arms are factory installed when ordered with a unit. Once an arm is attached, removal is not recommended due to boring holes in the upholstery.

Below are recommendations for the end arm.

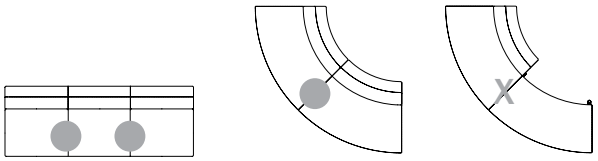
Note: Arm can only be mounted on the side of a unit with a back.



Middle Arms

Modular In-Line and Quarter Round units may be specified with a middle arm. Locations for the middle arm require two adjoining backs. Middle arms are not available between two separate units.

The middle arm is ordered as a separate line item option and pricing is listed on page 418. Optional middle arms must be factory installed.

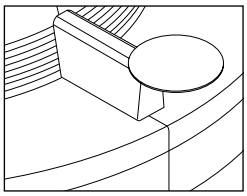


In-Line **Quarter Round**

Tablet Table Option

All arms on freestanding and modular units are available with an optional 14" diameter tablet. It is offered in ¾" thick wood or ½" thick Glacier White solid surface. The wood tablet is available in Cherry, Maple and Walnut.

The tablet is on a swivel mechanism allowing it to be placed closer to the user. The recommended weight limit for the tablet is 75lbs. JSI does not warrant any damage as a result of excessive weight.



Tablet
(shown on a middle arm)

Glacier White - add $315

1.5 mm rimmed core with veneer surface.

Important Upholstery Information

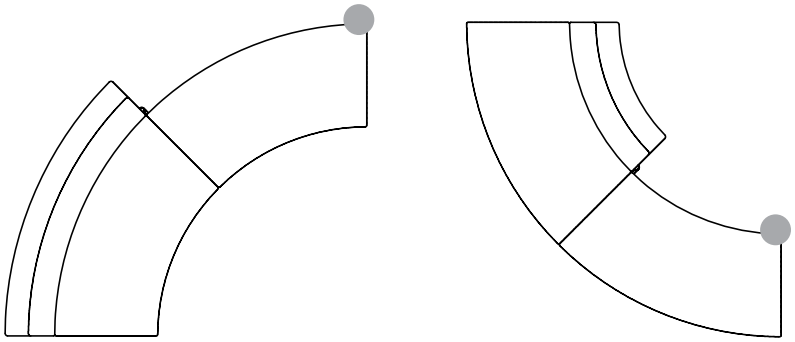
To reduce the number of seams and to achieve a clean look, **Railroaded** off the roll application is standard for Ziva. Line art and pricing for Ziva reflects railroaded fabric. **Due to the size of Ziva and minimal seams, patterned fabrics with the nap (side to side), and leather are not recommended.**

JSI strives to achieve customer satisfaction, therefore requests for patterned fabrics, with a nap application, and leather will be reviewed on a case by case basis. Fill out the sample form on the next page and contact Customer Service. Additional fabric yardage may be required and will be the customer's responsibility. The customer may also be asked to approve additional seaming. Other additional charges may apply. If a patterned fabric is specified, JSI does not guarantee matching at seams.

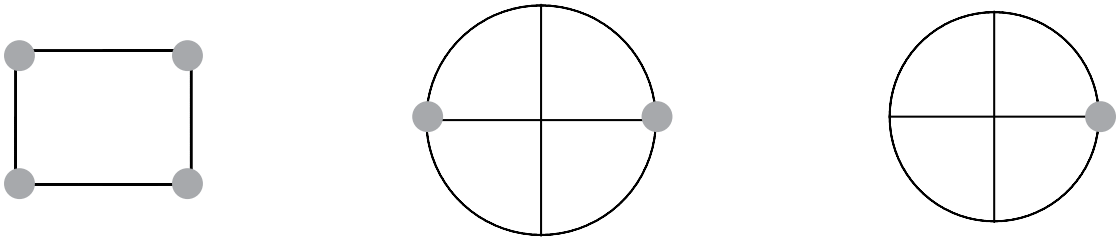
Standard Seaming

The back and seat are upholstered separately and therefore will have no joining seams, only tailoring seams as per the product design. Shown below are examples of seams required to join the fabric on the seat and surround. (marked with a ●)

The seat seam is hidden on freestanding and modular units with full backs. Partial back modular units have seaming on the bench section on the same side as the back.



Benches (freestanding and modular) and ottomans have tailoring seams to align with the feet on the seat platform.



48″ and 42″ **36″**

Privacy Surround will have a fabric joining seam on the front band of surround.

Custom Options

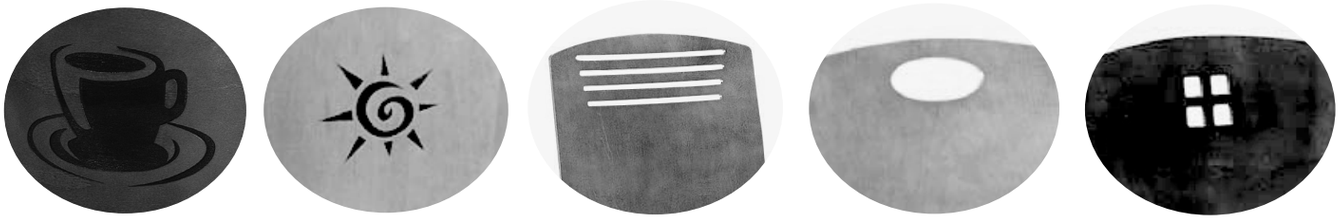
Wood and Metal Laser Cut Backs
Many of our seating models are available with custom wood engraving or laser cut backs. University seals, logos, unique designs, or any type of graphic can be designed into the seating back for a custom creation. Copyright approval may be required. Consult Community Customer Service for pricing and artwork specifications. Artwork must be submitted as a JPG or PDF file.

Wood Laser Engraving and Cut Outs General Pricing
* must order plain back when choosing these options

For Artwork 4" x 4" or Less	$41 list per chair
For Artwork Less than 6" x 6"	$75 list per chair
For Artwork Larger than 6" x 6"	Call For Pricing

For orders fewer than 50 pieces, add $114 list per design, per order. This pricing reflects etching (leaving the wood dark). If additional painted colors are added to artwork please call customer service for pricing.

Leather engraving also available. Please call Customer Service for pricing samples.



Metal Laser Cut Out General Pricing
* must order plain back when choosing this option.
Contact Customer Service for pricing.

Finish Information

DuraTex Low-Emission Finish
To reduce hazardous formaldehyde emissions, we use a proprietary, specially designed top coat that offers exceptional hardness, abrasion and impact resistance while removing hazardous or harmful gases.

Safety - DuraTex significantly reduces hazardous formaldehyde emissions which helps to improve the quality of the indoor air we breathe.

Quality - DuraTex was developed to be tough and durable with special attention to appearance. Our highest priority seeking a safe solution was to provide a finish that preserves the natural beauty of wood that our customers have come to expect

Durability - DuraTex was designed to meet a wide range of demanding performance and environmental standards to withstand even the heaviest wear and tear. It's no coincidence that we find 'durability' in DuraTex.

Natural Wood Finishes
Every tree has unique and defining characteristics, similar to fingerprints. These characteristics include differences in color, grain configurations, and texture. When specifying natural or light finishes, these natural markings are not masked and are easily detected. With this in mind, we hope you enjoy and appreciate the beauty of each tree's fingerprints.

