Kimball® Office

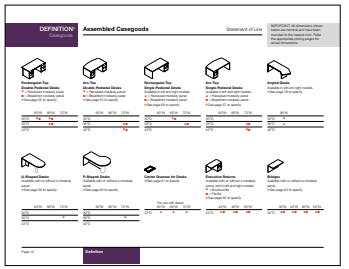
How to Use this Price List

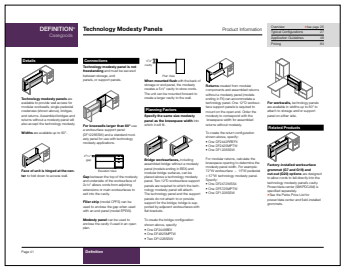
Kwik Office Program	➤See page 4
Sustainability	5
Locking Information	6
Casegoods at a Glance	7

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

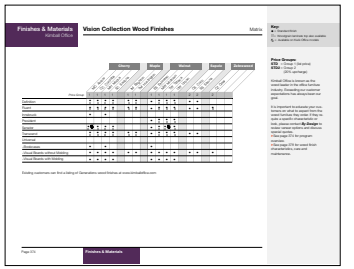
We suggest that you become familiar with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.



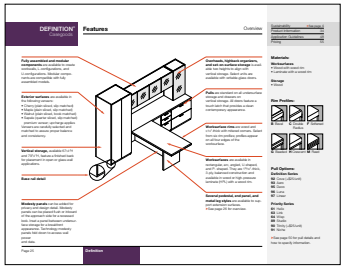
Statement of Line provides a snapshot of the entire product line. We've included an illustration, a table showing available sizes, and page cross references to the applicable pricing and how to specify pages.



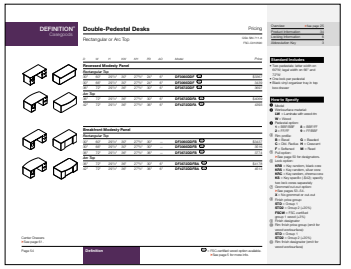
Product Information pages provide detailed information about the product, connections that can be made with other models, planning factors, and applications guidelines.



Look in the Finishes and Materials section to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product.



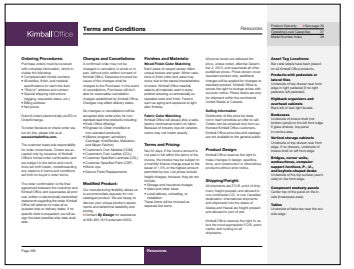
Overviews offer a quick look at the distinguishing features of the product line.



Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.

KJ icon indicates models that are available for quick shipment.
➤See the Kwik Office Price List.

(FSC) icon indicates models available with the FSC option (3% upcharge) at standard leadtime to meet FSC certification.



Use the Resources in the back of the price list. This repository of useful information includes Terms and Conditions, Warranty, Operating Load Capacities. You'll also find a model number index with references to the appropriate pricing page.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Standard product modifications are available on select products.
➤See the Product Modifications Price List at www.kimballoffice.com

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

Only Underwriters' Laboratory (U.L.) or Canadian Standards Association (C.S.A.) listed electrical components are used in electrical devices and are so labeled.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

How to Specify Our Products

Kwik Office Program	➤See page 4
Sustainability	5
Locking Information	6
Casegoods at a Glance	7

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ❶, ❷, or ❸) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

Overview ➤See page 25 · Product Information 34 · Locking Information 6 · Abbreviation Key 3

Standard Includes

- Two pedestals: letter width on 60"W; legal width on 66" and 72"W
- One lock per pedestal
- Black vinyl organizer tray in top box drawer

How to Specify

❶ Model
❷ Worksurface material:
LW = Laminate with wood rim
W = Wood
❸ Pedestal option:
1 = BBF/BBF **8** = BBF/FF
2 = FF/FF **9** = FF/BBF
① Rim profile:
B = Bevel **G** = Beaded
C = Dbl. Radius **H** = Crescent
F = Softened **M** = Read
⑤ Pull option:
➤See page 50 for designators.
⑥ Lock option:
KRB = Key random, black core
KRS = Key random, silver core
KRC = Key random, chrome core
KS = Key specific (-$42); specify two lock cores separately
⑦ Grommet/cut-out option:
➤See pages 53–54.
X = No grommet or cut-out
⑧ Finish price group:
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified (group 1 wood (+3%)
⑨ Finish designator
⑩ Rim finish price group (omit for wood worksurface):
STD = Group 1
STD2 = Group 2 (+20%)
⑪ Rim finish designator (omit for wood worksurface)

Center Drawers ➤See page 61.

Page 54 — **Definition** — (W) = FSC-certified wood option available. ➤See page 5 for more info.

Refer to the "standard includes" list to see what ships standard as part of the base model.

Follow these steps to build a complete model specification.

Options that incur an upcharge or decrease the base price are noted within the "How to Specify" steps.

Sample Specification:

The example below shows a complete model number for an **arc-top double-pedestal desk.**
➤See page 54 for the corresponding pricing table and How to Specify steps.

Kwik Office Program

Sustainability ➤See page 5
Locking Information 6
Casegoods at a Glance 7

Kwik Office casegoods are available to ship within five business days upon receipt of a credit-approved order.

Specific models and options from the following lines are available:
- Priority
- Senator
- Universal casegoods

Model Numbers:

Models and finishes that are available on Kwik Office have been marked with a K icon in this price list.

Kwik Office model numbers are different from standard model numbers. Base model numbers for Kwik Office products include all options and finish designators.

The K icon on standard lead-time pricing pages indicates availability; it does not provide the correct model numbers and option designators for specifying. You must use the complete model numbers listed i the Kwik Office Price List.

Include only Kwik Office models on your order. Any orders containing non-Kwik Office products will be treated as such and entered at standard lead times. Indicate clearly at the top of your order “Kwik Office.”

Changes and Cancellations:

No changes or cancellations will be accepted after order entry for Kwik Office products.

Order Size:

The Kwik Office program has a limited weekly volume capacity, with orders being entered on a first come, first served basis. Contact Customer Service for availability.

Sustainability

Enhancing the Home We All Share

Kwik Office Program ➤See page 4
Locking Information 6
Casegoods at a Glance 7

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤Find more specific details regarding the environmental aspects of our product offerings at: **www.kimballoffice.com**

ANSI/BIFMA level™
100% of the products manufactured by Kimball Office are level® certified. We offer the most sustainable portfolio in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet and exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

ecoScorecard℠
Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:
- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification
Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:
- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:
- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:
- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

SCScertified™ INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality
One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

Design for the Environment (DfE) is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.
➤For environmental data, visit our website at www.kimballoffice.com.

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

FSC www.fsc.org FSC® C010590
The mark of responsible forestry

FSC-Certified Wood
Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood at a 3% upcharge. Applicable models show FSCW as a finish price group designator option. Standard lead times apply to FSC orders.

ANEW

Asset Network for Education Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

Locking Information

Kwik Office Program ➤See page 4
Sustainability 5
Casegoods at a Glance 7

Locking storage units can be specified as:
- Key random
- Key specific

Black lock cores and hinged keys are identical to the ones used with systems products. KCCB*** models are for use with:
- Definition
- Priority
- Transcend

Brass lock cores and round keys are for traditional casegoods. KCCE*** models are for use with:
- Innsbruck
- Senator
- President

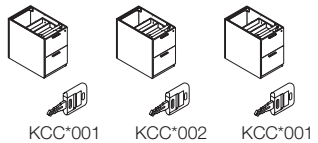
Silver lock cores and round keys are matte nickel. These lock cores and keys are identical to the ones used with Hum. Minds at Work. series. KCCG*** models are for use with:
- Definition
- Fluent
- Priority

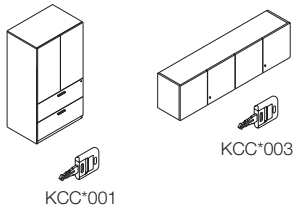
Chrome lock cores and round keys are shiny, polished chrome. KCCH*** models are for use with:
- Definition

Key Random Option:

When key random option is selected, key numbers will be assigned arbitrarily at the factory with key numbers ranging from KCCB001 to KCCB300 (black), KCCE001 to KCCE100 (brass), KCCG001 to KCCG100 (silver), or KCCH080 to KCCH099 (chrome).

Randomly numbered lock core(s) will ship standard along with your order for field installation.
Exception: Randomly numbered lock cores on Kwik Office models are shipped installed.



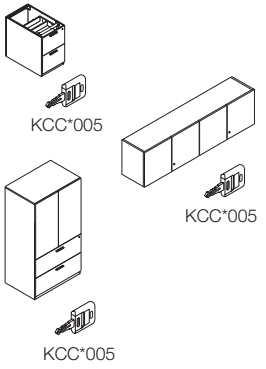


With random keying, different furniture units may or may not have the same key number. If you must have all locks keyed differently or all locks keyed the same, choose the key specific option.

Key Specific Option:

When key specific option is selected, the storage unit will be pre-drilled to accept a lock core; however, no lock cores will be shipped standard with the unit. If lock cores are standard on the unit, the price of the unit is reduced by the price of the lock core or cores.

You must specify lock core(s) separately for key specific option; specify any key number from KCCB001 to KCCB300 (black), KCCE001 to KCCE100 (brass), KCCG001 to KCCG100 (silver), or KCCH080 to KCCH099 (chrome).



To key all the furniture units in a workstation or department alike, choose the key specific option and order the quantity of locks needed for your installation.

Standard key that ships with the lock core can be used for the initial installation of the lock core in the field.

Change key model KCCB1CK allows removal of lock cores within these key ranges:
KCCB001–KCCB300
KCCE001–KCCE100
KCCG001–KCCG100
KCCH080–KCCH099

IMPORTANT: A change key, specified separately, is required to remove lock cores in the field.

Master key model KC2GMK will unlock any lock within these key ranges:
KCCB001–KCCB300
KCCE001–KCCE100
KCCG001–KCCG100

Model/Key Range *Price*

Black Lock Cores
KCCB001 to KCCB300 $22

Brass Lock Cores
KCCE001 to KCCE100 $22

Silver Lock Cores
KCCG001 to KCCG100 $22

Chrome Lock Cores
KCCH080 to KCCH099 $22

Change Key
KCCB1CK $6

Master Key
KC2GMK $12

How to Specify

❶ Specify exact key number for lock cores as the model number or model number for change or master key

Features

Sustainability ➤See page 4
Product Information 34
Application Guidelines 48
Pricing 54

Fully assembled and modular components are available to create workwalls, L-configurations, and U-configurations. Modular components are compatible with fully assembled models.

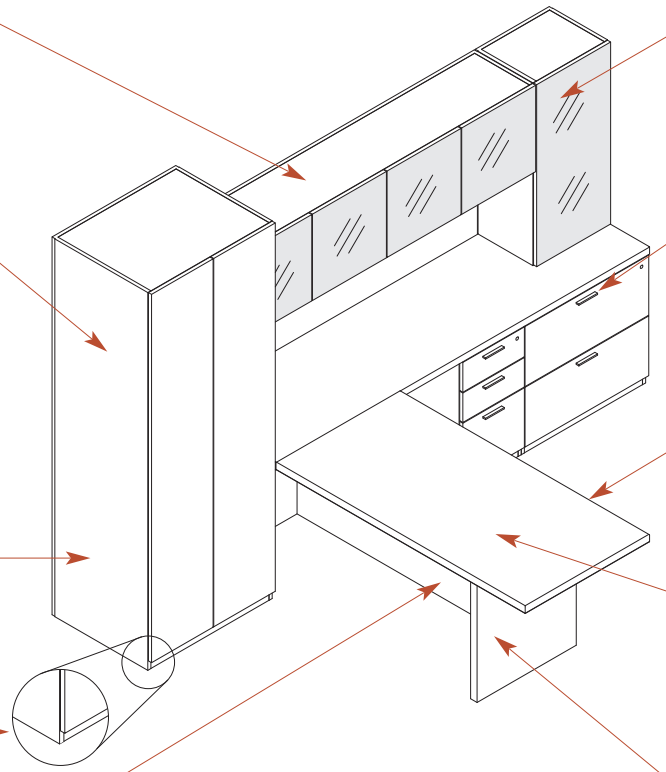
Exterior surfaces are available in the following veneers:
- Cherry (plain sliced, slip matched)
- Maple (plain sliced, slip matched)
- Walnut (plain sliced, book matched)
- Sapele (quarter sliced, slip matched) premium veneer; upcharge applies

Veneers are carefully selected and matched to assure proper balance and consistency.

Vertical storage, available 67½"H and 79½"H, feature a finished back for placement in open or glass-wall applications.

Base rail detail

Modesty panels can be added for privacy and design detail. Modesty panels can be placed flush or inboard of the approach side for a recessed look. Inset a panel between undersurface storage for a breakfront appearance. Technology modesty panels fold down to access wall power and data.



Overheads, highback organizers, and set-on-surface storage is available two heights to align with vertical storage. Select units are available with writable-glass doors.

Pulls are standard on all undersurface storage and drawers on vertical storage. All doors feature a touch latch that provides a clean contemporary appearance.

Worksurface rims are wood and 5/16"-thick with mitered corners. Select from six rim profiles; profiles appear on all four edges of the worksurface.

Worksurfaces are available in rectangular, arc, angled, U-shaped, and P- shaped. They are 1 9/16"-thick, 3-ply, balanced construction and available in wood or high-pressure laminate (HPL) with a wood rim.

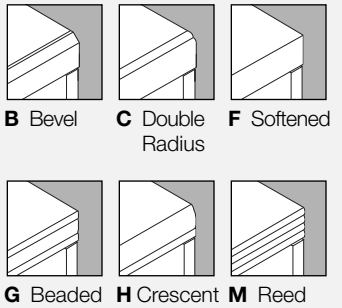
Several pedestal, end panel, and metal leg styles are available to support extension surfaces.
➤See page 26 for overview.

Materials:

Worksurfaces
- Wood with wood rim
- Laminate with a wood rim

Storage
- Wood

Rim Profiles:



B Bevel **C** Double Radius **F** Softened

G Beaded **H** Crescent **M** Reed

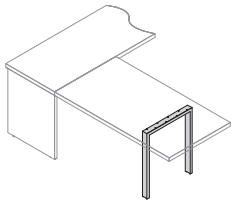
Extension Worksurface Support

Overview

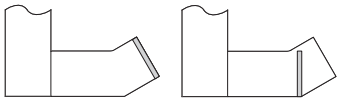
Overview	➤See page 25
Product Information	34
Application Guidelines	48
Pricing	54

Primary support for modular extension worksurfaces, such as rectangular, angled, U-shaped, and P-shaped worksurfaces that extend out from an adjacent worksurface, include:

- End panels
- Pedestals
- U-legs
- O-Legs
- Elite legs
- Column bases
- Half-cylinder bases



Worksurface can overhang a support pedestal or leg up to a maximum of 18" to accommodate a larger worksurface. Support depth does not have to match the worksurface depth on an overhang application.



Angled worksurfaces are designed to be supported one of two applications

- Worksurface can overhang the end panel or leg, or
- Support can be placed at the end of the angled surface.

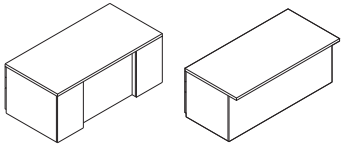
Assembled Casegoods

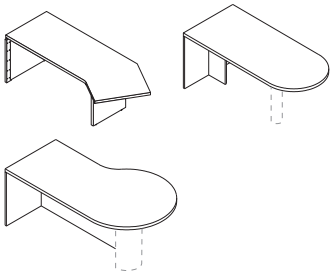
Overview	➤See page 25
Typical Configurations	27
Application Guidelines	48
Pricing	54

Details

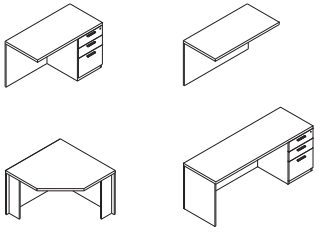


Breakfront Recessed

Assembled single- and double-pedestal desks are available in two styles: breakfront and recessed.

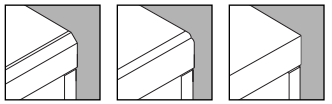


Angled, U-shaped, and P-shaped assembled desks are available to serve as main worksurfaces.

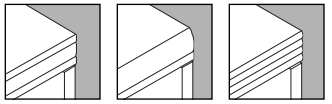


Returns, bridges, credenzas, and corner units are available.

Worksurfaces are 1 9/16" thick, 3-ply, balanced construction and available in wood or high-pressure laminate (HPL) with a wood rim.



B Bevel **C** Double Radius **F** Softened



G Beaded **H** Crescent **M** Reed

Worksurface rims are 5/16" thick, with mitered corners. Rim profile appears on all four edges of the worksurface.

Joints are securely fastened with screws, dowels, and concealed fasteners to ensure maximum strength.

Drawer sides and back are ½" thick with veneer faces. Bottoms are ¼" thick with veneer faces. Interiors are sealed, sanded, and finished with a clear, durable topcoat.

One wood drawer divider is provided with each box/box/file pedestal.

Drawer suspensions feature black, progressive action slides with precision steel ball bearings to ensure long lasting, quiet, and smooth operation. Box and file drawer suspensions are full extension.

Black filing rods are standard in all file drawers and accommodate various filing requirements.
➤See page 49 for filing capabilities.

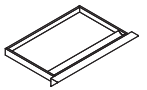
Face-mounted locks are standard on all desks, credenzas, returns, and undersurface pedestals. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.
➤See page 6 for locking information.

A variety of factory-installed worksurface grommet and cut-out options are available. Upcharge applies. Grommets are also available for field installation.
➤See page 52 for factory-installed grommet options.
➤See page 53 for factory-installed cut-out options.

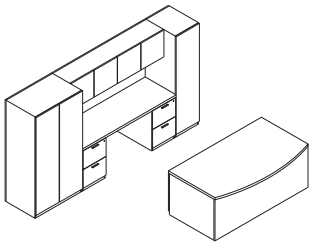
Levelers are black with 1½" adjustment range.

Several pull options are available.
➤See page 50.

Connections



Center drawers are available in three sizes for field installation into assembled and modular configurations.



Assembled models are fully compatible with modular components and storage.

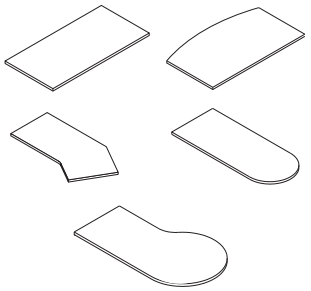
Related Products

Accessories, such as keyboard drawer, tackboard, center drawers, and adjustable keyboard products are available to add functionality to workspaces.
➤See the Perks Price List.

Keyboard kits that comply to ANSI/HFES Method 2 are available.
➤See the Perks Price List.

Overview	➤See page 25
Typical Configurations	27
Application Guidelines	48
Pricing	65

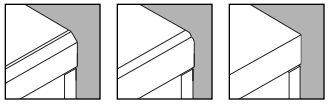
Details



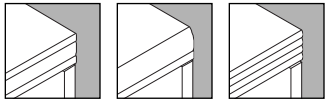
Worksurfaces shapes include:
- Rectangular
- Arc
- Angled
- U-shaped
- P-shaped

Worksurfaces are $1^{9}/_{16}$" thick, 3-ply, balanced construction and available in wood or high-pressure laminate (HPL) with a wood rim.

Modular worksurfaces are sized in 6" increments that correspond to Definition pedestals and storage.



B Bevel **C** Double Radius **F** Softened



G Beaded **H** Crescent **M** Reed

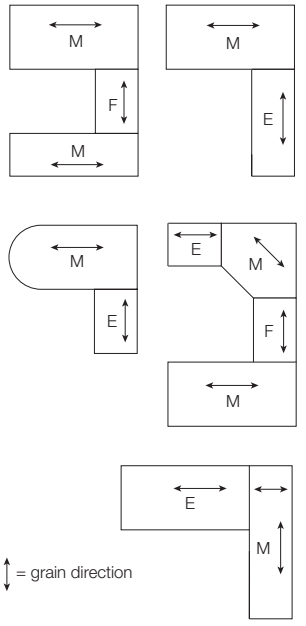
Worksurface rims are $^{5}/_{16}$" thick, with mitered corners. Rim profile appears on all four edges of the worksurface.

A variety of factory-installed worksurface grommet and cut-out options are available. Upcharge applies. Grommets are also available for field installation.
➤See page 52 for factory-installed grommet options.
➤See page 53 for factory-installed cut-out options.

Connections

IMPORTANT: Fully assembled models and modular components may be used together in the same configuration.

➤See modular support pages 36–37 for support options and guidelines.

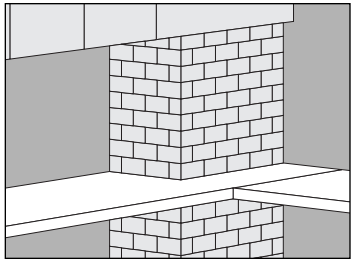


Attachment brackets, based on the application specified—main, filler, or extension—are standard on all worksurface shapes. If the application or position of the worksurface needs to be changed, flat brackets are available to order separately.

24"D rectangular worksurfaces are interchangeable; however, to receive the correct brackets, the application—main (M), extension (E), or filler (F)—must be specified. Main surfaces receive no attachment hardware; extension surfaces receive 2 flat brackets; and filler surfaces receive 4 flat brackets. Separate models are available for lengthwise grain or front-to-back grain direction.

30" and 36"D rectangular worksurfaces are available as separate models for main or extension applications. The appropriate brackets will ship with the model. Grain direction runs lengthwise.

Planning Factors



Worksurfaces can be scribed on site to conform with oblique angles, irregular column placement, and historical preservation guidelines. These are just a few instances where this capability becomes an asset.

Modular Support

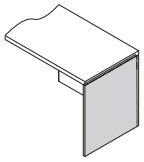
End Panels and Support Panels

Overview	➤See page 25
Typical Configurations	27
Application Guidelines	48
Pricing	71

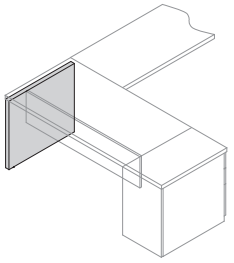
Details

End panels are available to support the end of a worksurface where there is no pedestal.

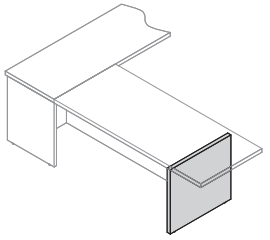
Support panels (model DF1228SW) provide additional support for long unsupported spans.



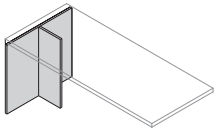
1 3/16"W end panels (models ending in EPW) are available in 3 depths: 23", 29", and 35". EPW end panel are sized 1" less deep than worksurfaces to accommodate modesty panel or filler strip.



1 9/16"W end panels (models ending in EPDW) are available in 3 depths: 24", 30", and 36". They are compatible with a partial modesty panel and a pedestal for support. They are used on the opposite side of the supporting pedestal to create a single-pedestal desk application. They include a bracket to attach to a bridge or return.



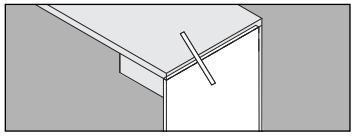
1 9/16"W end panels (models ending in EPEW) are available in 3 depths: 24", 30", and 36". They support the end of rectangular or angled extension worksurface.
➤See page 26 for application guidelines for extension worksurfaces.



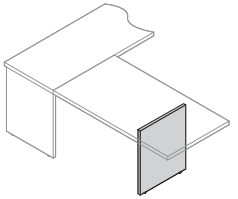
T-leg end panels can also be used to support the end of a worksurface where there is no pedestal. They are sized to the full depth of a worksurface and are recommended for use in open plan/freestanding applications. Modesty panel cannot be used in conjunction with T-leg end panels.

Connections

Support can be placed where needed without the limitations of predrilled or predetermined locations.

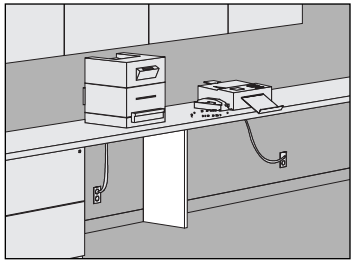


1 3/16"W end panels (models ending in EPW) attach to the worksurface with an angle bracket which prohibits the use of adjacent undersurface components or keyboard products.



To accommodate a longer worksurface, the surface can overhang support at 18" maximum. The end panel or leg depth does not have to match the worksurface depth in a overhang application. When inset, a 24"D support can be used with a 30" or 36"D surface; a 30" support can be used with a 36"D surface.

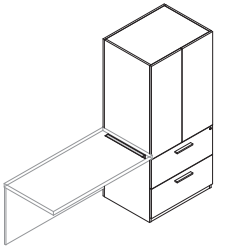
Planning Factors



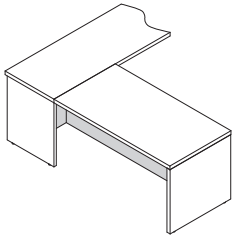
Consider the load a worksurface will carry when planning support. Additional support is recommended for surfaces where heavy equipment will be placed. 12"D support panel (model DF1228SW) can be used for additional support as shown above.

The maximum recommended span for an unsupported worksurface is 60"; longer distance requires additional support.

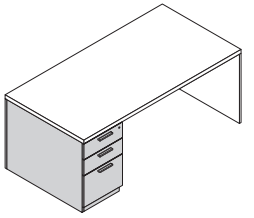
Related Products



Metal worksurface support bracket (model DFWBVS) is available to attach 24"D worksurfaces to vertical storage in place of an end panel.
➤See page 106.



Partial and full modesty panels are available
➤See page 38.



Undersurface pedestals can support the end of worksurfaces in any application. They are available in open back and finished back in select models.
➤See page 42.

Modular Support

Legs and Cylinder Bases

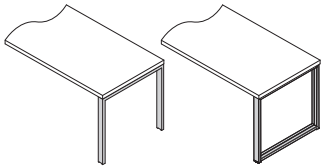
Overview	➤See page 25
Typical Configurations	27
Application Guidelines	48
Pricing	74

Details

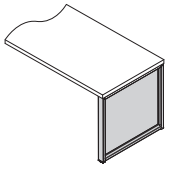
Support legs for extension worksurfaces, such as rectangular, angled, U-shaped, and P-shaped worksurfaces that extend out from an adjacent worksurface, includes:

- U-legs
- O-Legs
- Elite legs
- Column legs

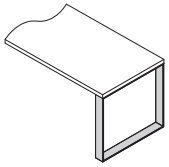
Pedestals, half-cylinder bases and end panels (models ending in EPEW) can also be used to support extension worksurfaces.



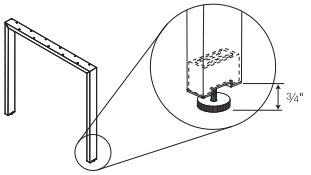
U-legs and O-legs are powder-coated steel and are available in platinum metallic, carbon metallic, designer white, and cinder paint. The U- and O-legs are fixed at 27¾"H, are 2⅜"W, and available in 24", 30", and 36" depths.



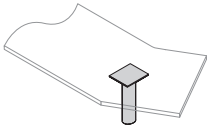
O-leg is also available with factory-installed veneer insert.



Elite legs are polished stainless steel, which is a compatible match to a polished chrome finish. Legs are fixed at 27¾"H, are 3½"W, and available in 30" and 36" depths.



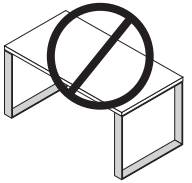
Black plastic leveler insert is located at the bottom of each U-leg, O-leg, and elite leg. The glide stem is 1" long and provides ¾" of adjustment.



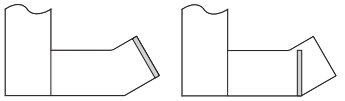
Column legs and half-cylinder bases can be used to support extensions and also desk applications with appropriate support on the opposite end. They come in metal round and square, wood round and half cylinder styles. Finishes are available in wood, chrome, and several paint finishes.

Connections

U-leg, O-leg, and elite leg frames are attached directly to underside of worksurface with screws.



IMPORTANT: U-legs, O-legs, and elite legs are not for use in freestanding desk applications. They cannot support set-on-surface storage applications.



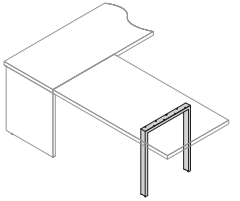
Angled worksurfaces are designed to be supported one of two applications:

- Worksurface can overhang the end panel or leg, or
- Support can be placed at the end of the angled surface.

Column legs and half-cylinder bases must always be inset, and are typically placed about 18" from end of surface.

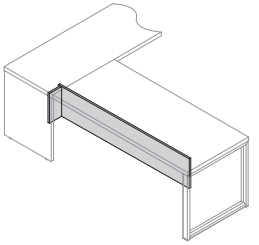
Planning Factors

The maximum recommended span for an unsupported worksurface is 60"; longer distance requires additional support.

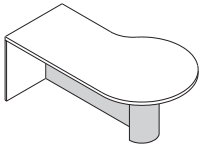


To accommodate a longer worksurface, the surface can overhang support pedestal or leg at 18" maximum. The end panel or leg depth does not have to match the worksurface depth in a overhang application. When inset, a 24"D support can be used with a 30" or 36"D surface; a 30" support can be used with a 36"D surface.

Related Products



Partial and full modesty panels are available for use with metal legs. There will be an open space detail between the leg and where the modesty ends. Approximate opening will be 3⅝" for the U- and O-legs and 2⅜" for the elite leg.
➤See page 39 for modesty panel guidelines.



Modesty panels can be used with a half cylinder base. Follow modesty panel guidelines to calculate the desired modesty width.

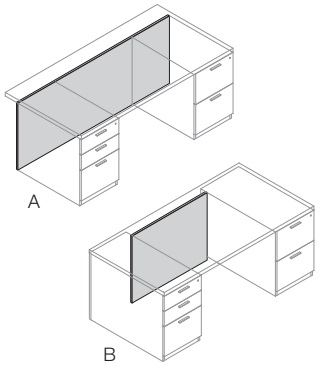
Modesty panels are not for use with column legs.

Modesty Panels and Back Panels

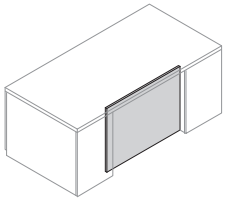
Overview	➤See page 25
Typical Configurations	27
Application Guidelines	48
Pricing	75

Details

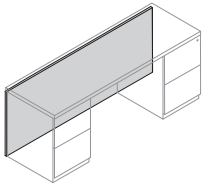
Modesty panels are used in conjunction with undersurface components to create a finished back (back panel) or enclosed kneewell. Modesty panels are designed for a specific application and are not universal. To assure proper fit and attachment hardware, modesty panels must be used in their correct application. They are fully finished on both sides.



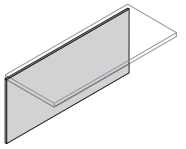
Modesty panels for modular casegoods mount underneath tops; hardware for attachment is included. Modesty panels can be specified to create a recessed modesty panel (A), or a breakfront effect (B) as shown in the desks illustrated. The finish of a modesty panel can either match or contrast with top.
Note: When creating a breakfront effect (B), the modesty panel is attached to the sides of the pedestals creating handed units.



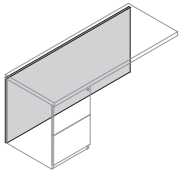
Kneewell modesty panels are available in full and partial height to create a fully enclosed kneewell for modular double-pedestal desks or kneespace credenza only. To select the correct modesty panel width, deduct the width of the pedestals from the worksurface width. They attach to the side of the pedestals creating handed units.



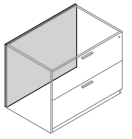
Desk/credenza modesty panels are fully finished on both sides and used to span the full width of a component desk or credenza only.



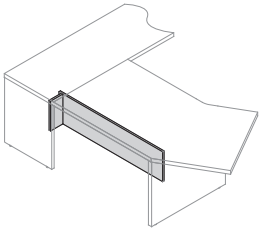
Bridge modesty panels are used in conjunction with component worksurfaces to create a modular bridge unit; can be used to create bridges only.

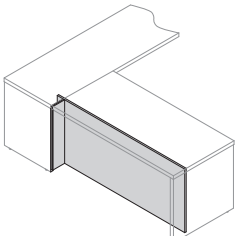


Return modesty panels are used in conjunction with component worksurfaces and undersurface pedestals to create a modular return unit; can be used to create returns only.



Pedestal back panels attach to undersurface pedestals to provide a finished back. They are sized to fit individual pedestal components.



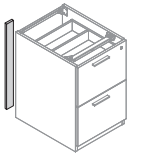


Modesty panels are available for rectangular and angled extension worksurfaces in partial-height (12⅝"H) and full height (27¼"H) models. They include the modesty panel and a 6¾" wing panel that wraps to meet the adjoining end panel or storage. The modesty panel will be wider than the specified worksurface width as it extends into the kneespace of the adjoining unit.

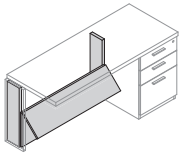
Planning Factors

Modesty panel sizes are specific to the application and type of support used. Options are available for veneer end panel and leg applications.
➤See page 39 for Modesty Panel Selection Guide.

Related Products



Filler strips are available to use when an open-back pedestal is placed against a wall and a modesty panel is not desired. They fill the 1” gap created by the difference in worksurface and pedestal depths.



Technology modesty panels are available.
➤See page 41 for details.

Modesty Panels

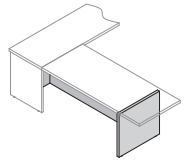
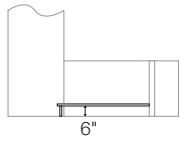
72"	Partial-height	DF5513MPDW	DF5213MPDW
78"	Partial-height	DF5813MPDW	—





Additional modesty panel applications can be can be accomplished with pedestal support or by allowing the worksurface to overhang the support pedestal, end panel, or leg support. Follow the guidelines of 60" unsupported span maximum, and a maximum overhang of 18". The modesty panel width will always extend into adjoining unit 2".

To calculate a modesty for an overhang application using a 1 9/16" (EPEW) end panel instead of a pedestal, follow the same guideline you would for a pedestal that is the same width as the inset.
For example: 72" worksurface with a 15" pedestal requires a DF6013MPREW modesty panel.

Partial-height modesty panel must always be used in the single-pedestal application shown at left. The unit can attach to a bridge or return, or be freestanding. A 1 9/16" end panel (EPEW) can be substituted for the pedestal allowing the top to overhang on the end. The 60" maximum span, and 18" maximum overhang rule applies.

Modesty Panels

Selection Guide, continued

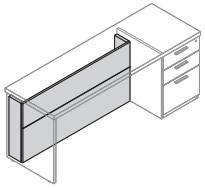
Technology Modesty Panels

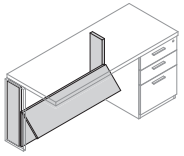
Overview	➤See page 25
Typical Configurations	27
Application Guidelines	48
Pricing	82

Details



Technology modesty panels are available to provide wall access for modular workwalls, single-pedestal credenzas (shown above), bridges, and returns. Assembled bridges and returns without a modesty panel will also accept the technology modesty.

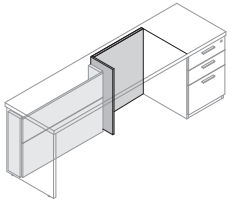
Widths are available up to 60".



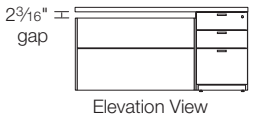
Face of unit is hinged at the center to fold down to access wall.

Connections

Technology modesty panel is not freestanding and must be secured between storage, end panels, or support panels.



For kneewells larger than 60" use a worksurface support panel (DF1228SSW) and a standard modesty panel for use with technology modesty applications.



Elevation View

Gap between the top of the modesty and underside of the worksurface of 2 3/16" allows cords from adjoining extensions or main worksurfaces to exit into the cavity.

Filler strip (model CPFS) can be used to enclose the gap when used with an end panel (model EPEW).

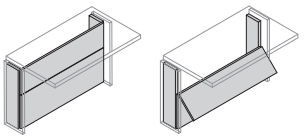
Modesty panel can be used to enclose the cavity if used in an open plan.

Plan View

When mounted flush with the back of storage or end panel, the modesty creates a 5 7/8" cavity to store cords. The unit can be mounted forward to create a larger cavity to the wall.

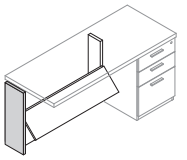
Planning Factors

Specify the same size modesty panel as the kneespace width into which it will fit.



Bridge worksurfaces, including assembled bridge without a modesty panel (models ending in BEX) and modular bridge surfaces, can be placed above a technology modesty panel. Two 12"D worksurface support panels are required to which the technology modesty panel will attach. The technology panel and the support panels do not attach to or provide support for the bridge; bridge is supported by adjacent worksurfaces with flat brackets.

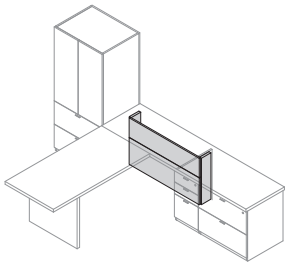
To create the bridge configuration shown above, specify:
- One DF2448BEX
- One DF4825MPTW
- Two DF1228SSW



Returns created from modular components and assembled returns without a modesty panel (models ending in FX) can accommodate a technology panel. One 12"D worksurface support panels is required to mount on the open end. Order the modesty to correspond with the kneespace width for assembled returns without modesty.

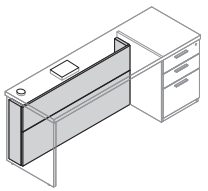
To create the return configuration shown above, specify:
- One DF2442RREFX
- One DF2425MPTW
- One DF1228SSW

For modular returns, calculate the kneespace opening to determine the modesty panel width. For example: 72"W worksurface – 15"W pedestal = 57"W technology modesty panel. Specify:
- One DF2472WSS4
- One DF5725MPTW
- One DF1228SSW



For workwalls, technology panels are available in widths up to 60" to attach to storage and/or support panel on either side.

Related Products



Factory-installed worksurface grommet (G7 and G19) and cut-out (G20) options are designed to allow cords to fall directly into the technology modesty panel's cavity. Power/data center (99KPDCAM) is specified separately.
➤See the Perks Price List for power/data center and field-installed grommets.

Undersurface Storage

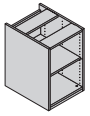
Overview	➤See page 25
Typical Configurations	27
Application Guidelines	48
Pricing	83

Details

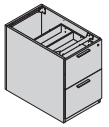
Pedestals can support a worksurface in a desk, return, credenza, or work-wall application. Top of pedestals are open to attach under the worksurface. Bottom of pedestals with drawers are open for electrical access.

Open-back pedestals feature a partially unfinished sub-back that acts as a counter weight for freestanding applications. Sub-back is 12⅛"H on lateral files and 14⅛"H on file/file and box/box/file units. Available in widths of 15", 18", 30", and 36"; depths available are 23", 29", and 35". Drawer configurations include:

- Box/box/file
- File/File
- Pencil/pencil/pencil/file
- Two lateral file drawers
- Open storage



Open-back open storage pedestals have an interior finished sub-back that stops 2" from top of pedestal to accommodate cable exit. These models require a back panel or modesty panel for open, freestanding applications.



Finished-back pedestals include a finished back panel and are the same depth as worksurfaces. They allow convenience when specifying for desks and extensions where a finished back is desired on the individual pedestal. They have a built in counterweight for freestanding applications. Finished back pedestals are available in 15" and 18" widths and in 24", 30", and 36" depths. Drawer configurations:

- Box/box/file
- File/File

Drawer sides and back are ½" thick with veneer faces. Bottoms are ¼" thick with veneer faces. Interiors are sealed, sanded, and finished with a clear, durable topcoat.

One wood drawer divider is provided with each box/box/file pedestal.

Drawer suspensions feature black, progressive action slides with precision steel ball bearings to ensure long lasting, quiet, and smooth operation. Box and file drawer suspensions are full extension.

Black filing rods are standard in all file drawers and accommodate various filing requirements.
➤See page 49 for filing capabilities.

Face-mounted locks are standard on undersurface pedestals. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.
➤See page 6 for locking information.

Several pull options are available.
➤See page 50.

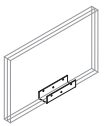
Levelers are black with 1½" adjustment range.

Mobile storage is available in several styles. All mobile pedestals include an anti-tip device and counterweight.

- Cushion-top mobile pedestal provides occasional seating, storage and stows under surfaces.
- Box/box/file and file/file mobile pedestals feature an organizer tray in the finished top panel; not recommended for use under a worksurface.
- Pencil/box/file pedestal has a finished top and can be used under worksurfaces.
- Utility table can function as a serving cart, overhead projector stand, or mobile cabinet. Black handles are on both ends. Does not include an anti-tip device or counterweight.

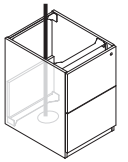
Connections

Open-back pedestals do not include a back panel and allow access to electrical in the wall. They are 1" less deep than worksurfaces to accommodate optional back or modesty panels for open, freestanding applications. When placed directly against a wall, a filler strip is recommended for the exposed end.



Ganging brackets can be used to attach 2 or more cabinets together side by side. They do not deface the cabinet and are optional.

Planning Factors

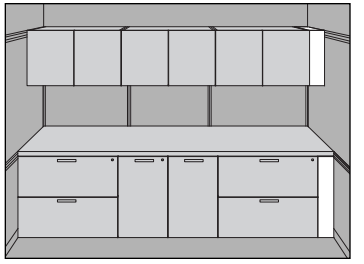


Cords and cables may routed behind the drawers of both open-back and finished-back pedestals.

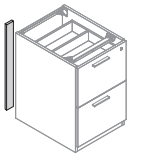
- 23"/24"D lateral files have a 5" clearance; file/file and box/box/file units have a 3" clearance.
- 29"/30"D units have a 2" clearance.
- 35"/36"D units have an 8" clearance.

➤See page 51 for additional cord management information.

Related Products



Filler panels can be specified to build out cabinetry for a custom fit. Panels are scribed on site.

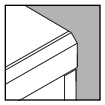


Filler strips are available to use when an open-back pedestal is placed against a wall and a modesty panel is not desired. They fill the 1" gap created by the difference in worksurface and pedestal depths.

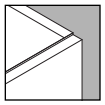
Freestanding Files & Bookcases

Overview	➤See page 25
Typical Configurations	27
Application Guidelines	48
Pricing	88

Details



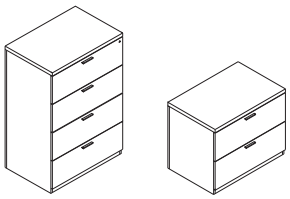
With Rim



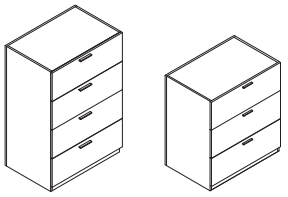
Without Rim

Freestanding lateral files are available with two finished top options:
- With rim profile
- Without a rim profile

Finished backs and an interlock mechanism are standard on all models. Interlock mechanism allows only one drawer to open at a time to help prevent tipping.



Models with a rim profile on four sides are available in two-drawer and four-drawer models.



Models with a finished top but no rim are available in three-drawer and four-drawer models.

Face-mounted lock is standard. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.
➤See page 6 for locking information.

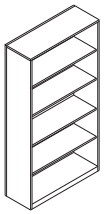
Drawer sides and back are ½" thick with veneer faces. Bottoms are ¼" thick with veneer faces. Interiors are sealed, sanded, and finished with a clear, durable topcoat.

Drawer suspensions feature black, progressive action slides with precision steel ball bearings to ensure long lasting, quiet, and smooth operation.

Black filing rods are standard in all file drawers and accommodate various filing requirements.
➤See page 49 for filing capabilities.

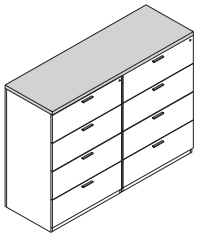
Several pull options are available.
➤See page 50.

Levelers are black with 1½" adjustment range.



Freestanding bookcases are available in 30" and 36" widths and five heights, ranging from 28¾" to 79¼". Shelves are ¾" thick and adjustable. Tops are fully finished, but have no rim profile. Backs are finished.

Connections



Component tops are available for freestanding bookcases and lateral files without a rim profile, if one is desired. Top will overhang bookcase front by 1". Component tops can span more than one unit.

Related Products

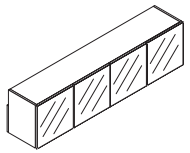
Additional shelves for bookcases may be specified separately.
➤See page 107.

