VIRCO

COLORS, FINISHES & LEAD-TIMES

Virco's extensive product solutions – including custom engineered solutions – are available in a wide range of colors and finishes with corresponding lead-times as described below.

STOCKED MODELS (formerly QUICK SHIP)

- Specific models and color combinations for expedited delivery.
- Stocked Items are in stock and ready to ship quickly, usually in 2 - 3 days.
- To ship in 2 - 3 days, all models on an order must be from the Stocked list. If any item is not from the Stocked list, the entire order will be shipped at the time the longest lead item is ready.
- Stocked Models selections shown on pages 2 to 10 of this price list.

ASSEMBLED-TO-ORDER (formerly CLASSROOM BASICS)

- Expanded products and color combinations.
- ASSEMBLED-TO-ORDER Models are assembled upon receipt of an order from components we stock and are usually ready to ship in 2 - 3 weeks.
- Assembled orders must consist exclusively of Stocked and/or Assembled Models and color combinations, otherwise the lead time will be extended.
- ASSEMBLED-TO-ORDER models selections shown on pages 12 to 43 of this price list.

VIRCO'S FULL PALETTE OF COLORS, FABRICS, LAMINATES AND FINISHES (MADE-TO-ORDER Models)

Virco's full palette of standard colors and finishes as shown on pages xi - xii of this price list.

- Models not included in Stocked or Assembled are Made-to-Order (Made) and are usually ready within 4 - 8 weeks from order placement.
- Optional upholstery listed on page xiii may be subject to extended lead-times depending on the material suppliers inventory and/or production schedule.
- MADE-TO-ORDER models selections shown on pages 46 to 175 of this price list.

CUSTOM COLORS, FABRICS, LAMINATES, FINISHES, AND MINIMUM ORDERS

- In addition to our Stocked and Assembled palettes, we offer a broad range of colors and finishes which are available in minimum order quantities (varies by model) and/or with a set-up fee ($250 - $1000).
- Because of the capabilities and processes available in our U.S. Factories, we have the ability to do custom color matches from samples or swatches with minimum quantities and a set-up fee (varies by model).
- On wood-substrate tables and laminated work surfaces, we offer custom patterns and edge treatments, including logo designs and school mascots with minimum quantities and a set-up fee (varies).
- Custom finishes are quoted on a project-by-project basis and require purchase of complete production including any over-runs.
- Please contact your Virco sales representative for more information.

CUSTOM ENGINEERED SOLUTIONS

- In some cases, your project may require customized engineering solutions. This is sometimes the case in refurbishment or retrofit projects, where a certain number of furniture pieces – including modified versions of standard products – have to fit into an 'as-built' pre-existing space.
- Our in-house engineers and domestic factories are uniquely positioned to design, prototype, and test such solutions, to help insure that your custom requirement also meets BIFMA industry standards for safety and reliability, as well as Federal ADA guidelines and standards.
- Custom Engineered Solutions are quoted on a project-by-project basis and require minimums, set-up fees, and extended lead-times.
- Please contact your Virco sales representative for more information.

6000 SERIES FOLDING TABLES

Tubular steel legs. Models are available with a 3/4" thick particleboard-core top with a fused-on melamine surface and 3/4" profile T-mold edge banding.
The folding mechanism includes a gravity-fed safety lock. Because the safety lock is permanently attached, a formed tab on the lock arm permits the hinge to fold in only one direction. Spring clips are formed from tempered steel to accept the cross brace of the leg unit. Each spring clip is housed in an injection-molded polyethylene shell to help protect hands from sharp edges. Each table has two spring clips.
Patented steel aprons consists of four machine formed steel segments with no exposed sharp edges. The outer edge is rolled to form a strong and smooth flange. MT SERIES MOBILE TABLES