Due to the natural characteristics of wood, environmental effects, and material upgrades, we cannot guarantee exact finish matches on existing furniture previously ordered from Community. If an exact match to existing furniture is required, it must be specified so that the proper procedures can be followed to ensure an acceptable finish. Community will accept no liability for the finish if this procedure is not followed.

We reserve the right to make changes in a finish formula if we believe the change will improve the quality or appearance of our furniture.

Wood finishes are represented in individual samples of oak, maple or color stain options. Contact Community customer service for ordering information.

Special Finishes
Add a charge of $275 list per order for any non-standard wood finish. Community reserves the right to decline any request for a custom finish if we feel that we will be unable to match it due to limitations of the wood species or of the sample provided to us. Because of the natural variations of wood, minor differences in color may occur.

Colors
Add a charge of $275 list per order and $29 list per item for any non-standard paint color. Community reserves the right to decline any request for a custom finish if we feel that we will be unable to match it due to limitations of the wood species or of the sample provided to us. Because of the natural variations of wood, minor differences in color may occur. When specifying paint finishes please be aware the flush joint may be more visible.

Community is proud to partner with Maharam, Momentum, Ultraleather and Wollsdorf Leather. Please refer to the respective pages in this pricer for each of these partners. Scan the QR codes on the back of the swatch card for latest grades and other information.

Textile Grade-In Programs
For the convenience of our specifiers, we have graded in the following suppliers:

Arc Com
Designtex
Maharam
Mayer
Momentum
Pallas
Stinson
Ultrafabrics
Wollsdorf Leather

Please contact Customer Service for pricing grades on textiles and leathers not listed.

Indicate on purchase order if Community is to order the fabric.

For samples, contact Customer Service.

Grades and availability of fabric are subject to change without notice. Changes could include but are not limited to price increase, discontinued patterns, discontinued colors, etc. See jsifurniture.com for up to date information.

Many textiles have repeats and the additional yardage required has been factored in for textiles ordered through the Community Carded and Grade-In Programs. We reserve the right not to match textiles with a horizontal or vertical repeat greater than 17". Additional charges may apply for textile being applied with special instructions.

COM Policy
Refer to the COM price column for list prices.

All yardage requirements listed in the price list are based upon 54" plain non-directional material. The textile on most products is cut "up the roll"; refer to the check list pages for each individual series for further information.

Additional yardage may be required. Contact Customer Service for any of the following conditions to assure proper yardage:
+ horizontal repeats or vertical repeats greater than 3"
+ textile less than 54" wide off the roll
+ patterned textile to be applied a special way

To assure quick turn around and accurate calculation of yardage, please supply the following information:
+ supplier's name
+ pattern name and color name
+ the Community model numbers and the order quantity
+ any special direction and/or special instructions

We cannot assume responsibility for defective COM delivery to us or for the tailoring quality issues some textiles may create. Bulky textiles, thin weight textiles or fiber content may not tailor well on some models.

COM Fabric Repeat Guide

Roll Width	Plain Fabric	2" - 6" Repeat	7" - 12" Repeat	13" - 18" Repeat	19" - 24" Repeat	25" - 28" Repeat	29" - 35" Repeat	36" - 50" Repeat
15"	0%	20%	30%	50%	75%	100%	200%	250%
53" to 51"	20%	60%	85%	135%	145%	165%	225%	300%
50" to 48"	35%	60%	85%	135%	145%	180%	245%	325%
47" to 36"	45%	70%	90%	150%	170%	190%	265%	350%

The percentage represents the additional fabric yardage that needs to be added to the COM yardage.

Large Repeats and Striped Fabrics
Community does not recommend large fabric repeats or striped fabrics on large curved lounge sections. The geometry prevents matching the patterns at the seams.

Contact Customer Service with questions or for suggestions on how to achieve the aesthetics you desire.

Tips: use contrasting fabric
request fabric pattern not be matched
run fabric railroad

COL Policy
Refer to the COL price column for list prices.

Customer's own leather requirements are based on an average hide of 50 square feet.

Contact Customer Service for requirements on any other sizes.

All square footage requirements are based upon usable footage. The shape of the hide and the usable footage may make it necessary for us to request additional leather.

Placing Orders with COM or COL
COM & COL orders must include the following:
+ model number where the COM or COL will be applied
+ textile/leather supplier's name
+ sample of the textile/leather attached to order
+ special application instructions

Ship COM/COL prepaid to the following:

Community
Attn: COM Dept
932 Mill Street
Jasper, IN 47546

Make sure the supplier tags the shipment with the customer purchase order number and sales order numbers if available.

All COM/COL orders will ship at standard lead time from the delivery of the COM/COL, except for orders requiring special custom matched finishes or special application of the COM/COL.

Fire Retardancy
At a minimum standard, all Community upholstered products are manufactured to comply with Bureau of Electronics, Appliance Repair, Home Furnishings and Thermal Insulation-Technical Bulletin 117-2013 issued by State of California Department of Consumer Affairs. With a January 1, 2015 effective date, this standard was passed and requires upholstered furniture to be safer from the hazards associated with smolder ignition in all four (4) categories of materials, as applicable.

Compliance with more stringent codes may require special manufacturing considerations and upcharges.

California Technical Bulletin 133 (CAL 133)
Community uses a barrier material between the foam cushioning and the upholstery cover in order to comply with CAL 133. The standard upcharge on products specified to comply with CAL 133 is **$55 list per yard** of textile.

Community has performed a series of full scale fire tests on samples - representing a variety of product styles and worst case scenarios of upholstery covers - to comply with the requirements of the state of California Technical Bulletin 133 (CAL 133). Products in compliance will be labeled that they have been manufactured to meet the CAL 133 standard. Only products with internal test data can be labeled.

Some product designs and fabric cannot be combined to comply with CAL 133. Because of this, we reserve the right to reject any request for an upholstery cover, including COM, or product style that we feel may compromise the integrity or safety of a product specified to comply with CAL 133.

Contact Customer Service for a quote if you require laboratory certification that a specific product and upholstery combination WILL PASS CAL 133. The quotation will include testing, video, and transportation charges plus the list cost of the sample.

Our standard lead time will apply to products that do not require certification. Allow an additional six weeks over the standard lead time for products that need actual laboratory certification.

The end user, specifier and/or dealer have the responsibility to make sure all products specified will meet the flammability and safety codes of the jurisdiction where the products will be located and used.

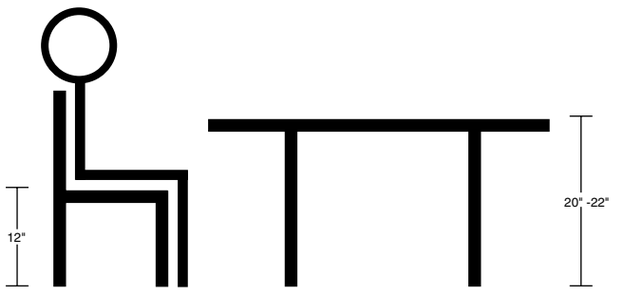
Planning For Kids

Kindergarten (ages 4-7)
Seat Height: 12"
Table Height: 20"-22"
Suggested table and chair heights.
Not available as a standard.