Overhead Storage

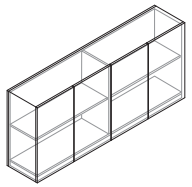
Overview	➤See page 25
Typical Configurations	27
Application Guidelines	48
Pricing	90

Details

Hinged-door overhead storage are available in two heights—18" and 30"—and several widths ranging from 30" to 72" for wall-mount or suspended applications.



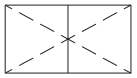
18"H units are available with wood or writable glass doors.



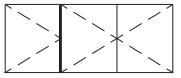
30"H units are available with wood doors.

Wood doors feature one set of matching grain pattern.

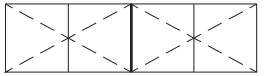
Glass doors, available on wall-mount 18"H models only, are have a writable, ice gloss finish (202G) and feature a clear anodized frame (486).
Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.



2 door



3 door

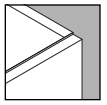


4 door

Door configurations:
- 30"W and 36"W overhead cabinets have 2 doors.
- 42"W, 48"W, and 54"W overhead cabinets have 3 doors with a single door on left.
- 60"W, 66"W, and 72"W overhead cabinets have 4 doors.

A support panel divides the cabinet into two separate sections as indicated by the bold line.

Apron rail, inset behind the bottom edge of the doors, accommodates and conceals task lights.

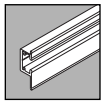


Tops of cabinets are fully finished, however, they have no rim profile. Component tops may be used if a rim profile is desired.

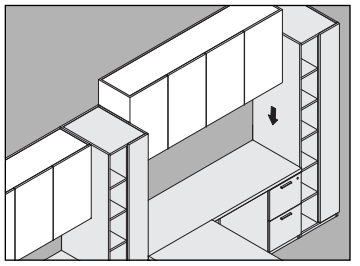
Back panel is ¾-height on wall-mount models; suspended models feature a fully finished, enclosed back.

Connections

Wall-mount overhead cabinets are hung with wall-mount Traxx brackets.
- 30", 36", and 42"W overheads must be supported by at least two solid attachment points on a wall.
- 48" and 54"W overheads must be supported by at least three solid attachment points on a wall.
- 60", 66", and 72"W overheads must be supported by at least four solid attachment points on a wall.

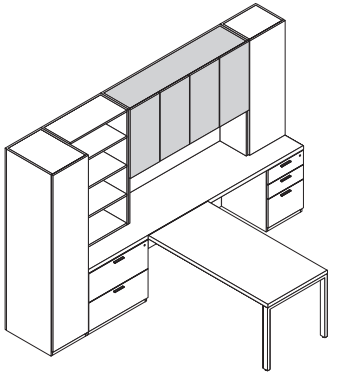


IMPORTANT: Wall-mount Traxx brackets must be specified separately for wall-mount models. Brackets are 72"W and can be scribed in the field to accommodate cabinets less than 72"W.

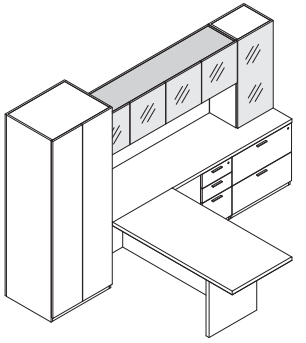


Suspended overhead cabinets can be suspended between and attached to set-on-surface storage cabinets, vertical storage cabinets, or a combination of both. Attachment bracketry is included.

Planning Factors

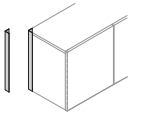


Overhead storage can be used in conjunction with highback organizers, set-on-surface storage, and vertical storage.

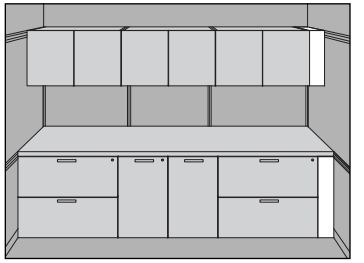


Units of different heights can be combined. Shown here is an overhead cabinet suspended between a 38"H set-on-surface cabinet and 79¼"H vertical storage unit.

Related Products



Filler strip may be specified for the back edge of a wall-mounted cabinet to conceal the exposed Traxx bracket.



Filler panels can be specified to build out cabinetry for a custom fit. Panels are scribed on site.

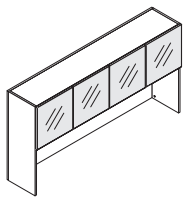
Highback Organizers

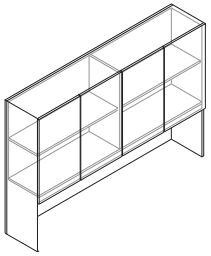
Overview	➤See page 25
Typical Configurations	27
Application Guidelines	48
Pricing	94

Details

Hinged-door highback organizers are available in two heights: 38" and 50".



38"H units are available with wood doors or writable glass doors. Wood door units range from 54" to 108"W; writable glass door units range from 54" to 72"W.



50"H units are available with wood doors in widths ranging from 54" to 72".

Wood doors feature one set of matching grain pattern.

Glass doors, available on wall-mount 18"H models only, are have a writable, ice gloss finish (202G) and feature a clear anodized frame (486).
Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.

3 door

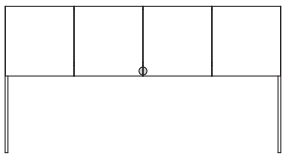
4 door

6 door

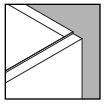
Hinged-Door Configurations:
- 54"W overhead storage cabinets have 3 doors with a single door on left.
- 60"–84"W overhead storage and highback organizers have 4 doors.
- 96"–108"W highback organizers have six doors.

A support panel divides the cabinet into two separate sections as indicated by the bold line.

Apron rail, inset behind the bottom edge of the doors, accommodates and conceals task lights.



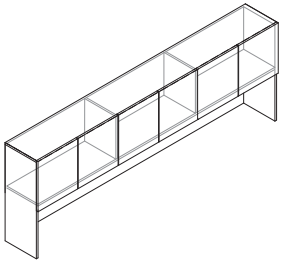
2"-diameter, black plastic grommet is standard on highbacks at top behind apron rail to manage task light cords.



Tops of cabinets are fully finished, however, they have no rim profile. Component tops may be used if a rim profile is desired.

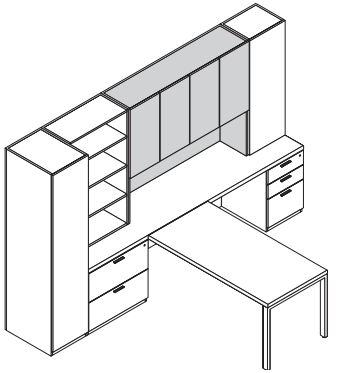
Connections

IMPORTANT: Highback organizers are for use on top of a worksurface only; not for freestanding applications. Highback organizers require proper support, such as pedestals or end panels, directly under the worksurface where the end panel of the highback rests.

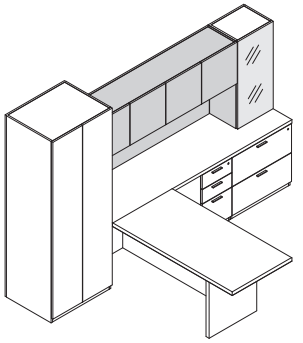


108"W highback organizer consists of two sections, shipped in separate cartons; assembly is required.

Planning Factors

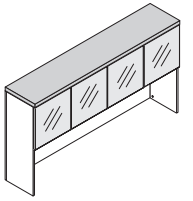


Highback organizers can be used in conjunction with set-on-surface storage and vertical storage:
- 38"H units when placed on a surface will line up with 67½"H vertical storage.
- 50"H units line up with 79¼"H vertical storage.



Units of different heights can be combined. Shown here is highback organizer between a 38"H set-on-surface cabinet and 79¼"H vertical storage unit.

Related Products



Component tops
➤See page 108.

LED lights, fluorescent task lights, tackboards, power tackboards, and slatwall tiles are available.
➤See the Casegoods Price List.

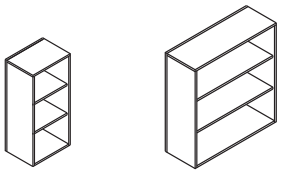
108"W highbacks accommodates two AC4618 tackboards or smaller and two KAC49 or KCU33TLKL task lights or smaller.

Set-on-Surface Storage

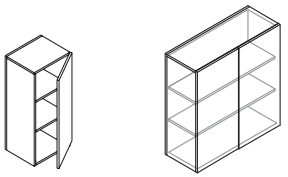
Overview ➤See page 25
Typical Configurations 27
Application Guidelines 48
Pricing 98

Details

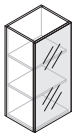
Set-on-surface storage is available in open bookcase, hinged door, and organizer styles.



Open bookcase models are available 18", 30," or 36"W and 38" or 50"H.



Wood door storage is available 18", 30," or 36"W and 38" or 50"H. 18"W models feature a single door which can be specified to hinge right or left; 30" and 36"W feature double-doors. Doors feature a touch latch.

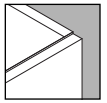


Writable glass hinged-door models are available in 38"H only. Glass doors are non-locking and feature a touch latch.

Organizer models are 18"W available and 38" or 50"H.

Doors are available in wood and writable glass. Doors feature a touch latch. Wood doors are standard as non-locking, but field-installed lock options are available. Glass doors are non-locking.
➤See page 6 for locking information.

Shelves are ¾" thick and adjustable 38"H bookcase and hinged-door units have two adjustable shelves; 50"H bookcase and hinged-door units have three shelves. Organizers features 5 shelves in the bottom section; 50"H organizers also have one adjustable shelf in the upper section.



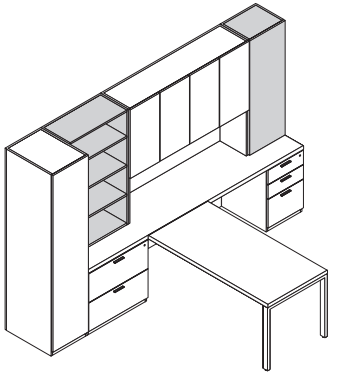
Tops of cabinets are fully finished, however, they have no rim profile. Component tops may be used if a rim profile is desired.

Connections

IMPORTANT: Set-on-surface are for use on top of a worksurface only; not for freestanding applications.

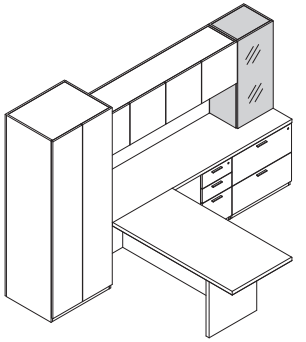
Ganging adjacent units with bolts through the side panels is recommended. Hardware ships with the unit.

Planning Factors



Set-on-surface storage is sized to be used in conjunction with highback organizers, overheads, and vertical storage:

- 38"H units when placed on a surface will line up with 67½"H vertical storage.
- 50"H units line up with 79¼"H vertical storage.



Units of different heights can be combined. Shown here is highback organizer between a 38"H set-on-surface cabinet and 79¼"H vertical storage unit.

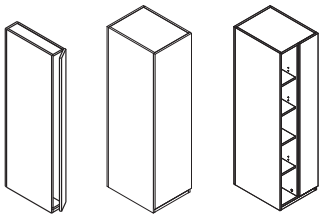
Vertical Storage

Overview	➤See page 25
Typical Configurations	27
Application Guidelines	48
Pricing	103

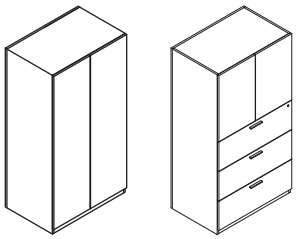
Details

Vertical storage cabinets are 24"D available in two heights—67½" and 79¼".



Single-door cabinets are available in the following configurations:

- 6" and 18"W wardrobe
- 18"W shelf storage
- 18"W combination wardrobe and open-shelf storage



Double-door cabinets are available in 30" and 36"W in the following configurations:

- Wardrobe
- Combination wardrobe and shelf storage
- All shelves
- Two-drawer lateral file with shelf-storage above
- Three-drawer lateral file with shelf storage above

Wood doors feature a touch latch.

Shelves are ¾" thick and adjustable.

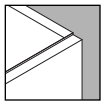
Face-mounted locks are standard on all vertical storage units. On models with lateral file drawers, the drawer unit is standard as locking; locking doors on the upper section are optional. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.
➤See page 6 for locking information.

Drawer sides and back are ½" thick with veneer faces. Bottoms are ¼" thick with veneer faces. Interiors are sealed, sanded, and finished with a clear, durable topcoat.

Drawer suspensions feature black, progressive action slides with precision steel ball bearings to ensure long lasting, quiet, and smooth operation.

Black filing rods are standard in all file drawers and accommodate various filing requirements.
➤See page 49 for filing capabilities.

Levelers are black with 1½" adjustment range.



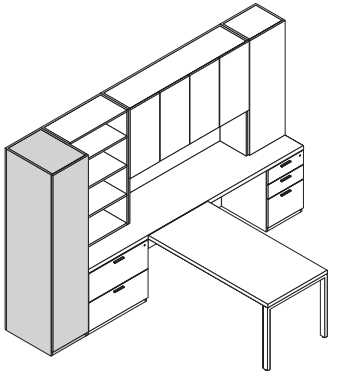
Tops of cabinets are fully finished, however, they have no rim profile. Component tops may be used if a rim profile is desired.

Backs are finished.

Connections

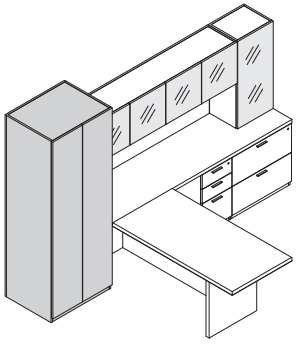
Ganging adjacent units with bolts through the side panels is recommended.

Planning Factors



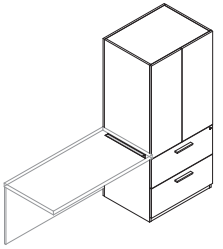
Vertical storage is sized to be used in conjunction with highback organizers, overheads, and set-on-surface storage:

- 38"H units when placed on a surface will line up with 67½"H vertical storage.
- 50"H units line up with 79¼"H vertical storage.



Units of different heights can be combined. Shown here is highback organizer between a 38"H set-on-surface cabinet and 79¼"H vertical storage unit.

Related Products



Metal worksurface support bracket (model DFWBVS) is available to attach 24"D worksurfaces to vertical storage in place of an end panel.

Integrating with Traxx and Tiles

Overview	➤See page 25
Typical Configurations	27
Cord Management	51
Pricing	54

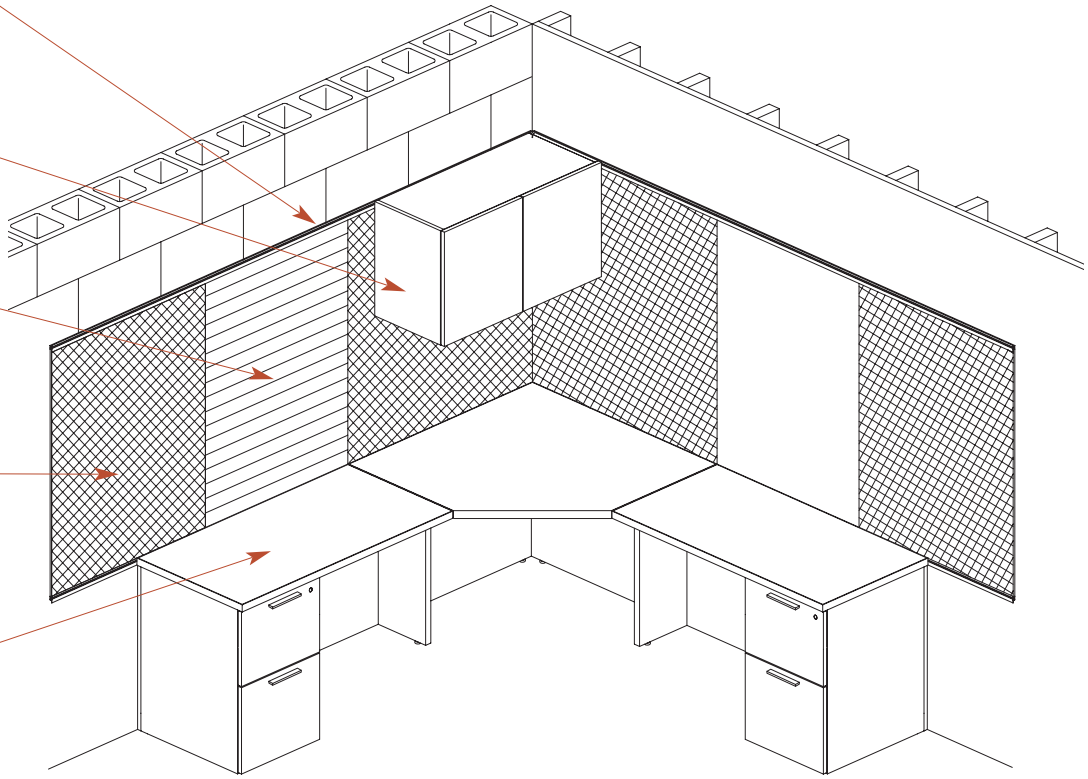
Traxx can be mounted to most interior walls, including steel or wood stud walls, masonry block, or solid masonry walls.

Overhead storage can be mounted to upper Traxx.

Tiles mount between upper and lower Traxx to add functionality to the workspace.

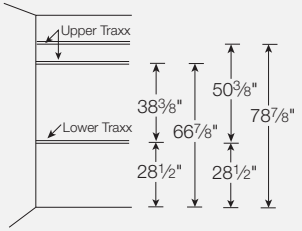
Fabric and standard marker board tiles can be scribed in the field to meet individual requirements.

Worksurfaces can be mounted to lower Traxx.



Installation Heights

Traxx should be installed at heights to correspond with the appropriate application.



Overhead Cabinets	66⅞"H
Worksurfaces	28½"H
Conferencing Solutions	78⅞"H

➤See the Systems Price List for Traxx and tiles planning and pricing information.

➤See the Systems Price List for worksurface brackets for Traxx supported worksurfaces and Cetra applications.

How to Specify

Specify pull option and finish together in one step.
If pull finish designator is a number, insert an underscore between the pull designator and the finish designator. For finish designators that are letters, put the pull and finish together without a space or underscore.

Examples:
93_487 = Aero pull, Brushed Nickel
61SF = Helix, Silver Frost metallic

Cord Management

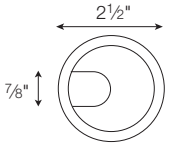
Application Guidelines

Overview	➤See page 25
Typical Configurations	27
Grommet Options	52
Cut-Out Options	53

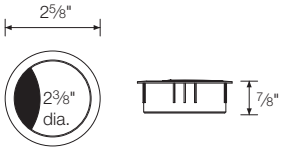
The Definition casegoods line provides several flexible options for routing and concealing cords and cables. These include:

- Factory-installed worksurface grommet options (G7 and G19)
- Factory-installed G20 cut-out for power/data center
- Technology modesty panels
- Pedestals with a deep channel behind the drawers and open bottom
- Highback organizer with cord access grommet

Factory-installed grommets and cutouts are available as an option on assembled casegoods and modular worksurfaces in predetermined worksurface locations.
➤See pages 52–53 for specification information, upcharges, and locations by worksurface shape or type.

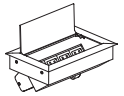


G7 metal grommets are a one-piece unit with a powdercoat finish in the following colors:
MB Matte Black
501 Platinum Metallic

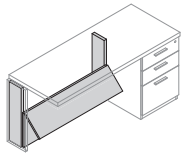


G19 metal grommet is a two-piece unit with black brush access. Top locks in place. Powdercoat finish in the following colors:
405 Designer White
501 Platinum Metallic
514 Carbon Metallic
490 Polished Chrome
487 Brushed Nickel

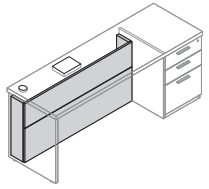
Grommets for field installation are also available (models 99KG7MB, 99KG7PL, 99KG19PL, 99KG19DW, 99K19CM, 99KB19490, and 99KG19487).
IMPORTANT: Note the location of support legs to ensure they do not interfere with grommet locations.
➤See the Perks Price List.



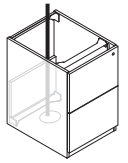
G20 cut-out is designed to accept 8⅝" x 5⅝" above-mount power/data center (model 99KPDCAM), specified separately, for applications where connections are required at the worksurface. Power/data center has an anodized aluminum finish.
➤See the Perks Price List.



Technology modesty panels provide wall access and a 5⅞" cavity to store cords. Top part is hinged and can be flipped down by the user to access wall outlets and stored cabling.
➤See page 41 for more details.



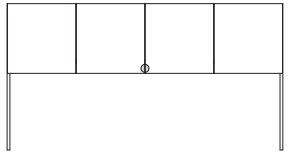
G20 cutout and power/data center can be installed over open kneespace areas and the technology modesty panel. Cords can be plugged in at the surface and exit inside the unit. Power/data center cannot be installed over pedestals.



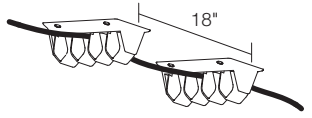
Open-back and finished-back pedestals allow cords and cables to be routed behind the drawers.

- 23"/24"D lateral files have a 5" clearance; file/file and box/box/file units have a 3" clearance.
- 29"/30"D units have a 2" clearance.
- 35"/36"D units have an 8" clearance.

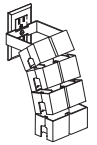
Holes can be bored in the field into pedestal sides to pass cords through the pedestal.



2"-diameter, black plastic grommet is standard on highbacks at center top behind apron rail to manage task light cords.



Perks undersurface cable manager is available to manage cords and cables under the worksurface. Cables pressure fit between loops.
➤See the Perks Price List.



Perks flexchain manages cables and power-in feeds from under the surface to the floor. Flexchain U-bracket, specified separately, mounts to a standard wall outlet to manage cords from the outlet to under the surface.
➤See the Perks Price List.

Standard Includes

- Pedestal: letter width on 66"W; legal width on 72"W
- Lock
- Black vinyl organizer tray in top box drawer

How to Specify

❶ Model
❷ Worksurface material:
LW = Laminate with wood rim
W = Wood
❸ Pedestal option:
1 = BBF
2 = FF
④ Rim profile:
B = Bevel **G** = Beaded
C = Dbl. Radius **H** = Crescent
F = Softened **M** = Reed
⑤ Pull option:
➤See page 50 for designators.
⑥ Lock option:
KRB = Key random, black core
KRS = Key random, silver core
KRC = Key random, chrome core
KS = Key specific (-$22); specify lock core separately
⑦ Grommet/cut-out option:
➤See pages 52–53.
X = No grommet or cut-out
⑧ Finish price group:
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑨ Finish designator
⑩ Rim finish price group (omit for wood worksurface):
STD = Group 1
STD2 = Group 2 (+20%)
⑪ Rim finish designator (omit for wood worksurface)

Overview ➤See page 25
Product Information 35
Cord Management 51
Abbreviation Key 3

Standard Includes

- Worksurface: widthwise grain direction
- Rim profile on all four sides
- Attachment brackets

How to Specify

❶ Model
❷ Worksurface material:
LW = Laminate with wood rim
W = Wood
③ Rim profile:
B = Bevel **G** = Beaded
C = Dbl. Radius **H** = Crescent
F = Softened **M** = Reed
④ Grommet/cut-out option:
➤See pages 52–53 for designators.
X = No grommet or cut-out
⑤ Worksurface finish price group:
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑥ Worksurface finish designator
⑦ Rim finish price group (omit for wood worksurface):
STD = Group 1
STD2 = Group 2 (+20%)
⑧ Rim finish designator (omit for wood worksurface)

Private Office Presence

With Open Plan Functionality!

Features ➤See page 124
Planning Guidelines 128
Product Information 130
Pricing 142

Supporting Change:

What works for one, doesn't always work for another! Fluent offers a variety of components that can be reconfigured as business needs change.

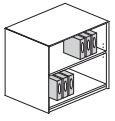
Supporting the Environment:

Like all Kimball Office products, Fluent is environmentally responsible. ➤See Sustainability Facts at right.

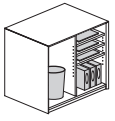
Anything but Typical:

Components are designed to allow the user to configure to meet individual needs.

For example typical storage features long shelves that only accommodate binders; Fluent storage's center divider and extra shelf combine space for project files, binders and/or trash receptacle.



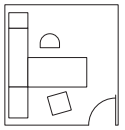
Typical Storage



Fluent Storage

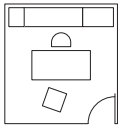
Fluent's Key Features:

① **Fluent is a modular set-in-place wood solution** that easily adapts to the environment of private or open plan workspaces.



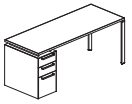
Workwall...

becomes...



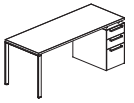
Desk and wall unit

② **Non-handed components** easily adapt to space changes. A left-hand application can become a right-hand application. Worksurfaces are rimmed on all sides and are supported by pedestal spacer bars to allow reconfiguration.



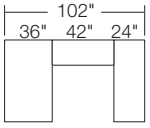
Left-hand application...

becomes...

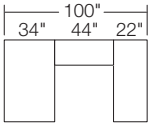


Right-hand application

③ **Fluent's smaller scale and clean lines** fit in smaller 10x10 offices. Worksurface and component sizes are scaled down to appear less massive within their workspaces, providing more maneuvering space for occupants.



Typical workstation



Fluent workstation

④ **Storage components** are finished on all sides to divide space or for use next to glass walls. Expanded product offering brings new layout possibilities to the private office.

⑤ **Technology components** easily twist into worksurface support rails. Occupants can move components to accommodate change.

Sustainability Facts:

Kimball Office is committed to providing quality products that improve indoor air quality and meet or exceed the requirements set by the U.S. Green Building Council's LEED rating system and the BIFMA Furniture Emissions Standard (FES).

Fluent was designed using EPA Design for the Environment (DfE) standards and LEED protocols. The entire line is fully IAQ compliant, even the wood components, and feature Pura®, Kimball Office's proprietary UV finish.
➤See page 374.

Painted components are MDF with formaldehyde-free paint, and meet indoor air quality requirements. Besides sustainable, low-emitting materials, Fluent is manufactured using aluminum castings with a high recycled content, including pulls, legs, grommets, support elements, and overhead shelves. Additionally, Fluent contains no PVC (polyvinyl chloride), chrome and CFCs (chlorofluorocarbons), and features LED lighting, which produces no heat and is easily taken apart for recycling.

Product Information	130

Vertical storage addresses work and personal storage requirements.

Stacking overheads on a support assembly allows variation of storage and materials.

Low storage provides more space and accommodates guests for impromptu discussions.

Workwall and workwall accessories provide additional storage options.

Screens are available to provide privacy above the worksurface. They attach to the underside of the worksurface.

Technology/support pedestals neatly conceal cords, CPUs, and personal items, and provide worksurface support.

Optional modesty panels attach to the underside of the worksurface for privacy.

Mobile storage provides flexibility and fits under worksurfaces.

Technology modesty panels feature a channel for cord storage. Partial-height allows access to electrical outlets and power/data sharing between workstations.

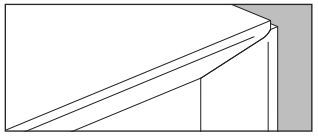
Introduction ➤See page 114
Technology Management 126
Planning Guidelines 128
Product Information 130

Fluent's signature aesthetic is the precision miter construction, which gives every unit its crisp, rectilinear features and clean, modern appearance.



Fluent uses a compound, lock-miter minifix joint that is beveled and machined with an inner step profile. This profile precisely indexes all of the mitered panels so they cannot move once fastened together.

Exterior surfaces are available in the following veneers:

- Cherry (plain sliced, slip matched)
- Maple (plain sliced, slip matched)
- Walnut (plain sliced, book matched)
- Sapele (quarter sliced, slip matched) premium veneer; upcharge applies
- Zebrawood premium composite veneer; upcharge applies
- Painted MDF

Veneers are carefully selected and matched to assure proper balance and consistency. All units are finished on all exterior sides, including the top.

Drawer sides and back are ½" thick with veneer faces. Bottoms are ¼" thick with veneer faces. Interiors are sealed, sanded, and finished with a clear, durable topcoat.

Drawer fronts are ¾" thick, 3-ply construction. Five-sided drawers allow easy removal of drawer fronts.

Wood drawer dividers are standard in all box drawers.

Drawer suspensions feature black, progressive-action slides with precision steel ballbearings to ensure long-lasting, quiet, smooth operation. Box and file drawer suspensions are full extension.

Black filing rods are standard in all file drawers and accommodate various filing requirements.

Leveling glides are 1½"H and provide 1¼" of adjustment.

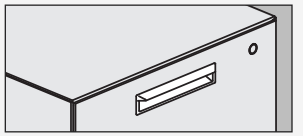
Silver locks (matte nickel) are standard on storage units with drawers and wood hinged doors. Lock cylinders are removable if re-keying is necessary. Key random and key specific options are available.
➤See page 6.

Resin material is part of the Lumicor® LumiclearR4™ Color Collection and is available in Woven Snow (21) with a frost/frost finish on both sides.

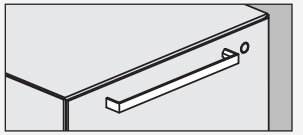
Oval and rectangular glass worksurfaces are backpainted in low-iron, opaque white with a matte finish (201 Arctic). Rims are polished.

Glass doors are backpainted in low-iron, opaque white with a matte finish (202 Ice)), and have an aluminum frame. Color is a compatible match to worksurface glass.

Pull Options:



Recessed
5⅞"W x 1⅛"H



Rectangular
10⅜"W x ⅝"H x 1⅛" projection

Exception: On 15"W storage units, rectangular pulls are 8⅞"W x ⅝"H x 1⅛" projection

Rim Profile:

Technology Management

Overview

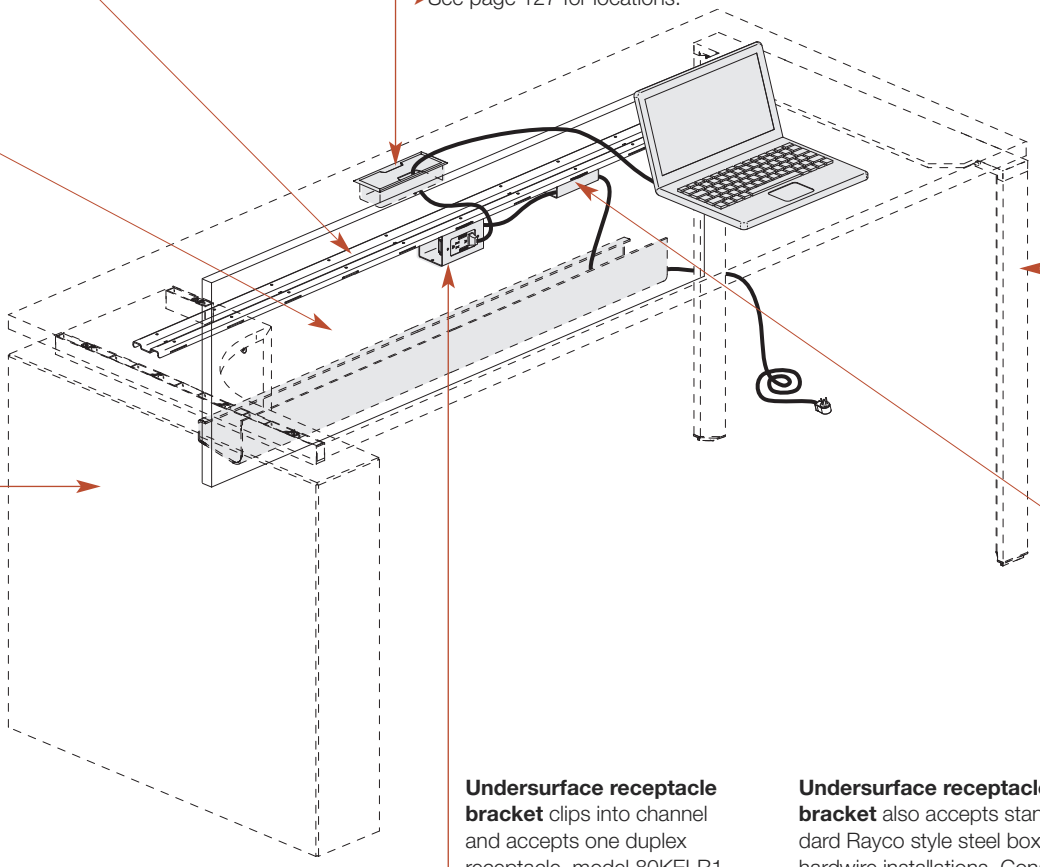
Introduction	➤See page 114
Planning Guidelines	128
Filing Capabilities	129
Grommet Options	127

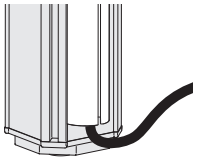
Support channels are standard under worksurfaces and notched to accept technology and cord management accessories. Undersurface wire manager and receptacle brackets twist into and can be moved along the channel by occupants as technology changes.

Technology modesty panel is hinged to tip into the kneespace for access to power and data outlets in the wall. Cable trough is on the outside facing the wall or adjacent workstation.

Undersurface technology/support pedestals are available to house equipment and route cords and cables.

Factory-installed grommets are available in two styles; upcharge applies. Grommets are also available for field installation. They can be placed over a pedestal or storage unit.
➤See page 127 for locations.





Leg assemblies ship standard with one cord manager that attaches to the leg for vertical routing of cords.

Undersurface wire manager routes cables and cords and can store coiled cords up off the floor.

Undersurface receptacle bracket clips into channel and accepts one duplex receptacle, model 80KELR1.
➤See page 238.

Undersurface receptacle bracket also accepts standard Rayco style steel box for hardwire installations. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.

Grommet Options

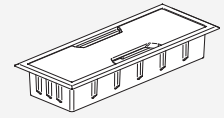
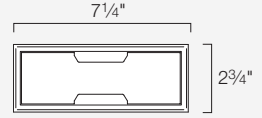
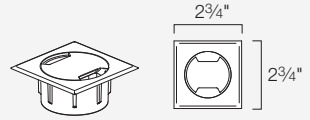
Grommets:





Rectangular grommets



Square grommets

Two grommet sizes/shapes are available. Both rectangular and square grommets are cast aluminum with a Silver Satin (511) finish. These two-piece grommets feature a lid with wire slots that lifts out.

Perks models 99KG17SS and 99KG18SS are also available separately for field installation.
➤See the Perks Price List.

How to Specify

① Insert the grommet designator in the model number sequence.

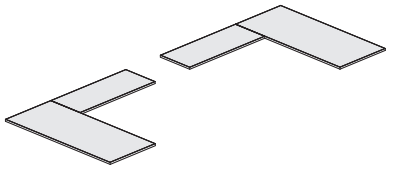
Planning Guidelines

Features ➤See page 124
Technology Management 126
Planning Guidelines
Filing Capabilities 129

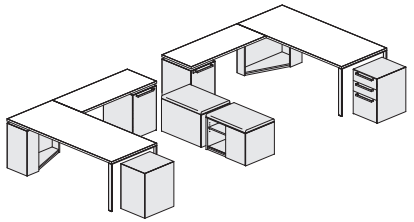
The intelligence behind Fluent is found in its ease of product planning, specification, and installation. Configurations range from freestanding work tables and storage that can be reconfigured into standard L and U office applications. A variety of support options support open plan space division and individual work areas.

Planning Steps:

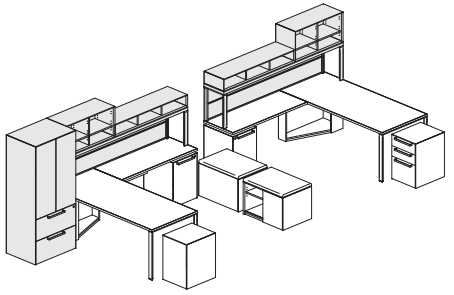
① Determine worksurface layout.



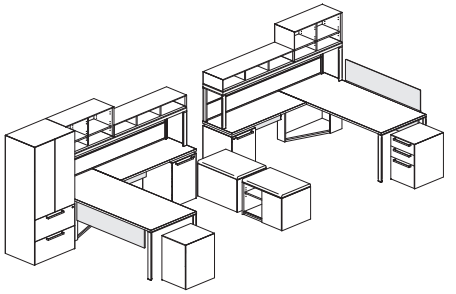
② Select storage and support.



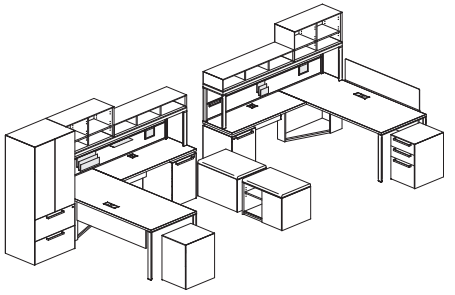
③ Select vertical and set-on-surface storage.



④ Add modesty panels and privacy screens.

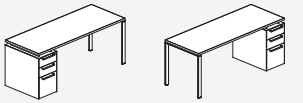


⑤ Determine lighting, technology components, and accessories.

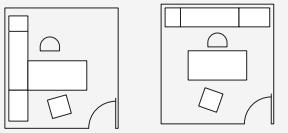


Planning for Reconfiguration:

Fluent offers a variety of components that can be reconfigured as business needs or occupants change.



A right-hand application can easily become a left-hand application in another space.



A workwall can be transformed into a desk and wall unit within the same space.

Approval/Compliance:

All single-circuit components and Fluent furniture are U.L. 962 listed in the USA and comply with the National Electrical Code (NEC); all single-circuit components are CSA certified, Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. The customer is responsible for the proper application of products to the local codes under which installation must be made.
Note: Any field modification of the electrical components voids the UL and CSA listing.

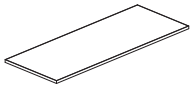
- Letter size paper is 8½" x 11".

Worksurfaces

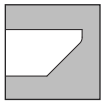
Features ➤See page 124
Technology Management 126
Grommet Options 127
Pricing 142

Details

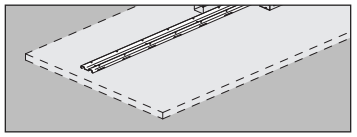


Worksurfaces are 1 3/16" thick, 3-ply, balanced construction with a 1/8" wood rim. Overall height of worksurface with legs or pedestal is 29" with the leveler in the lowest position.

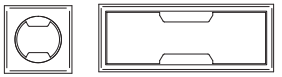
Worksurfaces are available in the following shapes:
- Rectangular
- Wedge
- Extended
- Oval



Arris rim profile is standard.



Support channel ships installed on the underside of worksurface to add rigidity and support electrical components. Cinder finish.



Two grommet sizes/shapes are available. Grommets are positioned to avoid interference with support channels.
➤See page 127 for details.

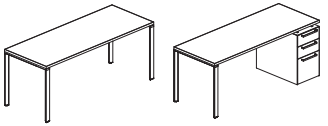
Finishes & Materials

Worksurfaces
- Wood
- Laminate

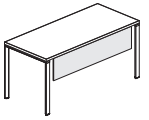
Worksurface Rim
- Wood
- Polypropylene: 405 Designer White

Connections

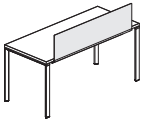
Worksurfaces are rimmed on all four sides and are designed to connect to create “L” or “U” layouts.



Worksurfaces can be supported by undersurface pedestals with spacer bars, legs, or a combination of both.

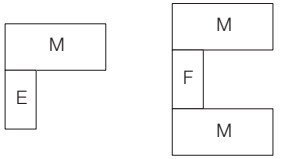


Modesty panels attach to the underside of the worksurface to provide privacy.



Privacy screens wrap around the rim and mount to the underside of the worksurface.

Planning Factors

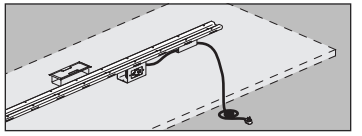


Worksurfaces must be specified as main, filler, or extension to receive the appropriate bracketry for your application.

Depth of pedestals and legs must match worksurface depth.

Grain direction on bridge and return worksurfaces runs front to back to align with desks and component tops, which run widthwise.
➤See page 127 for grain direction by worksurface shape.

Keyboard drawers and trays will not attach to the underside of worksurfaces due to the support rails.



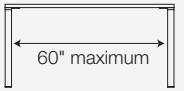
Technology components are available to provide data/power and cord management. These components twist-fit into the worksurface support channel.
➤See page 126.

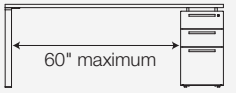
Oval and rectangular glass worksurfaces are backpainted in low-iron, opaque white with a matte finish (201 Arctic). Rims are polished.

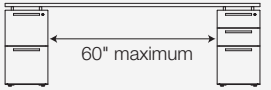
Maximum Open Span:

Maximum open span between support is determined by the depth of the worksurface.

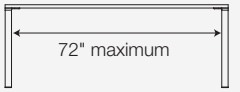
22"D Worksurfaces:

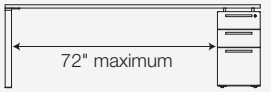


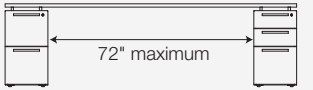




28" and 34"D Worksurfaces:



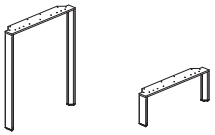




Leg Assemblies

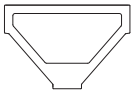
Features	➤See page 124
Technology Management	126
Planning Guidelines	128
Pricing	150

Details

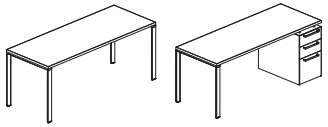


Leg assembly consists of two legs and a stretcher rail made of extruded aluminum with a clear satin, anodized finish. The horizontal rail is steel with a complementary powdercoat finish.

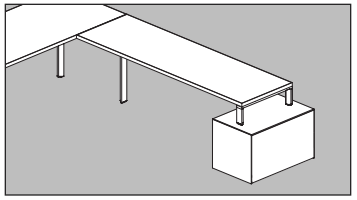
Leg assembly supports one side of a worksurface and is non-handed.



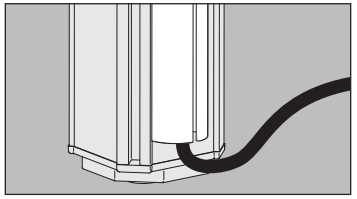
Vertical legs feature a triangular prism shape; each side is 2¼"W.



Desk-height leg assemblies are for applications where the leg extends to the floor. Adjustable glides are concealed and offer 1⁹⁄₁₆" adjustment.



Low storage support leg assemblies span over low storage components. Legs are secured to the pedestal top with dual-lock tape.



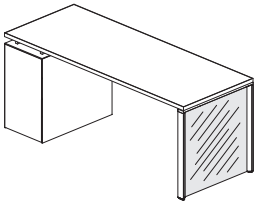
One cord manager made of semi-translucent polypropylene ships standard with each leg assembly for field installation.

Finishes & Materials

Leg Assemblies
- 511 Silver Satin

Connections

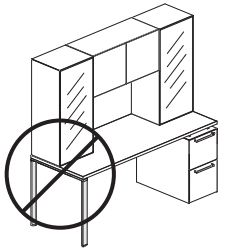
Attachment hardware ships standard with each leg assembly to attach the worksurface and the leg assembly.



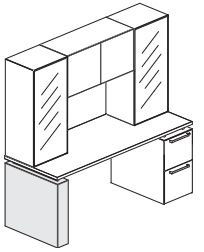
Extruded channel in each desk-height leg accepts resin leg inserts, which may be specified separately to provide privacy and a varied aesthetic.

Planning Factors

Depth of leg assemblies must match worksurface depth.



Incorrect



Correct

Leg applications will not support set-on-surface storage and highback support assemblies. Applications with set-on-surface or highback support assembly must be supported on both ends by desk-height undersurface storage.

Related Products

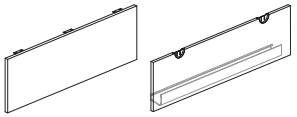
Resin leg inserts
➤See page 151.

Additional cord managers (Perks model 99K27WMV) are available.
➤See the Perks Price List

Modesty Panels

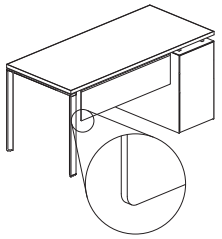
Features ➤See page 124
Technology Management 126
Planning Guidelines 128
Pricing 152

Details

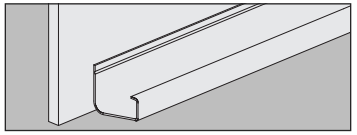


Modesty panels are available for seated privacy applications and technology solutions.