Tubular steel frame, 29" table height. Tops are available with a 3/4" thick particleboard-core high-pressure laminate work surface with 3/4" profile T-mold edge banding. Models are also available with work surfaces that have an optional urethane-based Sure Edge® finish. Nylon-base self-leveling glides. In the folded position, tables rest on four 3" swivel casters. The tables open and close in one operation. A safety device is built into the folding mechanism to help prevent pinching when tables are opened. A secondary safety release mechanism is incorporated to complete the opening of tables. The center hinge operates vertically in order to self clean and minimize trapping of food. Metal surfaces are available chromed or with a powder coat finish.
Service Life Recommendation: In order to extend the torque life of MT Series tables with torsion bars, Virco recommends that customers store their tables in an upright position when not in use. When cleaning Virco mobile tables, Virco recommends that their high-pressure laminate surfaces be wiped down as needed with a damp cloth or sponge and mild detergent or soap; this recommendation also applies to plastic stool seats, and to metal surfaces with a chrome or powder coat finish.
IMPORTANT: Never use a power washer to clean Virco mobile tables. Tables are intended for indoor use.
Warranty Note: MT Series tables are covered by Virco's 10-year warranty; however, torsion bars used on these tables are covered by a 5-year warranty. Virco recommends that torsion bars be inspected for torque strength frequently.

MTB SERIES MOBILE BENCH TABLES

Tubular steel frame, heavy-duty mobile folding bench tables have an automatic locking feature, as well as a safety clearance between table sections to help protect hands during opening. The tables also have a torsion bar for ease of operation, and are free-standing when closed. Tops and benches are available with a 3/4" thick particleboard-core high-pressure laminate work surface with 3/4" profile T-mold edge banding. Tops and benches are also available with an optional urethane-based Sure Edge® finish. In the folded position, tables rest on four 3 1/2" swivel casters. Middle legs have a 1" rubber crutch tip. The table automatically locks in the open and closed positions. The center hinge operates vertically in order to self clean and minimize trapping of food. The top support apron is available with a powder coat finish. The undercarriage is available fully chromed or with an optional powder coat finish.
Optional Edge Finish: Virco's custom Sure Edge finish is offered as an option for table tops and benches. The Sure Edge finish consists of a urethane-based protectant that is bonded chemically to the substrate of the top or benches. The tamper-resistant Sure Edge finish, applied with an innovative anti-bacterial process for enhanced cleanliness and hygiene, functions as an effective moisture barrier, which seals the substrate of a top or bench between its high-pressure laminate surface and backing sheet. The Sure Edge finish has no gaps or seams, preventing food particles from lodging in table-top or bench-top edges. Models with a Sure Edge top finish include the letters AE. Models with a Sure Edge finish for tops and benches include the letters AEB.

MTC SERIES CONVERTIBLE BENCH TABLES

Tubular steel frame. This mobile bench and table unit changes quickly and easily from a table and bench configuration to a bench with a full backrest. When used as a table and bench, the unit features a bench height of 15" and a top height of 27", or a bench height of 17" and a top height of 29". Benches and tops are available with a 3/4" thick particleboard-core high-pressure laminate work surface with 3/4" profile T-mold edge banding. They are also available with an optional urethane-based Sure Edge® finish. The bench measures 96"L x 12"W; and the top measures 96"L x 15"W.
Table and bench height adjustment are made by a telescoping foot tube assembly secured to the table frame. Two adjustment positions are provided: one achieves a 15" bench height and a 27" top height; the other achieves a 17" bench height and a 29" top height. The base frame is mounted on four 4" swivel casters, two with locks. The apron, frame and links are powder coated. The foot tube assembly are chrome-plated.
Optional Edge Finish: Virco's custom Sure Edge finish is offered as an option for table tops and benches. The Sure Edge finish consists of a urethane-based protectant that is bonded chemically to the substrate of the top or benches. The tamper-resistant Sure Edge finish, applied with an innovative anti-bacterial process for enhanced cleanliness and hygiene, functions as an effective moisture barrier, which seals the substrate of a top or bench between its high-pressure laminate surface and backing sheet. The Sure Edge finish has no gaps or seams, preventing food particles from lodging in table-top or bench-top edges. Models with a Sure Edge top finish include the letters AE. Models with a Sure Edge finish for tops and benches include the letters AEB.

Optional Ganging Device: An optional ganging device consists of a lock plate, locking pin spring-loaded assembly and a docking plate. To engage the ganging device when two table tops are placed back to back, the keyed locking pins can be inserted into the docking plate, locking the two tables together at each end. Models with ganging device include the letter G.
Service Life Recommendation: In order to extend the torque life of MTC Series tables with torsion bars, Virco recommends that customers store their tables in an upright position when not in use. When cleaning Virco mobile tables, Virco recommends that their high-pressure laminate surfaces be wiped down as needed with a damp cloth or sponge and mild detergent or soap; this recommendation also applies to plastic stool seats, and to metal surfaces with a chrome or powder coat finish. IMPORTANT: Never use a power washer to clean Virco mobile tables. Tables are intended for indoor use.