K-3 (ages 7-9)
Seat Height: 14"
Table Height: 25"

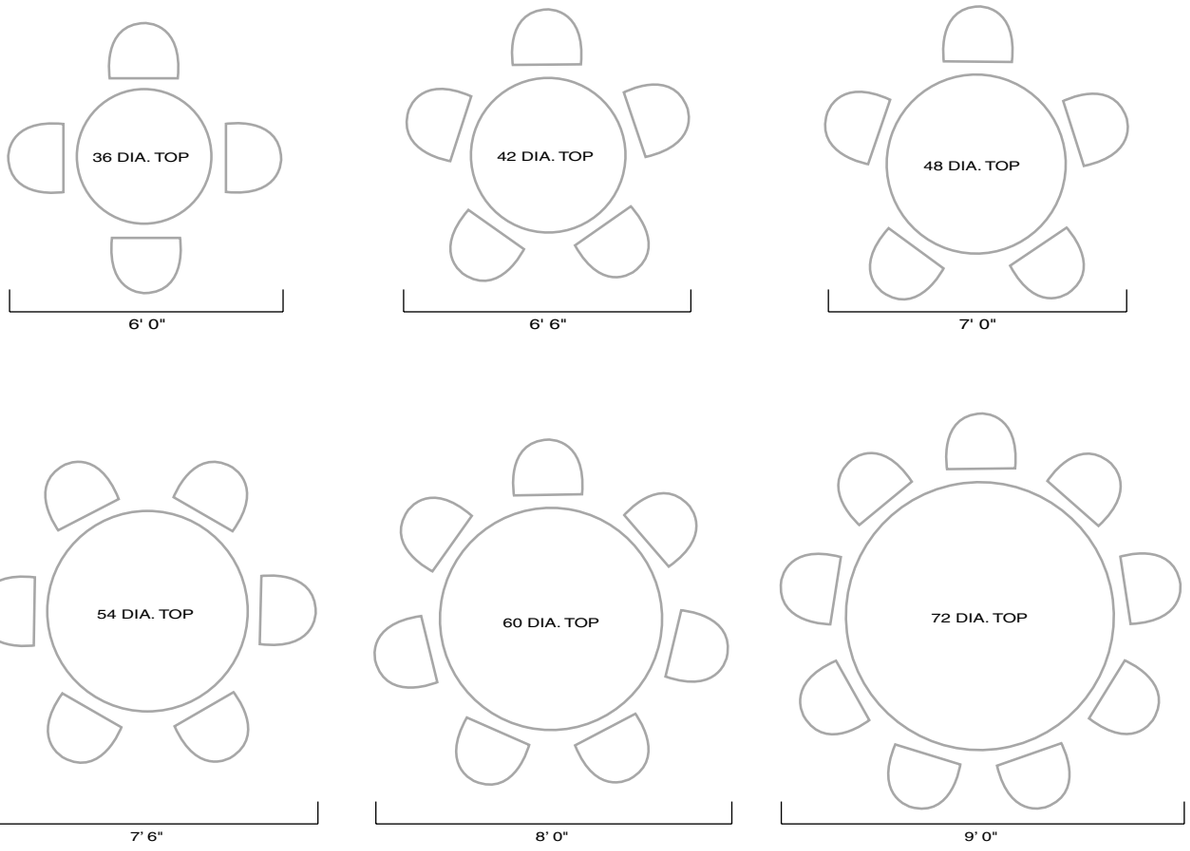
Grade 4-8 (ages 9-12)
Seat Height: 16"
Table Height: 27"

Planning With Tables

Some General Tips

1. 14 sq. ft. per person for spacious dining - allows for table, chair and aisle.
2. 12 sq. ft. per person for cafeteria or restaurant.
3. 10 sq. ft. per person for banquet, institutional or close seating.
4. Allow 18" for person seated from edge of table to back of chair.

Round Tables



Planning With Tables

Diagonal and Square Table Planning Tips

1. Diagonal seating saves floor space - Deuce tables and wall spacing saves the most space.
2. Allow 42" between squared tables for chairs back to back leaves 6" to push out.
3. Allow 60" between squared tables for chairs back to back leaves 26" service aisle.
4. Allow 24" between corners of diagonal tables for customer access - no aisle.
5. Allow 30" between corners of diagonal tables for customer access - narrow aisle.

Care and Maintenance Information:
- do not use a dry cloth or paper towel
- do not use any cleaner, liquid or soap containing ammonia, acetone, trichloroethylene or alcohol.
- use a soft cloth with warm water and buff dry with lint free soft cloth
- if heavier soiled cleaning is required, use small amount of liquid soap free of above listed chemicals diluted in warm water, rinse and buff dry with a soft lint free cloth
- spray cleaners can be used if they are designed for cleaning acrylic, plexiglas, polycarbonate or mylar window films and do not contain ammonia or alcohol. However, some cleaners could leave residue and might cause finger printing or smearing

Custom Laminate Imaging:

Size Restrictions:
· Round - Up to 60"
· Rectangle - Up to 36" x 72"

Pricing is based on info below:
· Quantity
· Table top size
· Color

We recommend a matte finish for more durability and scratch resistance.
Quantities under five - add $311 list set up fee.
Contact customer service for additional information.

Artwork Formatting Guidelines:

- Best type of file for custom laminate is a **vector based file**. This is due to the fact that resolution is not a concern with vector based files and therefore we can enlarge an image as much as we need to without a problem with clarity.
- **Very important: On all vector based files, convert all fonts to outlines** (or paths). This is the **ONLY** way to ensure that we will be able to print the fonts you want.
- Also, specify colors as Pantones in the file. When specifying Pantone colors please use UNCOATED colors. If Pantone colors are not available, please send a hard copy showing the colors you are needing.

For vector based files we prefer the following file formats:

Adobe Illustrator: Save using an .ai or .eps extension. (Examples: table_top_design.ai *or* table_top_design.eps)

Freehand: Version 9 and before. You can also export as an EPS file. **Make sure all imported files are embedded.**

Photoshop: Version CS or before. Save files as .tif or .psd files. If your artwork is in layers in Photoshop, please send the files to us in layers. Also, for color matching purposes we will need a hard copy of the colors you want to see. If the file originated in Illustrator or Freehand please send us the original file instead of a Photoshop file.

Corel Draw: We are able to read files Version 8.0 or earlier for PC. If you have a Mac-based Corel file you need to export the file as an EPS file. For extra insurance, have the file exported as an Illustrator file. (.ai) also. **Corel files cannot be used for the graphic process.** We will have to convert the file to an EPS format. Therefore, keep the file size as small as possible. Corel tends to expand rapidly when converted to EPS files.

Do not send a PageMaker file or a QuarkXPress file.

We can read a 100 MB zip disk, a 250 MB zip disk, or a CD.

We can also accept files via the Internet. We have a file size limitation of 10 MB, however larger files can be accessed. Please contact customer service for assistance.