Veneer and painted privacy modesty panels are finished on both sides.



Resin privacy modesty panels are ¼" thick and have a white frost appearance. Exposed edges are polished with rounded corners.



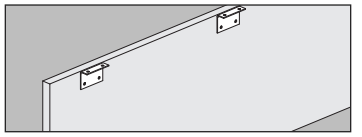
Technology modesty panels are finished on both sides and feature a cable trough on the back side made of white, translucent polypropylene.

Finishes & Materials

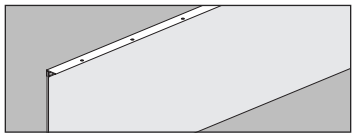
Privacy Modesty Panels
- Veneer
- Paint
- Resin

Technology Modesty Panels
- Veneer
- Paint

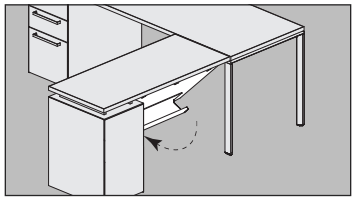
Connections



Privacy modesty panel in veneer or paint mounts to the underside of the worksurface with fixed "L" brackets.



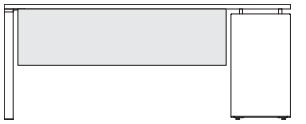
Resin modesty panel mounts to the underside of the worksurface with a continuous aluminum frame along the top edge.



Technology modesty panel mounts to the underside of the worksurface with hinge brackets that allow the panel to flip forward for access to electrical wall outlets. A black half-round cable manager allows cords to exit to the back of the panel.

Planning Factors

Use a technology modesty panel with bridge, return, and component worksurfaces placed against a wall or in shared applications. A privacy modesty can be used with all worksurfaces.



Modesty panel spans between two legs, two pedestals, or a pedestal and a leg with an approximate 1½" gap on each side. Width is specified based on the support application. Modesty panels cannot be placed behind a pedestal.
➤See Modesty Panel Application Guidelines on page 133.

Mobile pedestals will not fit in front of a modesty and be flush with the worksurface edge if they are the same depth as worksurface. Specify a shallower pedestal or deeper worksurface.

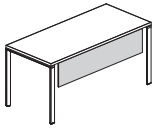
Modesty panels do not provide structural stability.

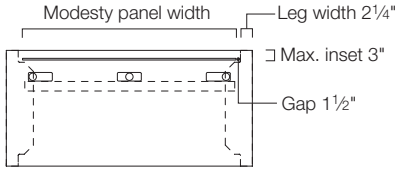
Modesty Panels

continued

Features ➤See page 124
Technology Management 126
Planning Guidelines 128
Pricing 152

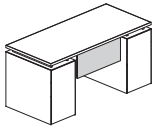
Legs Only

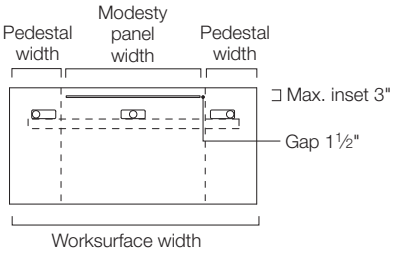




Worksurface width - legs - gap = Modesty panel width
Example: 72" - 4½" (2¼" each leg) - 3" (1½" each side) = 64½"

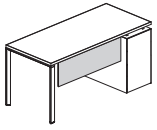
Pedestals Only

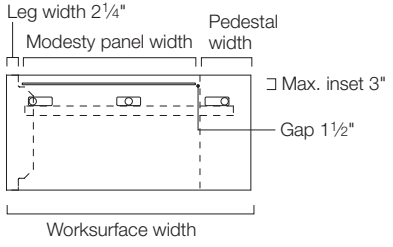




Worksurface width - pedestals - gap = Modesty panel width
Example: 72" - 30" (two 15") - 3" (1½" each side) = 39"

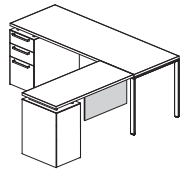
Legs and Pedestal

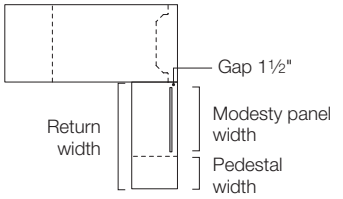




Worksurface width - leg - pedestal - gap = Modesty panel width
Example: 72" - 2¼" - 15" - 3" (1½" each side) = 51¾"

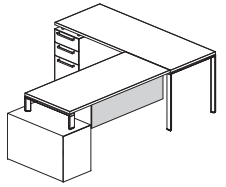
Return with Pedestal

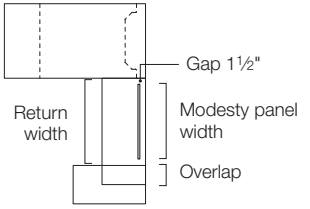




Return width - pedestal - gap = Modesty panel width
Example: 50" - 15" - 3" (1½" each side) = 32" (Specify 33"W model)

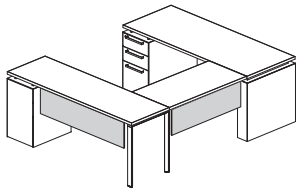
Return with Perpendicular Pedestal

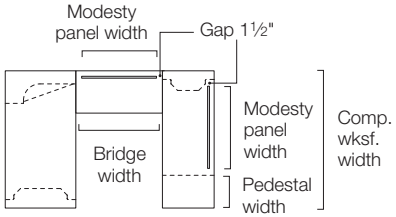




Return width - overlap - gap = Modesty panel width
Example: 50" - 10" (overlap) - 3" (1½" each side) = 37" (Specify 36¾"W model)

Bridge and Component





Bridge width - gap = Modesty panel width
Example: 46" - 3" (1½" each side) = 43"
Component width - leg - pedestal - gap = Modesty panel width
Example: 72" - 2¼" - 18" - 3" (1½" each side) = 48¾"

Desk Worksurfaces:

Modesty panels are inset a maximum of 3" on desk worksurfaces in front of grommets.

Bridges, Returns, and Component Worksurfaces:

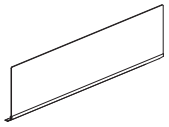
Modesty panels are inset to the inside of grommets on bridges, returns and component worksurfaces to allow cords to drop into optional technology management modesty panel.

Modesty panels are sized for 1½" gap on each side when placed between legs or pedestals. Order the next larger or smaller size for varied applications or if the exact size modesty is not available.

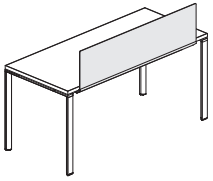
Privacy Screens

Features	➤See page 124
Technology Management	126
Planning Guidelines	128
Pricing	154

Details



Privacy screens provide visual privacy above the worksurface.

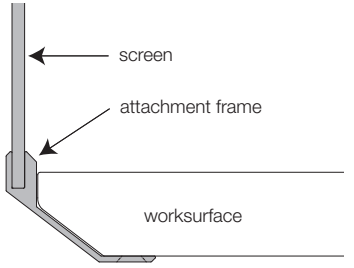


Resin privacy screens are ¼" thick and have a white frost appearance. Exposed edges are polished with rounded corners.

Finishes & Materials

Privacy Screens
- Resin

Connections



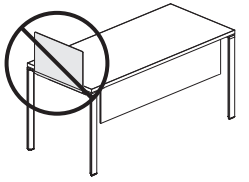
Privacy screen is held in a continuous, extruded, satin anodized frame along the bottom edge. The frame wraps around the arris rim and attaches to the underside of the worksurface.

Installation does not deface the worksurface.

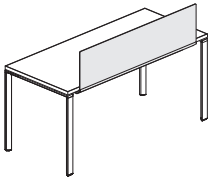
Screens can be attached to wood and laminate rectangular, wedge, and extended worksurfaces.

Modesty panel can also be installed below a privacy screen.

Planning Factors



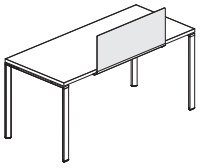
Incorrect



Correct

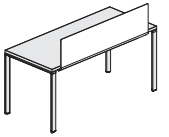
Privacy screens mount along the open width of the worksurface; they cannot be used on worksurface ends supported by a leg assembly or pedestal. They cannot overlap a pedestal or legs.

Screens will always be 7¼" less wide than a leg-supported worksurface, as screens mount between the leg assemblies. For odd sizes, specify the next smallest screen.

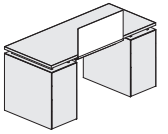


Screens can be specified in smaller widths depending on the intended result.

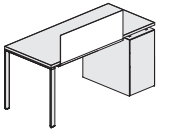
Application Guidelines



Worksurface width - legs - gap = privacy screen width
Example: 72" - 4½" (2¼" each leg) - 3" (1½" each side) = 64½"



Worksurface width - pedestal width - gap = privacy screen width
Example: 72" - 30" (two 15") - 3" (1½" each side) = 39"



Worksurface width - leg - pedestal width - gap = privacy screen width
Example: 72" - 2¼" - 15" - 3" (1½" each side) = 51¾"

Low Storage

Features ➤See page 124
Technology Management 126
Planning Guidelines 128
Pricing 155

Details

Low storage units are 19⅝"H. They are available 30", 36", or 44" widths and 15" or 22" depths. Low storage is available in a variety of configurations, including open, sliding door, and box/file styles, and in mobile and stationary models.

Mobile low storage units are available in a variety of sizes and styles. Casters are inset, enabling the mobile and freestanding units to sit next each other at the same height.

Interlock mechanism and counterweight are standard on units with drawers to prevent tipping.

Top is finished on all models.

Sliding doors are non-locking.

Leveling glides are 1½"H and provide 1¼" of adjustment.

Silver locks (matte nickel) are standard on storage units with drawers and wood hinged doors. Lock cylinders are removable if re-keying is necessary. Key random and key specific options are available.
➤See page 6 for locking information.

Finishes & Materials

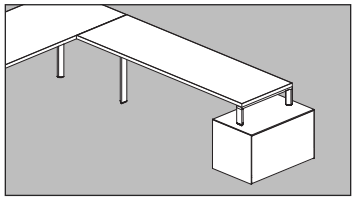
Chassis
- Wood veneer
- Paint

Drawer Fronts
- Wood veneer
- Paint

Doors
- Wood veneer
- Resin with aluminum frame
- Glass with aluminum frame

Connections

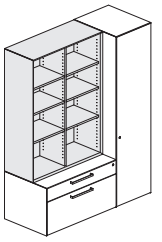
Low storage units are freestanding and set in place to allow for reconfiguration.



When used in conjunction with a low storage support assembly, low storage can support a worksurface.

Ganging brackets can be used where two or more cabinets are positioned side by side to create a built-up appearance. Ganging brackets do not deface the outside of the cabinets and are optional.
➤See page 177.

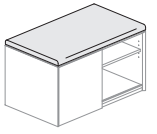
Planning Factors



Set-on-surface storage units may be placed on top of low storage units. 49"H set-on-surface storage will align with 69"H vertical storage. Other heights may be used, but will not align with other vertical storage heights.

Mobile low storage cannot be used to support worksurfaces or other storage units.

Related Products

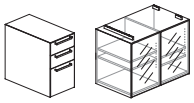


Cushions, specified separately, are available to create occasional seating within the workspace.

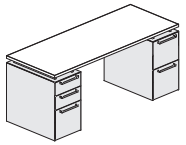
Desk-Height Storage

Features	➤See page 124
Technology Management	126
Filing Capabilities	129
Pricing	161

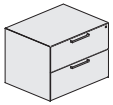
Details



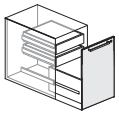
Desk-height storage units are available 15", 18", 30", or 36"W and 22", 28", or 34"D, and in a variety of open storage, hinged door, sliding door, and drawer configurations.



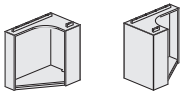
Undersurface models are used to support a worksurface.



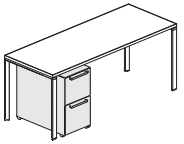
Freestanding models are for use in applications where a worksurface is not required. Interlock mechanism and counterweight are standard on freestanding units with drawers to prevent tipping.



Common front box/box/file storage provides a clean face with one pull. The file drawer pulls out with the full front face. Box drawers pull out separately.



Technology/support pedestals manage cords and support worksurfaces.



Mobile storage is available in a variety of sizes and styles. Casters are inset, enabling mobile and freestanding units to sit next to each other at the same height and fit under a worksurface. Cushion-top models will also fit under a worksurface.

Top is finished on all models.

Glass and resin hinged doors feature a touchlatch and are non-locking.

Sliding-doors are non-locking.

Recessed and rectangular pull options are available on wood doors and drawers.
➤See page 125.

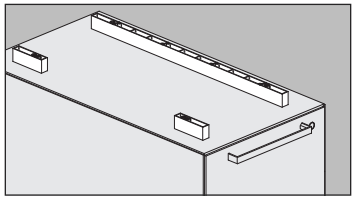
Spacer Rails on Undersurface Models
- Anodized aluminum: clear satin

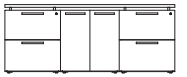
Connections

All models are non-handed for ease of reconfiguration.



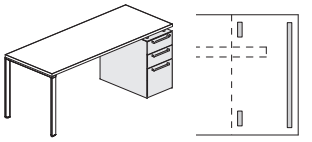
Undersurface models ship standard with three 1¼"H spacer rails, one long and two short, which fit into locator holes in the underside of pedestal top. These spacer rails are used to secure the worksurface to the pedestal and give the worksurface a floating aesthetic.

Planning Factors

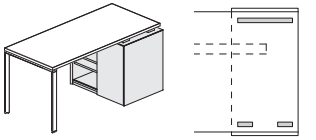


A combination of undersurface and freestanding models can be used to create credenzas or custom application with a worksurface.

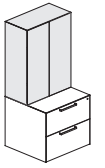
Ganging brackets can be used where two or more cabinets are positioned side by side to create a built-up appearance. Ganging brackets do not deface the outside of the cabinets and are optional.
➤See page 177.



For in-line applications, the long spacer bar should be placed on the outside; the shorter bars allow the worksurface's support channel to pass over the pedestal.



Perpendicular applications can also be created using open, sliding door, or technology pedestal. A 28"D worksurface spans a 30"W pedestal; a 34"D worksurface spans a 36"W pedestal. Pedestal will extend beyond the worksurface by 1" on either side. Pedestals with drawers are not for use in this application.



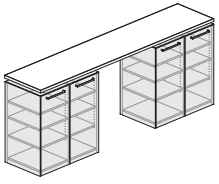
Set-on-surface storage units may be placed on top of freestanding desk-height units.
➤See page 139 for guidelines.

Standing-Height Storage

Features	➤See page 124
Technology Management	126
Filing Capabilities	129
Pricing	178

Details

Standing-height storage units are available 30" or 36"W and 15" or 22"D, and in a variety of hinged door, sliding door and drawer configurations.



22"D undersurface models are used to support a worksurface. Standing-height storage with worksurface is 41½"H.

15" and 22"D freestanding models are for use in applications where a worksurface is not required. Units are 39"H.

Interlock mechanism and counterweight are standard on freestanding units with drawers to prevent tipping.

Top is finished on all models.
Glass and resin hinged doors feature a touchlatch and are non-locking.

Sliding doors are non-locking.

Recessed and rectangular pull options are available on wood doors and drawers.
➤See page 125.

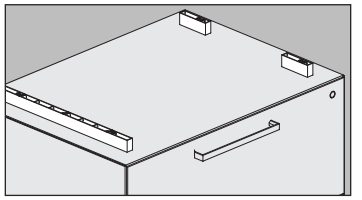
Spacer Rails on Undersurface Models
- Anodized aluminum: clear satin

Connections

All models are non-handed for ease of reconfiguration.



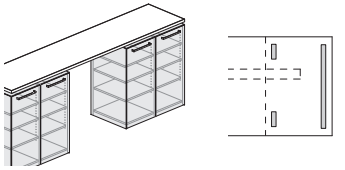
22"D undersurface models ship standard with three 1¼"H spacer rails, one long and two short, which fit into locator holes in the underside of pedestal top. These spacer rails are used to secure the worksurface to the pedestal and give the worksurface a floating aesthetic.

15"D undersurface units ship with two long spacer rails.

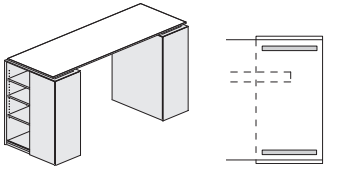
Freestanding storage units are set in place to allow for reconfiguration.

Ganging brackets can be used where two or more cabinets are positioned side by side to create a built-up appearance. Ganging brackets do not deface the outside of the cabinets and are optional.
➤See page 177.

Planning Factors



For in-line applications with 22"D units, the long spacer bar should be placed on the outside; the shorter bars allow the worksurface's support channel to pass over the pedestal.



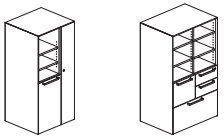
15"D units accept perpendicular worksurface only. A 28"D worksurface spans a 30"W pedestal; a 34"D worksurface spans a 36"W pedestal. Pedestal will extend beyond the worksurface by 1" on either side. Pedestals with drawers are not for use in this application.
Note: 22"D units can also be used in perpendicular applications using the same guidelines.

Set-on-surface storage and highback support assemblies cannot be placed on top of standing-height storage; however, suspended overheads may be used in a set-on-surface application.

Vertical Storage

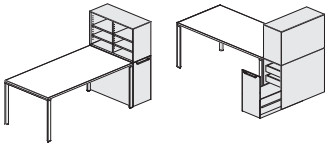
Features ➤See page 124
Technology Management 126
Planning Guidelines 128
Pricing 185

Details



Vertical storage units are 22"D and available 18", 24", 30" or 36"W. Units are available 42", 50", 69", or 78"H.

A variety of storage configurations are multi-functional for both business and personal needs.



42" and 50"H dual-sided models are 15"D and provide access from both sides of the unit. Dual-sided models stand at the aisle side of a workstation, providing privacy while encouraging interaction.

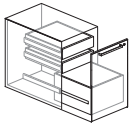
Interlock mechanism and counterweight are standard on freestanding units with drowers to prevent tipping.

All sides, including the top, are finished.

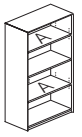
Glass and resin hinged doors feature a touchlatch and are non-locking.

Sliding doors are non-locking.

Shelves adjust top to bottom in 1¼" increments in open and closed storage above drawers. Shelves in wardrobe units adjust 1¼" up and down in two positions.



Common front box/box/file storage provides a clean face with one pull. The file drawer pulls out with the full front face. Box drawers pull out separately.



Freestanding open bookcases complete the vertical storage offering with 27", 42", 50", 69", and 78"H units. Bookcases are 15"D and available in 30" and 36" widths.

Recessed and rectangular pull options are available on wood doors and drawers in the lower section. Upper storage doors and wardrobe doors do not feature a pull.
➤See page 125.

Finishes & Materials

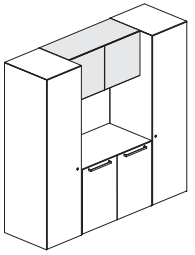
Chassis
- Wood veneer
- Paint

Drawer Fronts
- Wood veneer
- Paint

Doors
- Wood veneer
- Resin with aluminum frame
- Glass with aluminum frame

Connections

Vertical storage models stand-alone or together to create various configurations.



Overhead storage cabinets can be suspended between two vertical storage units.

Freestanding storage units are set in place to allow for reconfiguration.

Planning Factors

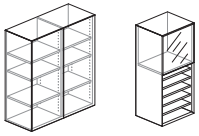
Dual-sided models with a common front pedestal are specified as handed units, but can be converted to the opposite hand in the field if required.

Vertical storage can be used in private office applications or to divide space in open plans.

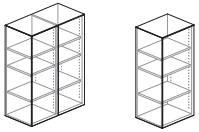
Set-on-Surface Storage

Features	➤See page 124
Technology Management	126
Planning Guidelines	128
Pricing	209

Details



Set-on-surface storage units are 15"D and available 18", 30" or 36"W. Models include hinged door, sliding door, and bookcase organizer units.



30" and 36"W units feature a center divider and six shelves. 18"W units are standard with three shelves. Shelves are adjustable to allow for project and binder storage.

All sides, including the top, are finished.

Glass and resin hinged doors feature a touchlatch and are non-locking.

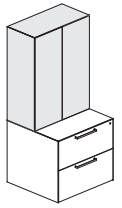
Sliding doors are non-locking.

Finishes & Materials

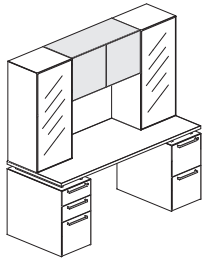
Chassis
- Wood veneer
- Paint

Doors
- Wood veneer
- Resin with aluminum frame
- Glass with aluminum frame

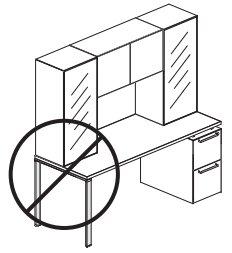
Connections



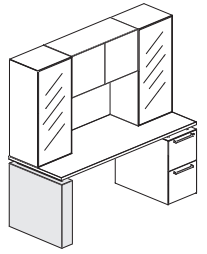
Set-on-surface storage can be placed on worksurfaces with appropriate support, or they can be placed directly on a pedestal. Double-stick tape facilitates attachment.



Overhead storage cabinets can be suspended between set-on-surface storage units.



Incorrect



Correct

Leg applications will not support set-on-surface storage. Applications with set-on-surface storage must be supported on both ends by desk-height undersurface storage.

Planning Factors

To align with 69"H vertical storage units, specify:
- 39⅝"H unit, if it will be placed on top of a worksurfaces supported by desk-height storage units; or
- 42"H unit if it will be placed directly on a desk-height storage unit; or
- 49"H unit if it will be placed on a low storage unit.

To align with 78"H vertical storage units, specify:
- 49"H unit, if it will be placed on top of a worksurfaces supported by desk-height storage units; or
- 51½"H unit if it will be placed directly on a desk-height storage unit.

Other height combinations may be specified, but will not align with vertical storage heights.

Overhead Storage

Features	➤See page 124
Technology Management	126
Planning Guidelines	128
Pricing	209

Details

Overhead storage units are 15"D and available 30", 36", 54", 72", and 90"W. Single-height units are 18"H; double-height units are 28"H. Models include open, hinged door, sliding door, and stacking cubbies.

Suspended and stacking models are finished on all sides, back, and top.

Wall-mount models are finished on all sides, except the back.

Glass and resin hinged doors feature a touchlatch and are non-locking.

Sliding doors are non-locking.

Cabinets are divided into sections, one behind each door.
¾"-thick shelves can be moved from one section to another. Shelves in single-height units adjust toward the bottom only. Shelves in double-height units adjust top to bottom in 1¼" increments.

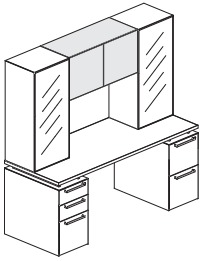
Finishes & Materials

Chassis
- Wood veneer
- Paint

Doors
- Wood veneer
- Resin with aluminum frame
- Glass with aluminum frame

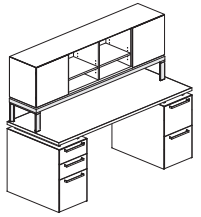
Connections

Wall-mount cabinets attach to the wall with provided brackets.

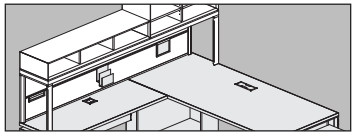


Suspended cabinets span between set-on-storage units and/or vertical storage units. Attachment hardware ships standard with the cabinet. Suspended cabinets can also be used as set-on storage for worksurfaces or desk-height
storage units.

Stacking cabinets can only be used with a highback or lowback overhead support assembly. Stacking units can face opposite directions
for cluster workstations. Spacer disk located on the platform indexes the location of the overhead and
creates ¼" reveal. A combination of overheads can be used on 72" open or 72" and 90" workwall models.



Support assemblies consists of legs with a platform to create a highback or lowback application utilizing a variety of stacking overheads.The underside features a metal support panel designed to accept LED lighting; other task lights will not mount under the unit. The back is open, but the highback
model is available with an enclosed workwall option. Legs are secured to worksurface with dual-lock tape.



HIghback support assembly with workwall is available in veneer, whiteboard, and tackable fabric. Tool rail in center accepts organization accessories, specified separately.

Planning Factors

Wall-mount overheads may not align with adjoining 15"D set-on-surface storage. Use a 22"D vertical storage unit to avoid alignment issues.

Stacking overhead widths must total the width of the highback or lowback overhead support assembly to which it will attach. For multiple unit applications, specify two 36"W units for a 72"W open or workwall support assembly, or a 54"W unit and a 36"W unit for a 90"W workwall support assembly.

To align with 69"H vertical storage units and 39⅝" set-on-storage on worksurfaces, specify:
- Single-height overhead cabinet, and
- High-back support assembly.

To align with 78"H vertical storage units and 49" set-on-storage on worksurfaces, specify:
- Double-height overhead cabinet, and
- High-back support assembly.

Lowback assembly with overhead storage does not align with vertical storage.

Related Products

LED lights can be mounted in a designated area in the center underside of the overhead platform. Use with Perks tackboards to conceal cords. Highback and lowback support assemblies will only accept LED lights.
➤See page 367.

Storage Unit Width	*LED Light Model*

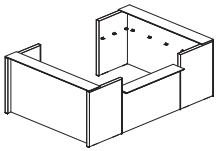
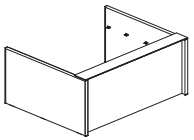
Reception Stations

Features	➤See page 124
Technology Management	126
Planning Guidelines	128
Pricing	237

Details



Reception station surrounds are available in four configurations:
- Right L-shape
- Left L-shape
- U-shape with one transaction shelf
- U-shape with ADA front and three transaction shelves



A single reception station consists of a 43"H panel surround and glass transaction shelf or shelves. Worksurfaces and storage are specified separately from the standard offering to create a variety of configurations. Components may be specified in any finish option.

Surround panels are finished on both sides and encased with a 2¼"W clear satin, anodized aluminum frame.

Glass transaction shelf spans surround panels on a metal support understructure.

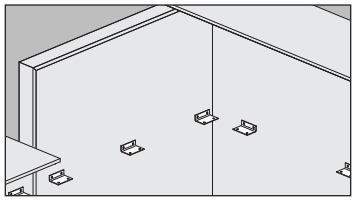
Finishes & Materials

Surround
- Wood veneer
- Paint

Transaction Shelf
- Low-iron back painted white glass with a matte finish and polished rim

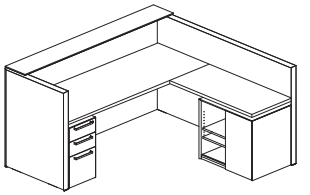
Shelf understructure
- Metal: 405 Designer White

Connections

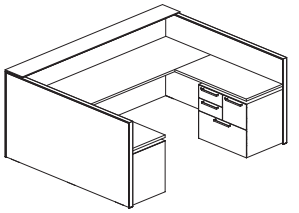


Mounting brackets for the main worksurface are standard with the surround panels.

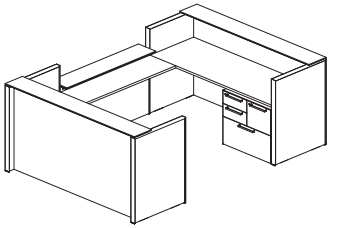
Planning Factors



L-shaped reception station accepts a 28"D x 78"W worksurface and a 22"D x 46"W return worksurface only. The 78"W worksurface does not need a pedestal; however, mobile or undersurface storage may be specified. The return surface must be supported on the open end with an undersurface pedestal.



U-shaped reception station accepts a 28"D x 96"W worksurface and two 22"D x 46"W returns worksurface only. The 96"W worksurface does not need a pedestal; however, mobile or 22" or 28"D undersurface storage may be specified. The return surfaces must be supported on the open ends with an undersurface pedestal.



U-shaped reception station with ADA transaction shelf accepts 28"D x 78"W worksurfaces and a 22"D x 58"W bridge worksurface only. Worksurfaces do not need a pedestal; however, mobile or 22" or 28"D undersurface storage may be specified.

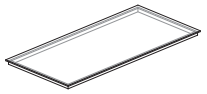
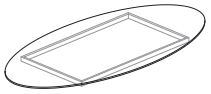
Glass Table Desk Worksurfaces

Pricing

GSA SIN 711-8

Features ➤See page 124
Technology Management 126
Planning Guidelines 128
Product Information 130





D	*W*	*Thickness*	*Model*	*Price*
Rectangular				
34"	72"	2"	**80K3472DTTRG**	$4807
Oval				
38"	78"	2"	**80K3878DTTVG**	$5151

Standard Includes

- Worksurface: ½"-thick, low-iron, back painted white with matte finish with polished rim
- 1½"H metal understructure: 405 Designer White paint

How to Specify

❶ Model
② Glass color:
201 = Arctic

IMPORTANT: These worksurfaces are for freestanding application with two leg assemblies, specified separately. Rectangular glass requires 80K3428LAP or 80K3410LAP models; oval glass requires 80K2828LAP or 80KK2810LAP models only.

Kneespace between legs on oval table desk is 42"W. Overall height of worksurface with leg assemblies is 29⅞".

Undersurface pedestals with spacer rail cannot be used to support glass surfaces.

Leg Assemblies

Pricing

GSA SIN 711-8

D	W	H	Model	Price
Desk-Height Support Legs				
22"	2¼"	27⅞"	**80K2228LAP**	$685
28"			**80K2828LAP**	696
34"			**80K3428LAP**	710

28"			**80K281827PFFBBF**	1957
34"			**80K341827PFFBBF**	2101

Standard Includes

- Chassis: vertical veneer or paint
- Drawer front: veneer or paint
- Pulls: recessed or rectangular
- Finished top, back, and sides
- Spacer rails on undersurface models
- Lock: silver; keyed randomly
- Counterweight on freestanding model

How to Specify

❶ Model
❷ Material:
W1 = Vertical veneer
W1P = Vertical veneer drawer fronts and painted chassis
P = Painted drawer fronts and chassis
PW1 = Painted drawer fronts and vertical veneer chassis
③ Sheen type (omit for P models):
STD = Standard sheen
④ Pull option:
67SS = Recessed, silver satin
68SS = Rectangular, silver satin
⑤ Lock option:
KRS = Key random
KS = Key specific (-$22); specify lock core separately
⑥ Front finish group:
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑦ Front finish designator
⑧ Chassis finish group (omit for W1 and P models):
STD = Group 1
STD2 = Group 2 (+20%)
⑨ Chassis finish designator (omit for W1 and P models)

Used to manage wires and CPUs and support worksurfaces. Can be used to support worksurfaces with set-on-surface storage and highback or low-back support assemblies, where a leg will not provide support.

Accommodates most 18"D CPUs.
Inside clearance:
22"D models = 20½"D
28"D models = 26½"D
34"D models = 32½"D

Ganging Brackets

Used to manage wires and CPUs and support worksurfaces.

Ganging Brackets
➤See page 177.

Standard Includes

- Chassis: vertical veneer or paint
- Hinged door: veneer or paint
- Finished top, back, and sides
- One ¾"-thick adjustable shelf
- Touchlatch
- Spacer rails
- Cord openings in top and bottom panel

How to Specify

❶ Model
❷ Material:
W1 = Vertical veneer
W1P = Vertical veneer door and painted chassis
P = Painted door and chassis
PW1 = Painted door and vertical veneer chassis
③ Sheen type (omit for P models):
STD = Standard sheen
④ Front finish group:
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑤ Front finish designator
⑥ Chassis finish group (omit for W1 and P models):
STD = Group 1
STD2 = Group 2 (+20%)
⑦ Chassis finish designator (omit for W1 and P models)

Features

Overview

Features	➤See page
Typical Configurations	243
Filing Capabilities	244
Locking Information	6

Exterior surfaces are cherry (plain sliced, slip matched) veneer. Veneers are carefully selected and matched to assure proper balance and consistency.

Tops are 1 3/16" thick, 3-ply balanced construction.

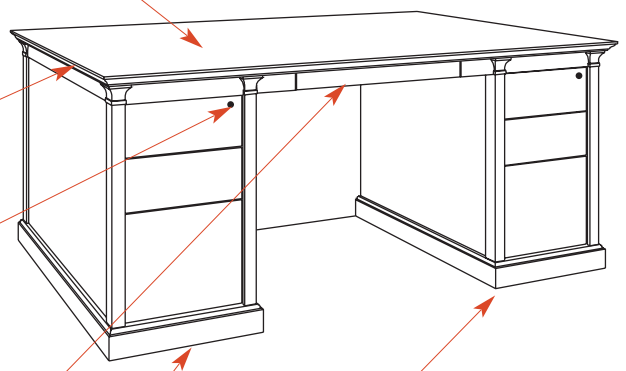
Edges are 1" solid hardwood with precisely mitered corners.

Locks are standard on drawer fronts of all desks, credenzas, returns, lateral files, and component freestanding pedestals. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.

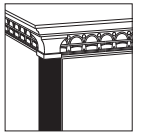
Center drawer is standard on double-pedestal desks, single-pedestal desks, and table desks. Bottom of drawer is lined with black leather.

Full height pedestals have two box drawers and one file drawer in left pedestal and two file drawers in right pedestal.

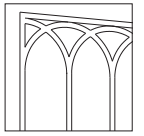
Leveling glides adjust for uneven floors.



Details



Corner and Frieze



Bookcase Door Muntin (black)

Drawer pulls are black.

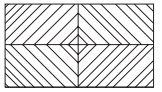
Drawer sides and back are ½" thick with veneer faces. Drawer bottoms are ¼" thick. 5-sided construction allows easy removal of drawer front. Dowel joint assembly is used for maximum strength. Interiors are sealed, sanded, and finished with a clear lacquer finish to protect against swelling, shrinking, or warping and to provide a smooth feel and appearance.

Drawer fronts are ¾" thick 3-ply with vertically matched grain.

Drawer dividers are included in desks and credenzas for placement in any box drawer.

Full extension, progressive action drawer suspensions, with precision ball bearings on file drawers, provide a smooth, quiet operation. Box drawers have full extension slides with a positive stop action.

Heavy-duty filing hardware accommodates various filing requirements.



Fancy face top, available on double-pedestal desks, features figured cherry veneer in a diamond match pattern.

Black metal grommets are optional on all single-pedestal desks, returns, and bridges. Grommets are also available for field installation on any desk. ➤See the Perks Price List.

Finishes & Materials

Wood Finishes

- MC Amber Cherry
- MH Mocha Cherry

Related Products

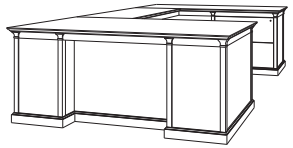
Accessories, including center drawers, adjustable keyboard products, keyboard kits that comply to ANSI/HFES Method 2, and visual boards are available to add functionality to workspaces. ➤See the Perks Price List.

Light kits are available for field installation in set-on-surface bookcases, highback organizers, and overhead storage. Light switch kit must be specified separately; switch can control multiple fixtures.

Typical Configurations

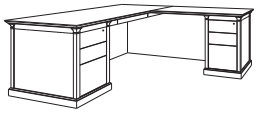
Features ➤See page 242
Filing Capabilities 244
Locking Information 6

Executive U
Executive U-configurations can be achieved by connecting a single-pedestal desk, a bridge, and a single-pedestal credenza.



Description	*Base Model**	*Qty*	*Price*
Left pedestal desk	**IN3672DLFB**	1	$5922
Bridge with modesty panel	**IN2551BEFH**	1	2658
Right pedestal credenza	**IN2475CRF6**	1	5514
		Total	$14094

Executive L
Executive L-configurations can be achieved by connecting a single-pedestal desk and an executive return.



Description	*Base Model**	*Qty*	*Price*
Left pedestal desk	**IN3672DLFB**	1	$5922
Right executive return	**IN2551RREF**	1	3676
		Total	$9598

The configurations shown at left are typical of those possible with Innsbruck components. Many more configurations are possible to fit your installation.

Right configurations are shown; left units can easily be configured. See appropriate pricing pages for model numbers.

To price a configuration, simply add the prices of the individual components together.

* Check the appropriate pricing page for the complete model number that includes the finish.

For Use with Set-on-Surface Bookcases, Highback Organizers, and Overhead Storage

GSA SIN 711-8

	Model	*Price*
Light Kit		
	LGT-A	$89
Light Switch Kit		
	SWK-A	$73

These light kits are for use inside storage cabinets. They cannot be used underneath highback organizer or overhead to light the work-surface area.

Specify one light kit for one- or two-door storage. Specify two light kits for three- or four-door storage.

IMPORTANT: Light switch kit, specified separately, is required for light kit; however, one switch kit can provide single-switch control for multiple fixtures if desired. Only one switch kit is required per wall arrangement.

Features ➤See page 242
Typical Configurations 243

Standard Includes

Light Kit
- 40-watt clear lamp
- Black fixture

Light Switch Kit
- 10' cord
- Light-intensity dimmer switch

Features

Overview

Statement of Line	➤See page 262
Typical Configurations	265
Filing Capabilities	267
Locking Information	6

Exterior surfaces are walnut (plain sliced, book matched) veneer. Veneers are carefully selected and matched to assure proper balance and consistency.

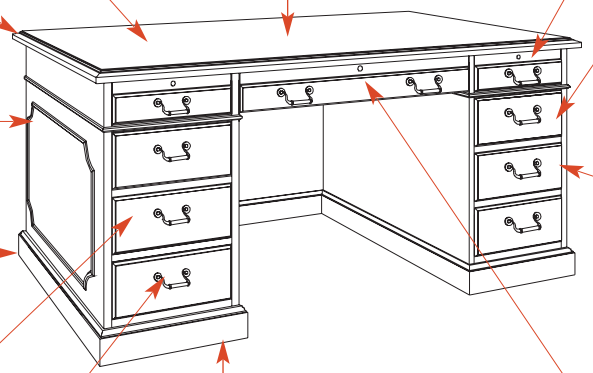
Rims are solid hardwood with precisely mitered corners.

Decorative molding is available as an option. Upcharge applies.

Leveling glides adjust for uneven floors.

Drawer fronts are ¾" thick 3-ply and use 100% butt-figured walnut veneer.

Leather-wrapped pulls are available. Upcharge applies.



Tops are 1 3/16" thick, 3-ply balanced construction. Wood grain laminate is also available.

Base rails are solid hardwood for impact and wear resistance.

Writing shelf is standard on single- and double-pedestal desks.

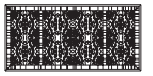
Full-height pedestals have one pencil drawer, one box drawer, and one file drawer. File drawer has the appearance of two box drawers.

Drawer sides and back are ½" thick with veneer faces. Drawer bottoms are ¼" thick. 5-sided construction allows easy removal of drawer front. Dowel joint assembly is used for maximum strength. Interiors are sealed, sanded, and finished with a clear lacquer finish to protect against swelling, shrinking, or warping and to provide a smooth feel and appearance.

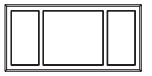
Center drawer is standard on double-pedestal and table desks. Bottom of drawer is lined with black leather.

Centra™ locking is featured on double- and single-pedestal desks, credenzas and lateral files to secure all drawers in the unit with a single lock. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.

Details



Burl



Leather Inlay

Burl and leather inlay models are available on select desk worksurfaces. ➤See page 381 for leather choices.

Antique brass metal grommets are optional on all desks, returns, credenzas, and bridges.

Joints are securely fastened with screws, glue, and solid hardwood cleats to ensure maximum strength.

Drawer dividers are included in desks and credenzas for placement in any box drawer.

Full extension, progressive action drawer suspensions, with precision ball bearings on file drawers, provide a smooth, quiet operation. Box drawers have full extension slides with a positive stop action.

Heavy-duty filing hardware accommodates various filing requirements. ➤See page 267 for filing capabilities.

Related Products

Accessories, such as keyboard drawer, adjustable keyboard products, and visual boards available to add functionality to workspaces. ➤See the Perks Price List.

Features

Overview

Statement of Line	➤See page 290
Typical Configurations	293
Filing Capabilities	295
Locking Information	6

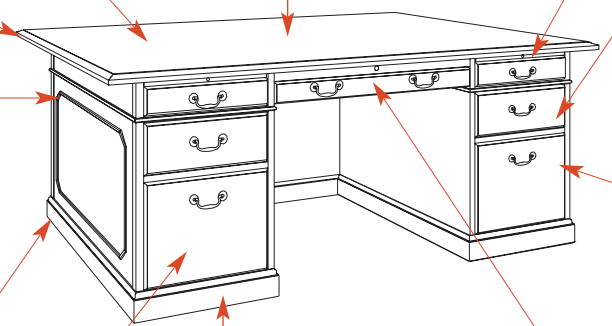
Exterior surfaces are cherry (plain sliced, slip matched) or walnut (plain sliced, book matched) veneer. Veneers are carefully selected and matched to assure proper balance and consistency.

Rims are solid hardwood with precisely mitered corners.

Decorative molding is available as an option. Upcharge applies.

Leveling glides adjust for uneven floors.

Drawer fronts are ¾" thick 3-ply with vertically matched grain.



Tops are 1 3/16" thick, 3-ply balanced construction. Wood grain laminate is also available.

Base rails are solid hardwood for impact and wear resistance.

Writing shelf is standard on single- and double-pedestal desks with breakfront modesty panel.

Full height pedestals have one pencil drawer, one box drawer, and one file drawer. Hardwood corner post and panel construction is reinforced with tenon and groove joinery.

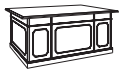
Drawer sides and back are ½" thick with veneer faces. Drawer bottoms are ¼" thick. 5-sided construction allows easy removal of drawer front. Dowel joint assembly is used for maximum strength. Interiors are sealed, sanded, and finished with a clear lacquer finish to protect against swelling, shrinking, or warping and to provide a smooth feel and appearance.

Center drawer is standard on double-pedestal, single-pedestal desks, and table desks. Bottom of drawer is lined with black leather.

Centra™ locking is featured on double- and single-pedestal desks, credenzas and lateral files to secure all drawers in the unit with a single lock. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.

Details

Breakfront modesty



Flush modesty

Modesty panel on double-pedestal desks are available with a breakfront or flush appearance.

Antique brass metal grommets are optional on all desks, returns, credenzas, and bridges.

Joints are securely fastened with screws, glue, and solid hardwood cleats to ensure maximum strength.

Drawer dividers are included in desks and credenzas for placement in any box drawer.

Full extension, progressive action drawer suspensions, with precision ball bearings on file drawers, provide a smooth, quiet operation. Box drawers have full extension slides with a positive stop action.

Heavy-duty filing hardware accommodates various filing requirements. ➤See page 267 for filing capabilities.

Related Products

Accessories, such as keyboard drawer, adjustable keyboard products, and visual boards available to add functionality to workspaces. ➤See the Perks Price List.

Features

Overview

Statement of Line ➤See page 318
Technology Management 322
Integrating with Traxx & Tiles 324
Typical Configurations 325

Exterior surfaces are available in the following veneers:
- Cherry (plain sliced, slip matched)
- Maple (plain sliced, slip matched)
- Walnut (plain sliced, book matched)
- Sapele (quarter sliced, slip matched) premium veneer; upcharge applies

Veneers are carefully selected and matched to assure proper balance and consistency.

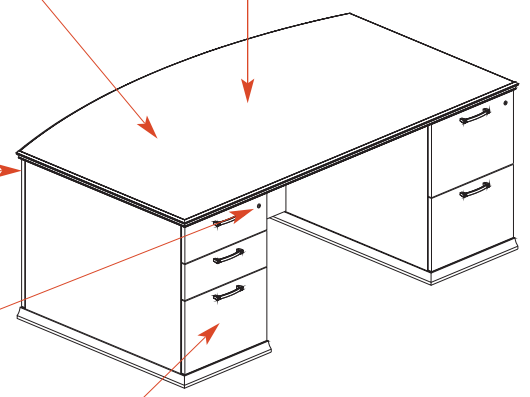
Hinged access doors for cable routing are located on the approach side of desks.

Face-mounted locks are standard on all desks, credenzas, returns, and undersurface pedestals. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.
➤See page 6 for lock information.

Pedestals are legal width on most models.

Drawer fronts are ¾" thick, 3-ply construction with vertically matched grain. 5-sided drawer construction allows easy removal of drawer fronts.