Warranty Note: MTC Series tables are covered by Virco's 10-year warranty; however, torsion bars used on these tables are covered by a 5-year warranty. Virco recommends that torsion bars be inspected for torque strength frequently.

6000 SERIES FOLDING TABLES

Tubular steel legs. Models are available with a 3/4" particleboard-core top with a fused-on melamine surface and 3/4" profile T-mold edge banding.
The folding mechanism includes a gravity-fed safety lock. Because the safety lock is permanently attached, a formed tab on the lock arm permits the hinge to fold in only one direction. Spring clips are formed from tempered steel to accept the cross brace of the leg unit. Each spring clip is housed in an injection-molded polyethylene shell to help protect hands from sharp edges. Each table has two spring clips.
Patented steel aprons consists of four machine formed steel segments with no exposed sharp edges. The outer edge is rolled to form a strong and smooth flange. Apron ends are inserted into patented corner supports formed of injection-molded polyethylene which completely enclose the ends of the steel aprons. A high-impact stacking bumper attaches to the outer edge of the corner support to facilitate stacking. Metal surfaces are available with a powder coat finish.

CORE-A-GATOR® SERIES FOLDING TABLES

Tubular steel legs. Lightweight folding table with a patented design featuring an ABS plastic top with an innovative three-piece construction. Extruded aluminum U-channels along each edge for added strength. Corners reinforced with four high-impact molded ABS corner protectors. Tables have edge molding around the complete perimeter of the top to serve as an edge protector. Tables have apron bumpers at each corner to protect the top surface during storage. Dual link folding mechanism consists of four steel links that form the folding mechanism. Two links are riveted to the leg assembly and the other two to a mounting bracket on the underside of the table. The two pairs of links provide lateral support when the table is in use and also allow the legs to fold into a closed position. The folding mechanism has an automatic positive locking rod that engages the two pairs of links. The locking mechanism automatically engages when the table is upright. The legs have fitted plastic glides. Metal surfaces are available with a powder coat finish.

TABLES

MT SERIES MOBILE TABLES

Tubular steel frame, 29" table height. Tops are available with a ¾" thick particleboard-core high-pressure laminate work surface with ¾" profile T-mold edge banding. Optional configurations include surfaces with a urethane-based Sure Edge® finish. Nylon-base self-leveling glides. In the folded position, tables rest on four 3" swivel casters. The tables open and close in one operation. A safety device is built into the folding mechanism to help prevent pinching when tables are opened. A secondary safety release mechanism is incorporated to complete the opening of tables. The center hinge operates vertically in order to self clean and minimize trapping of food. Metal surfaces are available chromed or with a powder coat finish.

Service Life Recommendation: In order to extend the torque life of MT Series tables with torsion bars, Virco recommends that customers store their tables in an upright position when not in use. When cleaning Virco mobile tables, Virco recommends that their high-pressure laminate surfaces be wiped down as needed with a damp cloth or sponge and mild detergent or soap; this recommendation also applies to plastic stool seats, and to metal surfaces with a chrome or powder coat finish.

IMPORTANT: Never use a power washer to clean Virco mobile tables. Tables are intended for indoor use.

Warranty Note: MT Series tables are covered by Virco's 10-year warranty; however, torsion bars used on these tables are covered by a 5-year warranty. Virco recommends that torsion bars be inspected for torque strength frequently.