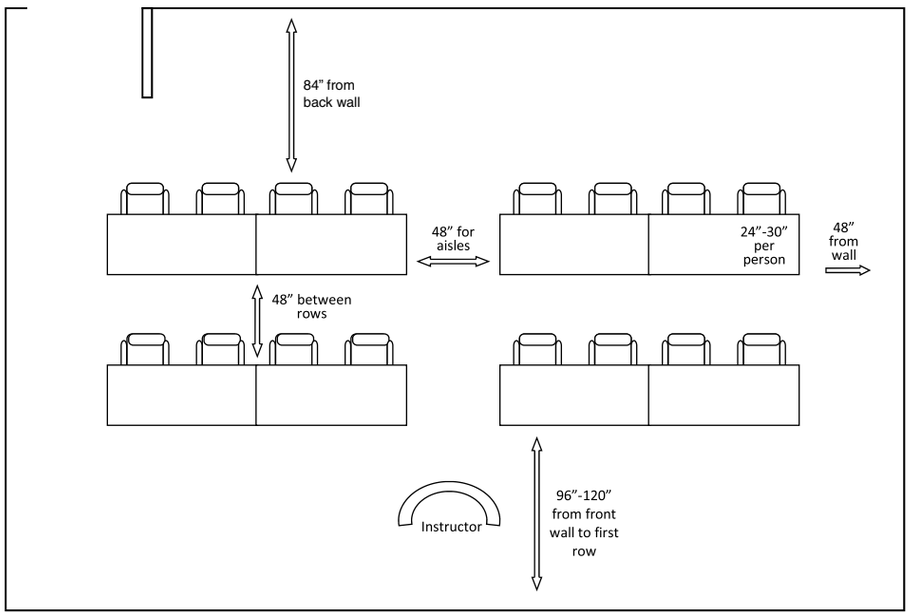
How to Specify Prep Tables

Follow these easy steps to create an adaptable, mobile learning environment.

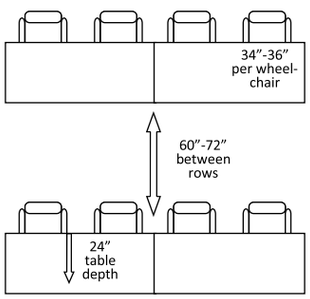
1. The first step, initial requirements
A) Determine room configuration which will best fit your needs
B) Determine seating capacity requirements

2. Determine the Top Shapes and Sizes, as well as the number of tops needed for the chosen table configuration. (See page 269 for seating capacity options.)

A) Table Placement Guidelines
- 24"–30" per person
- 48" for aisles
- 48" from side walls
- 96"–120" for presenter between front wall and first row
- 48" between rows
- 84" from back wall
- 72" between round or square tables



B) ADA Guidelines
- 34"–36" per wheelchair table space
- 24" minimum table depth
- 60"–72" between rows for wheelchairs to be placed back-to-back
- 36" minimum for wheelchair single passage
- 60" minimum for wheelchair double passage
- 60" minimum diameter to turn wheelchair
- 29" height accommodates newer wheelchairs; however, some wheelchairs require 32" height.



3. Select Base Color, Top Material and Edge Color

A) Base Color

BSX - Black Sandtex
STS - Stardust Silver

B) Top Material

LS - Laminate with standard PVC eased edge (For standard laminate list, see page 274
LP - Laminate with premium edge

C) Edge Color

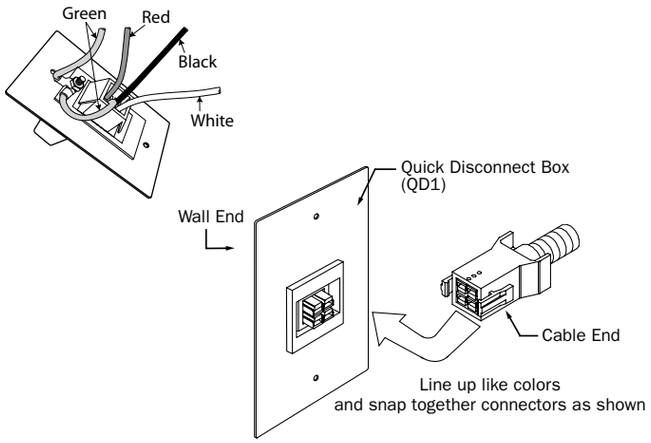
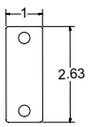
Figure 2
With optional quick disconnect wall outlet.



Prep's power kit accommodates classroom or training room requirements with single or double circuit options, indicated by series of colored wires.

Included in the power kit:
- Power box with grommet
  - One box for 42", 48" rectangle tops, trapezoid, half round and AV
  - Two boxes for the 60" & 72" rectangle tops.
- Cables
  - One power box kit - Two cables are included; one for each end of the power box
  - Two power box kits - Three cables are included; one for each end of the table and one to connect the two boxes
- Wire Cable Clamps - to secure your wires to the underside of the table top
- Safety linking plate - screws the underside of the table top to secure the tables from being pulled apart accidently and damaging electrical cables
- Black plastic electrical cover with wire management.



Single and Double Circuit Guide

Single Circuit
- For smaller rooms with limited electrical needs
- Each table's electrical components can be connected with cables and secured with safety linking brackets (linking brackets included, field installation required).
- Wedge and Quarter Rounds Linking Tables require jumper cables (EKJ-12) ordered separately, (U brackets included, field installation required).
- When connecting to building power; options include:
  1) Quick disconnect wall outlet
  2) 6' cable with standard 3-prong plug
  3) Hard wired into wall with cable extended from wall

Double Circuit
- For larger rooms with greater electrical needs
- Double circuit use requires a table grid with circuits assigned to alternating tables (see page 272)
  (Example: Table 1 = circuit 1, Table 2 = circuit 2, Table 3 = circuit 1)
- When connecting to building power; options include:
  1) Quick disconnect wall outlet
  2) Hard wired into wall with cable extended from wall

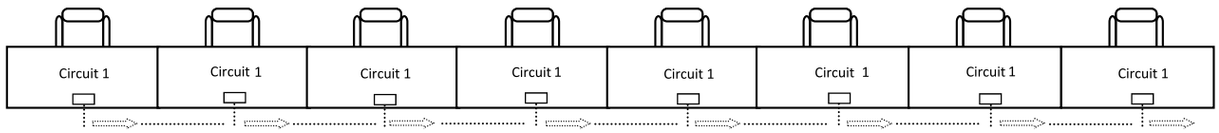
Single and Double Circuit* Guide

- Each table's electrical components can be connected in the field with cables, and secured with safety linking brackets (linking brackets included, field installation required).
- Wedge and Quarter Round Linking Tables require jumper cables (EKJ-12) ordered separately, (U brackets included, field installation required).
- When connecting to building power; options include:
  1) Quick disconnect wall outlet*
  2) 6' cable with standard 3-prong plug - single circuit only; cannot be used with double circuit
  3) Hard wired into wall with cable extended from wall*

Single Circuit

- Use allows maximum flexibility for smaller rooms with limited electrical needs
- Up to 8 duplex units can be linked on a single circuit system

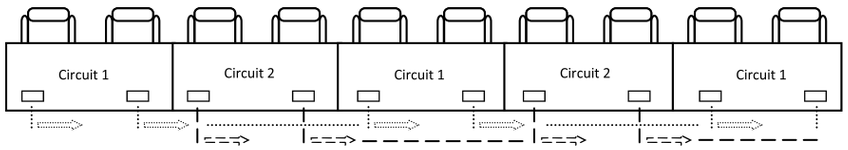
Ex. 1

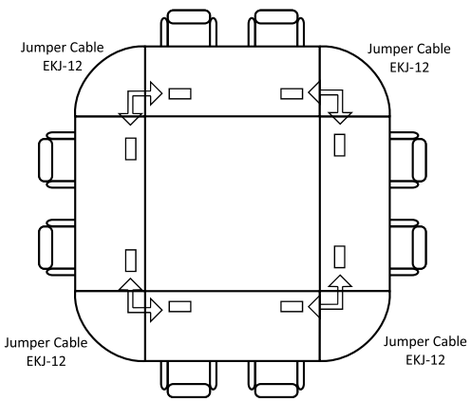


Double Circuit

- Use for larger rooms with greater electrical needs
- Up to 10 duplex units can be linked on a double circuit grid
- Double circuit use requires a table grid with circuits assigned to alternating tables, as shown

Ex. 2



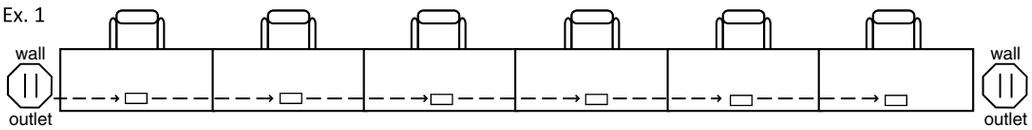


*NOTE: Double circuit building power source options must be wired to support double circuit configurations.