Worksurfaces are 1 3/16" thick, 3-ply balanced construction with a ½" wide solid wood rim.



Details

Joints are securely fastened with screws, glue, and solid hardwood cleats to ensure maximum strength.

Drawer suspensions feature black slides with precision steel ball bearings to ensure long lasting, quiet, and smooth operation. Box drawer suspensions are ¾ extension. File and lateral file drawers are full extension.

Black filing rods are standard in all file drawers and accommodate various filing requirements.

Rims on adjoining worksurfaces (e.g., single-pedestal desk to a return) are miter cut to ensure a clean, flush fit.

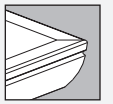
Wood-door storage is available in plain-sliced or diamond-matched veneer on selected models.

Glass-door storage features a crisscross glass pattern. Glass is tempered.

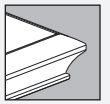
Hinged modesty panels are standard on all bridges and returns for access to wall outlets.

Metal worksurface grommets are available factory installed; upcharge applies. Grommets are also available for field installation.

Rim Profiles:



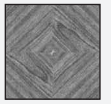
GR Groove



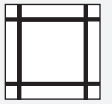
RD Ridge

Door Patterns:

Plain-sliced Wood

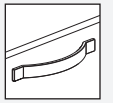


Diamond-matched Wood

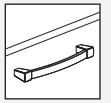


12 Crisscross Glass

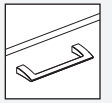
Pull Options:



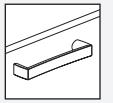
51 Camber



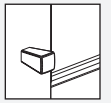
52 Bridge



53 Sweep



54 Sway



59 Funnel

Note: Funnel pull is standard on high-back organizers, bookcase organizers, and overhead storage doors only.

Pull and Grommet Finishes:

CM Carbon Metallic
MB Matte Black
SN Satin Nickel
Note: Specify option and finish together in one step. Example:
51MB = Camber pull, matte black

Technology Management

Features	➤See page 321
Integrating with Traxx & Tiles	324
Typical Configurations	325
Filing Capabilities	327

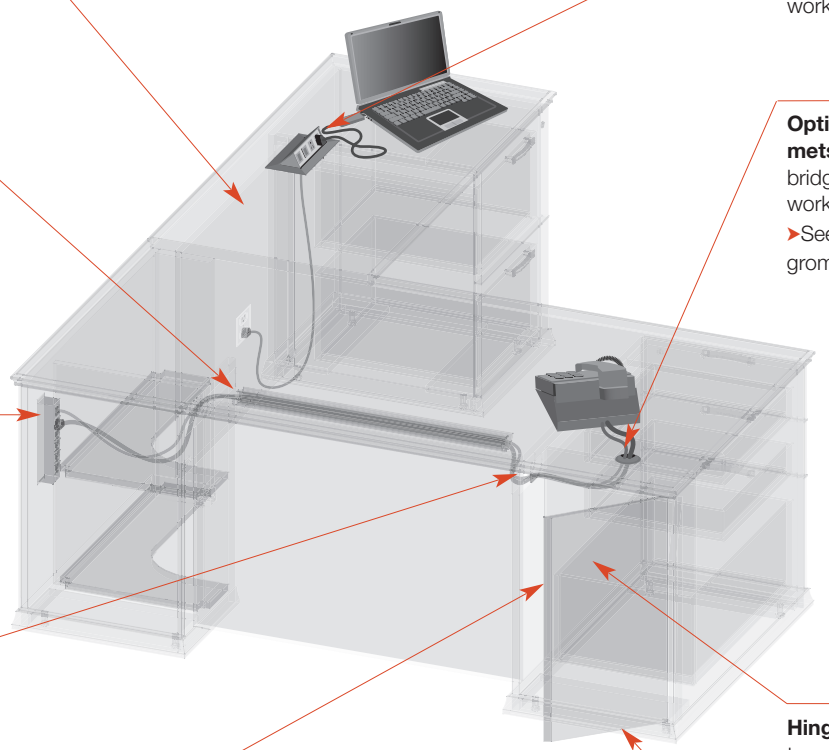
Modesty panels on bridges and returns are hinged for access to wall outlets.

Undersurface wire manager, specified separately, helps manage cords and cables below the worksurface.

Power outlet strip, specified separately, provides electrical below the worksurface.

Cord openings under worksurface are standard in kneespace of all assembled desks for routing cords and cables.

A structural panel separates the drawers from the cable routing compartment to prevent unwanted access to the drawer contents.



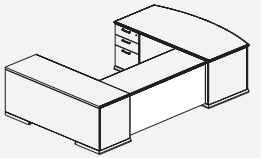
Optional, factory-installed pop-up power/data center provides connectivity directly on the worksurface; upcharge applies.

Optional, factory-installed grommets are available on desks, returns, bridges credenzas, and component worksurfaces; upcharge applies.
➤See next page for details and grommet locations.

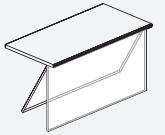
Hinged access doors allow access to cable routing compartment. Both single- and double-pedestal desks feature two access doors, one on the left and one on the right on the approach side.

Opening below hinged access door allows cord to enter or exit the cable routing compartment on the approach side.

Modesty Panels:



Modesty panels on returns and bridges are recessed 3" from the back edge of the worksurface to create an area to store cords and cables. Recessed modesty panel allows the whole unit to be placed flush against the wall.



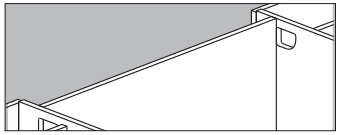
Hinged modesty panel on returns and bridges swing inward to allow easy access to all outlets.

Keyboard Kits:

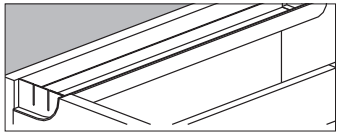
Keyboard kits that comply to ANSI/HFES Method 2 are available.
➤See the Perks Price List.

Features	➤See page 321
Integrating with Traxx & Tiles	324
Typical Configurations	325
Filing Capabilities	327

Cord Opening Locations:



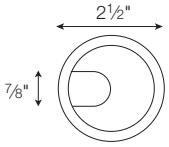
Double and single-pedestal desks, credenzas, and returns feature a cord opening on the kneespace side of each pedestal just below the worksurface.



24"D modular undersurface pedestals feature two cord openings (with black grommets); one in the back upper corner of each pedestal side panel.

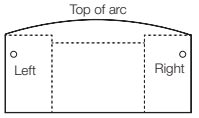
Cable channel located along the top edge of the back panel allows cords to be routed horizontally through adjoining pedestals or dropped vertically anywhere along the cable channel.

Worksurface Grommets:



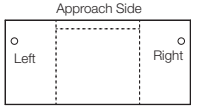
Metal worksurface grommets (G7) are available as a factory-installed option or separately for field installation; upcharge applies.

Dimensions shown at right are from center of grommet to edge of worksurface.
Note: If specifying a center location, be sure there is clearance under the grommet opening to avoid conflict with undersurface storage.



Arc Desks

Grommet to top of arc	13¼"
Grommet to side edge	5"



Rectangular Desks

Grommet to approach side	7¼"

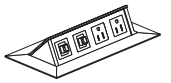
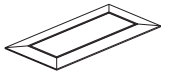
Corner Worksurfaces

Grommet to back edges	5"

Power/Data Centers:



Open



Closed

Pop-up power/data center is available factory installed in any standard grommet location; upcharge applies.

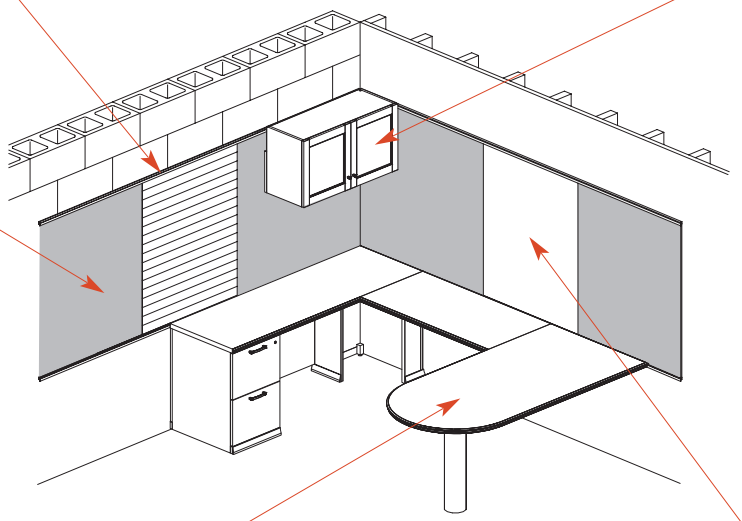
Standard features include:
- Anodized aluminum (MB matte black)
- Fluid, one-touch accessibility
- Two simplex power outlets
- Two blank voice/data ports
- Voice/data adapter kit to accept couplers and jacks
- 6' 15-amp power card
- 4 7/16"D x 8 5/16"W

Integrating with Traxx and Tiles

Features	➤See page 321
Technology Management	322
Typical Configurations	325
Filing Capabilities	327

Traxx can be mounted to most interior walls, including steel or wood stud walls, masonry block, or solid masonry walls.

Tiles mount between upper and lower Traxx to add functionality to the workspace.



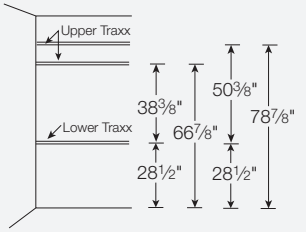
Overhead storage can be mounted to upper Traxx.

Fabric and standard marker board tiles can be scribed in the field to meet individual requirements.

U- and P-shaped worksurfaces and bridges without modesty panels can be mounted to lower Traxx.
Note: Credenza worksurfaces (page 339) are not designed for Traxx applications.

Traxx Installation Heights:

Traxx should be installed at heights to correspond with the appropriate application.



Overhead Cabinets	66⅞"H
Worksurfaces	28½"H
Conferencing Solutions	78⅞"H

➤See the Systems Price List for Traxx and tiles planning and pricing information.

➤See the Systems Price List for worksurface brackets for Traxx supported worksurfaces.

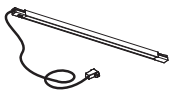
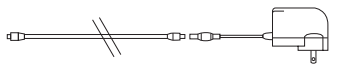
Details



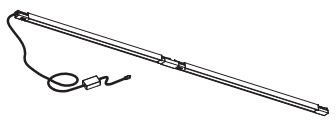
LED lights are a low-profile, linear solution for overhead cabinets, highback organizers, and shelves. LED lights provide a 3300K color temperature and consume less power; rated at 50,000 life hours. They utilize the latest technology for high light output with nearly no heat production. LEDs do not produce
UV emissions.

Number of LED lights varies by fixture width:
16"W models include 56 LEDs
24"W models include 104 LEDs
30"W models include 132 LEDs
62"W models include 264 LEDs

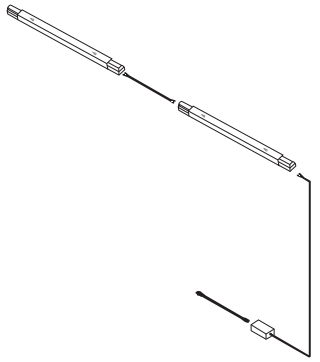
All units feature a silver aluminum finish and a toggle switch. 62"W models have two toggle switches.



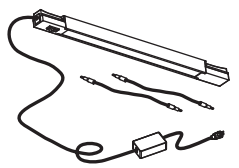
16", 24", and 30"W standard LED light fixtures include a 6' cord with an 3¼"W x 1½"D x 1½"H plug featuring a built-in UL1310 class II power supply. Standard models plug directly into power receptacle; they cannot be daisy chained.



62"W standard LED light fixture includes a two-piece 12' cord with an in-line 4⅛"W x 1¼"D x 1¾"H UL1310 class II power supply. 62"W standard models cannot be daisy chained.

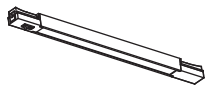


Daisy chain application requires a starter unit and is limited to 2 add-on units (3 fixtures total) per power source. A combination of fixture widths can be combined to obtain the desired length.



Daisy chain starter unit includes the fixture, a two-piece 12' cord with an in-line 4⅛"W x 1¼"D x 1¾"H UL1310 class II power supply, two 6' interconnect cords (black), and two jumper pins.

Black power cords are removable and can be plugged into either end of the fixture.



Daisy chain add-on units do not include a power supply or cords and must be used in conjunction with a starter unit.

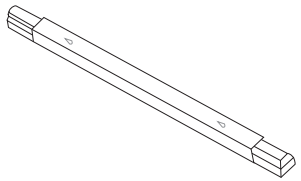
Mounting requirements, cord lengths, and cord access restrictions vary according to local standards. Consult local codes prior to specifying.

Meets California Title 24.

Assembled in the USA.

Connections

Magnetic mounting concealed inside the fixture allows attachment to the underside of Fluent highback support assemblies and metal overhead storage cabinets.



Woods screws are included for attaching fixtures to wood highback organizers and overhead storage.

Standard Includes

- Fixture: black
- T5 cool white single tube lamp:
  14 watt on 23"W light;
  21 watt on 35"W light;
  28 watt on 47"W light
- High-frequency electronic ballast
- Prismatic lens
- Rocker-type on/off switch in center
- 90° cord plug with southwest orientation prong configuration; Chicago unit features a fused plug
- 9' cord attached in center of fixture

How to Specify

❶ Model

All lighting components are U.L. approved.

Consult local codes for application restrictions.

For use on highback organizers and overhead storage.

K = Kwik Office model available.

Samples:

Samples of wood finishes, paints, and laminates are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur in color and texture.

Swatch cards and memo samples of Kimball Office fabrics are available upon request. There may be slight differences between samples and actual yardage as a result of variations in dye lots.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

Kimball Office offers a diverse collection of surface materials. Please see descriptions below to ensure that you are choosing the materials that best support your requirements.

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The fabric collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Generations Collection:

The Generations Collection is comprised of tried and true materials that have been in the Kimball Office offering for many years. This collection is designed to support long-standing customers and to help transition you to the current offering.
➤Visit kimballoffice.com to see the Generations Collection.

IMPORTANT: Materials in this collection should not be used to set standard color palettes for new installations.

Materials in this offering can be ordered using the standard process, however, extended lead times and minimum order quantities may apply. For best results, pre-planning orders with your Customer Service Representative is recommended.

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Warranty:

Fabrics and leathers are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).
➤See page 386 for complete warranty information.

STD2 = Group 2 (20% upcharge)

Kimball Office is known as the wood leader in the office furniture industry. Exceeding our customer expectations has always been our goal.

It is important to educate your customers on what to expect from the wood furniture they order. If they require a specific characteristic or look, please contact ***By Design*** to review veneer options and discuss special quotes.

➤See page 370 for program overview.
➤See page 374 for wood finish characteristics, care and maintenance.

Special Wood Finishes

Matrix

Standard Finishes on Alternate Wood Species

Standard finish colors on alternate wood species are available. Samples are available from Customer Service upon request.

Applicability of special finish colors depends on the wood species to which they are applied. The matrix below shows the types of woods used for each series.

	Cherry	*Maple*	*Walnut*	*Sapele*
Price Group	*1*	*1*	*1*	*2*
Definition	•	•	•	•
Fluent	•	•	•	•
Innsbruck	•			
President			•	
Senator	•		•	
Transcend	•	•	•	•

• = standard wood species

Note: Special finishes are not available on Zebrawood.

If one of our standard finishes is not appropriate, Kimball Office also has a library of previously developed special finishes which may be an acceptable match for your application. A custom finish can also be developed to meet specific needs.

➤See next page for previously developed and custom finishes.

Upcharges:

A **10%** upcharge per line item (model) for special wood finishes applies. Upcharge is calculated on the base price, before other option upcharges are added.

Example:
Senator buffet credenza (model SN2475CBLW) in special finish with molding and grommet—

Base price	$4615.00
	x .10
Special finish	$ 461.50
Base price	+4615.00
Molding option	+ 87.00
Left grommet option	+ 57.00
List price	$5220.50

Special Finish Designators:

	Wood Species		
Color	*Cherry*	*Maple*	*Walnut*
Amber	Standard/MC	MA00174KOG	WA02905KOG
Espresso	×	×	Standard/ES
Mocha	Standard/MH	×	WA02920KOG

Note: We have not yet developed special finish designators for standard finishes on alternate wood species for the other wood finishes.

Key:
× = Not feasible on wood species

How to Specify

① **Model:**
Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② **Finish type:**
For the "Finish type" step, insert a special code (in place of STD or STD2):
ZCHY1 = Special cherry finish
ZMAP1 = Special maple finish
ZWAL1 = Special walnut finish
ZSAP1 = Special sapele finish
Note: Choose the special finish code based on the standard wood species used in the case-goods line (see matrix at left).

③ **Finish designator:**
For the "Finish designator" step, insert the designator from the table at left.

Sample:
① ②
DF3028BCOFW ZCHY1
③
CH00073KOG

Special Wood Finishes

Matrix

Previously Developed and Custom Finishes

Wood Finishes	➤See page 371
Laminates	375
Paints	377
Panel Fabrics	378

Previously developed and custom finishes are available for special requirements. Kimball Office has an extensive library of previously developed special finishes which may be an acceptable match for your application. If not, a custom finish can be developed to meet specific needs.

Samples of previously developed special finishes are available from Customer Service upon request.

Applicability of special finish colors depends on the wood species to which they are applied. The matrix at right shows the types of woods used for each series.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a finish color.

	Cherry	*Maple*	*Walnut*	*Sapele*
Price Group	*1*	*1*	*1*	*2*
Definition	•	•	•	•
Fluent	•	•	•	•
Innsbruck	•			
President			•	
Priority	•	•	•	•
Senator	•		•	
Transcend	•	•	•	•

• = standard wood species

Note: Special finishes are not available on Zebrawood.

Approval Process:

① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the $300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.

② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. Custom finishes will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.

③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

Upcharges:

A one-time fee of **$300** (net) will be billed for the development of each new custom finish. This fee covers all Kimball Office product lines on which the finish may be used. Models receiving a special finish will also be assessed an upcharge.

A **10%** upcharge per line item (model number) for special wood finish is calculated on the Grade 1 upholstery price, then added to the price for the selected fabric grade, to arrive at the list price.

Example:
Senator buffet credenza (model SN2475CBLW) in special finish with molding and grommet—

Base price	$4615.00
	x .10
Special finish	$ 461.50
Base price	+4615.00
Molding option	+ 87.00
Left grommet option	+ 57.00
List price	$5220.50

How to Specify

① **Model:**
Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② **Finish type:**
For the "Finish type" step, insert a special code (in place of STD or STD2):
ZCHY1 = Special cherry finish

Wood Finish Characteristics

Including Care and Maintenance Tips

Wood Finishes	➤See page 371
Laminates	375
Paints	377
Panel Fabrics	378

Kimball Office's experience in wood finishing extends from past generations of craftsmen to present day state-of-the-art technology.

Our Pura® finish is a proprietary, water-based, ultraviolet (UV) wood finish that has virtually no volatile organic compounds (VOCs). It uses less energy than our conventional finishing process and meets or exceeds BIFMA Furniture Emission Standards (FES) and U.S. Green Building Council LEED requirements for indoor air quality. Pura is exceptionally clear and durable and allows the beauty of our wood to shine through. The durability, depth, clarity, and beauty of Pura meets the high expectations customers have of Kimball Office finishes.

Finish fill and sheen level for the top surfaces is appropriate for the design and wood species. If different specifications are required, contact Customer Service.
➤See page 7 for fill and sheen information by line.

All wood products are very susceptible to darkening from age and exposure to UV rays (sunlight and other sources), especially cherry and maple. Although a special UV inhibitor is added to finishes, care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change of the wood.

Grain characteristics of cherry veneer such as gum streaks and gum pockets occur naturally and add to the authentic look and feel of natural veneer. These are inherent to this veneer and should not be considered defects.

Brighton maple is a clear finish for those who appreciate the inherent beauty of wood. Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

Fine scratches from everyday use may be more visible on furniture with dark finishes. Darker finishes absorb more light, while fine scratches reflect the light. Therefore, scratches can be more emphasized due to this contrast. The use of a desk pad is recommended to keep scratching to a minimum.

To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth following direction of the grain.
- Dry with a separate cloth if needed.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.

Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminate surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

Customer Specified Laminate

Application Guidelines

GSA Non-Contract

Wood Finishes	➤See page 371
Laminates	375
Paints	377
Panel Fabrics	378

Customer specified laminate (CSL) is available on:
- Definition worksurfaces
- Fluent worksurfaces
- Priority worksurfaces
- Scenario table tops
- Array table tops
- Complementary Furniture
- Configuration table tops
- Contemporary table tops

➤Contact Customer Service to initiate approval.

Kimball Office reserves the right to decline a customer specified laminate which may not be suitable for application.

Kimball Office assumes no responsibility for the durability, consistent coloration or any other performance characteristic of a customer specified laminate.

Metal, embossed, specialty, and supplier discontinued laminates must be custom quoted.
➤Contact ***By Design*** at 800.482.1616 extension 6002.

CSL on products not listed above must be custom quoted.
➤Contact ***By Design*** at 800.482.1616 extension 6002.

Kimball Office orders and procures all customer specified laminates.

Laminate sheen level must not exceed 60° for maximum durability of worksurfaces.

Lead times may vary for certain laminates. Minimum order quantities may apply.

Pricing:

A **20% upcharge per line item** (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

Example:
Priority double-pedestal desk (model 53K3672DDFBL8) with CSL worksurface and one worksurface grommet—

Base price	$2197.00
	x .20
Special finish	$ 439.40
Base price	+2197.00
Left grommet option	+ 57.00
List price	$2693.40

How to Specify

① **Model:** Build the complete model specification (excluding the finish type and finish designator) by following the How to Specify on the appropriate pricing page for the product that is to receive the special finish.

② **Finish type:** For the "Finish type" step, insert a special finish code (in place of STD).
ZFMA1 = Formica
ZLMT1 = Lamin-Art
ZLTC1 = Lamitech
ZNEV1 = Nevamar
ZPTE1 = Pionite
ZWST1 = Wilsonart

③ **Finish designator:** For the "Finish designator" step, insert the laminate designator (color number) of the laminate to be applied to the product.

Sample (base model underlined):

➤See page 380 for descriptions.

Cleaning Fabrics:

Cleaning Code S
- Use only mild, pure water-free cleaning solvents.
- Cleaning by a professional furniture service is recommended.

Cleaning Code WS
- Use water-based cleaning agents or foam. Mild water-free solvents may also be used.
- Cleaning by a professional furniture service is recommended.

Cleaning Code W
- Use water-based cleaning agents or foam.

Cleaning Code D
- Dry clean only.

Directional Fabrics:

Fabric alignment for directional fabrics may vary slightly from panel to panel.

Warranty Info:

Fabric and leathers are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).
➤See page 386 for complete warranty information.

Price Grade E

Alliance Fabrics:

Kimball Office has formed partnerships with top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Lead times for alliance fabrics are based on supplier availability. Preplanning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply. ➤Contact Customer Service for availability before finalizing orders.

The information provided in this section is the most current information available at the time this price list was printed.

Application of Alliance Program upholstery will be as depicted on the swatch card unless otherwise instructed on the order.

For memo samples of Alliance fabrics, contact our alliance partners directly.

Terratex is a registered trademark of True Textiles, Inc. Each Terratex fabric must meet these four criteria:

- Made of 100% post-consumer and/or post-industrial fiber, or compostable materials
- Made using processes that reduce waste, emissions, energy, water usage, and toxic by-products
- Meets or exceeds the same quality standards of fabrics manufactured using virgin materials and conventional processes
- Made of a single fiber type, without backcoating, so that it too can be recycled or composted.

Green-e
100% of the electricity used to make these products is matched by Green-e certified renewable energy certificates.

Customer's Own Material:

Customer's Own Material (COM) is available on cushion-top pedestals and tackboards. Materials with heavy backings and vinylized fabrics are not recommended.

Kimball Office recommends that a sample be submitted for application approval prior to an order being placed. Sample should be no smaller than 5" x 7". Include a list of model numbers on which you wish to use the COM. Reference "application approval" and send to:

Kimball Office
Attn: COM Administration
1600 Royal Street
Jasper, IN 47549

Kimball Office approval signifies only that such materials can be applied to the products for which intended. Such approval does not constitute any responsibility nor any warranty on the part of Kimball Office as to appearance, behavior, or durability of the material.

Orders will be acknowledged with a tentative ship date. A notification will be sent with the date the COM must be received. If material is not received by the specified date, your ship date will be reassigned. It is the responsibility of the purchaser to expedite delivery of the material.

COM Policy:

While Kimball Office inspects fabrics for mill imperfections, some are difficult to recognize. Kimball Office is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring, appearance, or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Customers are responsible for ordering COM fabrics and expediting delivery of the material to Kimball Office.

IMPORTANT: Kimball Office reserves the right to decline a fabric or leather that may not be suitable for application to product.

Where to ship COM:

➤See the applicable pricing page for yardage requirements.

For Fluent, Priority, and Transcend cushion-top pedestals, send PREPAID to:

Kimball Office
Attn: COM Department
340 East 11th Avenue
Jasper, IN 47549-1001

For Casegoods tackboards, send PREPAID to:

Kimball Office
Attn: COM Department
Dock 11
1620 Cherry Street
Jasper, IN 47549

Tag all materials with:
- Kimball Office/Dealer's Name
- Purchase Order Number

Customer's Own Leather:

Customer's Own Leather (COL) is available on President as a special quote.
➤Contact ***By Design*** at 800.482.1616 extension 6002.

Customer's Own Leather specifications are based on average hide size of 44-50 square feet.

Orders will be acknowledged with a tentative ship date. A notification will be sent with the date the COL must be received. If material is not received by the specified date, your ship date will be reassigned. It is the responsibility of the purchaser to expedite delivery of the material.

Where to ship COL:

Send PREPAID to:

Kimball Office—Salem
200 Kimball Blvd.
Salem, IN 47167

Operating Load Capacities

Terms & Conditions ➤See page 384
Product Warranty 386
Model Number Index 388

Component	Operating Load Capacity (Functional Loads)	Example
Desk/table <45"W	200 lbs. over 12" diameter area, concentrated loading	
Desk/table 45"W–72"W	200 lbs. over 12" diameter area, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 72"W = 288 lbs.
Desk/table >72"W	Two 200 lb. loads over two 12" diameter areas, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 84"W = 324 lbs.
Pedestal drawer	.017 lb. per cubic inch of drawer interior filing space *Note: File drawers are to support hanging files only; they are not intended for bottom loading.*	24"D x 18"W x 12"H = 88 lbs.
Transaction counter, secondary surface <16"D, or and shelf	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	12"D x 60"W = 147 lbs. t.w.
Adjustable keyboard <36"W	66 lbs. over 12" diameter area, concentrated loading 66 lbs., distributive loading	
Writing shelf	25 lbs., distributive loading	
Extendible elements (drawer, shelves, etc.)	.017 lb. per cubic inch of drawer interior filing space, distributive loading	24"D x 15"W x 12"H = 73 lbs.
Center/pencil drawers	5 lbs., distributive loading	
Storage or bookcase top <38"H	200 lbs. concentrated loading .26 lb. per square inch of surface area, distributive loading	24"D x 36"W = 225 lbs.
Storage or bookcase top 38"H–72"H	.26 lb. per square inch of surface area, distributive loading	24"D x 36"W = 225 lbs.
Storage or bookcase top >72"H	.09 lb. per square inch of surface area, distributive loading	24"D x 36"W = 78 lbs.
Storage or bookcase bottom	.017 lb. per cubic inch above surface, distributive loading (not more than 18" in height)	24"D x 36"W x 18"H = 264 lbs.

Square inches should be calculated using this formula: Surface depth x surface width of available storage

Cubic inches should be calculated using this formula: Surface length x surface depth x height of available storage above the surface (limited to 18 inches above the surface)

The table at left lists the operating load capacities of various Kimball Office components. All components meet or exceed the ANSI/BIFMA Functional and Proof Loading requirements X5.5 (2008 Desk and Table Products Tests) and X5.9 (2004 Storage Units Tests). The Operating Load Capacities listed represent the BIFMA functional loads which are equivalent to loads that can be expected in normal use of the component.

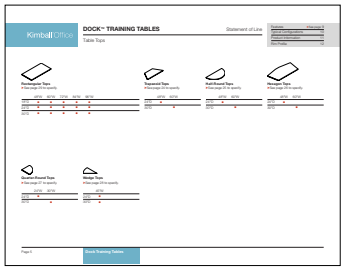
How to Use this Price List

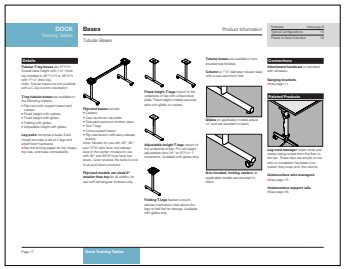
Sustainability ➤See page 4
How to Specify Our Products 3

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

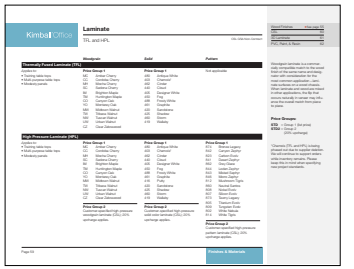
We suggest that you become familiar with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.



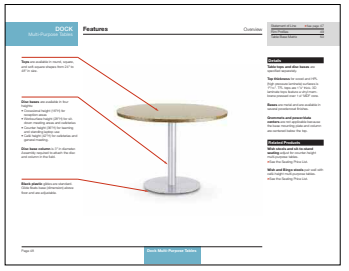
Statement of Line provides a snapshot of the entire product line. We've included an illustration and page cross references to the applicable pricing and how to specify pages.



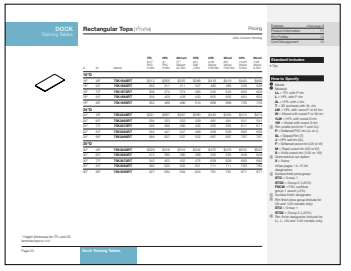
Product Information and Application Guidelines pages provide detailed information about the product, connections that can be made with other models, and planning factors.



Look in the Finishes and Materials section to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product.



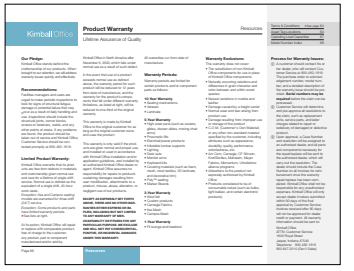
Overviews offer a quick look at the distinguishing features of the product line.



Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.

K icon indicates models that are available for quick shipment.
➤See the Kwik Office Price List.

(FSC) icon indicates models available with the FSC option (3% upcharge) at standard leadtime to meet FSC certification.



Use the Resources in the back of the price list. This repository of useful information includes Terms and Conditions, Warranty, Operating Load Capacities. You'll also find a model number index with references to the appropriate pricing page.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Standard product modifications are available on select products.
➤See the Product Modifications Price List at www.kimballoffice.com

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

How to Specify Our Products

Sustainability ➤See page 4
How to Use this Price List 2

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ❶ or ❷) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ③, ④, or ⑤) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

How to Specify
❶ Model
❷ Material:
LL = TFL with P rim
L = HPL with P rim
2L = HPL with J rim
T = 3D laminate with SL rim
LW = HPL with wood F or M rim
W = Wood with wood F or M rim
1LW = HPL with wood S rim
1W = Wood with wood S rim
③ Rim profile (omit for T and 2L):
P = Softened PVC rim (LL or L)
SL = Sloped Rim (T)
J = HPL self rim (2L)
F = Softened wood rim (LW or W)
M = Reed wood rim (LW or W)
S = Knife wood rim (1LW or 1W)
④ Grommet/cut-out option:
X = None
➤See pages 14–15 for designators.
⑤ Surface finish price group:
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑥ Surface finish designator
⑦ Rim finish price group (include for LW and 1LW models only):
STD = Group 1
STD2 = Group 2 (+20%)
⑧ Rim finish designator (include for LL, L, LW and 1LW models only)

* Height (thickness) for TFL and 3D laminate tops is 1¼".

Page 23 — Dock Training Tables

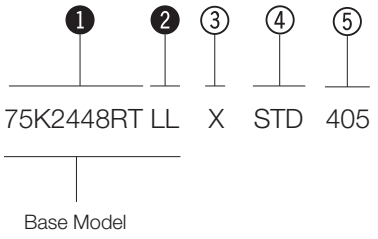
Refer to the "standard includes" list to see what ships standard as part of the base model.

Follow these steps to build a complete model specification.

Options that incur an upcharge or decrease the base price are noted within the "How to Specify" steps.

Sample Specification:

The example below shows a complete model number for a **rectangular table top.**
➤See page 32 for the corresponding pricing table and How to Specify steps.



Pricing Table Abbreviations:

D = Depth

W = Width

H = Height

T = Thickness

AO = Approach Overhang

ED = End Depth

KW = Kneespace Width

KH = Kneespace Height

WC = Worksurface Clearance

How to Use this PL ➤See page 2
How to Specify Our Products 3

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤Find more specific details regarding the environmental aspects of our product offerings at: **www.kimballoffice.com**

ecoScorecard℠

Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:
- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification
Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:
- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:
- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:
- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

Design for the Environment (DfE) is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.
➤For environmental data, visit our website at www.kimballoffice.com.

pura

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

SCScertified™
INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality
One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

ANEW

Asset Network for Education Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

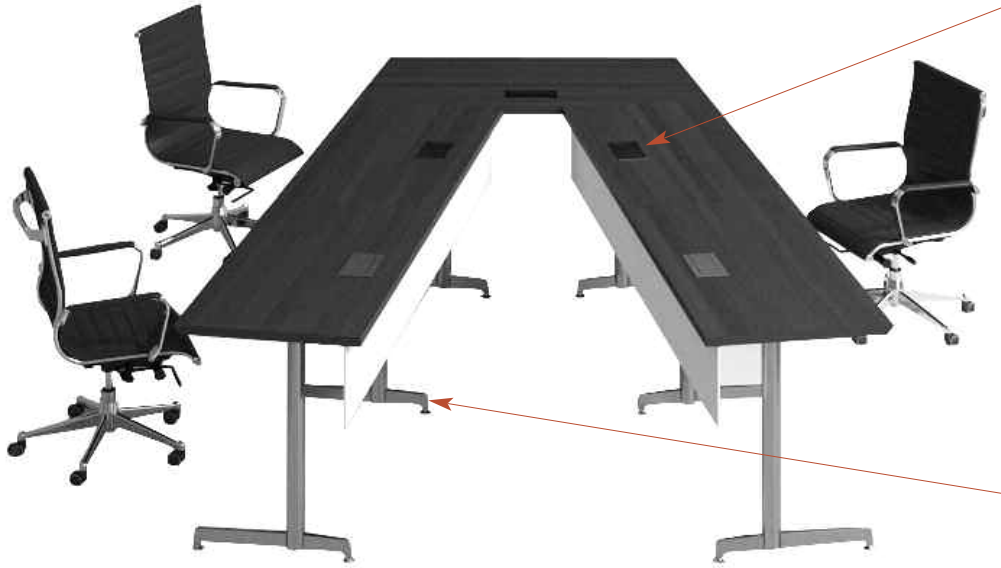
Overview

Statement of Line ➤See page 5
Typical Configurations 10
Power & Data Overview 19

Dock training tables are available in dozens of practical sizes and shapes, and can be combined in flexible arrangements for any use. Create dynamic learning environments, training rooms, private offices, collaborative spaces, and cafes, then expand or rearrange as your demands change.

Tops and legs are specified separately, increasing the flexibility of the product. Leg applications include:
- Flip/nest
- Fixed height
- Shared fixed height
- Folding
- Height adjustable

For mobility, casters are available for select leg styles.



Choose from a variety of top shapes and finishes to create your individual style and adapt to multiple budgets.

Nesting legs with casters move easily to quickly set up room configurations to suit your meeting requirements.

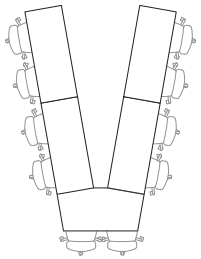
Accessory options include:
- Modesty panels
- Ganging brackets
- Surface power ports
- Grommets
- Single-circuit and 4-trac multi-circuit power systems
- Wire troughs
- Cable management

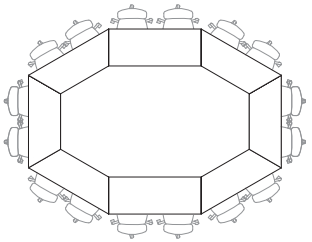
Shared table legs minimize cost and maximize leg room when used for more permanent table applications.

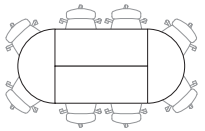
Typical Configurations

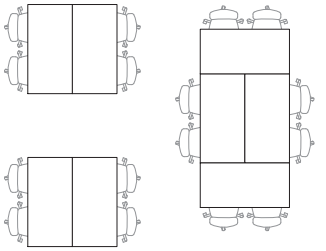
Features ➤See page 9
Power & Data Overview 19

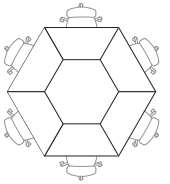
Idea Starters

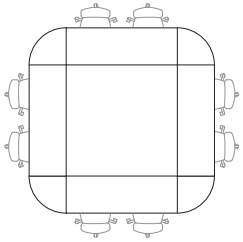


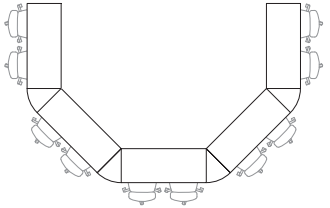


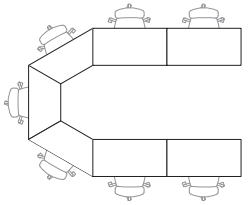


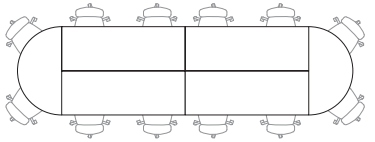


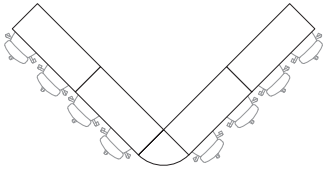


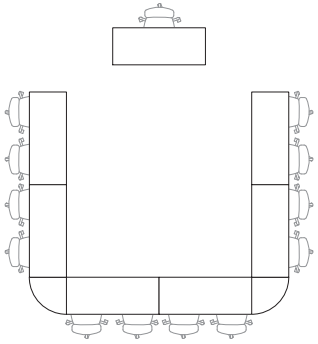


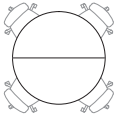


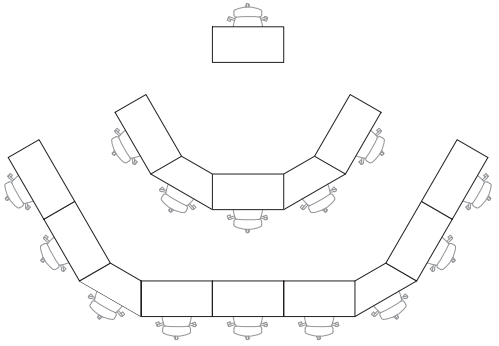


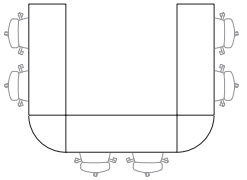












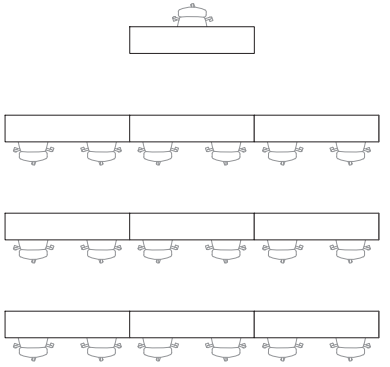


Table Tops

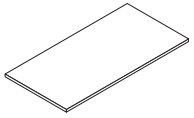
Features ➤See page 9
Typical Configurations 10
Power & Data Overview 19

Details

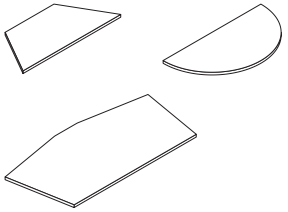
Dock training tops are available in:
- 1 1/8"-thick thermally-fused laminate (TFL)
- 1 1/8"-thick 3D laminate
- 1 3/16"-thick high-pressure laminate (HPL)
- 1 3/16"-thick high-pressure laminate (HPL) with a wood rim
- 1 3/16"-thick wood veneer

Six top shapes are available:
- Rectangular
- Trapezoid
- Half-Round
- Hexagon
- Quarter-Round
- Wedge

Not all top sizes are available for every base application.
➤See price list pages for each base type and corresponding top size



Rectangular tops are for use with all leg styles and application types. Grain runs with the width.

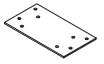


Trapezoid, half-round, and hexagon tops are for use with fixed height, folding, adjustable height, and shared leg bases. These top shapes cannot be used with flip/nest bases. Grain runs with the width.

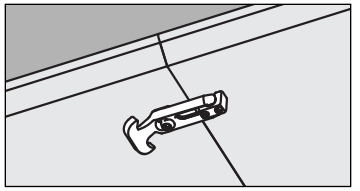
Quarter-round and wedge tops are "insert" tops to create various configurations. They are not designed to be used individually, and must be attached to rectangular worksurfaces on both sides with flat brackets (specified separately) and leg(s). Grain runs diagonally.

Connections

Tops do not ship with attachment hardware. Hardware ships with the base.



Flat brackets are required when creating several types of permanent configurations; specified separately.



Ganging bracket kit includes two black, elastic-nylon brackets that attach to the underside of two adjacent surfaces. Ganging brackets may be desired for reconfigurable applications such as nesting or mobile tables.

Planning Factors

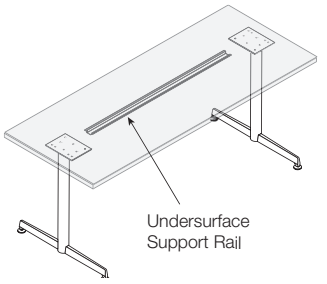
When ordering quarter-round or wedge surfaces, 2 flat brackets must be ordered for each joint to attach the tops to the adjoining rectangular surface.

When ordering tops with shared legs, 2 flat brackets must be specified for each joint to attach tops to the adjoining surface.

Flat brackets or ganging bracket kits are required when installing single-circuit or 4-trac multi-circuit electrical systems on 2 or more tables to prevent separation or damage.

24" and 30"D quarter round and 30"D wedge tops can only be used with shared C-leg bases for required support.

24"D wedge top can only be used with fixed-height T-leg or C-leg pairs. A shared leg is not applicable due to interference with the mounting plate.



Undersurface support rails are required when using fixed-height, folding, and adjustable-height bases. Rail should be located in the center of the top depth.
Note: Flip/nest bases do not require a support rail, as they ship with a cross-bar as standard.
➤See chart below for undersurface support rail requirements.

Legs must be inset 12" from each end on 84" and 96"W tops for stability.

Related Products

Factory-installed grommets and cutout options are available; up-charge applies.
➤See pages 14 and 15.

Grommets are also available for field installation.
➤See the Perks Price List.

Modesty panels
➤See page 18.

Undersurface wire managers
➤See page 13.

Undersurface Support Rail Requirements:

Top W	Base Type	42"W Rail	56"W Rail
48" Hexagon	Fixed or adjustable height	●	
60" Hexagon	Fixed or adjustable height	●	
60" Rectangular	Fixed, folding, or adjustable height	●	
72" Rectangular	Fixed or adjustable height		●
72" Rectangular	Folding	●	
84" Rectangular	Fixed or adjustable height	●	
96" Rectangular	Fixed or adjustable height		●

Note: Rail width requirements are determined by the base mounting plate size which vaires by base type.

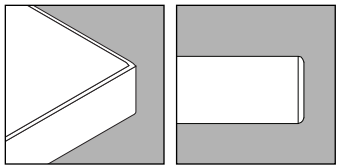
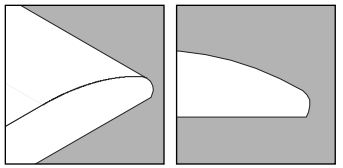
Power & Data Overview 19

Rim Profiles

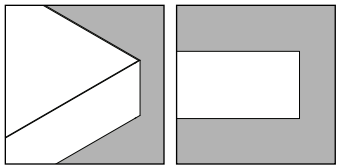
Rim profiles differ based on the top material selected.