MTB SERIES MOBILE BENCH TABLES

Tubular steel frame, heavy-duty mobile folding bench tables have an automatic locking feature, as well as a safety clearance between table sections to help protect hands during opening. The tables also have a torsion bar for ease of operation, and are free-standing when closed. Tops and benches are available with a ¾" thick particleboard-core high-pressure laminate work surface with ¾" profile T-mold edge banding. Optional configurations include surfaces with a urethane-based Sure Edge® finish. In the folded position, tables rest on four 3½" swivel casters. Middle legs have a 1" rubber crutch tip. The table automatically locks in the open and closed positions. The center hinge operates vertically in order to self clean and minimize trapping of food. The top support apron is available with a powder coat finish. The undercarriage is available fully chromed or with an optional powder coat finish.
Optional Edge Finish: Virco's custom Sure Edge finish is offered as an option for table tops and benches. The Sure Edge finish consists of a urethane-based protectant that is bonded chemically to the substrate of the top or benches. The tamper-resistant Sure Edge finish, applied with an innovative anti-bacterial process for enhanced cleanliness and hygiene, functions as an effective moisture barrier, which seals the substrate of a top or bench between its high-pressure laminate surface and backing sheet. The Sure Edge finish has no gaps or seams, preventing food particles from lodging in table-top or bench-top edges. Service Life Recommendation: In order to extend the torque life of MTB Series tables with torsion bars, Virco recommends that customers store their tables in an upright position when not in use. When cleaning Virco mobile tables, Virco recommends that their high-pressure laminate surfaces be wiped down as needed with a damp cloth or sponge and mild detergent or soap; this recommendation also applies to plastic stool seats, and to metal surfaces with a chrome or powder coat finish.
IMPORTANT: Never use a power washer to clean Virco mobile tables. Tables are intended for indoor use.
Warranty Note: MTB Series tables are covered by Virco's 10-year warranty; however, torsion bars used on these tables are covered by a 5-year warranty. Virco recommends that torsion bars be inspected for torque strength frequently.

MTS SERIES MOBILE STOOL TABLES

Tubular steel frame, heavy-duty mobile folding stool tables have an automatic locking feature, as well as a safety clearance between table sections to help protect hands during opening. The tables also have a torsion bar for ease of operation, and are free-standing when closed. Tops are available with a ¾" thick particleboard-core high-pressure laminate work surface with ¾" profile T-mold edge banding. Optional configurations include surfaces with a urethane-based Sure Edge® finish. Each seat has its own direct-to-floor load-bearing column and provides its own support without the need of cross members running between seats. Each seat has its own place to enter and exit. Round stool tops are 13" in diameter, injection-molded from a high-impact ABS material. In the folded position, tables rest on four 3½" swivel casters. Middle legs have a 1" rubber crutch tip. The table automatically locks in the open and closed positions. The center hinge operates vertically in order to self clean and minimize trapping of food. The top support apron is available with a powder coat finish. The undercarriage is available fully chromed or with an optional powder coat finish.

Optional Edge Finish: Virco's custom Sure Edge finish is offered as an option for table tops. The Sure Edge finish consists of a urethane-based protectant that is bonded chemically to the substrate of the top. The tamper-resistant Sure Edge finish, applied with an innovative anti-bacterial process for enhanced cleanliness and hygiene, functions as an effective moisture barrier, which seals the substrate of a top between its high-pressure laminate surface and backing sheet. The Sure Edge finish has no gaps or seams, preventing food particles from lodging in table-top edges. Models with a Sure Edge top finish include the letters AE.

Service Life Recommendation: In order to extend the torque life of MTS Series tables with torsion bars, Virco recommends that customers store their tables in an upright position when not in use. When cleaning Virco mobile tables, Virco recommends that their high-pressure laminate surfaces be wiped down as needed with a damp cloth or sponge and mild detergent or soap; this recommendation also applies to plastic stool seats, and to metal surfaces with a chrome or powder coat finish.

IMPORTANT: Never use a power washer to clean Virco mobile tables. Tables are intended for indoor use.

Warranty Note: MTS Series tables are covered by Virco's 10-year warranty; however, torsion bars used on these tables are covered by a 5-year warranty. Virco recommends that torsion bars be inspected for torque strength frequently.

6000 SERIES FOLDING TABLES

Tubular steel legs. Models are available with a ¾" particleboard-core top with a fused-on melamine surface and ¾" profile T-mold edge banding.
The folding mechanism includes a gravity-fed safety lock. Because the safety lock is permanently attached, a formed tab on the lock arm permits the hinge to fold in only one direction. Spring clips are formed from tempered steel to accept the cross brace of the leg unit. Each spring clip is housed in an injection-molded polyethylene shell to help protect hands from sharp edges. Each table has two spring clips.
Patented steel aprons consist of four machine formed steel segments with no exposed sharp edges. The outer edge is rolled to form a strong and smooth flange. Apron ends are inserted into patented corner supports formed of injection-molded polyethylene which completely enclose the ends of the steel aprons. A high-impact stacking bumper attaches to the outer edge of the corner support to facilitate stacking. Metal surfaces are available with a powder coat finish.