Non-Directional and Non-Sequential Electrical System

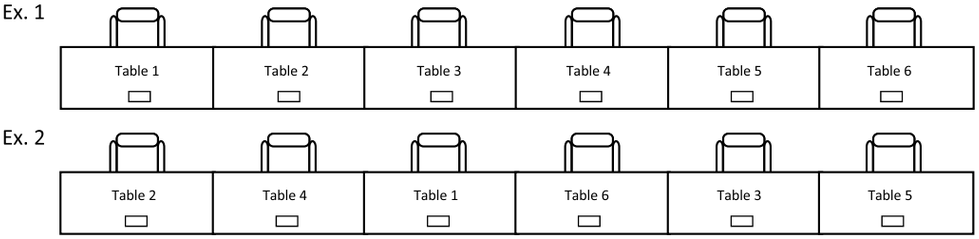
Prep's non-directional, non-sequential electrical package allows virtually any configuration. In addition, table order is not limited by single or double circuit systems. Simply disconnect each table from the connecting table or wall outlet, change the configuration, and reconnect the tables to one another or to the wall. It's that simple!

Non-Directional



· Wall power in-feed cables can be attached to either end of the table configuration

Non-Sequential



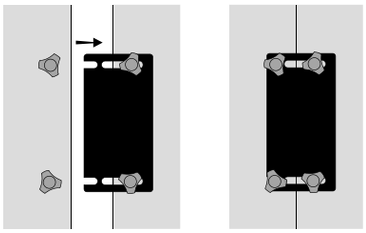
· Table order isn't a concern with Prep's electrical system

Single and Double Circuit Options
· Quick disconnect wall outlet
· Hard wiring with cable extended from wall
· Building power source must be wired to support double circuit configurations

Double Circuit
· The electrical system is a four wire system consisting of two individual circuits. Each circuit is rated at 20 amps/120 volts maximum.
· Circuit 1 (black), and Circuit 2 (red) are served by a system neutral (white) and an equipment ground (green). Check with local codes before connecting to building.

TABLES

Linking Kit



· Easy to install
· All table tops are pre-bored with inserts to accept field installed linking kit except round and square tops
· 4 black low profile knobs (2 for each table) with quick release flat plate
· 11" gauge steel
· Standard on Wedge and Quarter Round table tops

Wedge and Quarter Rounds linking tops are available.
(See page 270) All linking tables include linking kits.

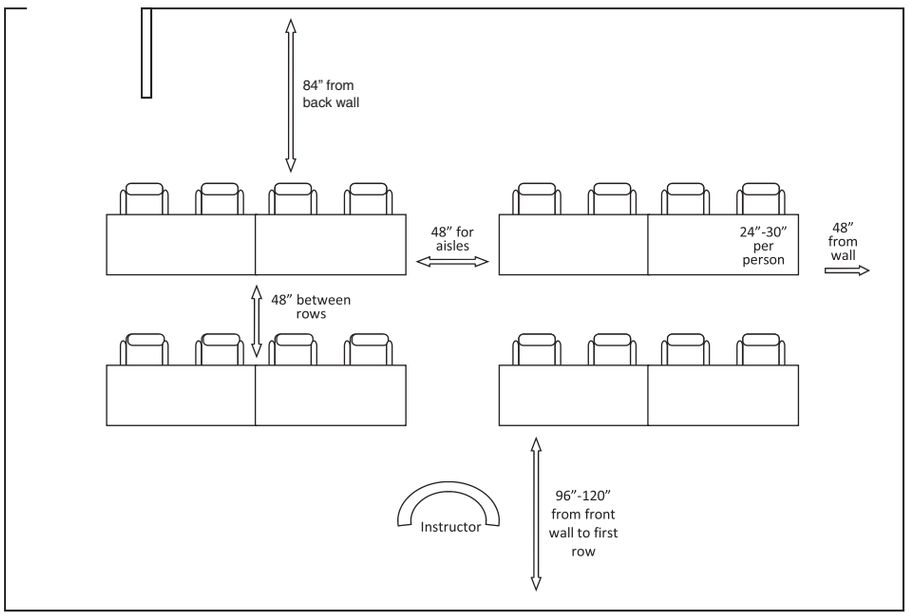
How to Specify Cruz Pre-Configured Training Tables

(Table configuration includes top, modesty panel, and tilt top bases with casters)

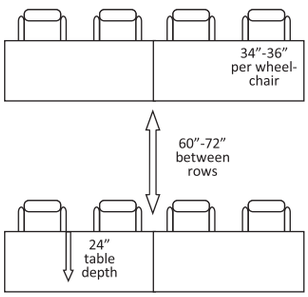
Follow these easy steps to create an adaptable, mobile learning environment.

1. The first step, initial requirements
A) Determine room configuration which will best fit your needs
B) Determine seating capacity requirements

2. Determine the Top Shapes and Sizes, as well as the number of tops needed for the chosen table configuration.
(See page 292 for seating capacity options.)
A) Table Placement Guidelines
· 24"–30" per person
· 48" for aisles
· 48" from side walls
· 96"–120" for presenter between front wall and first row
· 48" between rows
· 84" from back wall



B) ADA Guidelines
· 34"–36" per wheelchair table space
· 24" minimum table depth
· 60"–72" between rows for wheelchairs to be placed back-to-back
· 36" minimum for wheelchair single passage
· 60" minimum for wheelchair double passage
· 60" minimum diameter to turn wheelchair
· 29" height accommodates newer wheelchairs; however, some wheelchairs require 32" height.



3. Select Base Color, Top Material and Edge Color

A) Base Color

BSX - Black Sandtex
STS - Stardust Silver

B) Top Material

LS - Laminate with standard PVC eased edge (For standard laminate list, see page 297)
LP - Laminate with premium metallic eased edge

C) Edge Color

4. Table Options

A) Linking Kits

· All table tops are pre-bored with inserts for linking tops end to end.

B) Power Kit Options

· Table size will determine your standard power and grommet location.
· Single or double circuit available
· Optional data ports

Community offers single or double circuit electrical units to meet classroom technology demands. See Power and Data pages 294–296. Please contact our customer service department for assistance at 800-622-5661.

Seating Capacity Options

For other seating requirements, select different configurations that are compatible with classroom size and capacity.