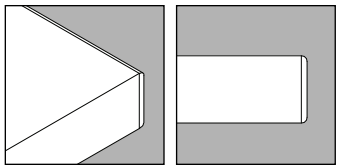
P Softened PVC rim
- Applies to TFL or HPL surfaces
- 3mm PVC edge
- Profile is on all four sides



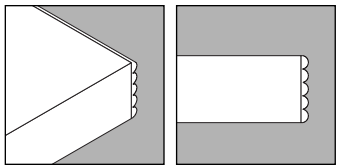
SL Sloped rim
- Applies to 3D laminate surfaces
- Sloped user edge
- Flat approach/end edges



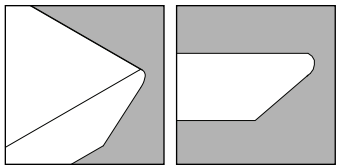
J Self-edge rim
- Applies to HPL surfaces
- Profile is on all four sides



F Softened wood rim
- Applies to HPL with wood rim or wood surfaces
- 3mm shaped wood on user edge
- .5mm flat edge band on approach/end edges



M Reed wood rim
- Applies to HPL with wood rim or wood surfaces
- 3mm shaped wood on user edge
- .5mm flat edge band on approach/end edges



S Knife wood rim
- Applies to HPL with wood rim or wood surfaces
- Knife rim on user edge
- .5mm flat edge band on approach/end edges

Table Tops

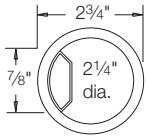
Product Information

Power and Cord Management

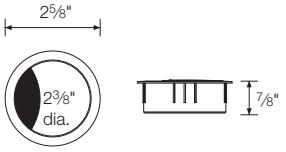
Features ➤See page 9
Typical Configurations 10
Power & Data Overview 19

Dock provides several flexible options for routing and concealing cords and cables. These include:
- Factory-installed grommet options (G1 and G19)
- Factory-installed C4 and C5 cut-outs for power/data/USB centers
- Undersurface wire trough
- Cord manager clip

Factory-installed grommets and cutouts are available as an option on tops in pre-determined locations.
➤See pages 14 and 15. for specification information, upcharges, and locations by top shape or type.

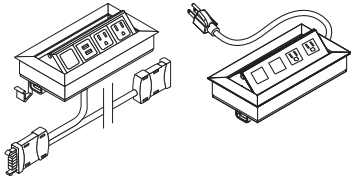


G1 plastic grommet is a two-piece unit with snap-in lid. Lid cutout slides open to route cables or can be closed when not in use. Available in:
SL Silver
MB Matte Black



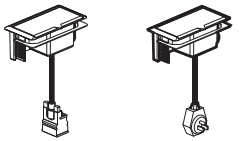
G19 metal grommet is a two-piece unit with black brush access. Top locks in place. Powdercoat finish in the following colors:
405 Designer White
501 Platinum Metallic
514 Carbon Metallic
544 Silver Pearl

Grommets for field installation are also available.
➤See the Perks Price List.



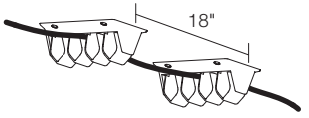
C4 cut-outs are for use with:
- Power harness with MHO retractable power centers (KCEI2PHPDUS (shown above) and KCEI2PHPDS)
- MHO retractable power center with 3 prong plug (KCEB2PDPS and KCEB2PDUPS)

Power centers must be ordered separately for field installation.
➤See page 45 and 48.

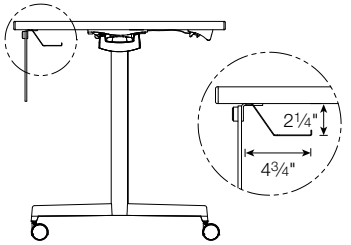


C5 cut-outs are for use with:
- Power/data centers with modular feed KCEP1PDMB and KCEP1PDMS)
- Power/data centers with three prong plug (KCEP1PDPB and KCEP1PDPS)

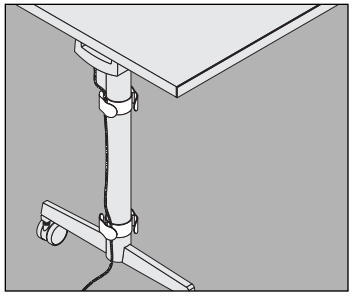
Power centers must be ordered separately for field installation.
➤See page 44 for product information.



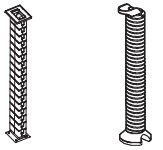
Perks loop-style undersurface cable manager organizes cords and cables under tops. Cables pressure fit into individual loops. Openings are 1"D x ⅝"W x 1"H and can be removed to expand capacity. Black plastic. Set of 6.



Metal wire trough attaches to the underside of top to hold and conceal cords and cables. Use with single-circuit and 4-trac multi-circuit electrical systems. User side is open for easy access. Trough can be used with flip/nest, fixed, and adjustable-height leg applications and is compatible with a modesty panel installed in front of the trough. It is not available for use with folding legs.



Leg cord manager fits blade and tubular bases to hold cords and cables being routed from the floor to the top. These clips are simple to use and no installation hardware is required; they snap onto the column. Available in silver or clear plastic. Set of 3.



Perks flexchain and expandable cable manager manages cables and attaches to the underside of top to route cables and cords to the floor.

Available Finishes

G1 Plastic Grommets:
SL Silver
MB Matte Black

G19 Metal Grommets:
405 Designer White
501 Platinum Metallic
514 Carbon Metallic
544 Silver Pearl

How to Specify

① Insert the location *and* finish designator (for grommets) into model number sequence as indicated on the corresponding pricing page.

Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.
For example:
G1LMB = G1 grommet, left, matte black
G19R501 = G19 grommet, right, platinum metallic

IMPORTANT: Only the grommet locations shown in the matrix at left with a designator and price are available.

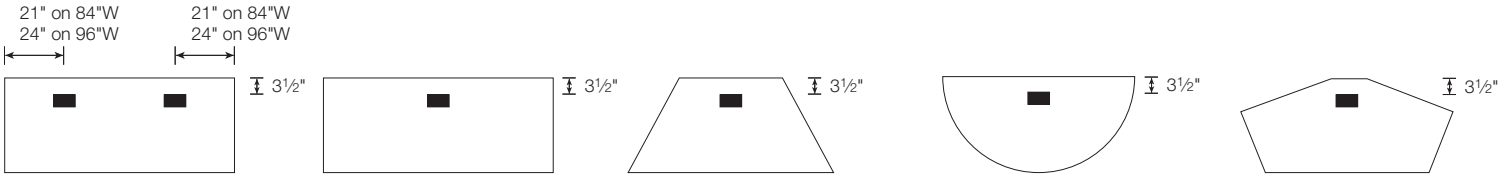
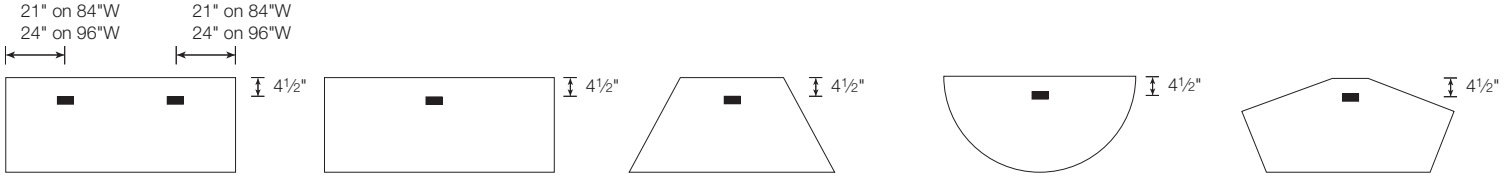
C4 Cut-Outs



C5 Cut-Outs



Related Products

C4 cut-outs are designed to accept:

- Power Harness with MHO retractable power centers (KCEI2PHPDUS and KCEI2PHPDS)
- MHO retractable power center with 3 prong plug (KCEB2PDUS and KCEB2PDUPS)

C5 cut-outs are for use with:

- Power/data power centers with modular feed KCEP1PDMB and KCEP1PDMS)
- Power/data power centers with three prong plug (KCEP1PDPB and KCEP1PDPS)

How to Specify

① Insert the location into model number sequence as indicated on the corresponding pricing page.

IMPORTANT: Only the cut-out locations shown in the matrix at left with a designator and price are available.

Bases

Product Information

Blade Bases

Features ➤See page 9
Typical Configurations 10
Power & Data Overview 19

Details

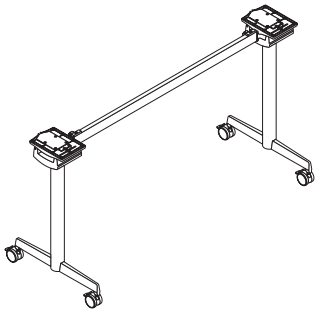
Blade bases are available in two distinct styles:
- T-leg
- C-leg

All blade bases are 27¾"H. Overall table height with 1⅛"-thick top installed is 28 13/16"H or 28⅞"H with 1 3/16"-thick top.

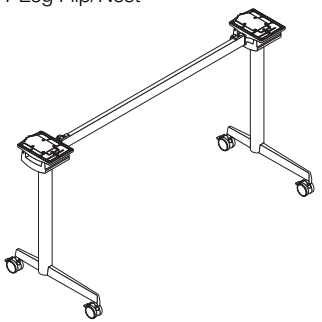
T-leg blade bases are available in the following models:
- Flip/nest with support beam and casters
- Fixed-height with casters
- Fixed-height with glides
- Folding with glides

C-leg blade bases are available in the following models:
- Flip/nest with support beam and casters
- Fixed-height with casters
- Fixed-height with glides
- Shared fixed-height with glides (single leg)

Leg pairs comprise a base, with the exception of a shared C-leg. Each model provides a set of 2 legs and attachment hardware.
➤See the pricing pages for top shape, top size, and base compatabilty.



T-Leg Flip/Nest

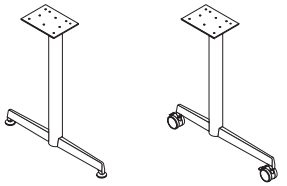


C-Leg Flip/Nest

Flip/nest T-leg and C-leg bases include:
- Casters
- Cast aluminum top plate
- Extruded aluminum bottom plate
- Two T- or C-legs
- Cross support beam
- Flip mechanism with easy-release lever(s)

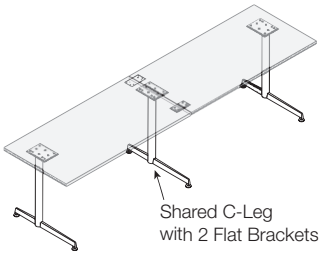
Note: Models for use with 48", 60", and 72"W tops have one release lever in the center; models for use with 84" and 96"W tops have two levers. Lever enables the table to lock in up and down positions.

Flip/nest models are sized 2" smaller than top for all widths; for use with rectangular surfaces only.

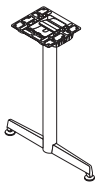


T-leg C-leg

Fixed-height T-legs and C-legs mount to the underside of top with a fixed steel plate. Fixed-height models are available with glides or casters.



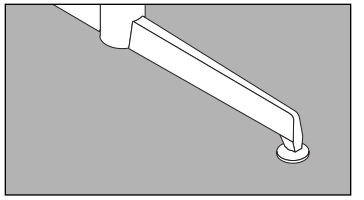
Fixed-height shared C-leg with glides can be specified for static table configurations to replace two legs. Two flat brackets are required at the seam. Some shape applications will only allow one bracket due to space restrictions, however.



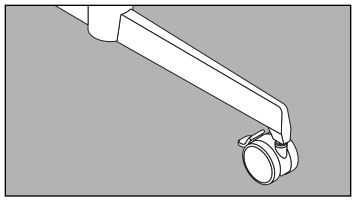
Folding T-legs feature a touch-release mechanism that allows the legs to fold flat for storage. Available with glides only.

Column and foot for all blade bases are available in matching or contrasting powdercoat finishes. Foot is also available in polished aluminum at no upcharge.

Column is 2⅜"-diameter, 10-gauge tubular steel with a cast aluminum foot.



Glides on applicable models adjust ¾" and are standard in:
- Silver on Polished Aluminum, Designer White, Platinum Metallic, or Silver Pearl, Antique White, or Frosty White foot
- Black on all other foot colors.



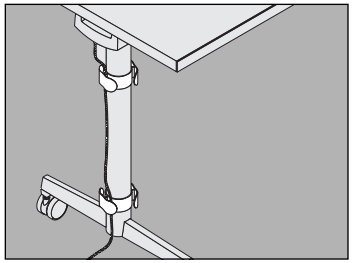
Non-hooded, locking casters on applicable models are available in:
- Black
- White/grey

Connections

Attachment hardware is standard with all bases.

Ganging brackets
➤See page 11.

Related Products



Leg cord manager holds cords and cables being routed from the floor to the top. These clips are simple to use and no installation hardware is required; they snap onto the column.

Undersurface wire managers

Bases

Product Information

Tubular Bases

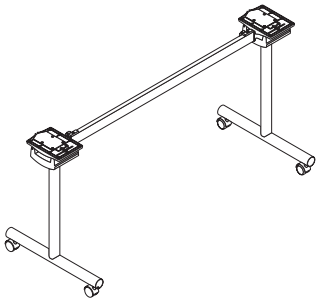
Features ➤See page 9
Typical Configurations 10
Power & Data Overview 19

Details

Tubular T-leg bases are 27¾"H. Overall table height with 1⅛"-thick top installed is 28 13/16"H or 28⅞"H with 1 3/16"-thick top.
Note: Tubular bases are not available with a C-leg column orientation.

T-leg tubular bases are available in the following models:
- Flip/nest with support beam and casters
- Fixed-height with casters
- Fixed-height with glides
- Folding with glides
- Adjustable-height with glides

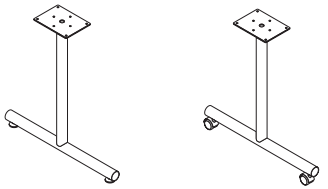
Leg pairs comprise a base. Each model provides a set of 2 legs and attachment hardware.
➤See the pricing pages for top shape, top size, and base compatabilty.



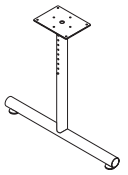
Flip/nest bases include:
- Casters
- Cast aluminum top plate
- Extruded aluminum bottom plate
- Two T-legs
- Cross support beam
- Flip mechanism with easy-release lever(s)

Note: Models for use with 48", 60", and 72"W tops have one release lever in the center; models for use with 84" and 96"W tops have two levers. Lever enables the table to lock in up and down positions.

Flip/nest models are sized 2" smaller than top for all widths; for use with rectangular surfaces only.



Fixed-height T-legs mount to the underside of top with a fixed steel plate. Fixed-height models are available with glides or casters.

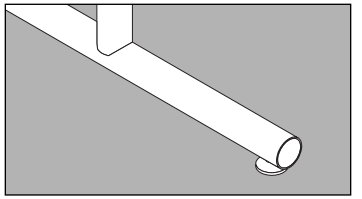


Adjustable-height T-legs mount ot the underside of top. Pin-set height adjustables from 26" to 35"H in 1" increments. Available with glides only.

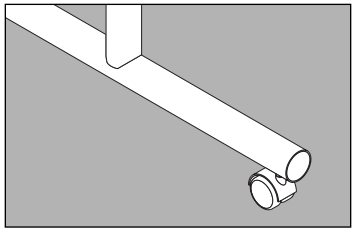
Folding T-legs feature a touch-release mechanism that allows the legs to fold flat for storage. Available with glides only.

Tubular bases are available in two powdercoat finishes.

Column is 1⅞"-diameter, 14-gauge tubular steel.



Glides on applicable models adjust ¾" and are standard in black.



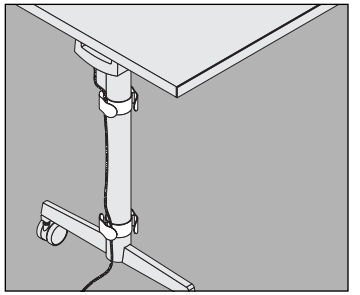
Non-hooded, locking casters on applicable models are standard in black.

Connections

Attachment hardware is standard with all bases.

Ganging brackets
➤See page 11.

Related Products



Leg cord manager holds cords and cables being routed from the floor to the top. These clips are simple to use and no installation hardware is required; they snap onto the column.

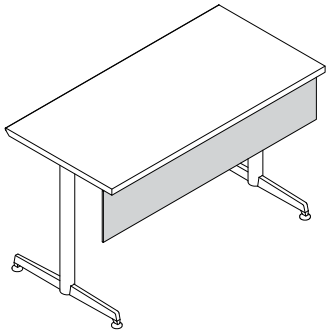
Undersurface wire managers
➤See page 13.

Undersurface support rails
➤See page 41.

Modesty Panels

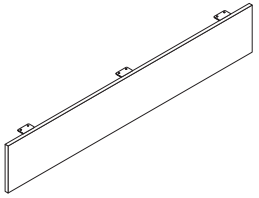
Features ➤See page 9
Typical Configurations 10
Power & Data Overview 19

Details

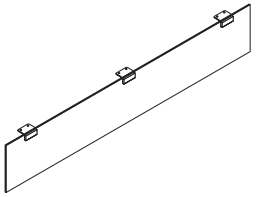


Modesty panels provide user privacy and conceal electrical components and metal wire trough. Panels are 10"H.

➤See the pricing pages for modesty panel and top compatibilty.



TFL, HPL, and wood veneer modesty panels are 3/4" thick and are edge banded in the same material.



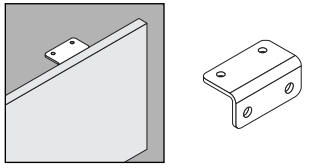
Resin modesty panel is 1/4" thick and ships with a silver coverplate to conceal mounting brackets.

Connections

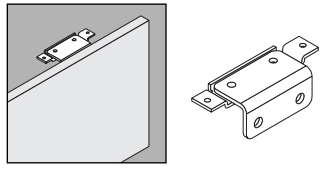
Mounting bracketry for static, folding, or nesting is indicated as part of the specification for the modesty panel. Select:

- Static for fixed tables
- Folding for folding tables
- Nesting for flip/nest tables

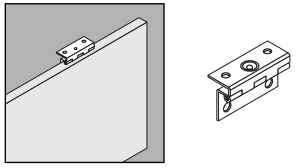
Upcharge applies for folding and nesting options.



Static

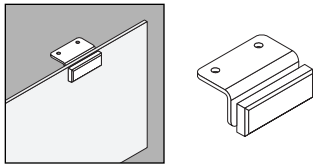


Folding (removable)

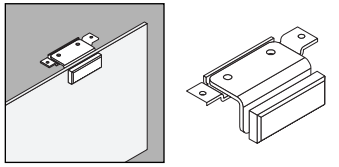


Flip/nest (hinged)

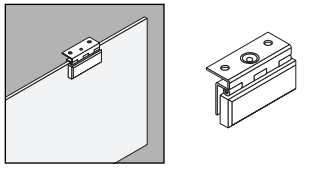
Mounting brackets for use with TFL, HPL, and wood modesty panels are black.



Static



Folding (removable)



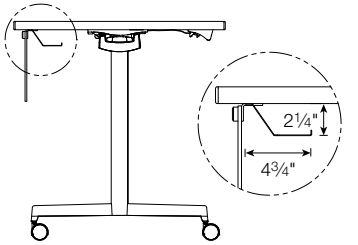
Flip/nest (hinged)

Mounting brackets for use with resin modesty panels are:

- Silver for flip/nest bases
- Black for fixed-height and folding bases

Modesty panel ships with the following bracket quantities:

- 48"W includes 2 brackets
- 60" and 72"W includes 3 brackets
- 84" and 96"W includes 4 brackets



Metal wire trough is compatible with a modesty panel installed in front of the trough.

Power and Data

Overview

Features ➤See page 9
Typical Configurations 10

Dock offers several power options:
- Corded
- Perimeter single-circuit power system
- Interlink IQ single-circuit power system
- 4-trac multi-circuit power system

IMPORTANT: Installation and use of electrical systems, the number or receptacles used on a given circuit, and connections to the building power suppy should be in compliance with all local and national codes.
Verify code requirements before ordering.

Corded:

Corded components are stand alone units that plug directly into a wall outlet. They can be used in a single table application or can plug into the 4-trac power system duplex receptacle under the top. UL recognized.

➤See page 48.

Perimeter Single-Circuit:

This non-sequential, 15-amp daisy-chain system can power a maximum of 8 power/data centers, each with 2 receptacles, off of one in-feed.
UL recognized.

System is comprised of:
- Smart box power in-feed
- Table-to-table jumpers
- Power/data center

➤See page 20.

Interlink IQ Single-Circuit:

This non-sequential, 15-amp daisy-chain system can power a maximum of 8 power/data centers, each with 2 receptacles, off of one in-feed.
UL recognized.

System is comprised of:
- Sensor box with power in-feed
- Combination power harness and rectractable power/data and power/data/USB center
- Table-to-table jumpers select configurations

➤See page 22.

4-Trac Multi-Circuit:

This low profile, non-sequential, 15-amp (2 circuits) or 20-amp (1 circuit), daisychain system provides 4 wires, and powers up to 12 duplex receptacles per circuit. All parts are UL listed, with the exception of the 20-amp power in-feed with plug which is UL recognized.

Up to twelve tables can be linked together.

System is comprised of:
- Power in-feeds*
- Modular power kits that include two duplex receptacles and harness
- Table-to-table jumper

* Rotating power in-feed with quick disconnect, hardwire and hardwire for NYC in-feed models are also available.

➤See page 24.

Power and Data

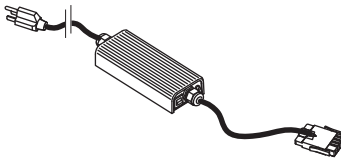
Product Information

Perimeter Single-Circuit Power System

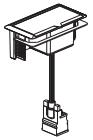
Features ➤See page 9
Typical Configurations 10
Power & Data Overview 19

Details

Non-sequential, 15-amp daisy-chain system can power a maximum of 8 power/data centers, each with 2 receptacles, off of one in-feed. UL recognized.



Smart box power in-feed includes smart LED indicators that illuminate green when you have linked the appropriate number of units. A red light means you've linked too many units. 10' black 15-amp power cord plugs into standard wall or floor outlet on one end and connects to jumper or power/data center with modular feed.



Power/data centers are 6 1/4"W x 3 1/4"D and fit C5 factory-installed cut-outs in top. They feature a self-storing, metal lid with a plastic body. Attaches to power in-feed and jumper.

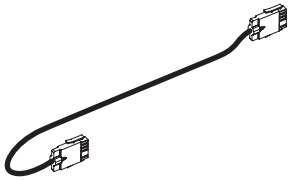


Table-to-table jumper continues power from one power/data center to another.

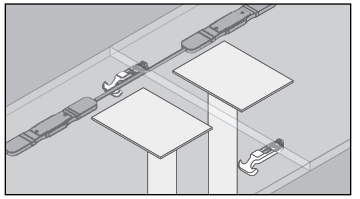
➤See page 21 for diagrams for required components.

Connections



Ganging brackets or flat brackets are required between power-linked tables.

Up to 8 power/data centers can be powered by one smart box power in-feed.

Power and Data

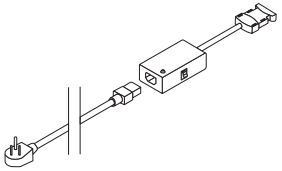
Product Information

Interlink IQ Single-Circuit Power System

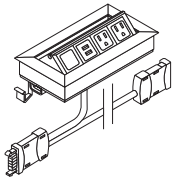
Features ➤See page 9
Typical Configurations 10
Power & Data Overview 19

Details

Non-sequential, 15-amp daisy-chain system can power a maximum of 8 power/data centers, each with 2 receptacles, off of one in-feed. UL recognized.



Interlink IQ power in-feed with sensor box includes smart LED indicators that illuminate green when you have linked the appropriate number of units. A red light means you've linked too many units. A 10' black, 15-amp power cord plugs into the sensor box on one end and into a standard wall or floor outlet on the other end.



60"W Mho® power harness with retractable power/data or power/data/USB center provides power to the surface and extends power to an adjacent surface. Power centers are 8⅜"W x 4⅜"D and fit C4 factory-installed cut-outs in top. Clear, anodized aluminum.

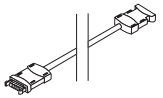


Table-to-table jumpers are required for 72"W tables in runs of 3 or more tables.
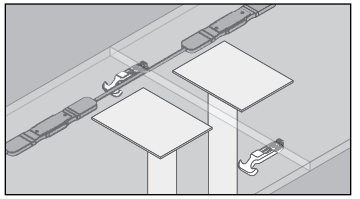
➤See page 23 for diagrams for required components.

Connections



Ganging brackets or flat brackets are required between power-linked tables.

Up to 8 power centers can be powered by one in-feed.

IMPORTANT: Installation and use of electrical systems, the number or receptacles used on a given circuit, and connections to the building power suppy should be in compliance with all local and national codes.Verify code requirements before ordering.

Power and Data

Product Information

4-Trac® Multi-Circuit Power System

Features ➤See page 9
Typical Configurations 10
Power & Data Overview 19

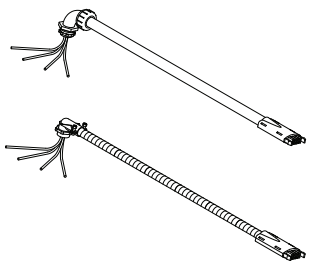
Details

Low profile, non-sequential, 15-amp daisychain system provides 4 wires and 2-circuits. Utilizing a single power in-feed, the system powers up to 12 duplex receptacles per circuit or up to 24 duplex receptacles when using both circuits.

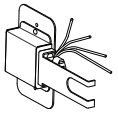
Three types of 15-amp power in-feeds are available to bring power from a wall or floor-mounted power box:
- Hardwire
- Hardwire for NYC/San Francisco
- Rotating with quick disconnect

Determine your need based on the available power source and local electrical codes. There are no restrictions in connection sequence.

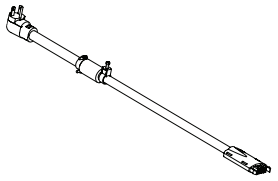
IMPORTANT: All power in-feeds require installation by a licensed electrician.



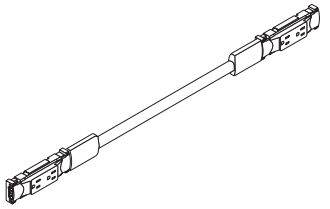
Hardwire 15-amp power in-feeds feature black, liquid-tight conduit (standard model) or metal conduit (NYC model). Modular end connects to modular power kit.



Rotating 15-amp power in-feed is available to replace an existing wall outlet. Allows quick disconnect from wall outlet. A 72"L jumper, specified separately, connects the rotating power in-feed to a modular power kit. Jumper is encased in black liquid-tight conduit.

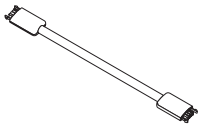


20-amp power in-feed with plug is available. Modular end connects to modular power kit.
IMPORTANT: The 20-amp power in-feed limits the system to a single circuit only and accommodates a maximum of 12 duplex receptacles; all modular power kits in the series must be Circuit 1. This infeed will not plug into a 15-amp power outlet.



Modular power kits contain:
- Two 15-amp duplex receptacles
- Harness between the two receptacles, either circuit 1 or circuit 2.

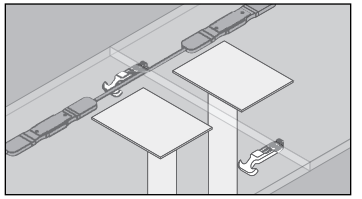
Kits are sized to table top widths and attach to the underside of top with included brackets for ease of installation. Harness is encased in black liquid tight conduit.



25" and 36"L jumpers are available to extend power between duplex receptacles on adjoining tables. Jumper is encased in black liquid-tight conduit. 72"L jumpers are for use with rotating 15-amp power in-feed.

All parts are UL 183 listed, with the exception of the 20-amp power in-feed with plug which is UL recognized.

Connections



Ganging brackets or flat brackets are required between power-linked tables.

Planning Factors

Specify the appropriate cut-out size for corded units to install in the top and plug into the duplex outlet underneath the top to bring power to the surface.
➤See page 15.

Specify tops with G1 or G19 grommets to allow desk top eletronics to be plugged in under the surface. This is a lower cost alternative and practicle for more permanent or semi-permanent configurations, such as teaming environments.
➤See page 14.

Related Products

Undersurface wire managers

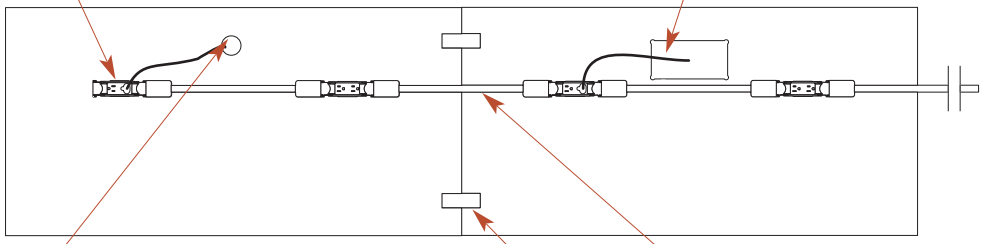
Power and Data

4-Trac® Multi-Circuit Power System, continued

Features ➤See page 9
Typical Configurations 10
Power & Data Overview 19

Modular power kit features duplex receptacle on each end.

Specify a factory-installed cut-out in table top and a power/data center separately to provide power above the surface. 3-prong plug plugs directly into a receptacle below the top top.



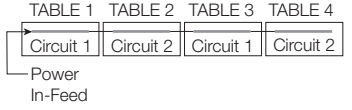
Specify table top with a factory-installed grommet to allow electronics to be plugged in directly to duplex receptacles below the table top.

Table-to-table jumper connects modular power kits, jumping power from one table to the next.

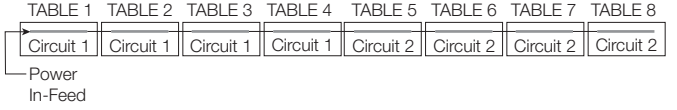
Ganging brackets or flat brackets are required at each table connection to prevent separately of the power system.

IMPORTANT: Installation and use of electrical systems, the number or receptacles used on a given circuit, and connections to the building power suppy should be in compliance with all local and national codes.
Verify code requirements before ordering.

Circuits in Alternating Pattern



Circuits in Succession



Determining Circuit Usage:

The decision to specify circuit-1-only or to use circuit 1 and 2 together is based on how many tables you wish to power.

Circuit 1 only:

- Utilizes circuit 1 power kits
- Can power up to 6 tables maximum off of one power in-feed
- Provides two duplex receptacles to each table for a total of 12 duplex receptacles per run
- Can be powered with 15-amp hardwire (standard or NYC model), rotating 15-amp hardwire, or 20-amp plug-in power in-feed

Circuits 1 and 2:

- Accomodates a combination of circuit 1 and 2 modular power kits
- Can power 7 or more tables (maximum of 12) off of one power in-feed
- Provides two duplex receptacles to each table for a total of 12 duplex receptacles per run
- Can be powered with 15-amp hardwire (standard or NYC model) or rotating 15-amp hardwire.
- Cannot be powered with 20-amp plug-in power infeed
- Circuits 1 and 2 can alternate table to table or they can be in succession (see at diagram at left) since the system is non-sequential and will automatically connect to the correct circuit

Table Tops

Rim Profiles ➤See page 54
Factory-Installed Grommets 56
Factory-Installed Cut-Outs 57
Table Base Matrix 61

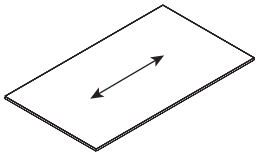
Details

Dock training tops are available in:
- 1 1/8"-thick thermally-fused laminate (TFL)
- 1 1/8"-thick 3D laminate
- 1 3/16"-thick high-pressure laminate (HPL)
- 1 3/16"-thick high-pressure laminate (HPL) with a wood rim
- 1 3/16"-thick wood veneer

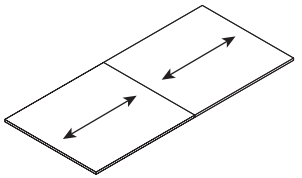
Ten top shapes are available:
- Round
- Square
- Soft Square
- Rectangular
- Soft Rectangular
- Arc Rectangular
- Boat
- Racetrack
- Ellipse
- Tapered

➤See price list pages for each base type and corresponding top size

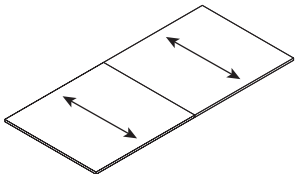
Six rim profile options are available.
➤See page 54.



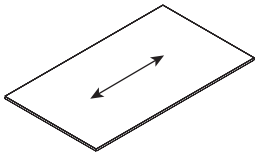
Grain direction runs with the width on one-piece wood tops in all veneers and finishes



Grain direction runs with the width on two-piece wood tops in the following veneers:
- Cherry (plain-sliced)
- Maple (plain-sliced)
- Walnut (plain-sliced)
- Sapele (quarter-cut)



Grain direction on two-piece wood tops runs with the depth on the following veneers:
- Oak (quarter-cut)
- Walnut (quarter-cut)
- Zebrawood



Grain direction runs with the width on one- and two-piece woodgrain laminate tops. On two-piece TFL surfaces, the woodgrain pattern will not be matched; two-piece HPL tops will have an acceptable match.

Connections

Two-piece tops ship with flat brackets to connect tops at seams.

Hardware ships with base to attach the base to the top.

Related Products

Factory-installed grommets and cut-outs are available; upcharge applies.
➤See pages 56–57.

Grommets are also available for field installation.
➤See the Perks Price List.

Product Information

Power and Cord Management

Table Tops	➤See page 53
Rim Profiles	54
Factory-Installed Cut-Outs	57
Table Base Matrix	61

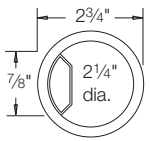
Details

Several flexible options for routing and concealing cords and cables are available with Dock training:

- Factory-installed grommets (G1)
- Factory-installed C2, C4, C6, C8, and C9 size for power/data/USB centers
- Cord manager clips

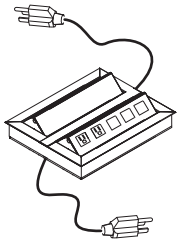
Factory-installed grommets and cut-outs are available as an option on tops 60"W and wider in pre-determined locations; upcharge applies.

➤See page 00 for grommet options.
➤See page 00 for cut-out options.



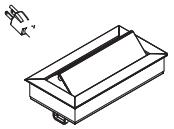
G1 plastic grommet is a two-piece unit with snap-in lid. Lid cutout slides open to route cables or can be closed when not in use. Available in:

SL Silver
MB Matte Black



C2 cut-outs are for use with:

- M2X retractable power/data (KCU0810ELPDC or KCU0810ELPDCH)
- M2X retractable power/data/USB/HDMI/VGA Center (KCE820ELPDC or KCE820ELPDH)



C4 cut-outs are for use with:

- Mho® retractable power/data center with 3 prong plug (KCEB2PDPS
- Mho retractable power/data/USB center with 3 prong plug (KCEB2PDUPS)

➤See page 48.

C6 cut-outs are for use with:

- Node™ power center (KCEBN11PU)
- Node™ power/USB center (KCEBN20E)

C8 cut-outs are for use with:

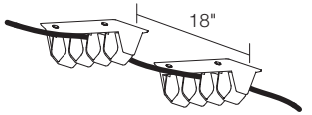
- Vault power/data turnbox (KCE4124PD)

C9 cut-outs are for use with:

- Vault power/data/USB turnbox (KCE4164PD)

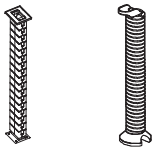
Leg cord manager fits blade bases to hold cords and cables being routed from the floor to the top. These clips are simple to use and no installation hardware is required; they snap onto the column. Available in silver or clear plastic. Set of 3.

Related Products



Perks loop-style undersurface cable manager organizes cords and cables under tops. Cables pressure fit into individual loops. Openings are 1"D x ⅝"W x 1"H and can be removed to expand capacity. Black plastic. Set of 6.

➤See page 00.



Perks flexchain and expandable cable manager manages cables and attaches to the underside of top to route cables and cords to the floor.

➤See page 00.

Grommets are also available for field installation.

➤See the Perks Price List.

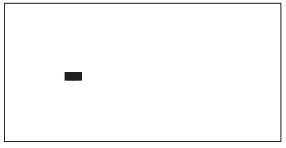
IMPORTANT: Factory-installed cut-outs options are available on rectangular, soft rectangular, arc rectangular, boat, racetrack, tapered, and ellipse tops only. Round, square, and soft-square tops (all sizes), and 24" x 48" tops are not available with factory-installed cut-outs.

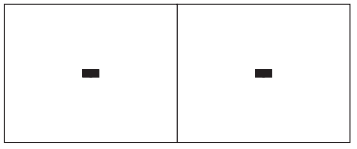
How to Specify

① Insert the location into model number sequence as indicated on the corresponding pricing page.

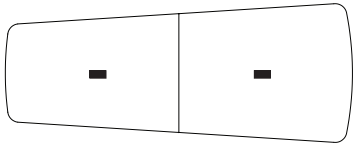
IMPORTANT: Only the cut-out locations shown in the matrix at left with a designator and price are available.



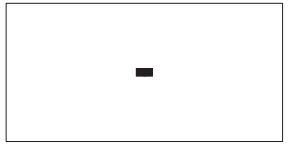
C*IE = Inside End (between bases)



C*ILR = Inside Left and Right (between bases)



C*IL = Inside Left (smaller end)
C*IR = Inside Right (larger end)
C*ILR = Inside Left and Right (between bases)



C*C = Center

** Size of cut-out*

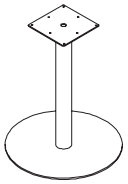
Bases

Product Information

Disc Bases

Table Tops ➤See page 53
Table Base Matrix 61

Details



Disc bases are available in four heights:

- Occasional height (16"H) for reception areas
- Worksurface height (28"H) for sit-down meeting areas and cafeterias
- Counter height (36"H) for teaming and standing laptop use
- Café height (42"H) for cafeterias and general meeting

Bases are metal and are available in several powdercoat finishes.

Disc base column is 3" in diameter. Assembly required to attach the disc and column in the field. Black plastic glides are standard on disc bases. Glide floats base ¼" above the floor with ⅛" adjustabiity.

Disc bases can be used singularly to support round, square, and soft-square tops from 24" to 48". They can be used in sets of 2 or 3 too support rectangular and other shaped tops.

Connections

Grommets and power/data centers are not applicable with round and square tops; the base mounting plate and column of disc bases are centered beneath the top.

Bases mount to the underside of tops with a fixed steel plate. Attachment hardware is standard with all bases.

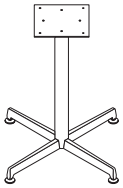
Bases

Product Information

Blade Bases

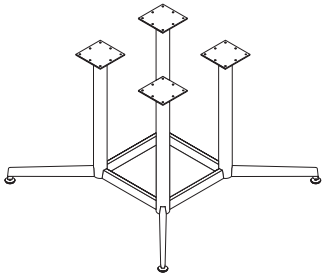
Table Tops ➤See page 53
Table Base Matrix 61

Details



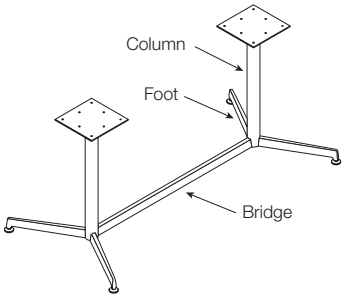
Blade X bases can be used singularly to support round, square, and soft-square tops from 24" to 48". They are available in five heights:

- Occasional height (16"H) for reception areas
- End table height (20"H) for reception areas
- Worksurface height (28"H) for sit-down meeting areas and cafeterias
- Counter height (36"H) for teaming and standing laptop use
- Café height (42"H) for cafeterias and general meeting



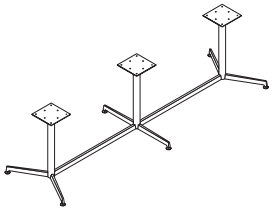
Quad bases are used to support 48" square and soft-square tops, as well as 54" and 60" round, square, and soft-square tops. They available in three heights:

- Worksurface height (28"H) for sit-down meeting areas and cafeterias
- Counter height (36"H) for teaming and standing laptop use
- Café height (42"H) for cafeterias and general meeting



Y bases are used to support occasional, meeting, and conference tops in a variety of sizes and shapes. They available in four heights in select sizes:

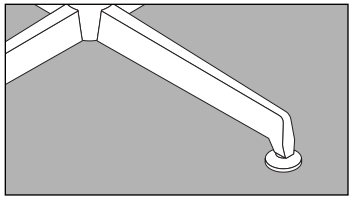
- Occasional height (16"H) for reception areas
- Worksurface height (28"H) for sit-down meeting areas and cafeterias
- Counter height (36"H) for teaming and standing laptop use
- Café height (42"H) for cafeterias and general meeting



98" and 110"W Y bases feature three columns, six feet, and two bridges.

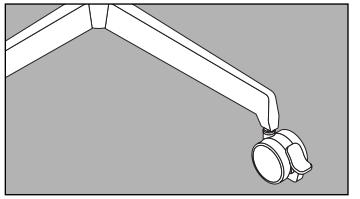
Column is 2⅜"-diameter, 10-gauge tubular steel with a cast aluminum foot.

Column, feet, and bridges on blade bases are available in matching and contrasting powdercoat finishes. The foot and bridge are also available in polished aluminum at no upcharge; foot and bridge on quad and Y models are always the same color/finish.



Glides adjust ¾" and are standard in:

- Silver on Polished Aluminum, Designer White, Platinum Metallic, Silver Pearl, Antique White, or Frosty White foot
- Black on all other foot colors.



Non-hooded, locking casters on mobile blade X base models are available in:

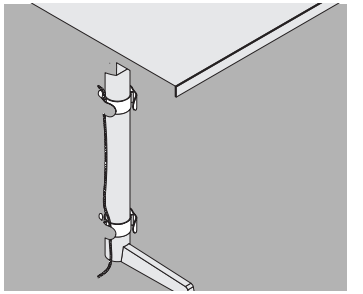
- Black
- White/grey

Connections

Bases mount to the underside of tops with a fixed steel plate. Attachment hardware is standard with all bases.

Grommets and power/data centers are not applicable with round and square tops; the base mounting plate and column of blade bases are centered beneath the top.

Related Products



Leg cord manager fits blade bases to hold cords and cables being routed from the floor to the top. These clips are simple to use and no installation hardware is required; they snap onto the column. Available in silver or clear plastic. Set of 3.

Wish stools and sit-to-stand seating adjust for counter-height tables.

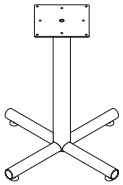
Bases

Product Information

Tubular X Bases

Table Tops ➤See page 53
Table Base Matrix 61

Details

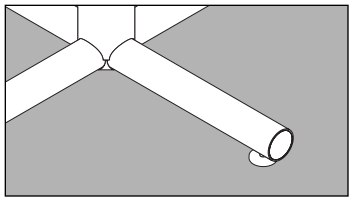


Tubular X bases are available in two heights:

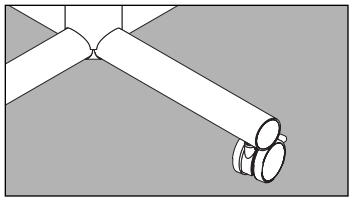
- Worksurface height (27¾"H) for sit-down meeting areas and cafeterias
- Café height (41"H) for cafeterias and general meeting

Bases are metal and are available in two powdercoat finishes.

Column is 3" in diameter and feet are 1⅞" in diameter. Constructed of 14-gauge tubular steel.



Glides adjust ¾" and are standard in black.



Non-hooded, locking casters are available on worksurface-height (27¾"H) bases. They are standard in black.

Connections

Bases mount to the underside of tops with a fixed steel plate. Attachment hardware is standard with all bases.