CORE-A-GATOR® SERIES FOLDING TABLES

Tubular steel legs. Lightweight folding table with a patented design featuring an ABS plastic top with an innovative three-piece construction. Extruded aluminum U-channels along each edge for added strength. Corners reinforced with four high-impact molded ABS corner protectors. Tables have edge molding around the complete perimeter of the top to serve as an edge protector. Tables have apron bumpers at each corner to protect the top surface during storage. Dual link folding mechanism consists of four steel links that form the folding mechanism. Two links are riveted to the leg assembly and the other two to a mounting bracket on the underside of the table. The two pairs of links provide lateral support when the table is in use and also allow the legs to fold into a closed position. The folding mechanism has an automatic positive locking rod that engages the two pairs of links. The locking mechanism automatically engages when the table is upright. The legs have fitted plastic glides. Metal surfaces are available with a powder coat finish.

Models with a seat pad consist of polyurethane foam covered with fabric. The KD articulating tablet arm measures 21¼" x 15⅜" x ⅝" and has a plywood core. Chairs with an articulating tablet arm cannot accommodate an optional KD arm kit.
Optional steel-base and felt-base glides are available. Metal surfaces are available chromed or with a powder coat finish.
Stacking Capabilities: Model SG1 chairs are stackable up to 4 high when used with Virco's model HCT4 or HCT789 chair trucks. Chairs with an optional articulating KD tablet arm are not stackable; however, chairs with an optional KD arm kit can be stacked up to 4 high.
Virco recommends that model SG1 chairs be stacked only with other model SG1 chairs. Model SG1 chairs, which are not upholstered and do not have a molded plastic underseat cover to help protect the upholstered seat pad fabric of stacked chairs, should not be inter-stacked with model SG1P chairs, which have a padded, upholstered seat.

OFFICE & ADMINISTRATION FURNITURE

SOLD IN FULL CARTONS ONLY

PARAMETER® SERIES

Virco's Parameter® Series includes a variety of desks and workstations for teachers, principals, administrators and office use. Selected models have a single- or double-pedestal configuration; other models come without pedestals. Parameter also includes help desk models having a work surface with a rounded edge on one end where students can pull up a chair for assistance with their work.

Models are available with an 1⅛" thick particleboard-core high-pressure laminate work surface with 1⅛" profile T-mold edge banding. All desks have a work surface with two grommets, one at each end, except help desks, which have a work surface with one grommet at the rectangular end. Two-drawer (file/file) and three- drawer (box/box/file) unitized pedestals consist of steel components. Pedestals incorporate a drawer interlock system to allow only one drawer per pedestal to open at one time. A core-removable lock secures drawers with one lock assembly ("gang locking"); one lock per pedestal. Riser blocks are made from ABS plastic and include an internal wire management chute; a riser block is situated between the work surface and each end panel or pedestal. Adjustable-height nylon feet.

Optional configurations include standard twin-wheel, locking casters, laminate and fabric screens. The column leg for use with L-configuration workstations having a peninsula return consists of welded steel components and an adjustable-height nylon glide. Metal surfaces are available with a powder coat finish.

A core-removable lock secures drawers with one lock assembly ("gang locking"); one lock per unit. Riser blocks are be made from ABS plastic and include an internal wire management chute; a riser block is situated between the top and each end panel or pedestal. The file credenzas are equipped with full-extension heavy-duty steel ball-bearing slides on all lateral drawers. A counter weight is installed in each unit to help prevent tipping when drawers are fully extended. An optional conversion bar kit, consisting of four powder coated steel bars, enables Parameter file credenza lateral drawers to accommodate legal size and letter size documents from front to back, rather than from side to side. For an optional conversion bar kit, specify model CBKLF. An optional drawer divider kit, consisting of one steel drawer divider, is available to help organize Parameter file credenza lateral drawers. FURNITURE WITH OAK FINISH

Virco's Oak finish highlights the grain and color accents of each furniture item. Because they're crafted from natural hardwood, no two pieces of Oak furniture have exactly the same grain pattern and color; instead, variations in grain and color result in uniquely complementary furniture groupings.