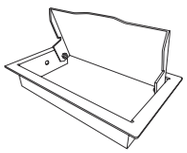

Figure 1

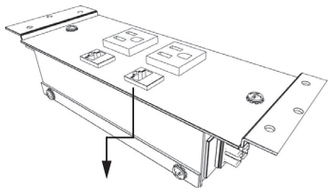
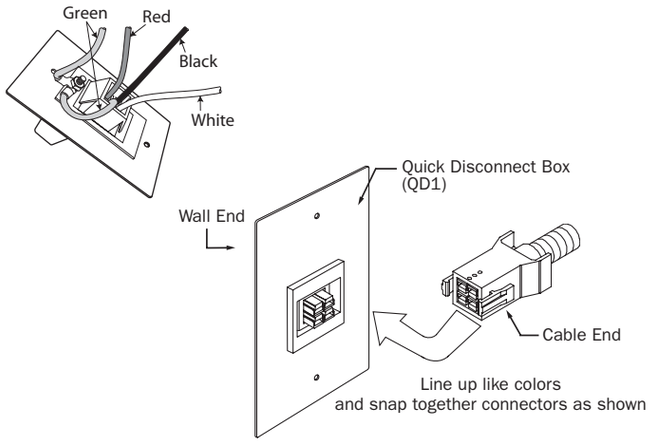


Optional data cut outs
(DJ-45 see page 302)

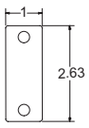
Cruz's electrical package (EP) offers single and double circuit capability. Data ports for easy internet access and equipment charging are also available.

Figure 2
With optional quick disconnect wall outlet.



Cruz's power kit accommodates classroom or training room requirements with single or double circuit options, indicated by series of colored wires.

Included in the power kit:
- Power box with grommet
  - One box for 42", 48" rectangle tops, trapezoid, half round and AV
  - Two boxes for the 60" & 72" rectangle tops.
- Cables
  - One power box kit - Two cables are included; one for each end of the power box
  - Two power box kits - Three cables are included; one for each end of the table and one to connect the two boxes
- Wire Cable Clamps - to secure your wires to the underside of the table top
- Safety linking plate - screws the underside of the table top to secure the tables from being pulled apart accidently and damaging electrical cables
- Black plastic electrical cover with wire management.



Single and Double Circuit Guide

Single Circuit
- For smaller rooms with limited electrical needs
- Each table's electrical components can be connected with cables and secured with safety linking brackets (linking brackets included, field installation required).
- Wedge and Quarter Rounds Linking Tables require jumper cables (EKJ-12) ordered separately, (U brackets included, field installation required).
- When connecting to building power; options include:
  1) Quick disconnect wall outlet
  2) 6' cable with standard 3-prong plug
  3) Hard wired into wall with cable extended from wall

Double Circuit
- For larger rooms with greater electrical needs
- Double circuit use requires a table grid with circuits assigned to alternating tables (see page 295) (Example: Table 1 = circuit 1, Table 2 = circuit 2, Table 3 = circuit 1)
- When connecting to building power; options include:
  1) Quick disconnect wall outlet
  2) Hard wired into wall with cable extended from wall

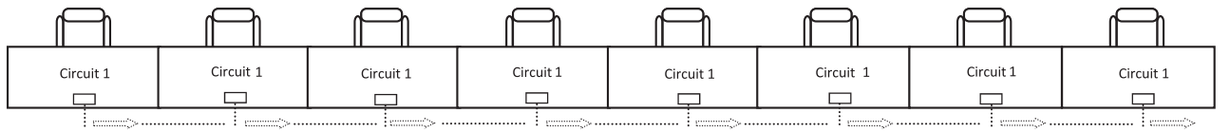
Single and Double Circuit* Guide

- Each table's electrical components can be connected in the field with cables, and secured with safety linking brackets (linking brackets included, field installation required).
- Wedge and Quarter Round Linking Tables require jumper cables (EKJ-12) ordered separately, (U brackets included, field installation required).
- When connecting to building power; options include:
  1) Quick disconnect wall outlet*
  2) 6' cable with standard 3-prong plug - single circuit only; cannot be used with double circuit
  3) Hard wired into wall with cable extended from wall*

Single Circuit

- Use allows maximum flexibility for smaller rooms with limited electrical needs
- Up to 8 electrical units can be linked on a single circuit grid

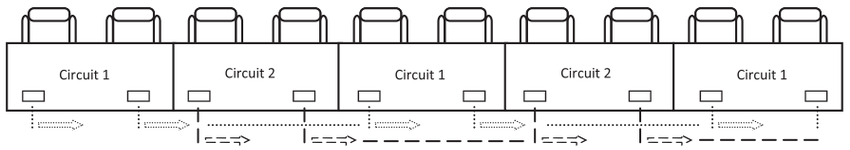
Ex. 1

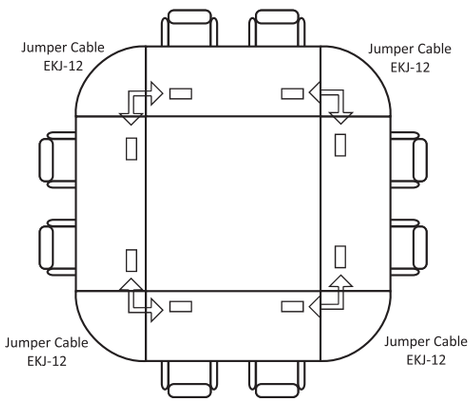


Double Circuit

- Use for larger rooms with greater electrical needs
- Up to 10 duplex units can be linked on a double circuit grid
- Double circuit use requires a table grid with circuits assigned to alternating tables, as shown

Ex. 2



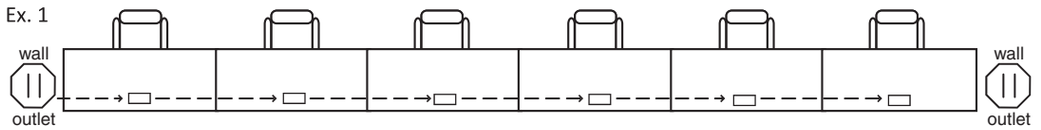


*NOTE: Double circuit building power source options must be wired to support double circuit configurations.

Non-Directional and Non-Sequential Electrical System

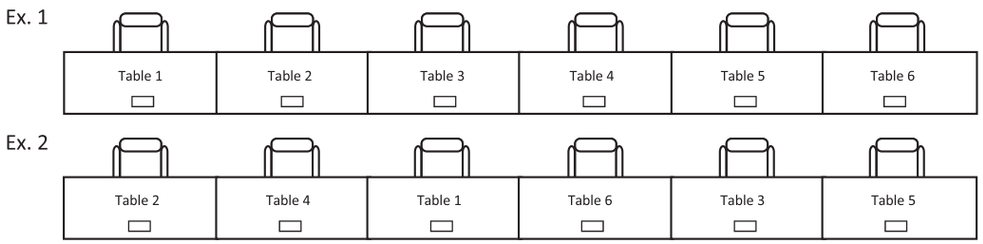
Cruz's non-directional, non-sequential electrical package allows virtually any configuration. In addition, table order is not limited by single or double circuit systems. Simply disconnect each table from the connecting table or wall outlet, change the configuration, and reconnect the tables to one another or to the wall. It's that simple!

Non-Directional



· Wall power in-feed cables can be attached to either end of the table configuration

Non-Sequential



· Table order isn't a concern with Cruz's electrical system

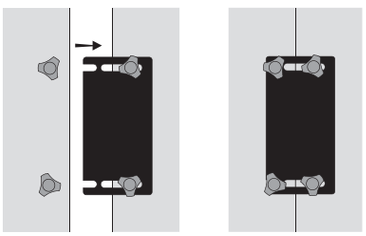
Single and Double Circuit Options

· Quick disconnect wall outlet
· Hard wiring with cable extended from wall
· Building power source must be wired to support double circuit configurations

Double Circuit

· The electrical system is a four wire system consisting of two individual circuits. Each circuit is rated at 20 amps/120 volts maximum.
· Circuit 1 (black), and Circuit 2 (red) are served by a system neutral (white) and an equipment ground (green). Check with local codes before connecting to building.