How to Specify

❶ Model
❷ Material:
LL = TFL with P rim
L = HPL with P rim
2L = HPL with J rim
T = 3D laminate with SL rim
LW = HPL with wood F or M rim
W = Wood with wood F or M rim
1LW = HPL with wood S rim
1W = Wood with wood S rim
③ Rim profile:
P = Softened PVC rim (LL or L)
SL = Sloped Rim (T)
J = HPL self rim (2L)
F = Softened wood rim (LW or W)
M = Reed wood rim (LW or W)
S = Knife wood rim (1LW or 1W)
④ Grommet/cut-out option:
X = None
⑤ Surface finish price group:
STD = Group 1
STD2 = Group 2 (+20%)
⑥ Surface finish designator
⑦ Rim finish price group (include for LW and 1LW models only):
STD = Group 1
STD2 = Group 2 (+20%)
⑧ Rim finish designator (include for LL, L, LW and 1LW models only)

FINISHES & MATERIALS

Samples:

Samples of Kimball Office materials are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur between samples and finished products. Kimball Office carefully selects all materials used in every product, ensuring a commercially acceptable color and finish.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The fabric collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Wood Finishes

Special Wood Finishes

GSA Non-Contract

Wood Finishes	➤See page 101
Laminate	104
3D Laminate	105
Paint, PVC, & Resin	107

Kimball Office offers the following options for special wood finishes:
- Standard finish color on alternate wood species
- Previously developed special finish
- Custom finish

Standard finish colors available on an alternate wood species include:
- Amber on Maple
- Amber on Walnut
- Mocha on Walnut

These finishes can be specified without going through the finish approval process described at right.

Previously developed special finishes can be selected from an extensive library developed by Kimball Office. Samples of previously developed special finishes are available from Customer Service upon request.

Custom finishes can be developed to meet specific needs, if an acceptable match is not available in our library.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a finish color.

Applicability:

Applicability of special finish colors depends on the wood species to which they are applied. The matrix below shows the types of woods used for each series.

Price Group	*Cherry 1*	*Maple 1*	*Walnut 1*	*Sapele 2*

Transcend	•	•	•	•
Villa Tables	•	•	•	•

• = standard wood species

Note: Special finishes are not available on Zebrawood, Canyon Oak, Monterey Oak, or Tuscan Walnut.

Upcharges:

A one-time fee of **$300** (net) will be billed for the development of each new custom finish. This fee covers all Kimball Office product lines on which the finish may be used.

A **10%** upcharge per line item (model number) will be applied for a standard finish on an alternative wood species, a previously developed special finish, or a custom finish. This upcharge is calculated on the base price, before other option upcharges are added.

For upholstered products, the upcharge is calculated on the Grade 1 upholstery price then added to the price for the selected fabric grade, to arrive at the list price.

Custom Finish Approval Process:

① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the $300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.

② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. If not, a custom finish will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.

③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

Note: The one-time fee of $300 will not be charged unless a custom match finish is required.

How to Specify

① **Model:**
Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② **Finish type:**
For the "Finish type" step, insert a special code (in place of STD):
ZCHY1 = Special cherry finish
ZMAP1 = Special maple finish
ZWAL1 = Special walnut finish
ZSAP1 = Special sapele finish
Note: Choose the special finish code based on the standard wood species used in the case-goods line (see matrix at left).

③ **Finish designator:**
For the "Finish designator" step, insert the designator below or the one provided to you by Customer Service:
MA00174KOG = Amber on Maple
WA02905KOG = Amber on Walnut
WA02905KOG = Mocha on Walnut

Wood Finishes

Characteristics Care and Maintenance Tips

Wood Finishes	➤See page 101
Laminate	104
3D Laminate	105
Paint, PVC, & Resin	107

Kimball Office's experience in wood finishing extends from past generations of craftsmen to present day state-of-the-art technology.

Our Pura® finish is a proprietary, water-based, ultraviolet (UV) wood finish that has virtually no volatile organic compounds (VOCs). It uses less energy than our conventional finishing process and meets or exceeds BIFMA Furniture Emission Standards (FES) and U.S. Green Building Council LEED requirements for indoor air quality. Pura is exceptionally clear and durable and allows the beauty of our wood to shine through. The durability, depth, clarity, and beauty of Pura meets the high expectations customers have of Kimball Office finishes.

Finish fill and sheen level for the top surfaces is appropriate for the design and wood species. If different specifications are required, contact Customer Service.
➤See the individual chapters for fill and sheen information by line.

All wood products are very susceptible to darkening from age and exposure to UV rays (sunlight and other sources), especially cherry and maple. Although a special UV inhibitor is added to finishes, care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change of the wood.

Fine scratches from everyday use may be more visible on furniture with dark finishes. Darker finishes absorb more light, while fine scratches reflect the light. Therefore, scratches can be more emphasized due to this contrast. The use of a desk pad is recommended to keep scratching to a minimum.

The beauty of wood is that, as a natural product, it will have differences in grain characteristics, color, and other features among wood species. The characteristics of our top grade veneers are appreciated and welcomed; it's the differences in characteristics that offer each office a unique look.

Maple veneers are slip matched. Brighton Maple is a clear finish for those who appreciate the inherent beauty of wood. Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

Walnut veneers are flat cut and applied book and center matched, except for Tuscan Walnut which is quarter cut.

Cherry veneers are slip matched. Grain characteristics of cherry veneer such as gum streaks and gum pockets occur naturally and add to the authentic look and feel of natural veneer. These are inherent to this veneer and should not be considered defects.

Oak veneer is quarter cut.

Specification of particular cuts, characteristics, or wood species can be accommodated. For example, a customer may ask for a limited amount of cathedrals or very limited variation in color from one veneer flitch to the next. Kimball Office systems products are able to satisfy those expectations, as long as we are notified prior to order placement. Depending on the request, the higher grade veneer may require an upcharge. Orders would also need to be handled through our custom quote process.

The wood species on seating may vary from the wood species on the casegood or system. Different wood species offer unique texture and grain which provide more variation in finish color; however seating finishes are compatible with casegoods and systems finishes.

To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth following direction of the grain.
- Dry with a separate cloth if needed.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.

Customer-specified HPL is also available.
➤See page 106.

Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminate surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

Price Group Desginator:

STD = Group 1 (list price)

Note: All TFL and HPL colors are in price group 1.

Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminate surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

Price Group Desginator:

STD = Group 1 (list price)

Laminate

Customer-Specified Laminate (CSL)

GSA Non-Contract

Wood Finishes	➤See page 101
Laminate	104
3D Laminate	105
Paint, PVC, & Resin	107

Customer specified high-pressure laminate (CSL) is available select products.
➤Contact Customer Service to initiate approval.

Kimball Office reserves the right to decline a customer specified laminate which may not be suitable for application.

Kimball Office assumes no responsibility for the durability, consistent coloration or any other performance characteristic of a customer specified laminate.

Metal, embossed, specialty, and supplier discontinued laminates must be custom quoted.
➤Contact ***By Design*** at 800.482.1616 extension 6002.

Kimball Office orders and procures all customer specified laminates.

Laminate sheen level must not exceed 60° for maximum durability of worksurfaces.

Lead times may vary for certain laminates. Minimum order quantities may apply.

Pricing:

A **20% upcharge per line item** (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

How to Specify

① **Model:** Build the complete model specification (excluding the finish type and finish designator) by following the How to Specify on the appropriate pricing page for the product that is to receive the special finish.

② **Finish type:** For the "Finish type" step, insert a special finish code (in place of STD).
ZFMA1 = Formica
ZLMT1 = Lamin-Art
ZLTC1 = Lamitech
ZNEV1 = Nevamar
ZPTE1 = Pionite
ZWST1 = Wilsonart

③ **Finish designator:** For the "Finish designator" step, insert the laminate designator (color number) of the laminate to be applied to the product.

Paint, PVC, and Resin

The table at right lists the operating load capacities (functional load) of various Kimball Office components. All components meet or exceed the ANSI/BIFMA Functional and Proof Loading requirements X5.5 (2014 Desk and Table Products Tests) and X5.9 (2012 Storage Unit Tests). The Operating Load Capacities listed represent the BIFMA functional loads which are equivalent to loads that can be expected in normal use of the component.

BIFMA

MEMBER
THE BUSINESS AND INSTITUTIONAL FURNITURE MANUFACTURER'S ASSOCIATION

Component	**Operating Load Capacity**	**Examples** (total weight [t.w.])
Desk/table <45"W	200 lbs. over 12" diameter area, concentrated loading	
Desk/table 45"W–72"W	200 lbs. over 12" diameter area, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 72"W = 288 lbs.
Desk/table >72"W	Two 200 lb. loads over two 12" diameter areas, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 84"W = 324 lbs.
Pedestal drawer	.017 lb. per cubic inch of drawer interior filing space *Note: File drawers are to support hanging files only; they are not intended for bottom loading.*	24"D x 18"W x 12"H = 88 lbs.
Transaction counter,	.017 lb. per cubic inch above surface secondary surface <16"D, (not to exceed 12"H), distributive loading or and shelf	12"D x 60"W = 147 lbs. t.w.
Adjustable keyboard <36"W	66 lbs., distributive loading	
Writing shelf	25 lbs., distributive loading	
Extendible elements	.017 lb. per cubic inch of drawer interior filing space, (drawer, shelves, etc.) distributive loading	24"D x 15"W x 12"H = 73 lbs.
Center/pencil drawers	5 lbs., distributive loading	
Storage or bookcase	200 lbs. concentrated loading top <38"H area, distributive loading	.20 lb. per square inch of surface 24"D x 36"W = 173 lbs.
Storage or bookcase	.20 lb. per square inch of surface area, distributive loading top 38"H–72"H	24"D x 36"W = 173 lbs.
Storage or bookcase	.09 lb. per square inch of surface area, distributive loading top >72"H	24"D x 36"W = 78 lbs.
Storage or bookcase	.017 lb. per cubic inch above surface, distributive loading bottom	24"D x 36"W x 18"H = 264 lbs. (not more than 18" in height)

Square inches should be calculated using this formula: Surface depth x surface width of available storage

Cubic inches should be calculated using this formula: Surface length x surface depth x height of available storage above the surface (limited to 18 inches above the surface)

U.L. Information:

Only Underwriters' Laboratory (U.L.) listed electrical components are used in electrical devices and are so labeled.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

Kimball® Office

HUM. MINDS AT WORK.® Price List

This price list is effective March 16, 2015 and supercedes all previously printed or electronically released versions.

Hum works the way minds work, Hum works for the environment.

Kimball Office's commitment to quality products and sustainability is reflected in Hum through its unique design, materials, and its manufacturing processes. Developed through our DfE (design for the environment) process, Hum offers a green building solution as well as a work environment for people to perform at their best.

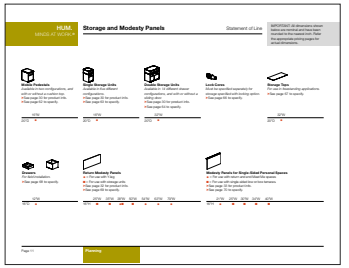
How to Use this Price List

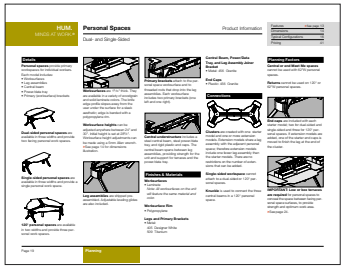
Planning	➤See page 5
Pricing	39
Finishes and Materials	77
Resources	83

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

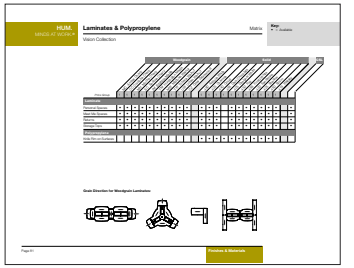
We suggest that you become familiar with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.



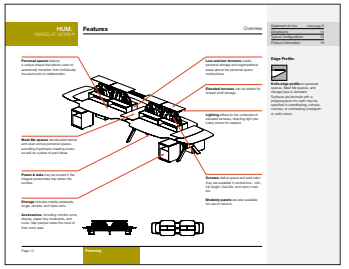
Statement of Line provides a snapshot of the entire product line. We've included an illustration, a table showing available sizes, and page cross references to the applicable pricing and how to specify pages.



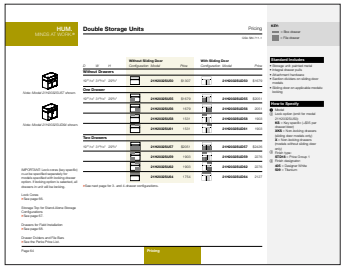
Product Information pages provide detailed information about the product, connections that can be made with other models, planning factors, and applications guidelines.



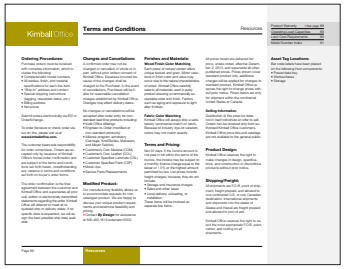
Look in the Finishes and Materials section to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product.



Overviews offer a quick look at the distinguishing features of the product line.



Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.



Use the Resources in the back of the price list. This repository of useful information includes Terms and Conditions, Warranty, Operating Load Capacities. You'll also find a model number index with references to the appropriate pricing page.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

How to Specify Our Products

Planning	➤See page 5
Pricing	39
Finishes and Materials	77
Resources	83

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ❶, ❷, or ❸) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

Dual-Sided Personal Spaces Pricing

GSA SIN 711-1

D	W	H	Model	Price
Starter				
83⅞"	62⅞"–70⅞"	28⅜"*	**21H2962PSTDS**	$4702
	70⅞"		**21H2970PSTDS**	5093
	81⅛"		**21H2982PSTDS**	5486
Extension				
83⅞"	62⅞"–70⅞"	28⅜"*	**21H2962PSTDE**	$4106
	70⅞"		**21H2970PSTDE**	4506
	81⅛"		**21H2982PSTDE**	4889

* Worksurface height is adjustable anywhere between 24"–30".

Features ➤See page 13
Dimensions 14
Typical Configurations 16
Product Information 19

Standard Includes
- Two personal space worksurfaces: laminate (same)
- Central understructure (support beam, power/data tray, two end caps [starter model only], joiner bracket on legs)
- Four primary brackets (two right and two left): painted metal
- Legs (two for starter model; one for extension model): painted metal

How to Specify
❶ Model
❷ Worksurface material:
L = Laminate
③ Rim profile:
S = Knife
④ Rim material:
Y = Polypropylene
⑤ Worksurface finish type:
STD = Price Group 1
⑥ Worksurface finish designator
⑦ Rim finish designator
⑧ Understructure finish type:
STD15 = Price Group 1
⑨ Understructure finish designator:
456 = Granite
⑩ Leg/primary bracket finish type:
STD13 = Price Group 1
⑪ Leg/primary bracket finish designator:
405 = Designer White
509 = Titanium

IMPORTANT: Specify one starter assembly for each contiguous configuration.

Power and Data Components ➤See pages 71–74.

Page 41 Pricing

Refer to the "standard includes" list to see what ships standard as part of the base model.

Follow these steps to build a complete model specification.

Options that incur an upcharge or decrease the base price are noted within the "How to Specify" steps.

Sample Specification:

The example below shows a complete model number for a **starter dual-sided personal space.**

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤Find more specific details regarding the environmental aspects of our product offerings at: **www.kimballoffice.com**

ANSI/BIFMA level™
100% of the products manufactured by Kimball Office are level® certified. We offer the most sustainable portfolio in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet and exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

ecoScorecard℠

Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:
- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification
Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:
- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:
- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:
- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

SCScertified™
INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality
One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

Design for the Environment (DfE) is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.
➤For environmental data, visit our website at www.kimballoffice.com.

Pura®

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

FSC
www.fsc.org
FSC® C010590
The mark of responsible forestry

FSC-Certified Wood
Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood at a 3% upcharge. Applicable models show FSCW as a finish price group designator option. Standard lead times apply to FSC orders.

ANEW

Asset Network for Education Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

The Hum Story

Statement of Line	➤See page 7
Features	12
Dimensions	13
Typical Configurations	15

Does the World Really Need Another Desk?

Can office furniture help people think, engage, focus, and connect? Hum is Kimball Office's resounding "yes" to these questions. This product is designed for individual focus, collaborative tasks, and everything in between. Hum helps provide a better workspace for people so they can do their best. It is modeled on the cognitive processes we all use to organize, concentrate, and collaborate. Hum is designed for people. Furniture has always been made to fit our bodies. Hum is designed to fit our minds as well. Hum environments work the way our minds work.

Don't Work, Hum.

Hum is the sound of a team working well, individually and together. Hum is the sound of productivity, engagement, and connection. Hum is the sound of ideas flowing.

We work alone, we work together. Hum allows you to move from one to another in an instant. From I to we without changing place. From I to we without changing pace.

Hum's Four Key Elements:

① **Personal workspaces** use a height-adjustable, convex table top to balance the needs of the individual with those of the team by enabling smooth transitions from solo work to group work. The unorthodox shape is the result of observing how people work together—*we huddle.* The outward curve on the front edge invites collaboration.

② **See Me™ screens** allow you to see and be seen. The openwork patterns create a visual boundary that filters distractions, but also lets you connect easily with your closest colleagues. *Complete focus, open collaboration, and everything in between.*

③ **Terraces** provide raised, horizontal planes for open storage and a display area that gives people a way to *organize their work in their own way.*

④ **Meet Me™ spaces** are positioned where two Personal Workspaces abut, creating a natural point for teammates to share ideas throughout the day. These spaces allow instant and effective meetings without moving. *Meetings in the moment.*

For You, Me, and the Environment.

Hum recognizes that different workplaces have different needs. In addition to creating environments that match how people's minds work, Hum offers a broad range of open plan and private office configurations based on various combinations of personal workspaces, screens, and terraces.

Hum has a simple, contemporary look. It features new worksurface shapes, customizable storage modules, and a broad variety of material options, including wool felt, metal, and laminate.

Hum is also designed to impact the environment positively. It is strong and durable for a long life, has significant recycled content, uses plantation-grown wood and low-energy consumption LED lights, and is easily taken apart for recycling. The Hum product is certified to meet the USGBC LEED Indoor Air Quality requirements. Hum works for the environment.

Behind the Design:

Developed in partnership with Formway Design, Hum draws upon research showing that, for most of us, a day's work is a continuum between individual focus and team tasks. Hum is designed to accommodate all work modes on this concentrate/collaborate continuum. It is a flexible and adaptable solution that works in tight spots and out in the open. It's designed for the individual, for working teams, and for whole organizations.

Features

Overview

Statement of Line	➤See page 7
Dimensions	13
Typical Configurations	15
Product Information	18

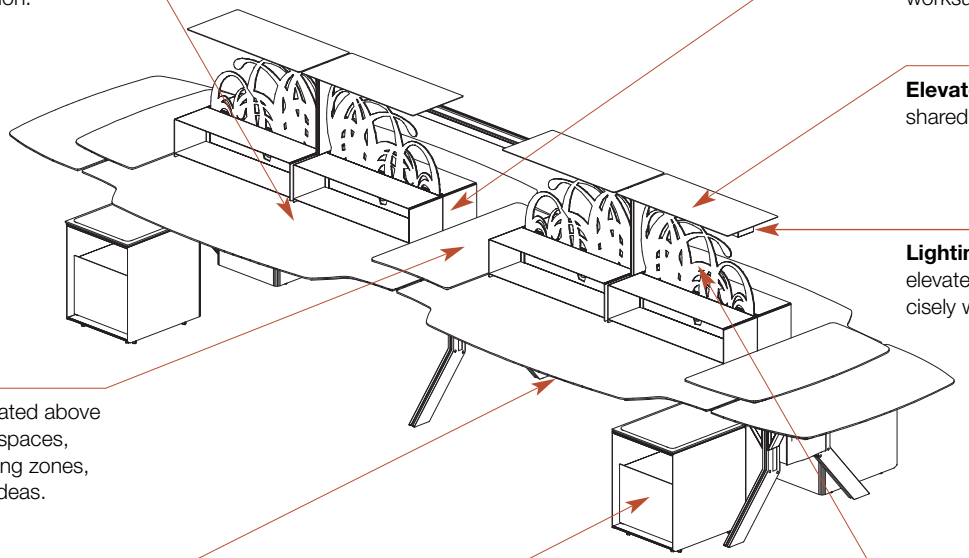
Personal spaces feature a unique shape that allows users to seamlessly transition from individually focused work to collaboration.

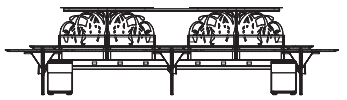
Meet Me spaces are elevated above and span across personal spaces, providing impromptu meeting zones, as well as a place to park ideas.

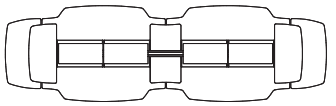
Power & data may be routed in the integral power/data tray below the surface.

Storage includes mobile pedestals, single and double units.

Accessories, including monitor arms, display, paper tray, bookends, and more, help people make the most of their work area.







Low and box terraces create personal storage and organizational areas above the personal space worksurface.

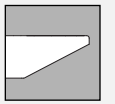
Elevated terraces can be added for shared shelf storage.

Lighting affixes to the underside of elevated terraces, directing light precisely where it's needed.

Screens define space and add color; they are available in central low-, mid-, full-height, See Me, and return models.

Modesty panels are also available for use on returns.

Edge Profile:



Knife edge profile on personal spaces, Meet Me spaces, and storage tops is standard. Surfaces are laminate with a polypropylene rim; both may be specified in coordinating, complementary, or contrasting woodgrain or solid colors.

Personal Spaces

Product Information

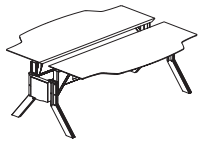
Dual- and Single-Sided

Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	40

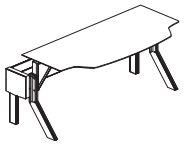
Details

Personal spaces provide primary workspaces for individual workers. Each model includes:

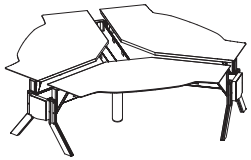
- Worksurfaces
- Leg assemblies
- Central beam
- Power/data tray
- Primary (worksurface) brackets



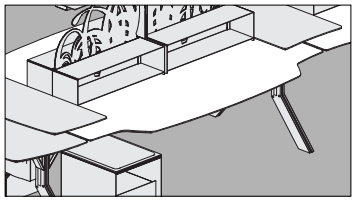
Dual-sided personal spaces are available in three widths and provide two facing personal work spaces.



Single-sided personal spaces are available in three widths and provide a single personal work space.

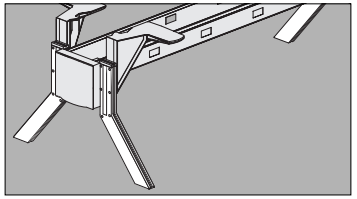


120° personal spaces are available in two widths and provide three personal work spaces.

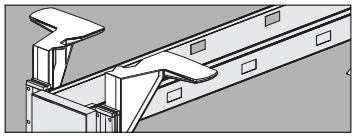


Worksurfaces are 1 3/16" thick. They are available in a variety of woodgrain and solid laminate colors. The knife edge profile slopes away from the user under the surface for a sleek aesthetic; edge is banded with a polypropylene rim.

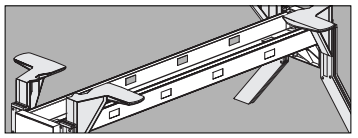
Worksurface heights can be adjusted anywhere between 24" and 30". Initial height is set at 28¾". Worksurface height adjustments can be made using a 5mm Allen wrench. ➤See page 13 for dimensions illustration.



Leg assemblies are shipped preassembled. Adjustable leveling glides are also included.



Primary brackets attach to the personal space worksurface and to threaded rods that drop into the leg assemblies. Each worksurface includes two primary brackets (one left and one right).



Central understructure includes a steel central beam, steel power/data tray, and rigid plastic end caps. The central beam spans between leg assemblies, providing strength for the unit and support for terraces and the power/data tray.

Finishes & Materials

Worksurfaces

- Laminate

  Note: All worksurfaces on the unit will feature the same material and color.

Worksurface Rim

- Polypropylene

Legs and Primary Brackets

- Metal:
  405 Designer White
  509 Titanium

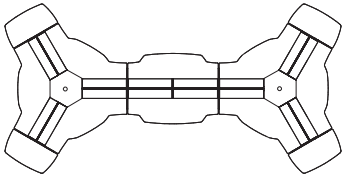
Central Beam, Power/Data Tray, and Leg Assembly Joiner Bracket

- Metal: 456 Granite

End Caps

- Plastic: 456 Granite

Connections



Clusters are created with one starter model and one or more extension models. Extension models share a leg assembly with the adjacent personal space; therefore extension models include one fewer leg assembly than the starter models. There are no restrictions on the number of extensions that can be added.

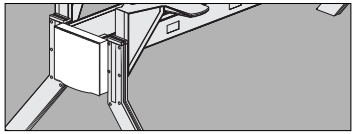
Single-sided workspace cannot attach to a dual-sided or 120° personal spaces.

Knuckle is used to connect the three central beams in a 120° personal space.

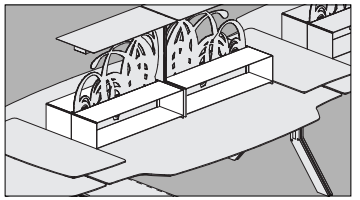
Planning Factors

Central or end Meet Me spaces cannot be used with 62"W personal spaces.

Returns cannot be used on 120° or 62"W personal spaces.



End caps are included with each starter model; two for dual-sided and single-sided and three for 120° personal spaces. If extension models are added, one of the starter end caps is moved to finish the leg at the end of the cluster.



IMPORTANT: Low or box terraces are required for personal spaces to conceal the space between facing personal space surfaces, to provide strength and optimum work area. ➤See page 23.

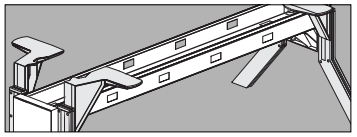
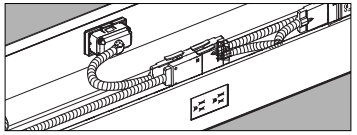
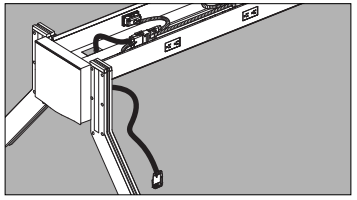
Power & Data



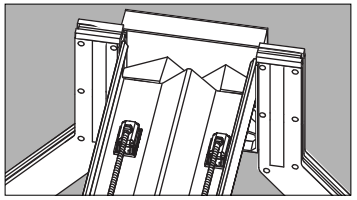
Power/data tray provides lay-in capability for single-circuit, four-circuit (8-wire), or hardwire electrical components. Voice and data cables can be routed in the tray to extend services throughout the cluster.



Knockouts in power/data tray accept receptacles and are compatible with industry-standard data faceplates, such as Panduit model number CFFPL4BL. Individual knockouts are $2^{11}/_{16}$" x $1^{3}/_{8}$".
➤See tables at right.



Knockouts in the bottom of the power/data tray allow cables to be routed up from the floor.



Receptacles placed in the bottom knockouts must be installed facing the floor.

Dual-sided personal spaces feature six knockouts in the bottom of each tray; three on each side positioned left, center, and right.

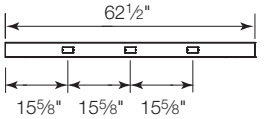
Single-sided personal spaces feature three knockouts in the bottom of each tray; positioned left, center, and right.

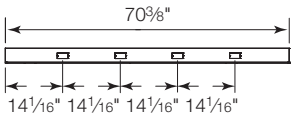
120° personal spaces feature two knockouts in the bottom of each tray near the leg assemblies.

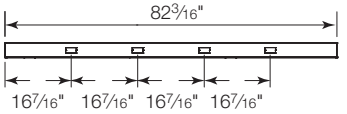
Cable ties can also be routed through the bottom holes to bundle cables in the power/data tray.

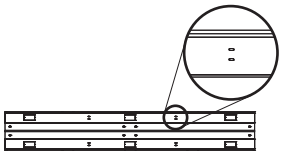
Dual- and Single-Sided Personal Spaces Power/Data Tray

Model Width	*Number of Knockouts (per side)*	*Location (on center)*
62"W	3	$15^{5}/_{8}$"
70"W	4	$14^{1}/_{16}$"
82"W	4	$16^{7}/_{16}$"







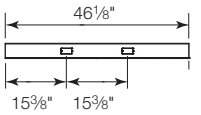


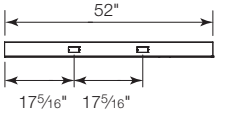
Holes centered in the bottom of each side of power/data tray are provided to attach Perks laptop/ equipment lock, model 99KLTLCK.

120° Personal Spaces Power/Data Tray

Note: There are three power/data trays on 120° personal spaces.

Model Width	*Number of Knockouts (per side)*	*Location (on center)*
47"W	2	$15^{3}/_{8}$"
53"W	2	$17^{5}/_{16}$"





➤See page 33 for Single-Circuit Electrical Planning.
➤See page 34 for Four-Circuit Electrical Planning.

Personal Spaces

Stand-Alone

Product Information

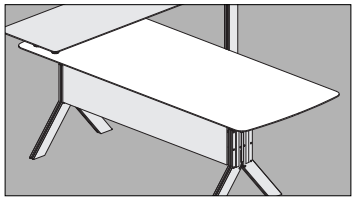
Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	40

Details

Stand-alone personal spaces provide a primary workspace for one worker. They are available in two widths. Each model includes:

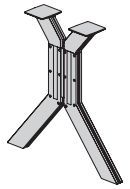
- Worksurface
- Two stand-alone leg assemblies, including worksurface brackets
- Central beam
- Power/data tray
- Modesty panel

IMPORTANT: Components in stand-alone personal spaces are unique and are not interchangeable with dual-sided, single-sided, and 120° personal spaces.

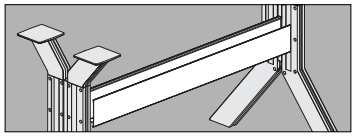


Worksurfaces are 1 3/16" thick. They are available in a variety of woodgrain and solid laminate colors. The knife edge profile slopes away from the user under the surface for a sleek aesthetic; edge is banded with a polypropylene rim.

Worksurface height is fixed at 28 3/4".



Leg assemblies for stand-alone units are shipped pre-assembled. Worksurface brackets and adjustable leveling glides are included.



Central understructure includes a central beam and power/data tray. The central beam spans between leg assemblies, providing strength for the unit and support for the power/data tray.

Finishes & Materials

Worksurfaces
- Laminate

Worksurface Rim
- Polypropylene

Legs and Primary Brackets
- Metal:
  405 Designer White
  509 Titanium

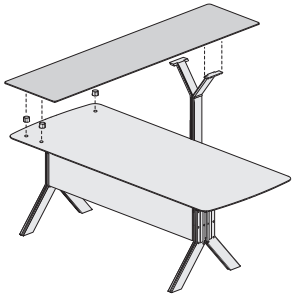
Central Understructure and Leg Assembly Joiner Bracket
- Metal: 456 Granite

Modesty panel
- 100% premium wool felt upholstered over a rigid core

➤See page 82 for colors.

Connections

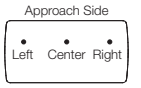
Stand-alone models cannot be connected to dual-sided, single-sided, and 120° personal spaces or other stand-alone units.



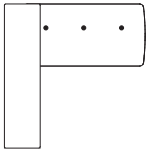
Returns for use on stand-alone personal spaces are available. If attaching a return, specify a stand-alone personal space for use with a left-hand or right-hand return. These surfaces are pre-drilled to accept the return and for proper positioning of the legs below the stand-alone personal space.

Power & Data

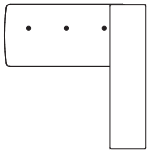
Power/data tray provides lay-in capability for single-circuit components. Voice and data cables can be routed in the tray.



Non-Handed Models;
for use without a Return



Models for Use with Return on Left



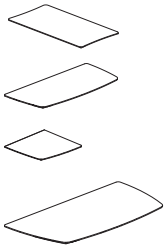
Models for Use with Return on Right

Factory-installed grommets are available in center, left, right, or left and right. Grommets fit into 2 3/8" holes and are located 13 3/8" from the approach side, centered above the power/data tray on all models. Left and right grommets are positioned 12 7/16" from the side edges on non-handed models and 17 15/16" from the side edges on models for use with returns.

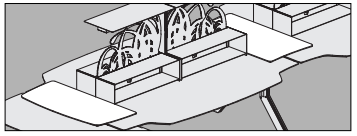
Meet Me Spaces

Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	44

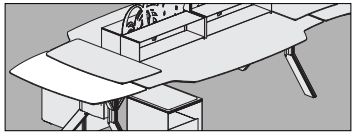
Details



Meet Me spaces extend the functionality of personal spaces, providing impromptu meeting spaces and a place to park ideas.

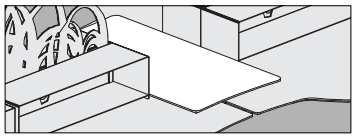


Central and end Meet Me spaces mount at 31⅛"H. Central and end Meet Me spaces include:
- Surface
- Central support brackets
- Edge support bracket(s)



Touchdown Meet Me spaces mount at the same height as personal spaces to provide a collaboration space at the end of a cluster. Worksurface height is adjustable anywhere between 24"H and 30"H.

Touchdown models include:
- Worksurface
- Two primary brackets



Meet Me space surfaces are 1 3/16" thick. They are available in a variety of woodgrain and solid laminate colors. The knife edge profile slopes away from the user under the surface for a sleek aesthetic; edge is banded with a polypropylene rim.

Finishes & Materials

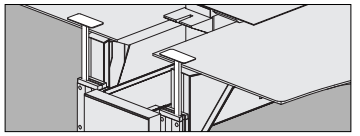
Worksurfaces
- Laminate

Worksurface Rim
- Polypropylene

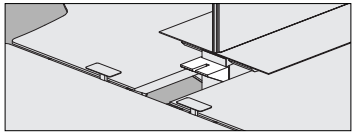
Support Brackets
- Metal:
  405 Designer White
  509 Titanium

Connections

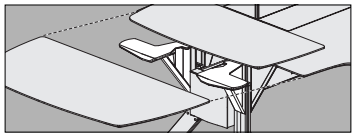
Central and end Meet Me spaces are supported by both center and edge support brackets.



Center support bracket features a metal post that fits into the leg assembly. Two center support brackets are standard with each center or end Meet Me space.



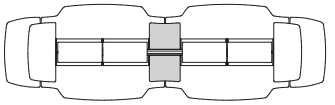
Edge support brackets attach to the outside of a terrace bracket, securing the abutting edge of the center or end Meet Me space to the terrace. Central Meet Me space models include two edge support brackets; end models include one.



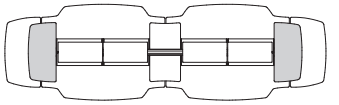
Primary brackets attach to the touchdown surface and to threaded rods that drop into the leg assemblies. These brackets are identical to the ones used to attach personal spaces surfaces. Each touchdown Meet Me space includes two primary brackets (one left and one right).

Planning Factors

Touchdown Meet Me spaces cannot be used at the end of a cluster where returns are placed.



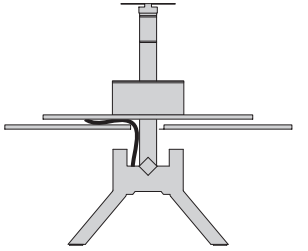
Central Meet Me spaces are for use between personal spaces in the middle of cluster. The user edges on each side of the surface feature a concave shape.



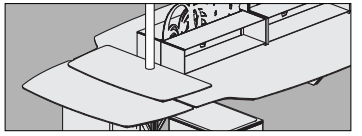
End Meet Me spaces are for use at the end of a cluster.

Central and end Meet Me spaces cannot be used on 62"W single- or dual-sided personal spaces.

Power & Data



Height of central and end Meet Me spaces allows cords and cables to pass from the personal space worksurface to the power/data tray below.

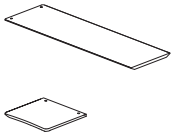


Cutout option on touchdown and end meet me surfaces is available to attach a ceiling/power data pole.

Returns

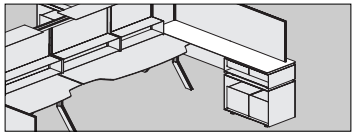
Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	46

Details

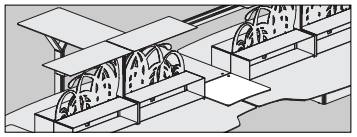


Return surfaces are 1³⁄₁₆" thick. They are available in a variety of woodgrain and solid laminate colors. The knife edge profile slopes away from the user under the surface for a sleek aesthetic; edge is banded with a polypropylene rim. Returns are available in 67"W and 82"W and a "mini" model. Returns include:

- Worksurface
- Support brackets



Returns mount at 31⅛"H on dual-sided or single-sided clusters, the same height as central and end Meet Me spaces.



Mini returns fill the gap in the center of the personal space where a standard-width return is used on only one side of the cluster or in single-sided applications. They have a similar aesthetic and functionality as one-half of a central Meet Me space.

Returns for stand-alone personal spaces are also available.

Finishes & Materials

Worksurfaces

- Laminate

Worksurface Rim

- Polypropylene

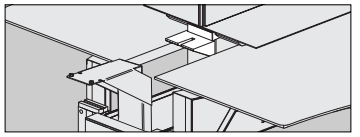
Support Brackets

- Metal:
  405 Designer White
  509 Titanium

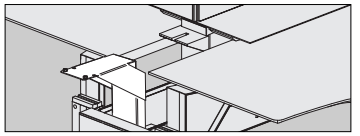
Y-Leg

- Metal:
  405 Designer White
  509 Titanium

Connections



Edge bracket attaches to the outside of a terrace bracket, securing the abutting edge of returns to the terrace.

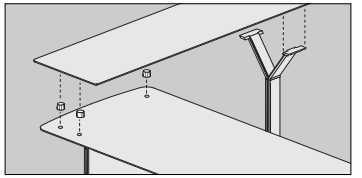


End bracket provides additional support for returns used at the end of a cluster.

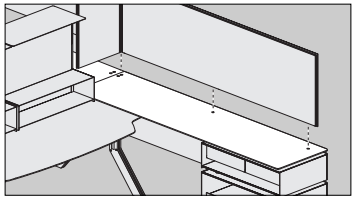
One support bracket is included with each standard-width return based on the application you specify. Support brackets are shared between returns on opposing sides of a dual-sided cluster.
➤See planning factors at right.

IMPORTANT: In single-sided applications, there is no return on the opposite side with which to share a bracket; therefore, an additional edge or end bracket must be specified separately for standard-width returns. *Note: Mini returns ship with either one or two edge brackets and a center support bracket based on your specification.*

IMPORTANT: Y-leg or storage unit must be specified separately to support the end of 67" or 82"W returns.



Clear plastic spacer raises and supports a return attached to a stand-alone personal space.



Returns for use with screens feature pre-bored mounting holes with metal inserts.

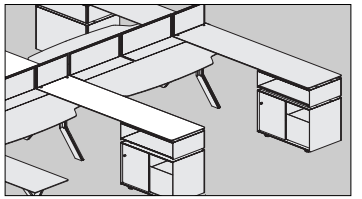
Return filler can be specified to fill the gap between returns where a central screen is not used.

67"W and 82"W returns accommodate a single or a double storage unit.
➤See page 29.

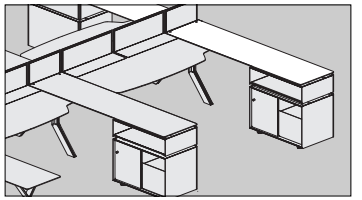
Planning Factors

Select the appropriate return model based on the application and/or location within the cluster. They are not applicable to 120° applications.

IMPORTANT: For dual-sided clusters that include returns, you must specify a return (standard return or mini return) for EACH SIDE of the cluster.



For returns located in the middle of a dual-sided cluster, specify "edge" for support bracket type for both returns.

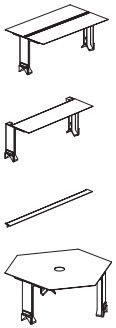


For returns located at the end of a dual-sided cluster, specify "end" for support bracket type for one return (upcharge applies) and "edge" for the other.

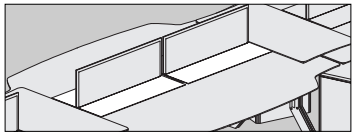
Low Terraces

Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	50

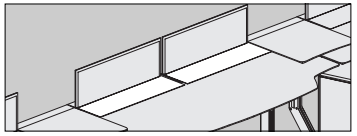
Details



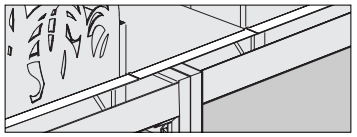
Terraces create personal storage and organizational shelves above the personal space. Low terraces mount at 31⅛"H, the same height as central and end Meet Me spaces.



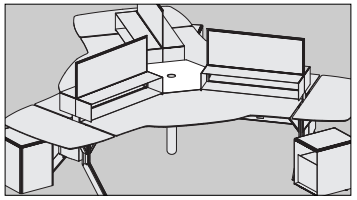
Dual-sided low terraces include:
- Two back-to-back terrace shelves
- Two dual-sided terrace brackets



Single-sided low terraces include:
- One terrace shelf
- One left-hand terrace bracket
- One right-hand terrace bracket



Single-sided mini low terraces are for use with a single-sided terrace when a modesty panel is not used.



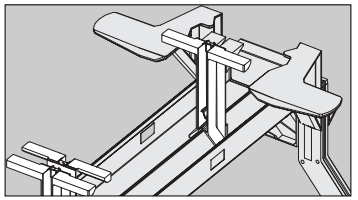
120° corner low terrace includes:
- Center terrace shelf
- Three terrace brackets

Finishes & Materials

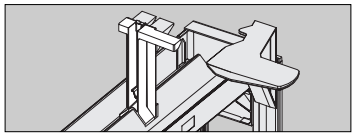
Terrace Shelves and Brackets
- Metal:
  405 Designer White
  509 Titanium

Connections

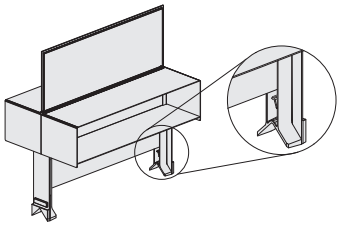
IMPORTANT: Low or box terraces are required to conceal the space between the personal space surfaces, provide strength, and provide optimum work area.



Dual-sided terrace brackets fit between facing personal space surfaces and rest on the power/data tray below. A pair of terrace brackets, standard with low terrace models, supports both sides of a low terrace.



Single-sided terrace brackets rest on the power/data tray. A left-hand bracket and a right-hand bracket, standard with single-sided low terrace, supports both sides of the terrace.

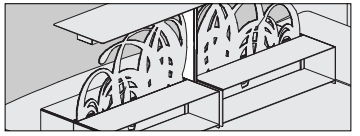


Integral screen stops in terrace brackets provide support for central or See Me screens, which are designed to slip between low or box terraces.

Screens are recommended for low terraces to divide the space into personal storage.

Planning Factors

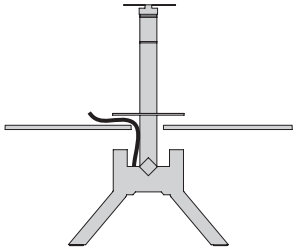
Refer to the application matrix to determine the correct width of terraces and screens based on the configuration.
➤See page 28.



Vertical post of elevated terraces and monitor arm posts attach in the center of the personal space between two adjacent terrace brackets.

Terraces are not applicable for stand-alone personal spaces.

Power & Data



Height of low terraces allows cords and cables to pass from the personal space worksurface to the power/data tray below.

Related Products

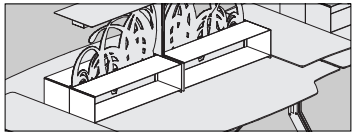
Terrace extensions provide additional work area beyond the terrace bracket for low or box terraces.
➤See page 38.

Box Terraces

Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	52

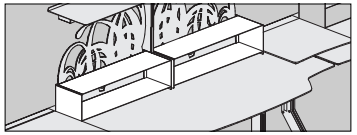
Details

Terraces create personal storage and organizational shelves above the personal space. The bottom of the box terrace mounts at 31⅛"H, the same height as central and end Meet Me spaces.



Dual-sided box terraces include:
- Two back-to-back open boxes
- Two terrace brackets

Note: Box is open to the opposite side. Specify screens to divide the space into personal storage.



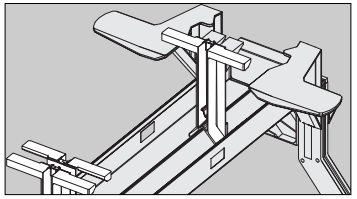
Single-sided box terraces include:
- One open box
- One left-hand terrace bracket
- One right-hand terrace bracket

Finishes & Materials

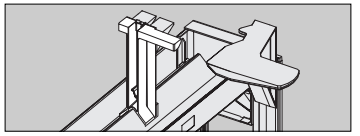
Terrace Boxes and Brackets
- Metal:
  405 Designer White
  509 Titanium

Connections

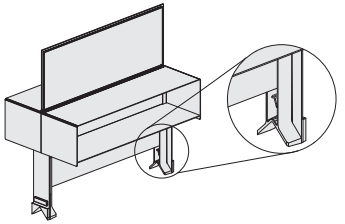
IMPORTANT: Low or box terraces are required for personal spaces to conceal the space between the personal space surfaces, provide strength, and provide optimum work area.