60", 72" AND 84" BOOKCASES

To avoid the risk of a serious tip-over accident, these bookcases must be securely anchored to a wall. Refer to the assembly instructions for more information.

GUIDELINES FOR STACKING & MOVING FURNITURE

The number of pieces of furniture that can be safely stacked or moved on Virco's mobile storage equipment will vary depending on many factors, including the furniture's height, weight and general design; the speed at which the unit will be moved; the terrain over which it will travel; and the strength of the operator(s). Care should be taken not to stack to the point of unsteadiness. Virco recommends starting with small, easily handled loads and adding one to two pieces of furniture at a time to determine the safe capacity for each set of conditions. Use Virco mobile storage equipment with appropriate Virco furniture only.

VIRCO AND THE ENVIRONMENT

GREENGUARD®

Hundreds of Virco furniture models have earned stringent GREENGUARD® Gold certification (formerly known as Greenguard Children & Schools Program certification) for low chemical emissions into indoor air. When this icon is shown at the bottom of a page in this price list, all products on that page are Greenguard Gold certified. For the most current listing of Virco's Greenguard-certified products – including models that may have been certified since the publication of this price list – go to www.greenguard.org and click on the Find Products link.

To search the Greenguard Certification Product Guide for Virco's Greenguard-certified products, be sure to search by the series name (for example, ZUMA®) or series number (for example, 3000 Series) rather than by specific model numbers (for example, ZU418 or 3018) since the search function will not recognize Virco model numbers. The Greenguard Certification Product Guide also has printable Greenguard certificates for Virco's Greenguard-certified furniture items. Please note that these certificates refer to Virco product groups (for example, ZUMA 4-Leg Chairs, ZUMA Cantilevered Chairs, and ZUMA Mobile Chairs) rather than to specific model numbers.

As the Greenguard website states, "GREENGUARD Certification ensures that a product has met some of the world's most rigorous and comprehensive standards for low emissions of volatile organic compounds (VOCs) into indoor air." To date, over 300 manufacturers – including Virco – provide customers with Greenguard-certified products.

LEED®

Many of Virco's customers are interested in the LEED® program. LEED, which stands for Leadership in Energy and Environmental Design, is a program of the non-profit U.S. Green Building Council. LEED is a well-known standard for environmentally-friendly buildings.

Virco furniture can help you earn points under the LEED for Schools and rating systems. Hundreds of Virco's Greenguard-certified products can help you earn an Indoor Air Quality (IAQ) credit under the LEED for Schools rating system. Depending on the project, Virco furniture can also help you earn LEED credits for Materials & Resources (MR). ZUMAfrd™ and Virco's other Greenguard-certified products are well suited to green building projects. Virco's Take-Back program can also help reduce the environmental impact of a renovation project.

For any questions about how Virco products can help your building project earn LEED points, please contact your Virco Sales Representative.

WASTEWISE

The U.S. Environmental Protection Agency's WasteWise program -- according to its website -- "helps organizations and businesses reduce waste and practice sustainable materials management through the prevention and recycling of municipal solid waste (common household and business waste) and select industrial materials."

Virco joined the EPA's WasteWise Program as a charter member in 1994. Over the years, we've been privileged to receive a number of WasteWise honors, including: WasteWise Program Champion (1998, 1999 & 2001); WasteWise Partner of the Year for Large Businesses (2000 & 2002); and WasteWise Climate Change Partner of the Year (2002). In 2003, Virco was designated as a charter member of the WasteWise Hall of Fame.

If your organization isn't already a member, we strongly encourage you to join WasteWise; information is available at:

http://www.epa.gov/epawaste/conserve/smm/wastewise/about.htm.

TAKE-BACK PROGRAM

Through this ground-breaking program – launched in 2006 – Virco takes back out-of-service furniture from qualifying schools, colleges and universities and recycles the components. Some of this recycled material can then be included in the Fortified Recycled Wood™ that's used to make seats, backrests and work surfaces for our highly sustainable ZUMAfrd furniture.

CASH FOR CARDBOARD

Virco's "Cash for Cardboard" Program helps 35 schools near our Conway, Arkansas facility reap the benefits of recycling. Virco builds recycling bins for these schools, collects their cardboard and transports it to a recycling vendor, then returns the proceeds to the schools. To date, the Cash for Cardboard Program has enabled these schools to earn over $100,000.