Linking Kit



· Easy to install
· All table tops are pre-bored with inserts to accept field installed linking kit
· 4 black low profile knobs (2 for each table) with quick release flat plate
· 11 gauge steel
· Standard on Wedge and Quarter Round table tops

Wedge and Quarter Rounds linking tops are available in ten sizes.
(See page 293) All linking tables include linking kits.

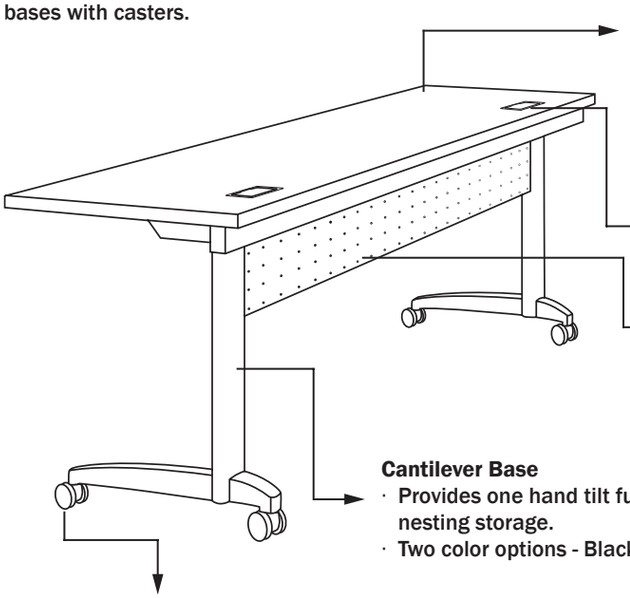
TABLES

The Prep Training Tables Collection offers rectangular tops with cantilevered tilt bases and fixed metal modesty panels. To help complete your configuration quarter round and wedge linking tops are available.

Training Table
Includes tilt top, modesty panel, two cantilevered tilt bases with casters.



Training Table Tops
- Top shapes available in rectangle and linking quarter round or linking wedges.
- Wilsonart standard laminate top offer
- 11 edge colors for laminate tops
- Eased edge profile

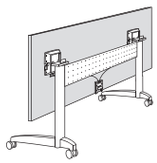
Optional electrical package with plastic cover

Modesty Panel
- Color will match the base color selection

Cantilever Base
- Provides one hand tilt function for easy nesting storage.
- Two color options - Black (B) or Silver (S)

Casters
- Standard with casters
- Dual-wheel locking
- Color: Black

Tilt Top



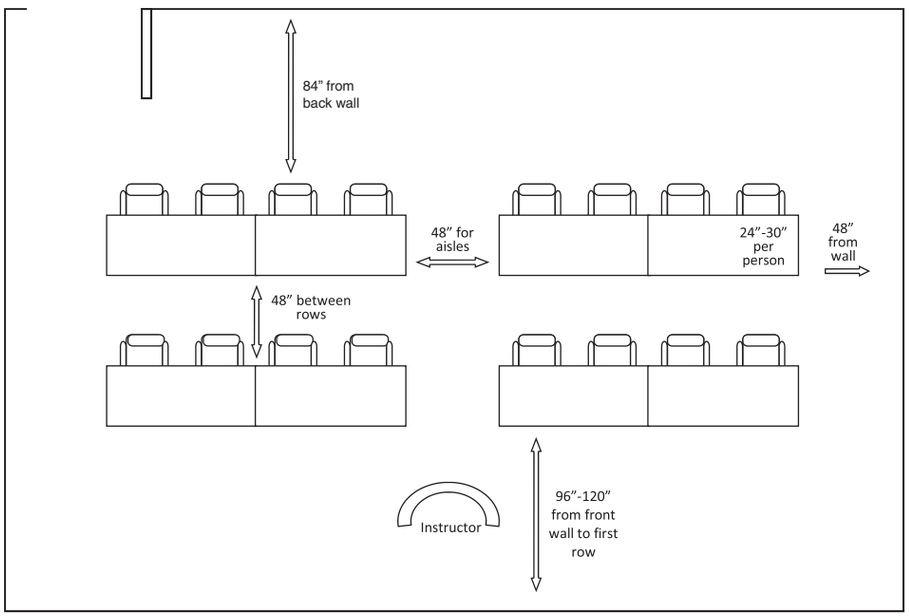
How to Specify Prep Tables

(Table configuration includes top, modesty panel, and tilt top bases with casters)

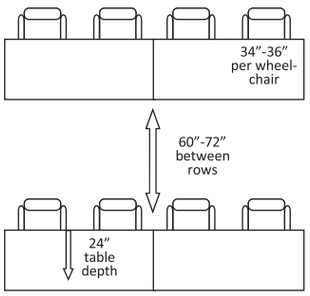
Follow these easy steps to create an adaptable, mobile learning environment.

1. The first step, initial requirements
A) Determine room configuration which will best fit your needs
B) Determine seating capacity requirements

2. Determine the Top Shapes and Sizes, as well as the number of tops needed for the chosen table configuration.
(See page 306 for seating capacity options.)
A) Table Placement Guidelines
- 24"–30" per person
- 48" for aisles
- 48" from side walls
- 96"–120" for presenter between front wall and first row
- 48" between rows
- 84" from back wall
- 72" between round or square tables



B) ADA Guidelines
- 34"–36" per wheelchair table space
- 24" minimum table depth
- 60"–72" between rows for wheelchairs to be placed back-to-back
- 36" minimum for wheelchair single passage
- 60" minimum for wheelchair double passage
- 60" minimum diameter to turn wheelchair
- 29" height accommodates newer wheelchairs; however, some wheelchairs require 32" height.



3. Select Base Color, Top Material and Edge Color

A) Base Color

BSX - Black Sandtex
STS - Stardust Silver

B) Top Material

LS - Laminate with standard PVC eased edge (For standard laminate list, see page 311)
LP - Laminate with premium edge

C) Edge Color

4. Table Options

A) Linking Kits

· All table tops are pre-bored with inserts for linking tops.

B) Power Kit Options

· Table size will determine your standard power and grommet location.
· Single or double circuit available
· Optional data ports

NOTE: Training Tables includes tilt top, modesty panel, two bases with casters

Community offers single or double circuit electrical units to meet classroom technology demands. See Power and Data pages 308–310. Please contact our customer service department for assistance at 800-622-5661.

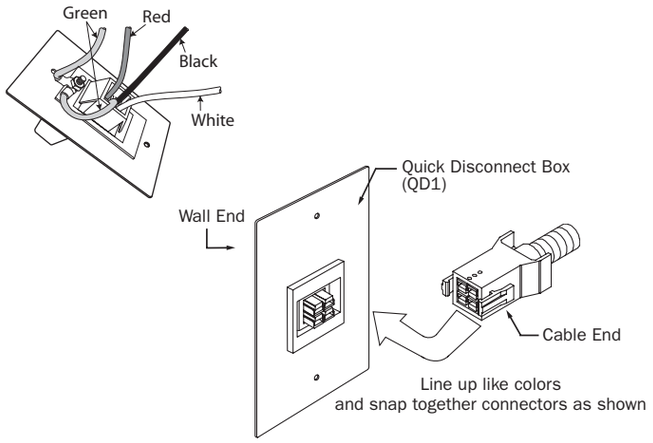
Optional data cut outs
(DJ-45 see page 314)

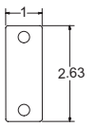
Prep's electrical package (EP) offers single and double circuit capability. Data ports for easy internet access and equipment charging are also available.