Dual-sided terrace brackets fit between facing personal space surfaces and rest on the power/data tray below. A pair of terrace brackets, standard with box terrace models, supports both sides of a box terrace.



Single-sided terrace brackets rest on the power/data tray. A left-hand bracket and a right-hand bracket, standard with single-sided low terrace, supports both sides of the terrace.

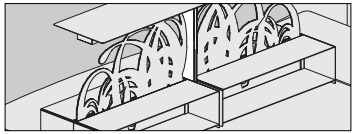


Integral screen stops in terrace brackets provide support for central or See Me screens, which are designed to slip between low or box terraces.

Screens are recommended for box terraces to divide the space into personal storage.

Planning Factors

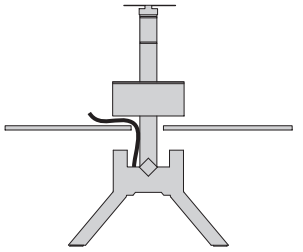
Refer to the application matrix to determine the correct width of terraces and screens based on the configuration.
➤See page 28.



Vertical post of elevated terraces and monitor arm posts attach in the center of the personal space between two adjacent terrace brackets.

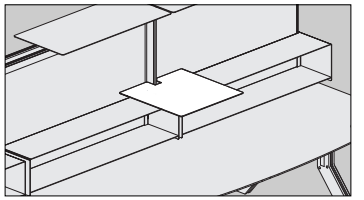
Terraces are not applicable for stand-alone personal spaces.

Power & Data



Height of box terraces allows cords and cables to pass from the personal space worksurface to the power/data tray below.

Related Products



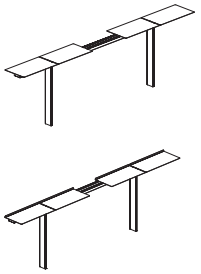
Terrace extensions provide additional work area beyond the terrace bracket for low or box terraces.
➤See page 38.

Dual- and Single-Sided Elevated Terraces

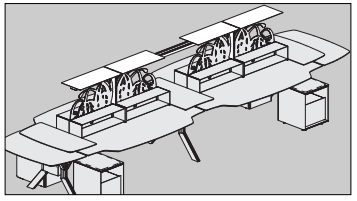
Product Information

Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	53

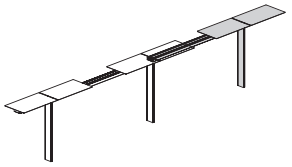
Details



Elevated terraces are installed at 55¾"H and provide shelf storage and support for LED light kits. Dual-sided elevated terrace shelves are 13⅜"D; single-sided elevated terrace shelves are 11½"D.



Elevated terrace starter model spans across two equal-width personal space units. Starter models include:
- Four elevated terrace shelves
- Main beam
- Two cantilever beams
- Two vertical posts



Extension model includes:
- Two elevated terrace shelves
- One main beam
- One vertical post

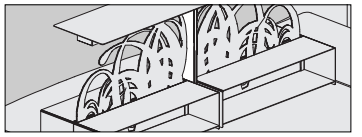
There are no restrictions on the number of extensions that can be added.

Finishes & Materials

Terrace Shelves
- Metal:
  405 Designer White
  509 Titanium

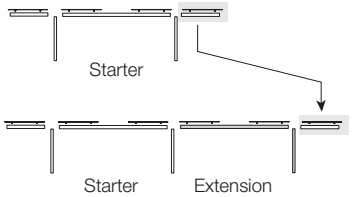
Vertical Posts and Beams
- Metal:
  405 Designer White
  509 Titanium
  456 Granite

Connections



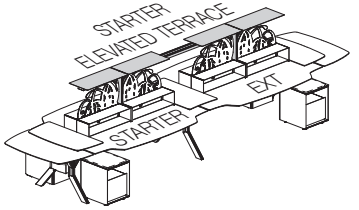
Vertical posts attach in the center of the personal space and are secured between terrace brackets.

IMPORTANT: Either low or box terraces must be used in conjunction with elevated terraces.



Starter and extension models are joined by attaching the extension beam in place of one of the cantilever beams on the starter model. The cantilever beam is then moved to finish the end of the configuration.

Planning Factors

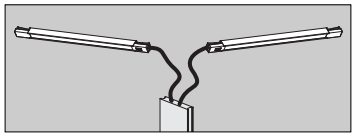


Elevated terrace starter model cannot be used on only a starter personal space. It must span across a personal space starter and an extension. To extend the elevated terrace across *additional* personal space extensions, specify one extension model per extension.

Both dual-sided or single-sided personal space units (the starter and extension) below a starter elevated terrace must be the same width.

Select the appropriate starter and extension elevated terraces models based on the width of the personal spaces below it.
➤See pricing page for details.

Power & Data



LED light kit wiring is routed down through the vertical post to the power/data tray.

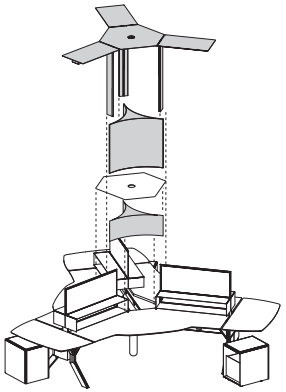
➤See page 37.

120° Elevated Terraces

Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	53

Details

120° elevated terraces are installed at 55¾"H and provide shared shelf storage and support for LED light kits. Elevated terrace shelves are 13⅜"D.



120° elevated terraces include:
- Three elevated terrace shelves
- Center elevated terrace shelf
- Three vertical posts
- Three beams
- Three full-height 120° corner screens for the center section (concave shape)
- Three 120° corner modesty panels (concave shape)

Note: Model does not include 120° low corner terrace; specify separately.

Finishes & Materials

Terrace Shelves
- Metal:
  405 Designer White
  509 Titanium

Vertical Posts and Beams
- Metal:
  405 Designer White
  509 Titanium
  456 Granite

120° Corner Screens
- 100% premium wool felt upholstered over a rigid core
  ➤See page 82 for colors.

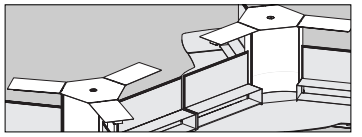
120° Corner Modesty Panels
- Metal: white paint

Connections

Vertical posts attach in the center of the personal space and are secured between terrace brackets.

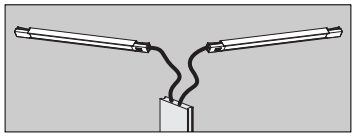
IMPORTANT: Either low or box terraces and a 120° corner low terrace must be used in conjunction with 120° elevated terraces.

Planning Factors



120° elevated terraces do not attach to one another and cannot accept attachment of dual-sided or single-sided extension models.

Power & Data

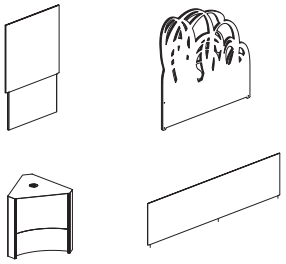


LED light kit wiring is routed down through the vertical post to the power/data tray.

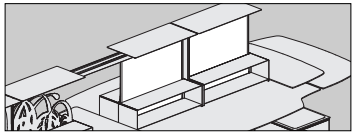
➤See page 37.

Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	56

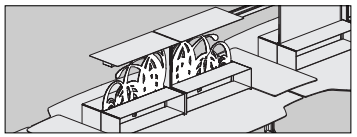
Details



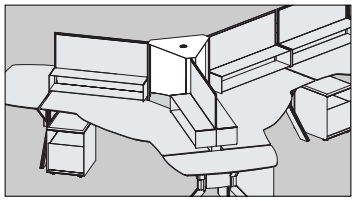
Screens extend above the worksurface to define space and add color.



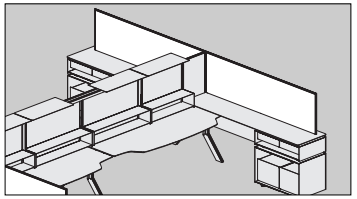
Central screens help divide space between facing personal spaces. They are available in low-, mid-, and full-height models. Central screens are 100% premium wool felt upholstered over a tackable, rigid core.
➤See page 13 for height dimensions.



See Me screens are offered in four patterns that provide a unique aesthetic and allow a selective, visual connection across facing personal spaces. See Me screens are painted metal; they are 1⁄16" thick.



120° corner screen assemblies are for use on 120° personal spaces and are available in mid- and full-height models. These three-sided structures feature three individual concave-shaped screens made of 100% premium wool felt upholstered over a non-tackable, rigid core. Also included are three 120° corner modesty panels that go below the terrace. The three vertical posts accept attachment of monitor arms.



Return screens are available in mid- and full-height models, and in two widths to match the widths of returns. Return screens are 100% premium wool felt upholstered over a tackable, rigid core. Rigid core is supported by a metal frame.

Finishes & Materials

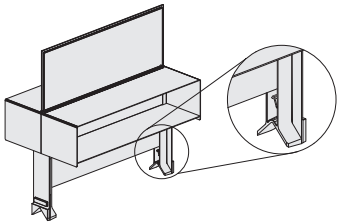
Central and Return Screens
- 100% premium wool felt upholstered over a rigid core
➤See page 82 for colors.

See Me Screens
- Metal
➤See page 81 for colors.

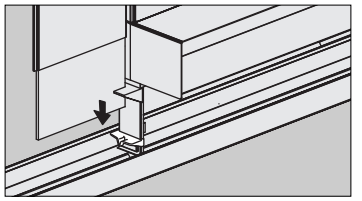
120° Corner Screen Assembly
- Metal frame:
  405 Designer White
  456 Granite
  509 Titanium
- Screen: 100% premium wool felt adhered to a rigid core

120° Corner Modesty Panels
- Metal: white paint

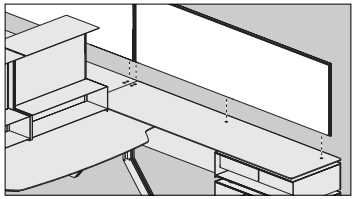
Connections



Central and See Me screens slip between low or box terraces, resting on the terrace bracket's integral screen stop. Central and See Me screens provide a back for the box terrace to separate individual storage.



Screen stop brackets, which affix to adjacent terrace brackets, are included with 16"W and 20"W central screens for use at the end or middle of the cluster between back-to-back returns.

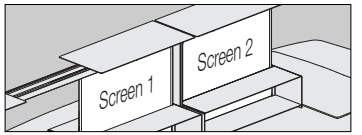


Return screens are securely fastened to the return with metal pins that rest in pre-bored mounting holes; a fastener secures the pin under the surface.

Planning Factors

Refer to the application matrix to determine the correct width of central and See Me screens based on the configuration.
➤See page 28.

Central and See Me screens must be used in conjunction with, and match the width of low or box terraces (except 16" and 20" central screens used between returns).



Screens cannot span across vertical posts of elevated terraces or monitor arm posts.

Application Guidelines

Matrix

For Low and Box Terraces, Central and See Me Screens

Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	56

	 With Meet Me Space or Return on one side	 With Meet Me Space or Return on both sides	 Without Meet Me Spaces or Return	 Between Returns at End of Cluster	 Between Returns in Middle of Cluster	
62"W Personal Spaces						*Screens (any height)* / *Terraces (low or box)*
	n/a	n/a	30"W + 30"W	n/a	n/a	
70"W Personal Spaces						*Screens (any height)* / *Terraces (low or box)*
	24"W + 34"W	24"W + 24"W	34"W + 34"W	16"W or 20"W	20"W

	24"W + 24"W + 24"W	n/a	34"W + 34"W + 34"W	n/a	n/a	
 53"W 120° Personal Spaces						*Screens (any height)* / *Terraces (low or box)*
	30"W + 30"W + 30"W	n/a	40"W + 40"W + 40"W	n/a	n/a	

Notes:

Widths shown in this matrix are nominal.
➤See pricing pages for actual dimensions.

Central screen must match the width of the low or box terrace (except for 16"W or 20"W screens used between returns).

When a central screen is used to divide two abutting returns, the width of the screen is determined by the location of the returns within the cluster.

See Me screens are not available for use between returns.

Meet Me spaces as referenced in this matrix include:
- Central spaces
- End spaces

Touchdown spaces do not affect screen usage.

Central and end Meet Me spaces cannot be specified for use on 62"W single- or dual-sided personal spaces.

Returns listed in this matrix refer to those on dual-sided clusters. Returns cannot be used on 120° personal spaces.

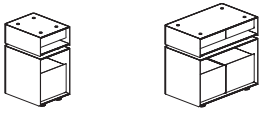
Mobile Pedestals and Storage Units

Product Information

Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	61

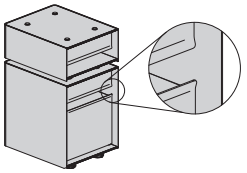
Details

Mobile pedestals are available with or without a cushion top. Cushion tops are upholstered with stitched, 100% premium wool felt. Models feature one file drawer, and are available with or without a box drawer.

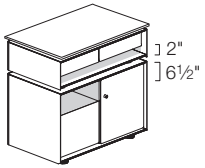


Single and double storage units are available with box and file drawers in a variety of drawer configurations, or without drawers.
➤See next page for drawer configuration options.

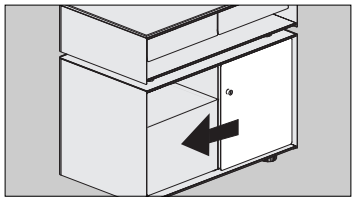
Mobile pedestals and storage units are available locking or non-locking. All drawers in locking models are pre-drilled to accept lock cores. Lock cores, keyed specific, must be specified separately.



Drawer fronts curve out slightly at the bottom (box drawers) or top (file drawers) to form an integral pull. Box drawers are 16⅛"D x 12⅛"W x 3¼"H. File drawers are 16⅛"D x 12⅛"W x 3¼"H.
➤See next page for filing capabilities.



Space above file drawers and below box drawers provides additional open storage area. Single units with three drawers and mobile pedestals with two drawers provide 1¾" open storage above the file drawer.



Double models are available with or without a sliding door for the lower compartment. The sliding door locks in the left or right position. Sliding-door models feature a divider between sections, enabling the door to secure the contents behind it. Sliding doors are always locking; lock, keyed specific, must be specified separately. Lock on door extends out to act as a door pull.

Leveling glides provide ¾" of adjustment.

Finishes & Materials

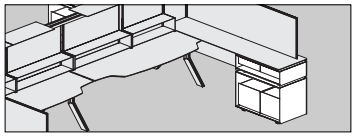
Pedestals and Storage Units
- Metal:
  405 Designer White
  509 Titanium

Cushion Top
- 100% premium wool felt
  ➤See page 82 for colors.

Drawer Interiors
- Metal: Black paint

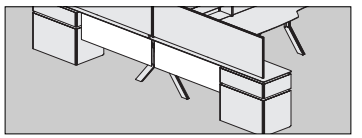
Lock Cores and Housing
- Matte Nickel

Connections



Single and double storage units install beneath returns by attaching fasteners up through the top of the storage unit into the return.

Storage tops must be specified to create freestanding double storage units.



Modesty panels cannot extend behind storage units.

Planning Factors

67"W returns accommodate a single or a double.

82"W return will accommodate a single or double storage unit.

Only one storage unit may be attached beneath a return.

Single storage unit cannot be used as a stand-alone unit. It must be used under a return.

Related Products

Storage Tops
➤See page 66.

Individual box and file drawers are available for field installation into open areas within units.
➤See page 67.

Mobile Pedestals & Storage Units

Product Information

Drawer Configurations and Filing Capabilities

KEY:

= Box drawer

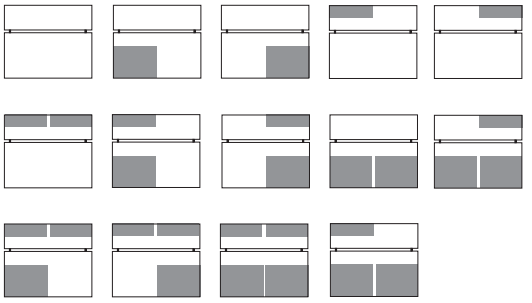
= File drawer

Drawer Configurations:

Mobile Pedestals

Single Units

Double Units



Sliding door is available for the lower compartment on double storage units.

Filing Capabilities:

	Interior Drawer Dimensions			
Description	*Inside Depth*	*Inside Width*	*Inside Height*	*Filing Arrangements*
File Drawers	16⅛"	12⅛"	10³⁄₁₆"	

16⅛" letter

12⅛" letter

12⅛" legal

Filing Hardware:

Front-to-back filing is standard on all file drawers. The drawer sides are designed to hold file folders.

For side-to-side filing, file bars must be specified separately. File bars are indicated with a heavier line in the filing capabilities illustrations at right.

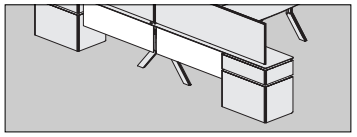
➤See the Perks Price List.

Return Modesty Panels

Product Information

Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	68

Details



Return modesty panels feature stitched 100% premium wool felt upholstered over a rigid core; they are approximately 5/8" thick. Return modesty panels are specified separately.
Note: Modesty panels for stand-alone personal spaces are standard with the primary worksurface.

Finishes & Materials

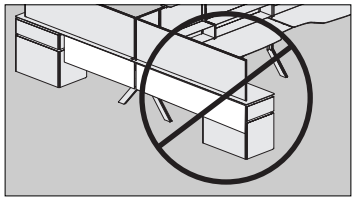
Return Modesty Panels
- 100% premium wool felt upholstered over a rigid core

➤See page 82 for colors.

Connections

Return modesty panels attach to the underside of returns.

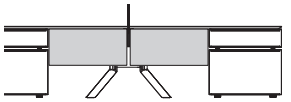
Planning Factors



Return modesty panels cannot extend behind storage units.

Select the appropriate width return modesty panel based on:
- The width of the return;
- The location of the return within the cluster, either middle or end; and
- The size of storage unit, if applicable.

➤See matrix at right



When return modesty panels are used at the end of a cluster, the modesty panels (one on each return) will meet in the middle but do not attach to one another.

Return modesty panels cannot be used on stand-alone returns.

Return Modesty Panel Application Matrix:

The dimensions listed within the matrix indicate the modesty panel width that is applicable for a particular configuration. The "X"ed areas represent the middle of the cluster where dual-sided personal spaces attach to each other.

	Y-Leg	*Single Storage Unit*	*Double Storage Unit*
Returns Located in the Middle of a Cluster			
66 9/16"W return	 38"W	 25"W	n/a*
82 3/8"W return	 53 3/4"W	 38"W	 25"W
Returns Located at the End of a Cluster			
66 9/16"W return (67 5/16"W**)	 63"W	 50"W	 34 1/2"W
82 3/8"W return (82 11/16"W**)	78 3/4"W	63"W	50"W

* Storage configuration is possible, but a modesty panel cannot be used in this application.

** Width of returns for use with stand-alone personal spaces.

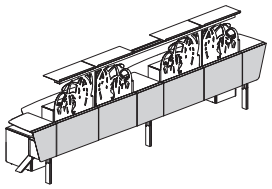
Modesty Panels

Product Information

For Single-Sided Personal Spaces

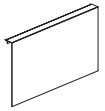
Features	➤See page 12
Dimensions	13
Typical Configurations	15
Pricing	69

Details

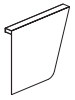


Modesty panels for single-sided personal spaces finish off the back side of the work space.

Models are specified based on the application—

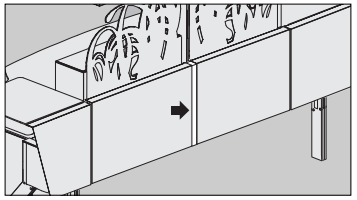


For use with:
- Single-sided low terraces
- Single-sided box terraces
- Returns



For use with:
- Single-sided end meet me spaces

- Modesty panel filler



Modesty panel fillers are used to fill the gap between two modesty panels behind low or box terraces.

Finishes & Materials

Modesty Panels for Single-Sided Personal Spaces
- Metal:
  405 Designer White
  509 Titanium

Connections

Modesty panels for single-sided personal spaces attach to the single-sided terrace bracket and power/data tray.

Planning Factors

Specify modesty panel to match the width of the low terrace, box terrace, return or end meet me space to which it will attach.

Single-Circuit Power

Features	➤See page 12
Dimensions	13
Power & Data Tray Details	19
Pricing	70

Details

Dual-sided, single-sided, and 120° personal spaces accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably.
➤See descriptions at right.

Stand-alone personal spaces accept single-circuit electrical components.

The following components comprise the single-circuit system:
- Power in-feed
- Duplex receptacles with an attached 12" modular feed
- 24" and 48" jumper cables

For ease in installation, the connectors will only plug in one way.

Power in-feed is a 10' cord with a "smart box" that monitors the number of receptacles connected. The system will automatically shut off if more than eight receptacles are plugged into the power in-feed. One end of the cord features a three-prong plug that plugs into a standard 110 volt, 15 amp wall or floor outlet.

Duplex receptacles snap into the power/data tray. Receptacles feature a 12" modular feed with a double-out interface. Power is brought to the receptacle by a power in-feed or jumper cable, and power is passed to adjacent components by a jumper cable forming a daisychain.

Jumper cables feature a squeeze-latch connector on each end and are available in two lengths: 24" and 48".

➤See page 19 for power/data tray details.

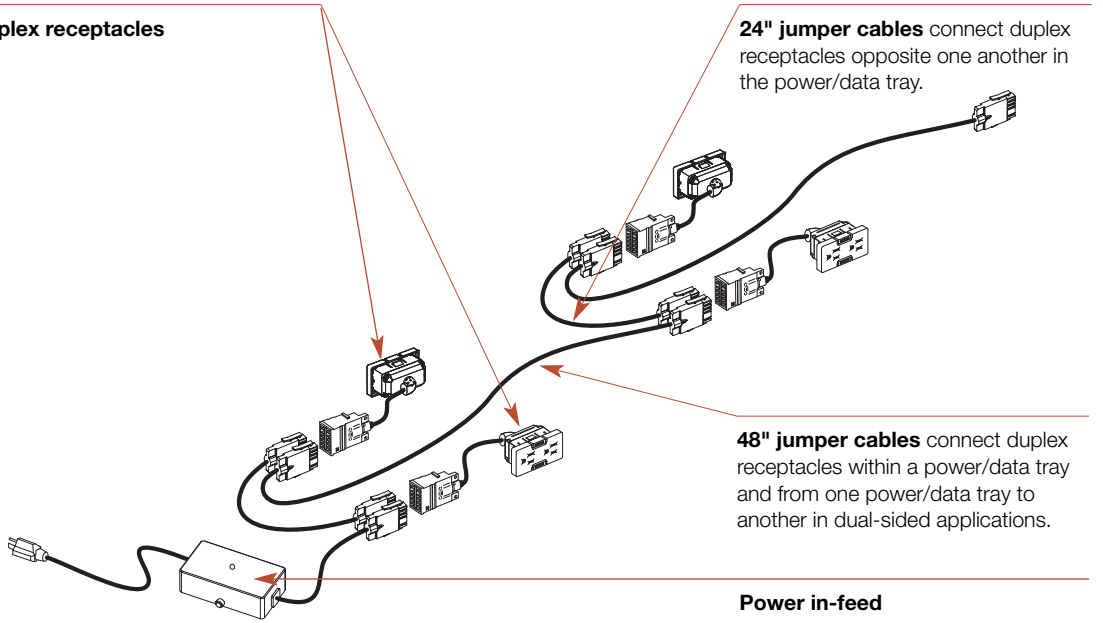
Planning Factors

This system should not be plugged into a GFCI outlet receptacle. The single-circuit system contains an overload breaker, and the sensing circuit in the "smart box" can affect the sensitivity of a GFCI power feed, causing the GFCI duplex receptacle to trip.

In 120° applications, 24" jumper cables can be used to jump from one power/data tray to another.
➤See below for dual-sided jumper applications.

Related Products

Single-circuit mini-adapt power module features an 18" modular feed with a double-over interface. The unit contains two receptacles for desktop power access. A hand-tightened clamp on the back of the unit allows flexibility for positioning it at the back of the personal space worksurface.



Circuitry Options:

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.

Four-circuit components combine to form an 8-wire, 4-circuit, power system.
➤See page 34 for four-circuit electrical planning guidelines.

Hardwire components are also available to allow field hardwiring of power within the power/data tray where required by local codes.
➤See page 73.

Approval/Compliance:

All Hum single-circuit components are U.L. 962 Recognized and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. *Note: Any field modification of the electrical components voids the UL listing.*

Four-Circuit (8-Wire) Power

Features	➤See page 12
Dimensions	13
Power & Data Tray Details	19
Pricing	72

Details

Dual-sided, single-sided, and 120° personal spaces accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably.
➤See descriptions at right.

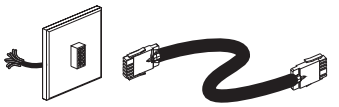
Stand-alone personal spaces accept single-circuit electrical components.
➤See page 33.

The following components comprise the multi-circuit system:
- Hardwire power in-feeds (two options) or ceiling power entry
- Power distribution assemblies
- Duplex receptacles
- Jumper cables

For ease in installation, the connectors will only plug in one way.

There are three ways to bring power to the system:
- 10' floor/wall power in-feed;
- Modular wall starter and modular 10' power in-feed; or
- 12' ceiling power in-feed

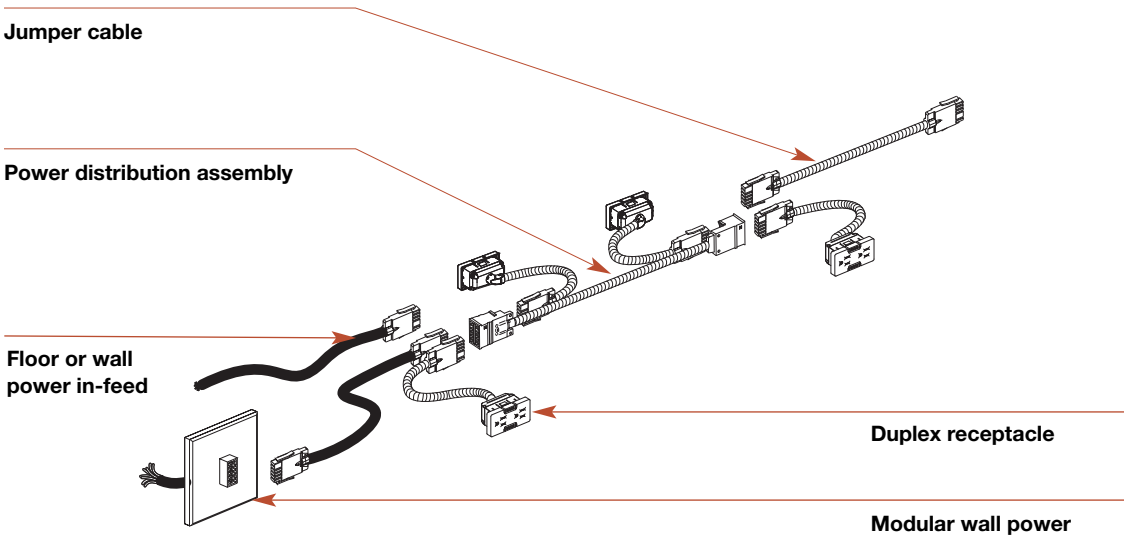
Floor/wall power in-feed features a 10' liquid tight conduit with a pigtail on one end that must be wired by a licensed electrician to a wall or floor-mounted junction box. The other end features a single squeeze-latch connector to attach to a power distribution assembly.



Modular wall power in-feed features a 10' modular conduit with a squeeze-latch connector on each end. One end must connect to modular wall starter, specified separately, the other end connects to a power distribution assembly. Modular wall starter must be wired to building power by licensed electrician.
Note: This modular power in-feed option allows you to unplug the cable from the wall and store away when not in use.

Ceiling power in-feed features a 12' flexible, galvanized metal conduit with a pigtail on one end that must be wired by a licensed electrician to a junction box in the ceiling. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

➤Continued on following page.



Circuitry Options:

Four-circuit components combine to form an 8-wire, 4-circuit, power system.

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.
➤See page 33 for single-circuit electrical planning guidelines.

Hardwire components are also available to allow field hardwiring of power within the power/data tray where required by local codes.
➤See page 73.

Approval/Compliance:

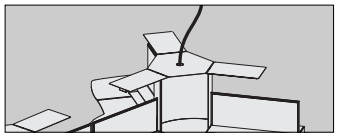
All Hum four-circuit components are U.L. 1286 Listed and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical

Note: Any field modification of the electrical components voids the UL listing.

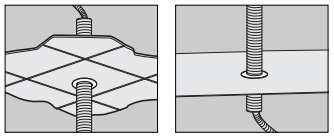
Four-Circuit (8-Wire) Power

continued

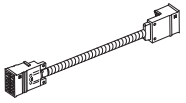
Features	➤See page 12
Dimensions	13
Power & Data Tray Details	19
Pricing	72



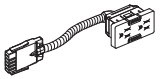
Power/data flexible ceiling pole is available to conceal ceiling power in-feed and other data cables. Pole is a flexible, metal conduit that connects to an integrated hole in the 120° elevated or low corner terrace.
Outer diameter of pole is 2¼"; inner diameter is 2". Touchdown, end meet me spaces, and returns can be specified with a cutout to attach a flexible ceiling pole.



Trim plates can be specified for field installation to conceal the intersection of the flexible ceiling pole at the ceiling and worksurface



Power distribution assembly supplies power for four duplex receptacles within a power/data tray. Power distribution assemblies are 36" long and can be used in both dual-sided and 120° personal spaces.



Duplex receptacles feature a 12" flexible, metal conduit and a single squeeze-latch connector to attach it to the power distribution assembly.

Receptacles models are numbered 1, 2, 3, 4, or 5 to correspond to the circuit to which they will provide access.

Jumper cables feature a squeeze-latch connector on each end and are available in two lengths, 36" and 48", to connect power distribution assemblies in adjacent power/data trays. Jumpers are encased in a flexible, galvanized metal conduit.

Use 36" jumper cables for:
- 62"W dual- or single-sided personal spaces
- 47"W and 53"W 120° personal spaces

Use 48" jumper cables for:
- 70"W and 82"W dual- or single-sided personal spaces

Planning Factors

Two wiring configurations are possible—3 and 1 or 2 and 2—utilizing the same components.
➤See wiring configurations at right.

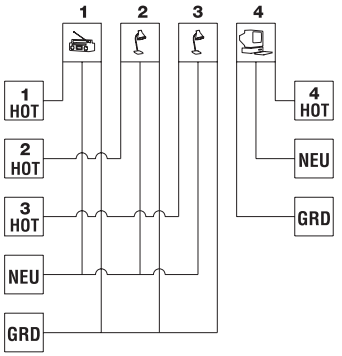
Duplex receptacles used for both types of wiring configurations are the same. This simplifies specifications and allows a faster understanding of the system.

A maximum of 13 duplex receptacles can be accommodated per circuit.

Related Products

➤See page 19 for power/data tray details.

3 and 1 (8-wire):

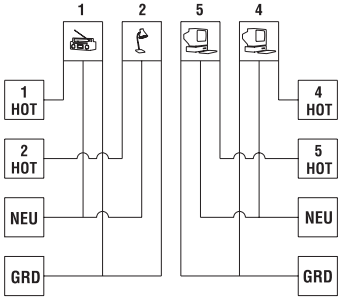


- Three utility circuits share a neutral and common ground.
- One circuit with a DEDICATED hot, neutral and ground.
- Utilize receptacles #1, 2, 3 for utility and #4 for the DEDICATED ground circuit.

Circuits 1, 2, and 3 can be used for general electrical needs. Customarily, one or more of the circuits is reserved for lighting or other everyday uses, which allows control by central or master switching.

Circuit 4 consists of three separate conductors (hot, neutral, and ground) and meets the BIFMA/ANSI definition for a dedicated circuit.

2 and 2 (8-wire):



- Two DESIGNATED utility circuits and two DESIGNATED computer circuits.
- Utilize receptacles #1 and #2 for the designated utility circuits and receptacles #4 and #5 for the designated computer circuits.

Note: Receptacle #3 cannot be used in the 2 and 2 configuration. If receptacle #3 is used, possible cross feed or interference from utility circuits one and two can be introduced to computer circuits.

Circuits 1 and 2 provide a pair of designated circuits for general electrical needs, as described for the 3 & 1.

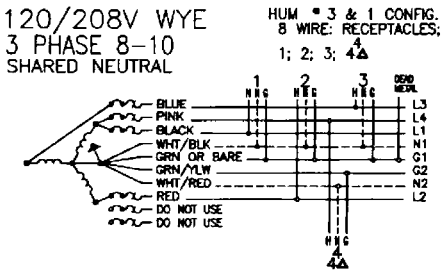
Circuits 4 and 5 provide a pair of designated circuits for computer applications.

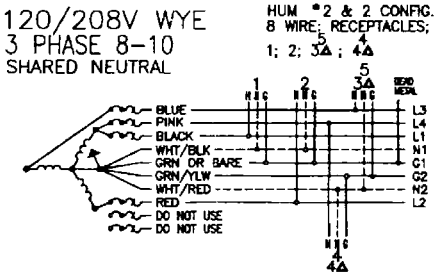
Four-Circuit (8-Wire) Power

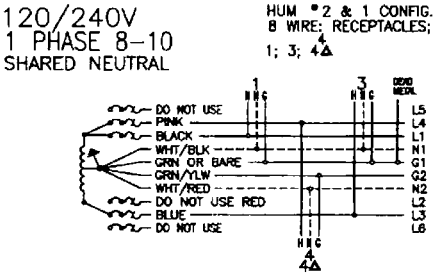
Wiring Schematics

Features ➤See page 12
Dimensions 13
Power & Data Tray Details 19
Pricing 72

The 8-wire, multi-circuit configuration provides up to four circuits. Ideally a 4-wire, WYE, 208-volt service provides the best utilization.







Planning & Installation:

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Hardware necessary for installation is shipped with all components.

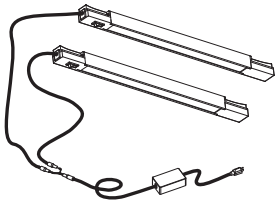
Details

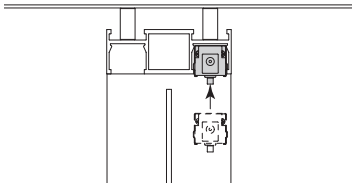


LED light kits provide a 3300K color temperature light to help enhance work areas. Each kit includes:

- Two 15½" long lighting modules with a silver aluminum finish containing 112 LEDs
- One toggle switch for each module
- Black UL1310 class II power supply
- Black cord
- Silver mounting clips

LED lighting kits consume very little power (9.4 watts per module) and have a very long life at 50,000 hours. LED light kits utilize the latest technology with high light output and nearly no heating. LEDs do not produce UV emissions.

Connections



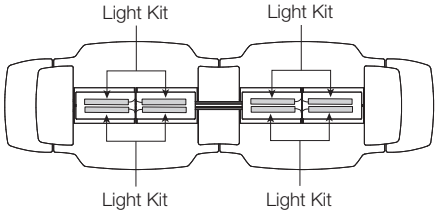
Metal mounting clips hold the lighting modules inside the elevated terrace beam.

Wiring is routed through the elevated terrace verticals into the power/data tray.

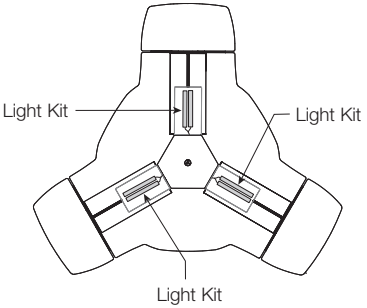
Planning Factors

One LED light kit should be specified for each user who needs supplemental task lighting.

LED light kits can only be specified for use on dual-sided, single-sided, and 120° elevated terraces.



In dual-sided applications, lighting modules can be installed back-to-back or side-by-side across the vertical in the elevated terrace beam. Four light kits, each with two lighting modules installed side-by-side, are shown in the illustration above.



In 120° applications, lighting modules can be installed back-to-back in the elevated terrace beam above low and box terraces. Each module will provide light for facing workspaces. Three light kits, each with two lighting modules installed back-to-back, are shown in the illustration above.

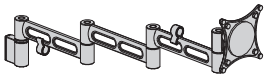
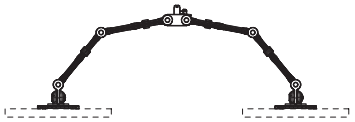
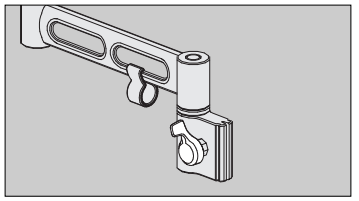
Details



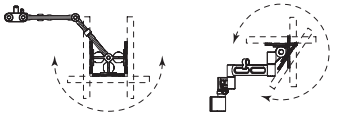
Monitor arms are available to mount LCD or plasma computer monitors. Monitor arms can be mounted on the vertical post of elevated terraces or to monitor arm posts (specified separately). Includes 75mm and 100mm VESA mounting brackets. Single monitor arms feature three jointed limbs and extend to a maximum of 24⅞". Weight limit is 17½ lbs.



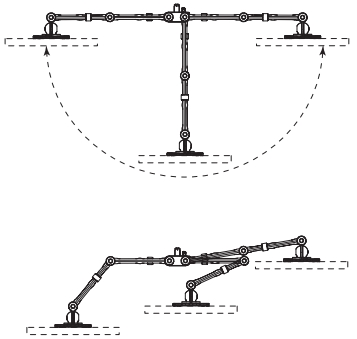
Double monitor arms are available to mount two LCD or plasma computer monitors. They feature two jointed limbs per arm; each limb extends a maximum of 16¾". Weight limit is 17 lbs. per arm; 34 lbs. total.



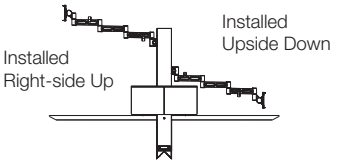
Lever allows hand tightening. Lever can be removed to allow a 5mm hex tool to make vertical adjustments.



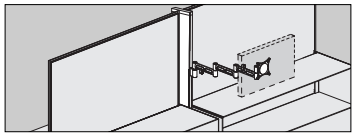
Monitor joint on monitor arm allows a vertical pivot of up to 145° and a horizontal pivot of up to 180°.



Horizontal rotation for monitor arms is over 180° and the joints allow limitless horizontal adjustments.



Monitor arms can be installed upside down to achieve a lower monitor height. If this is done, the tilt upward is limited to 34 degrees.

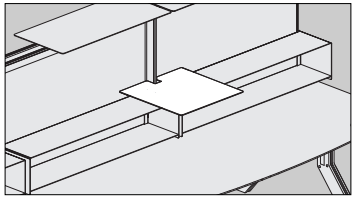


Monitor arm posts may be used to support monitor arms in configurations that do not have elevated terraces. Monitor arm posts are positioned between low and box terrace brackets. They are available in mid-height and full-height models, corresponding to mid-height and full-height screens.

Bookends are available in sets of two. Bottom edge of the bookend slides onto low terraces, top of box terrace, or elevated terrace shelf, and can be repositioned easily.

Displays are repositionable surfaces with a document stop at the bottom. They are designed to stand alone or hang off of screens or box terrace shelves.

Paper trays provide flexible storage space. They are lightweight and stackable.



Terrace extensions attach to low or box terraces and have a notch to fit around the vertical post. They provide additional work area depth to support items like laptops and monitors. They can be repositioned anywhere along the terrace shelf.

FINISHES & MATERIALS

Samples:

Samples of Kimball Office materials are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur between samples and finished products. Kimball Office carefully selects all materials used in every product, ensuring a commercially acceptable color and finish.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The fabric collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

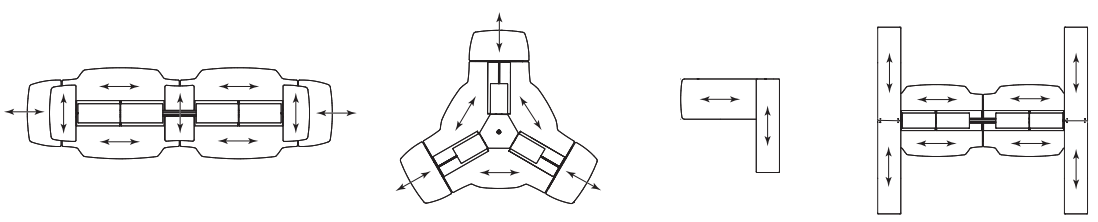
Grain Direction for Woodgrain Laminate:



Customer-Specified Laminate

GSA Non-Contract

Program Overview	➤See page 78
Laminate	79
Paint	81
Wool Felt	82

Customer specified high-pressure laminate (CSL) is available select products.
➤See page 79.

Kimball Office reserves the right to decline a customer specified laminate which may not be suitable for application.

Kimball Office assumes no responsibility for the durability, consistent coloration or any other performance characteristic of a customer specified laminate.

Metal, embossed, specialty, and supplier discontinued laminates must be custom quoted.
➤Contact ***By Design*** at 800.482.1616 extension 6002.

Kimball Office orders and procures all customer specified laminates.

Laminate sheen level must not exceed 60° for maximum durability of worksurfaces.

Lead times may vary for certain laminates. Minimum order quantities may apply.

Pricing:

A **20% upcharge per line item** (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

How to Specify

① **Model:** Build the complete model specification (excluding the finish type and finish designator) by following the How to Specify on the appropriate pricing page for the product that is to receive the special finish.

② **Finish type:** For the “Finish type” step, insert a special finish code (in place of STD).
ZFMA1 = Formica
ZLMT1 = Lamin-Art
ZLTC1 = Lamitech
ZNEV1 = Nevamar
ZPTE1 = Pionite
ZWST1 = Wilsonart

③ **Finish designator:** For the “Finish designator” step, insert the laminate designator (color number) of the laminate to be applied to the product.

The table at right lists the operating load capacities (functional load) of various Kimball Office components. All components meet or exceed the ANSI/BIFMA Functional and Proof Loading requirements X5.5 2008 Desk/Tables Products Test and X5.9 2012 Storage Units Test. The Operating Load Capacities listed represent the BIFMA functional loads which are equivalent to loads that can be expected in normal use of the component.

BIFMA

MEMBER
THE BUSINESS AND INSTITUTIONAL FURNITURE MANUFACTURER'S ASSOCIATION

Component	**Operating Load Capacity**	**Examples** (total weight [t.w.])
Worksurface	200 lbs. over 12" diameter area, concentrated loading 1.5 lb. per inch of perimeter, distributive loading	29"D x 71"W = 300 lbs. t.w.
Pedestal drawer	.017 lb. per cubic inch of drawer interior filing space (hanging load on file hangers)	16½"D x 12"W x 10¼"H wood = 34½ lbs. t.w.
Pedestal shelves	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	20"D x 32"W = 131 lbs. t.w
Open and enclosed shelves	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	9"D x 24"W = 44 lbs. t.w.

Cubic inches should be calculated using this formula:
Surface length x surface depth x height of available storage above the surface (limited to 12 inches above the surface)

U.L. Information:

Only Underwriters' Laboratory (U.L.) listed electrical components are used in electrical devices and are so labeled.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

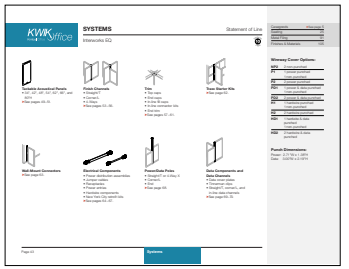
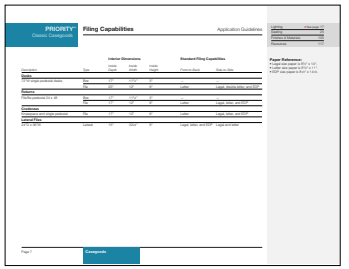
How to Specify Our Products 3

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

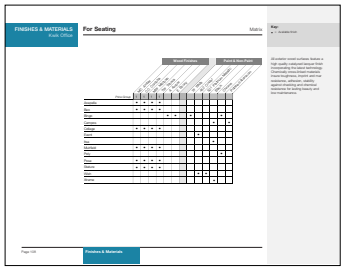
We suggest that you become familiar with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.