Figure 2
With optional quick disconnect wall outlet.



Prep's power kit accommodates classroom or training room requirements with single or double circuit options, indicated by series of colored wires.

Included in the power kit:
- Power box with grommet
  - One box for 42", 48" rectangle tops, trapezoid, half round and AV
  - Two boxes for the 60" & 72" rectangle tops.
- Cables
  - One power box kit - Two cables are included; one for each end of the power box
  - Two power box kits - Three cables are included; one for each end of the table and one to connect the two boxes
- Wire Cable Clamps - to secure your wires to the underside of the table top
- Safety linking plate - screws the underside of the table top to secure the tables from being pulled apart accidently and damaging electrical cables
- Black plastic electrical cover with wire management.



Single and Double Circuit Guide

Single Circuit
- For smaller rooms with limited electrical needs
- Each table's electrical components can be connected with cables and secured with safety linking brackets (linking brackets included, field installation required).
- Wedge and Quarter Rounds Linking Tables require jumper cables (EKJ-12) ordered separately, (U brackets included, field installation required).
- When connecting to building power; options include:
  1) Quick disconnect wall outlet
  2) 6' cable with standard 3-prong plug
  3) Hard wired into wall with cable extended from wall

Double Circuit
- For larger rooms with greater electrical needs
- Double circuit use requires a table grid with circuits assigned to alternating tables (see page 309)
  (Example: Table 1 = circuit 1, Table 2 = circuit 2, Table 3 = circuit 1)
- When connecting to building power; options include:
  1) Quick disconnect wall outlet
  2) Hard wired into wall with cable extended from wall

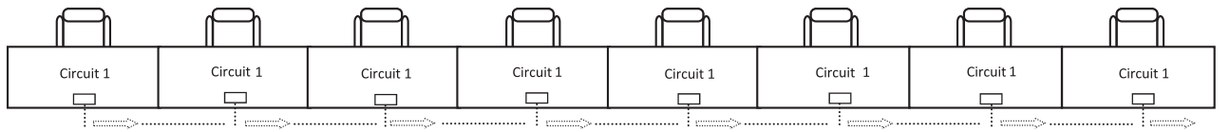
Single and Double Circuit* Guide

- Each table's electrical components can be connected in the field with cables, and secured with safety linking brackets (linking brackets included, field installation required).
- Wedge and Quarter Round Linking Tables require jumper cables (EKJ-12) ordered separately, (U brackets included, field installation required).
- When connecting to building power; options include:
  1) Quick disconnect wall outlet*
  2) 6' cable with standard 3-prong plug - single circuit only; cannot be used with double circuit
  3) Hard wired into wall with cable extended from wall*

Single Circuit

- Use allows maximum flexibility for smaller rooms with limited electrical needs
- Up to 8 duplex units can be linked on a single circuit system

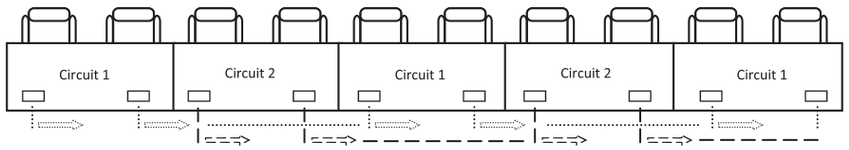
Ex. 1

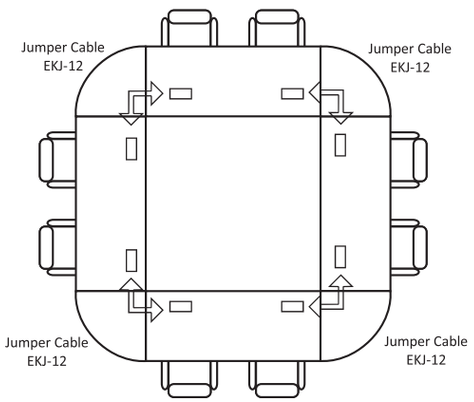


Double Circuit

- Use for larger rooms with greater electrical needs
- Up to 10 duplex units can be linked on a 20 amp double circuit grid
- Double circuit use requires a table grid with circuits assigned to alternating tables, as shown

Ex. 2



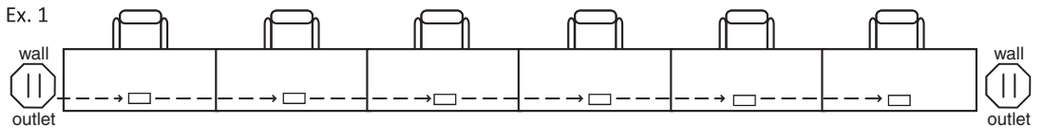


*NOTE: Double circuit building power source options must be wired to support double circuit configurations.

Non-Directional and Non-Sequential Electrical System

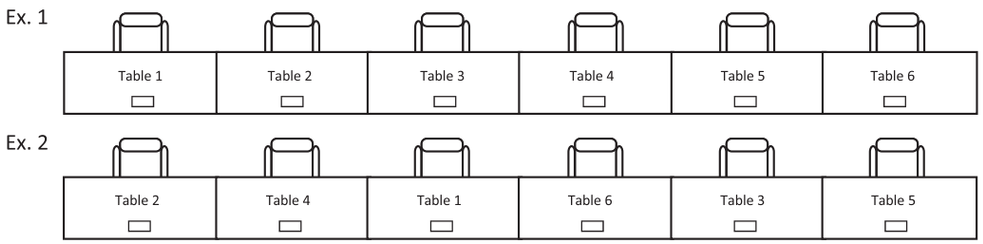
Prep's non-directional, non-sequential electrical package allows virtually any configuration. In addition, table order is not limited by single or double circuit grids. Simply disconnect each table from the connecting table or wall outlet, change the configuration, and reconnect the tables to one another or to the wall. It's that simple!

Non-Directional



· Wall power in-feed cables can be attached to either end of the table configuration

Non-Sequential



· Table order isn't a concern with Prep's electrical system

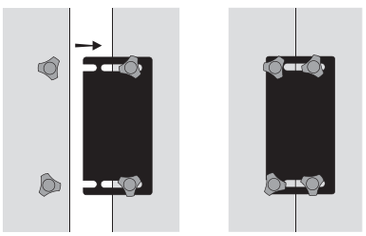
Single and Double Circuit Options

· Quick disconnect wall outlet
· Hard wiring with cable extended from wall
· Building power source must be wired to support double circuit configurations

Double Circuit

· The electrical system is a four wire system consisting of two individual circuits. Each circuit is rated at 20 amps/120 volts maximum.
· Circuit 1 (black), and Circuit 2 (red) are served by a system neutral (white) and an equipment ground (green). Check with local codes before connecting to building.

Linking Kit



· Easy to install
· All table tops are pre-bored with inserts to accept field installed linking kit
· 4 black low profile knobs (2 for each table) with quick release flat plate
· 11 gauge steel
· Standard on Wedge and Quarter Round table tops

Wedge and Quarter Rounds linking tops are available.
(See page 307.) All linking tables include linking kits.