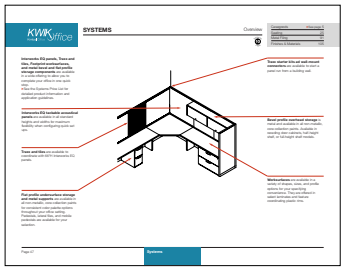
Statement of Line provides a snapshot of the entire product line available for quick shipment. We've included an illustration and page cross references to the applicable pricing and how to specify pages.



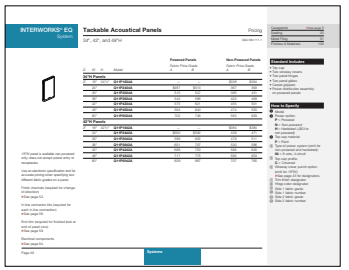
Product Information and Application Guidelines pages provide detailed information about the product, connections that can be made with other models, and planning factors.



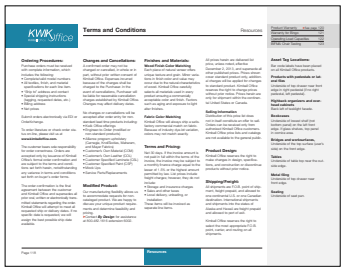
Look in the Finishes and Materials section to see what materials, fabrics, and finishes are available on Kwik Office products. All other finishes and materials available on Kwik Office models are listed on the individual pricing pages.



Overviews offer a quick look at the distinguishing features of the product line.



Pricing pages list each Kwik Office model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.



Use the Resources in the back of the price list. You'll find terms and conditions, warranty information, operating load capacities, model number index, and more.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

Only Underwriters' Laboratory (U.L.) or Canadian Standards Association (C.S.A.) listed electrical components are used in electrical devices and are so labeled.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

c UL US LISTED

How to Specify Our Products

Sustainability ➤See page 4
How to Use this Price List 2

Complete specifications are built by following a set of steps. These "How to Specify" steps are located on each pricing page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ❶, ❷, or ❸) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

18"W panel is available non-powered only; does not accept power entry or receptacles.

Use an electronic specification tool for accurate pricing when specifying two different fabric grades on a panel.

Finish channels (required for change-of-direction) ➤See page 53.

In-line connector kits (required for each in-line connection) ➤See page 58.

End trim (required for finished look at end of panel runs) ➤See page 59.

Electrical components ➤See page 64.

Page 49 — Systems

Casegoods ➤See page 5 · Seating 25 · Metal Filing 91 · Finishes & Materials 105

Standard Includes
- Top cap
- Two wireway covers
- Two panel hinges
- Two panel glides
- Carpet grippers
- Power distribution assembly on powered panels

How to Specify
❶ Model
❷ Power option:
P = Powered
N = Non-powered
H = Hardwired (+$53 to non-powered)
❸ Top cap material
P = Paint
④ Type of power system (omit for non-powered and hardwired):
84 = 8-wire, 4-circuit
⑦ Top cap profile:
C = Crowned
⑨ Wireway cover punch option (omit for 18"W):
➤See page 43 for designators.
⑪ Trim finish designator
⑫ Hinge color designator
⑬ Side 1 fabric grade
⑭ Side 1 fabric number
⑮ Side 2 fabric grade
⑯ Side 2 fabric number

Follow these steps to build a complete model specification.

Options that incur an upcharge or decrease the base price are noted within the "How to Specify" steps.

Sample Specification:

The example below shows a complete model number for an **Interworks EQ tackable acoustical panel.**

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤Find more specific details regarding the environmental aspects of our product offerings at: **www.kimballoffice.com**

ANSI/BIFMA level™
100% of the products manufactured by Kimball Office are level® certified. We offer the most sustainable portfolio in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet and exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

ecoScorecard℠
Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:
- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification
Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:
- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:
- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:
- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

SCScertified™ INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality
One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

Design for the Environment (DfE) is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.
➤For environmental data, visit our website at www.kimballoffice.com.

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

FSC www.fsc.org FSC® C010590
The mark of responsible forestry

FSC-Certified Wood
Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood at a 3% upcharge. Applicable models show FSCW as a finish price group designator option. Standard lead times apply to FSC orders.

Asset Network for Education Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

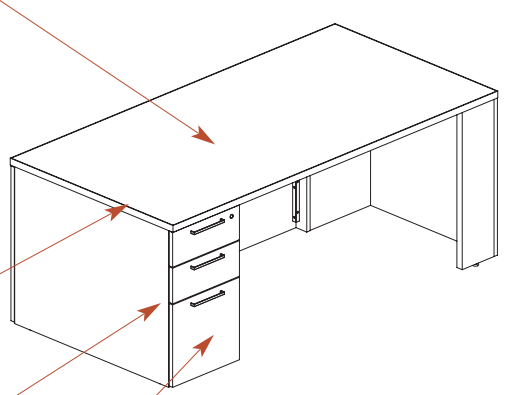
Finishes & Materials 107

Priority Laminate models offer great flexibility in finish selections. The worksurface, PVC rim, drawer/door fronts, and chassis may be specified in different colors to create a more transitional to contemporary feel.

Exterior wood surfaces on Priority Wood models are plain-sliced, slip-matched cherry or maple. Veneers are carefully selected and matched to assure proper balance and consistency.



Rim is 1/8" thick.

Pedestals are full height and letter width on assembled units.

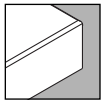
Drawer fronts are 3/4"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.

Features

Joints are securely fastened with dowels and mechanical fasteners to ensure maximum strength.

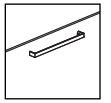
Worksurfaces are 1 3/16"-thick, 3-ply, balanced construction and available in wood or laminate.

Laminate worksurfaces feature high-pressure laminate (HPL) and is available in all standard laminate patterns and colors; customer specified laminate is also available.



Softened rim profile (P or F) appears on all four edges of the worksurface.

Black plastic (G1) grommets are available on select models.
➤See pricing pages for availability.
➤See the Priority Price List for location descriptions and dimensions.



Studio (89) pulls in platinum metallic are standard.

Lock cylinders are shipped installed on Kwik Office models and are keyed randomly. Key numbers will be assigned arbitrarily at the factory with key numbers ranging from KCCB001 to KCCB005.

Chassis and drawer/door fronts on Priority Laminate models feature thermally fused laminate (TFL). Grain direction runs top to bottom.

Drawer sides and back are 1/2" thick and wrapped in natural woodgrain vinyl. Bottoms are 3/16" thick.

Drawer suspensions feature black slides with precision steel ball bearings to ensure long-lasting, quiet, smooth operation. Box drawers are 3/4 extension. File drawers and lateral file drawers are full extension.

Black filing rods are standard in all file drawers and accommodate various filing requirements.
➤See page 7 for filing capabilities.

Hinged modesty panels are standard on fully assembled bridges, returns, kneespace, and single pedestal credenzas. Panel swings inward to allow access to wall outlets. It lifts from the floor and is held in place by leveling feet.

Hinged access doors on the approach side of desks allow access to cable routing compartment.

Overview

Filing Capabilities ➤See page 13
Lighting 17
Finishes & Materials 107

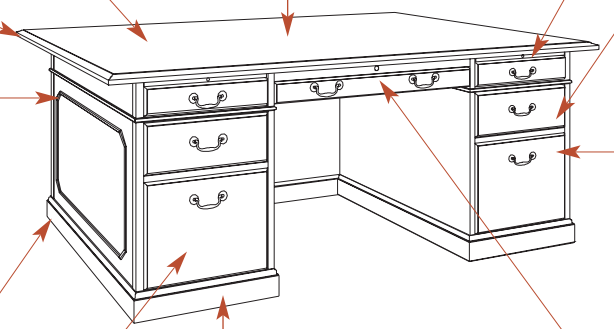
Exterior surfaces are cherry (plain sliced, slip matched) or walnut (plain sliced, book matched) veneer. Veneers are carefully selected and matched to assure proper balance and consistency.

Rims are solid hardwood with precisely mitered corners.

Decorative molding is standard on desks, returns, bridges, and credenzas.

Leveling glides adjust for uneven floors.

Drawer fronts are ¾" thick 3-ply with vertically matched grain.



Tops are 1 3/16" thick, 3-ply balanced construction. Wood grain laminate is also available.

Base rails are solid hardwood for impact and wear resistance.

Writing shelf is standard on single- and double-pedestal desks with breakfront modesty panel.

Full height pedestals have one pencil drawer, one box drawer, and one file drawer. Hardwood corner post and panel construction is reinforced with tenon and groove joinery.

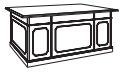
Drawer sides and back are ½" thick with veneer faces. Drawer bottoms are ¼" thick. 5-sided construction allows easy removal of drawer front. Dowel joint assembly is used for maximum strength. Interiors are sealed, sanded, and finished with a clear lacquer finish to protect against swelling, shrinking, or warping and to provide a smooth feel and appearance.

Center drawer is standard on double-pedestal and single-pedestal desks. Bottom of drawer is lined with black leather.

Centra™ locking is featured on double and single pedestal desks, credenzas, and lateral files to secure all drawers in the unit with a single lock. Lock cylinders are shipped installed on Kwik Office models and are keyed randomly. Key numbers will be assigned arbitrarily at the factory with key numbers ranging from KCCE001 to KCCE005.

Details

Breakfront modesty



Flush modesty

Modesty panel on double-pedestal desk features a breakfront appearance; single-pedestal desks are available with either a breakfront or flush appearance.

Antique brass pulls (28AB) are standard. Antique brass metal grommets are standard on returns, bridges, and select desks.

Joints are securely fastened with screws, glue, and solid hardwood cleats to ensure maximum strength.

Drawer dividers are included in desks and credenzas for placement in any box drawer.

Full extension, progressive action drawer suspensions, with precision ball bearings on file drawers, provide a smooth, quiet operation. Box drawers have full extension slides with a positive stop action.

Heavy-duty filing hardware accommodates various filing requirements. ➤See page 13 for filing capabilities.

Pricing

Q99K1706KK1	$584
Q99K2208KK1	$642
Q99K2319KKS1	$692

Adjustable Keyboard Kits:

Keyboard kits cannot be used with President and Senator kneespace credenzas due to the central locking mechanism; nor can they be used with Scenario tables and Fluent worksurfaces as they interfere with the support channels.

Only keyboard kit models 99K1706KK2 and (Q)99K1706KK1 work with Priority Progressive support rails and height-adjustable tables. Keyboard mount slide will need to be oriented parallel with the front edge of the worksurface. To store, lower the keyboard and swing under the surface.

Keyboard kits, when recessed, are not flush to the worksurface edge when mounted in accordance with the manufacturer's instructions.

The following adjustable keyboard kit models comply with ANSI/HFES method 2.

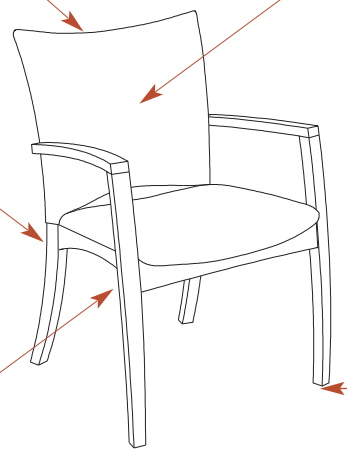
Frame is constructed of kiln-dried maple hardwoods.

Corners are reinforced with wood corner blocks and lag bolts. Metal brackets are also used on armless models to provide additional support.

Joints are double doweled and securely glued to ensure maximum strength.



Back and seat are fully upholstered. Cushions are high resiliency, CFC-free polyurethane foam.

Nylon glides are 7⁄8" in diameter and dome shaped.

Kwik Office Models

Mid-Back Side Chair (QK46AA)
- Maple hardwood frame
- Arms
- 34¼"H x 23¼"W x 23¼"D

Details

Seat suspension is constructed of ½"-thick, 9-ply, molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a suspension.

Seat cushion, applied to the flexible webbing suspension, is 1⅝" thick.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples. The entire seat assembly is fitted into the frame with wood screws inserted into the wood corner blocks.

Back is constructed of heavy webbing secured to the frame with staples. 1"-thick foam is applied to the webbing. Upholstery is wrapped over the foam and secured with upholstery staples.

Curved top rail is visible. It separates the front and back upholstery panels and adds to Beo's aesthetics.

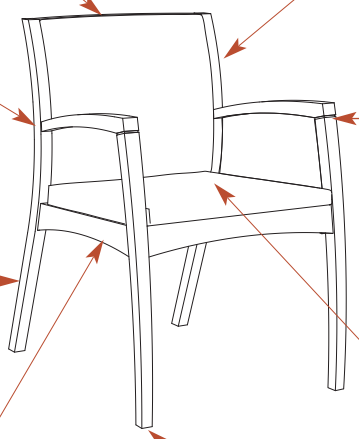
Joints are securely fastened with mortise and tenon joinery or double-doweled construction to ensure long-term use.

Wall-saver back legs flare slightly so they contact the baseboard first, saving the wall's finish and protecting the chair back.

Seat rails are reinforced with wood corner blocks and cleats attached with glue and wood screws.

Seat suspension is constructed of 9/32" thick molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a secure suspension.

Seat assembly is attached with wood screws to wood cleats on the frame.



Steam-bent frame is constructed of kiln-dried European beech to supports the body's curves.

Decorative reveal detail at the arm/leg joint. Reveal is 2mm deep by 4mm wide.

Seat cushions are made of 1¼" thin-profile, high-resiliency, CFC-free foam for maximum comfort and durability. Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples.

Nylon glides are ⅞" in diameter.

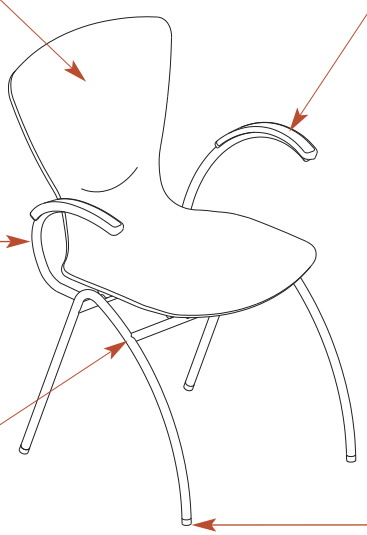
Shell is constructed of 7⁄16"-thick, 8-ply, molded plywood that is cross banded for strength. Shell is attached to the frame with four countersunk wood screws threaded into two wood cleats that are glued to the shell.

Arm supports, legs, and cross members are 25⁄32" x 3⁄32" hot rolled, welded, chrome plated, tubular steel.

Joints are welded.



Arm caps are 1 5⁄8" thick solid bentwood, finished to match the shell. Two countersunk wood screws attach each arm cap to the arm supports.

Black plastic glides fit like a cap over the ends of the tubular steel frame.

Mesh-back models incorporate a mesh design perfectly proportioned to give ergonomically correct, flexible support in all upright or reclined positions.

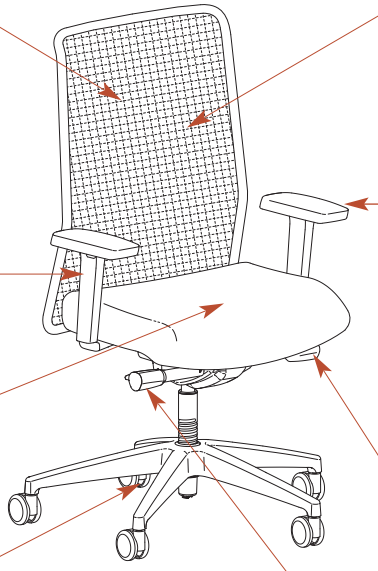
Arm structure consists of a steel upright covered in black nylon.

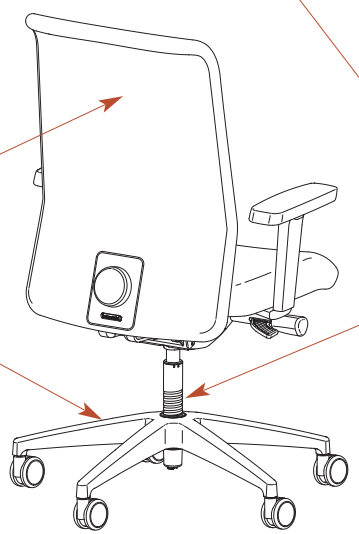
Seat cushions are 2 1/8" thick—1 3/4" CFC- and CHC-free molded foam, over a seven-layer molded plywood shell.

Black, dual-wheel casters on desk chairs are 65mm in diameter. Specify hard casters (802) for use on carpet (standard) or soft casters (801) for use on hard floors (upcharge applies).

Upholstered-back models feature a nine-layer molded plywood shell surrounded by molded, CFC- and CHC-free foam and upholstery.

Standard five-star base is 30% glass-filled nylon, textured, black plastic. Cast aluminum base with a polished finish is available as an option (upcharge applies).





Back features a three-position lock with release mechanism.

T-shaped arm rests are standard with 2D adjustability. User can adjust the arm vertically within a 4 1/4" range (11 positions) and horizontally within a 2 1/2" range. Arm caps are black polyurethane.

Seat slider is available as an option to adjust the seat depth for comfort. Seat depth is adjusted by grasping the left lever below the seat, pulling upward, and sliding forward or rearward; locks within a 2" range.

Synchro mechanism provides fully synchronized seat-to-back movement. Allows user to lock the chair in multiple positions within the range of movement using a single lever.

Seat height adjusts from 15 7/8"–23" via a patented twist/threaded column adjustment feature and pneumatic (gas) cylinder.

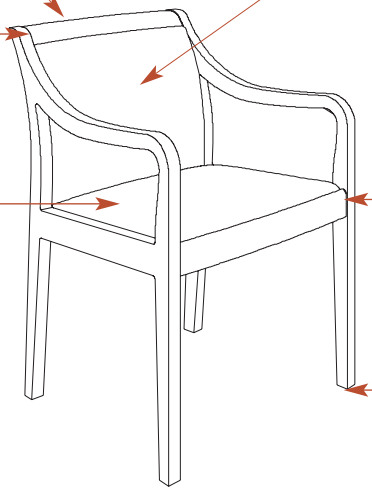
Frame is constructed of kiln-dried maple hardwoods.

Joints are double doweled and securely glued to ensure maximum strength.

Seat suspension is constructed of ½"-thick, 5-ply molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a suspension.



Cushions are high-resiliency, CFC-free polyurethane foam.

Back on wood top rail models is constructed of 1"-thick foam applied to ⅜"-thick, 5-ply contoured plywood. Back is attached to the frame with T-nuts, machine screws, and metal brackets.

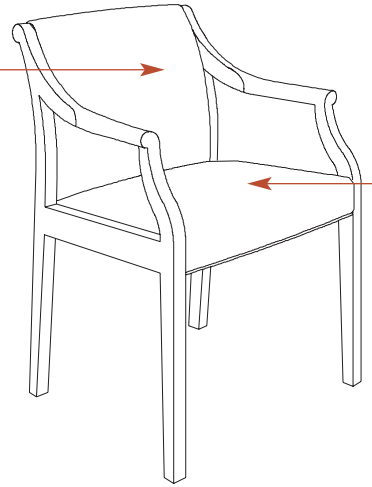
Corners are reinforced with wood corner blocks and tie screws on all models.

Nylon glides are ⅞" in diameter.

Back on fully upholstered models is constructed of 1"-thick foam applied to ⅜"-thick, 5-ply contoured plywood. Back is attached to the frame with press fit fasteners.

Back upholstery is wrapped in place and secured with upholstery staples.

Outer back panel is constructed of ⅜"-thick foam applied to 3⁄16"-thick, 3-ply contoured plywood. Press fit fasteners attach outer back panel to the inner back.



Seat cushion is applied to the flexible webbing suspension. Foam is 1¾" thick on chairs and 2½" thick on two-seat bench.

Seat upholstery is wrapped over cushion and secured to the seat suspension with upholstery staples. The entire seat assembly is attached to wood cleats on the chair frame with wood screws. Piping trims the front edge of the seat.

Metal Filing	93
Finishes & Materials	107

Back and seat are fully upholstered. Seat is tilted back, and the back is slightly reclined to allow the user to assume a more natural, relaxed posture.

Back upholstery, including ¾"-thick foam for the inside back and ¼" thick foam for the outside back, is applied to the back as a slipcover and secured with upholstery staples.

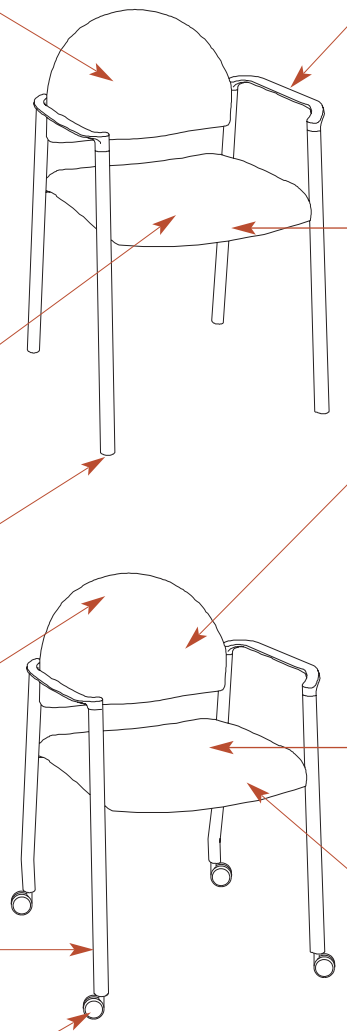
Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples.

Black nylon ball glides are standard on static 4-leg models. Hard casters are standard on mobile models.

Frames are ⅞" diameter, 14-gauge tubular steel. Cross members are ¾" diameter, 14-gauge steel. Leg frames are joined to the cross members with metal inert gas (MIG) welds. Plastic end caps are fitted into the frames of armless models.

Legs are angled for stability and available in textured powdercoat finish or smooth platinum metallic paint.

Black, hard casters are standard on mobile models.



Arm caps are injection molded nylon and attached to the frame with a pressure fit. They are color matched to the frame.

Waterfall front edge slopes forward to reduce pressure and increase circulation in the user's legs.

Backs are secured to the frame with 4 countersunk flat-head screws, 11-gauge steel plates, and T-nuts. Round back models are constructed using an injection molded poly-propylene panel. Flair back models are constructed using ⅜"-thick, 7-ply, molded plywood.

Cushions are high resilience, CFC-free polyurethane foam. Seat cushion is 1¼" thick.

Seat pan is contoured, blow-molded polyethylene. Channels within the seat pan fit over the cross members. Seat pan is attached to the seat frame with four machine screws and T-nuts.

Transport dolly is available at standard lead times.
➤See the Seating Price List.

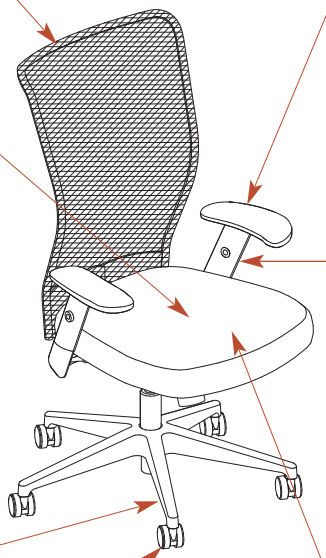
Mesh back, available in seven colors, is 84% texturized polyester and 16% elastin. The mesh is pulled over a metal frame and stapled into a plastic insert at the bottom.

Seat cushions feature a seamless, pull-over style upholstery. 1.0 models have 2½" of molded, CFC-free, urethane foam applied over a recycled plastic seat shell. 2.0 models (shown) have 1" slab foam with a ½" foam overlay topper and a ½" foam bottom (to give contour to seat) applied over a plywood seat shell.

5-prong base on 1.0 and 2.0 task chairs is constructed of extremely rigid, glass-filled nylon. Black surface is textured for scuff resistance.

Black, hard dual-wheel casters are standard.



Arm caps are soft, self-skinning polyurethane foam molded over a steel core for strength.

Arms are height adjustable within a 2½" range by the push of a button. 1.0 models (shown) lock into one of 7 positions. 2.0 models lock into one of 5 positions.

Height- and width-adjustable arms on 1.0 models also have a width adjustable range of 4¼".

Contoured "sit spot" and waterfall front edge provides optimal seated support and prevents undue pressure in the lower thigh/knee area.

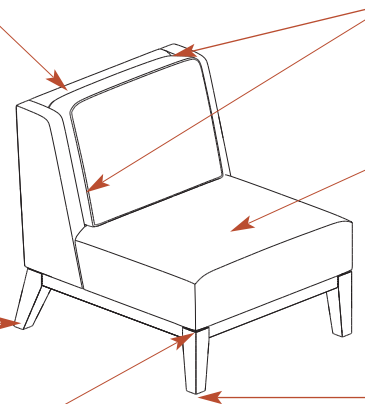
Frame is constructed of ¾" plywood, utilizing lap joint construction that is glued and screwed. All upholstered models are standard in kiln-dried maple hardwoods.

Outside panels are ½"-thick, high-grade polyurethane foam. Upholstery is a sewn slipcover that is stapled into place.

Lounge units feature a wall-saver back leg.

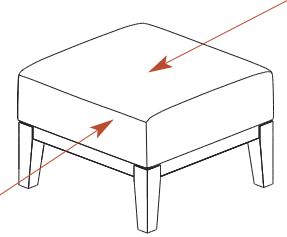


Piping is standard around the entire edge of both the front and back of the back cushion.

Cushions are high-resiliency, CFC-free, polyurethane foam. Seat cushions, specifically, are 5"-thick, high-grade, laminated polyurethane foam that is custom shaped.

Non-skid glides are ¾" in diameter and adjustable.

Legs and rails of base frames are constructed using double dowel and glue constructions with corner blocks which are also glued and screwed to base rails. The base frame is then attached to the seat frame with wood screws through the corner blocks. Units over 48"L feature additional screws to provide extra support. Rails and top of the legs are accented with a decorative reveal.



Ottoman and bench frame are constructed of 5½"-thick, high-grade polyurethane foam applied to a ¾" plywood frame using lap joint construction that is glued and screwed. A sewn slipcover is applied over the foam and attached with upholstery staples. Benches feature a sewn seam in the center. Legs and rails of base frames are constructed using double dowel and glue construction with corner blocks, which are also glued and screwed to the base rails. The rails feature a ¼" set back when attached to the legs. Tops of the legs are accented with ¼" decorative reveal. The base frame is then attached to the seat frame with wood screws through the corner blocks.

Seats have a high-tension strip webbing suspension that is stapled to the frame. Seat upholstery features a wrap-around upholstery method and is stapled into place.

All models are fully upholstered. Bottom is finished with a black, fabric dust cover prior to the wood frame being attached.

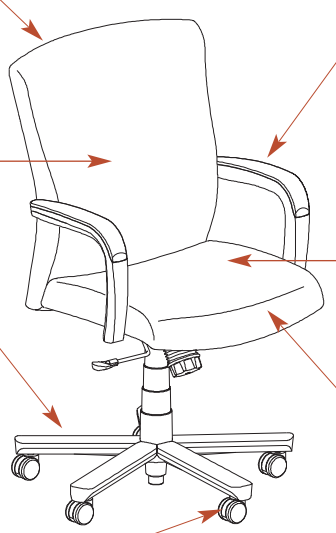
Outer back is fully upholstered. Back shell is contoured, blow-molded polyethylene with built-in stress-relieving flex.

Back cushion is high-resiliency, CFC-free, polyurethane foam and 1½" thick. Back is upholstered using a slipcover-style upholstery technique.

Hardwood base caps are kiln-dried maple supported by a rigid steel substructure.

Hard, black, dual-wheel casters for use on carpeted floors are standard.



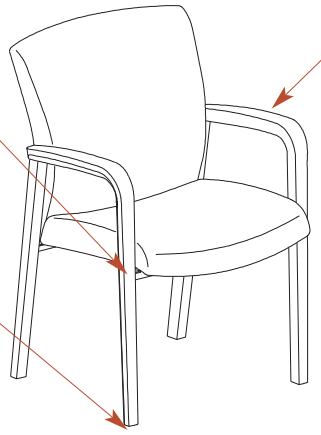
Arms on desk chairs are maple hardwoods with black urethane arm caps. Arms are attached to the seat with a metal support bracket and ¼"-diameter machine screws.

Seat cushion is CFC-free molded urethane foam and 2" thick. Seat is upholstered using a pull-around upholstery technique.

Waterfall front edge slopes forward to reduce pressure and increase circulation for the user's legs.

Seat rails on side chairs are ¾" outside diameter, 14-gauge, tubular steel.

Glides on wood frame side chair are dome-shaped plastic and ⅞" in diameter.



Hardwood-frame side chairs are kiln-dried maple. Joints are double doweled and glued to ensure maximum strength. Frame assembly is mounted in holes bored into the leg and secured with steel brackets and wood screws.

Metal Filing	93
Finishes & Materials	107

Lumbar support pad, made of polypropylene, moves 2½" for optimal comfort and support. Neoprene covers the foam in the lumbar area and facilitates movement of the lumbar pad.

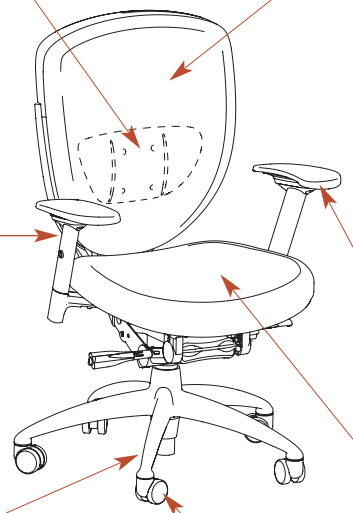
Height-adjustable arms adjust with a push button to one of 5 positions within a range of 2¼" and can be specified with fixed or 3-D adjustable arm caps.

Arm supports are glass filed nylon, insert molded over a steel core for superior support.

5-prong base is constructed of rigid, glass-filled nylon. Black surface is textured for scuff resistance.

Seat slider option is available on task chairs to adjust the seat depth for comfort. Seat depth is adjusted via a single lever and locks in one of 6 positions within a 2" range. Upcharge applies. Seat slider is not available on stools.

Low seat-height option, compatible with the BIFMA recommended minimum of 15", is available. The seat height adjustment range is 3". Upcharge applies.



Contoured CFC-free polyurethane foam provides comfort consistency and proper ergonomic support.

Back cushions have 1¾" CFC-free polyurethane foam to enhance comfort and reduce fatigue. Edges of foam used on seat and back are wrapped with ⅜" of higher density foam for cleaner edges and contours.

Arm caps are soft, black, self-skinning polyurethane foam, insert molded over a steel core for strength.

Seat cushions have 2" base foam, plus a ½" soft topper pad to enhance comfort and reduce fatigue. Base foam includes ½" filler centered on the bottom of the cushion for added support. Seat cushions feature a waterfall front edge.

Hard dual-wheel casters (C1) are standard.

Kwik Office Models

Task Chair with Height-Adjustable Arms (QK20BT)

- Fixed arm caps
- 39¼"–44"H x 27½"W x 26½"D

Details

Wishbone back frame is injection molded, glass-filled nylon. Frame is attached with 2 high-tensile M10-1.5 x 35mm Allen-head bolts with grade 8 heavy steel flat washers.

Inner back panel is injection molded polypropylene, designed with a reinforcing pattern to ensure rigidity.

Inner seat panel is molded 9/16"-thick, 9-ply (1/16" poplar per ply), single-shell construction with a waterfall front edge.

Seamed slipcover-style upholstery on the back and seat accommodates a wide variety of fabrics and leather.

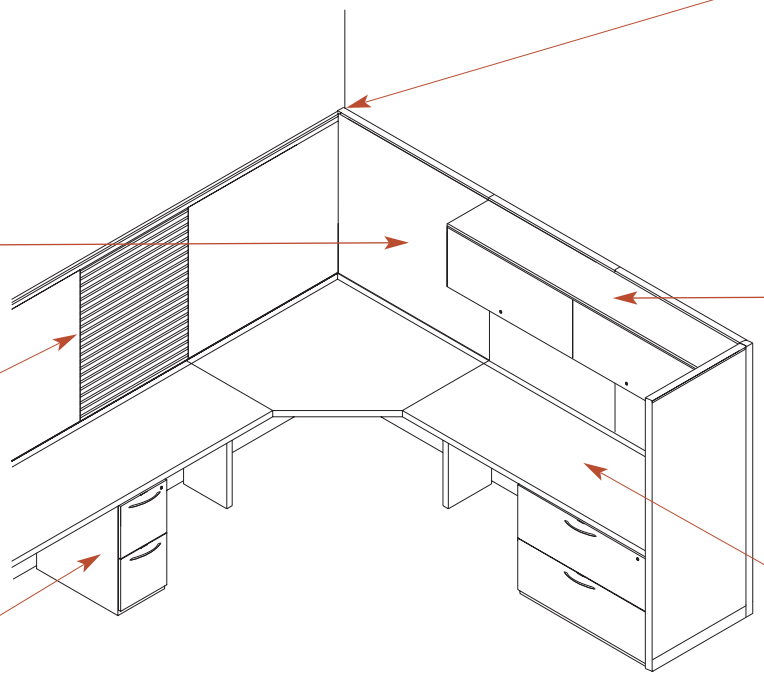
Interworks EQ panels, Traxx and tiles, Footprint worksurfaces, and metal bevel and flat profile storage components are available in a wide offering to allow you to complete your office in one quick stop.
➤See the Systems Price List for detailed product information and application guidelines.

Interworks EQ tackable acoustical panels are available in all standard heights and widths for maximum flexibility when configuring quick set ups.

Traxx and tiles are available to coordinate with 66"H Interworks EQ panels.

Flat profile undersurface storage and metal supports are available in all non-metallic, core collection paints for consistent color palette options throughout your office setting. Pedestals, lateral files, and mobile pedestals are available for your selection.



Traxx starter kits ad wall-mount connectors are available to start a panel run from a building wall.

Bevel profile overhead storage is metal and available in all non-metallic, core collection paints. Available in receding door cabinets, half-height shelf, or full-height shelf models.

Worksurfaces are available in a variety of shapes, sizes, and profile options for your specifying convenience. They are offered in select laminates and feature coordinating PVC rims.

S Bracket				
½"	½"	24"	**Q10PSBPNCS**	$86
Supplemental Bracket Spacer				
			Q10PSBSPCR	No charge

Standard Includes

- Bracket
- Attachment screws

How to Specify

❶ Model

Specify supplemental brackets for maximum stability when wing panel is not tied to worksurface at front and back.

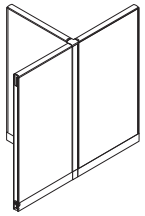
Specify bracket spacer when using a supplemental bracket to reinforce the connection between:
– 10P tackable acoustical (monolithic) panels and 10P sectional or glass panels (old models); or
– 10P tackable acoustical (monolithic) panels and 11P sectional or glass panels.
The bracket spacer will accommodate the difference in the depth of the top channel (cable trough).

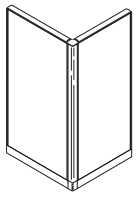
Finish Channels

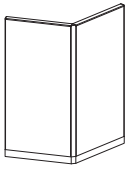
Pricing

For Same-Height Panel Connections

GSA SIN 711-1







T-configurations with one lower-height in-line or perpendicular panel require specification of additional models, including the straight/T finish channel shown on this page.
➤See page 56 for lower-height inline T configuration.
➤See page 58 for lower-height perpendicular T configuration.

Finish Channels

Pricing

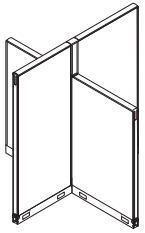
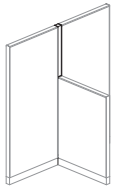
For Varied-Height 4-Way Connections—Two Lower Panels

GSA SIN 711-1



Select finish channel based on the difference in panel heights.



Models on this page can also be used to create T-configurations with one lower-height perpendicular panel. Specify:
– Varied-height 4-way/X with two lower-height panels finish channel (10P**CNHLL) for the side with the lower-height perpendicular panel; and
– Same-height straight/T finish channel in the appropriate height for the straight side (10P**CNT).

Note: One of the fabric channels included with the varied-height model will not be used.

Straight/T finish channels
➤See page 55.

GSA SIN 711-1

Casegoods ➤See page 5
Seating 25
Metal Filing 93
Finishes & Materials 107

Data channels are used to run voice/data cables through two adjacent panels at different heights.

Knockouts are provided at each panel height to allow for communication access.

For 4-way/X configurations, use in-line data channels plus in-line fill caps for each lower panel in the configuration.

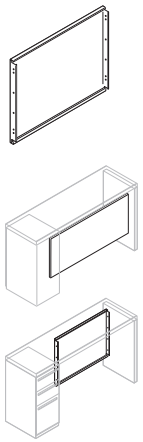
Modesty Panels

Pricing

GSA SIN 711-1

Casegoods	➤See page 5
Seating	25
Metal Filing	93
Finishes & Materials	107



IMPORTANT: All supports must be specified separately.

Modesty panels are pre-drilled and attach 4" inset from rear of pedestal or end panel only. Gap between top of modesty panel and underside of worksurface is 1½"; gap from bottom of modesty panel to floor is 3".

To determine modesty panel width required, subtract total **nominal** width of support (pedestals or end panels) from **nominal** width of worksurface. Example:
72"W worksurface
– 30"W support (Two 15"W peds)
= 42"W modesty panel required
➤See the Systems Price List for planning guideline chart.

Lock Cores for Key Specific Option
➤See page 106.

Features

Overview

Filing Capacities ➤See page 97
Lock Cores 106
Finishes & Materials 107

Top is finished so the file can be used as a stand alone unit.

Roll-out shelf with lift door (in applicable five-high models) replaces top drawer and adds 1" to overall height of the file. Accommodates standing binders up to 12"H.

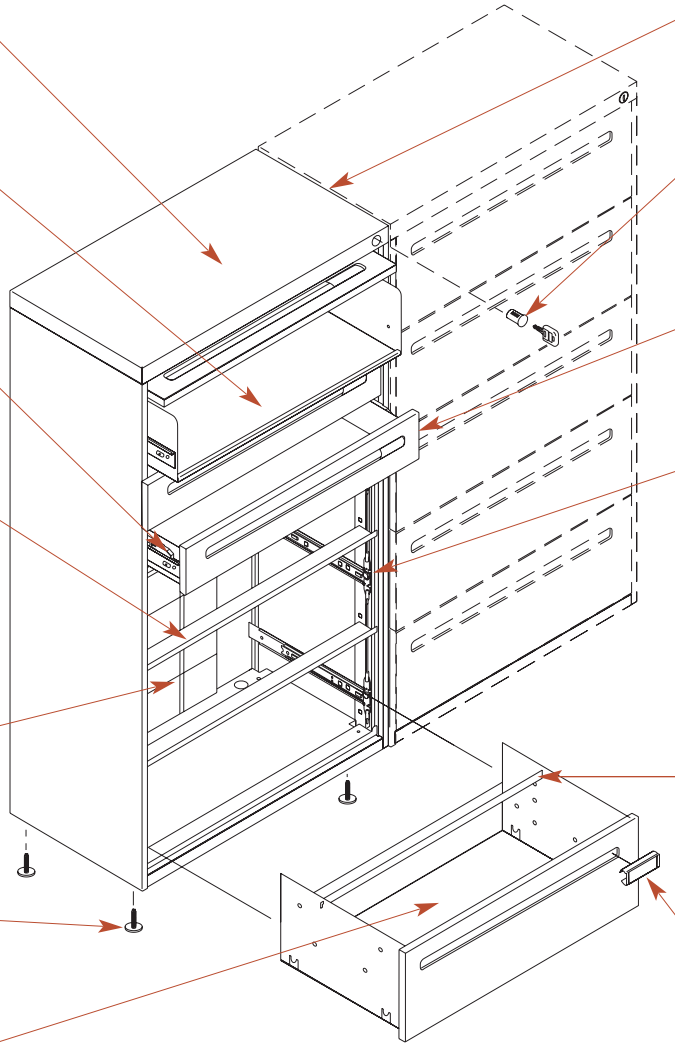
Built-in anti-rebound catch prevents drawer from accidentally rolling open.

Heavy-gauge frame is reinforced at all corners and built into the front of the file so openings are always true and square. Right angle bend of the coach seam makes the strongest use of formed metal and presents a clean exterior with no exposed welds.

Counterweight kit, specified separately, is required for all individual freestanding units. Kits include counterweight and bracket, packaged individually.

Four glides, standard, provide ¾" adjustability and allow for sturdy, four-point loading.

Steel drawer interiors are pre-painted cinder.



Knockouts are standard for ganging side-by-side.

Locking is standard. Select key random or key specific.
Note: Lock cores must be specified separately for key specific option.

Two 6"H half-height drawers may replace existing drawer in any position.

Full ball-bearing, progressive-slide drawer suspension allows both the drawer and suspension to extend together and provides smooth drawer operation.

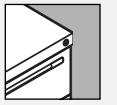
Silencing bumpers ensure quiet drawer operation and are added to suspension wherever a steel-to-steel contact would otherwise be made.

Side-to-side file bar is standard; one per drawer.

Front-to-back file bars are available separately for easy field installation.

Label holder is standard; one per drawer.

Drawer Pulls:



Drawer pull is recessed along the full front edge.

Locks:

Lateral files are predrilled to accept lock cores. Lock secures all drawers in the unit. Select key random or key specific when specifying.

Keying:

Key Random Option—Key numbers will be assigned arbitrarily at the factory with key numbers ranging from QKSCD001 to QKSCD025. Locks are shipped separately for field installation.

Key Specific Option—Specify any key number between QKSCD001 and QKSCD025. Locks are shipped separately for field installation.
IMPORTANT: If you select the key specific option, you must specify the lock core separately.

Features

Overview

Filing Capacities ➤See page 101
Lock Cores 106
Finishes & Materials 107

Top is finished so the file can be used as a stand alone unit.

Knockouts are standard for ganging side-by-side or for securing to a wall.

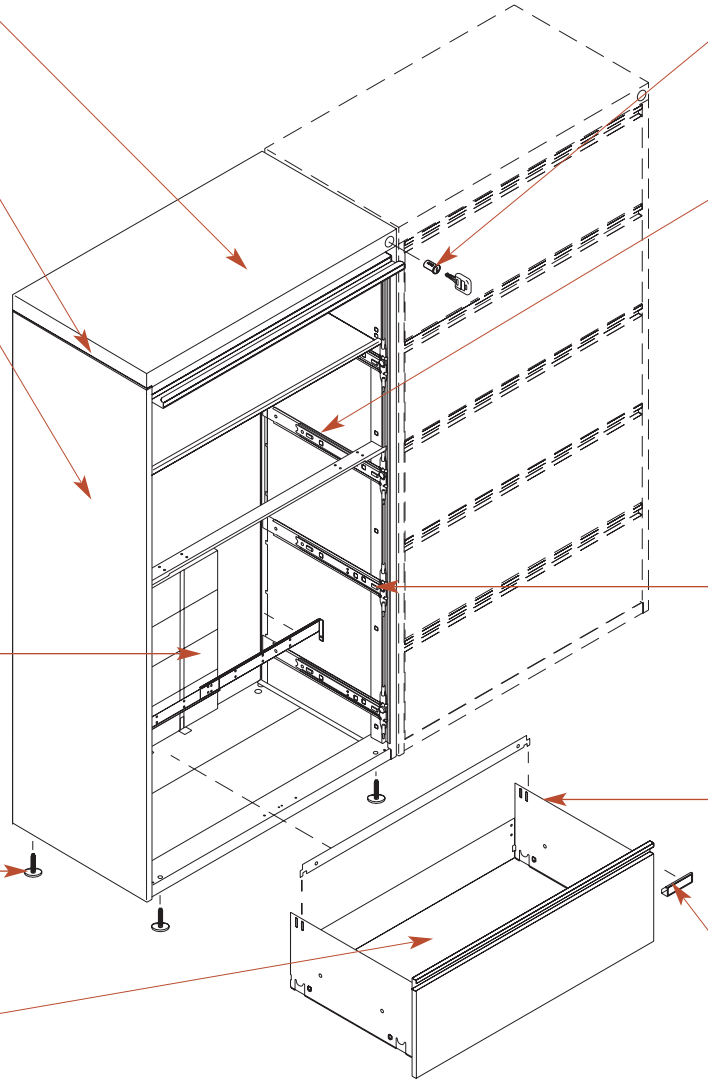
Fixed shelf with lift door on applicable five-high lateral files replaces top drawer and accommodates standing binders up to 12"H.

Drawer fronts and lift doors in the top position on five-high lateral files are 1 9/16" taller than the other drawer fronts to accommodate the receding lift-door application.

Counterweight kit, specified separately, is required for all individual freestanding units. Kits include counterweight and bracket, packaged individually.

Four glides, standard, provide ¾" adjustability and allow for sturdy, four-point loading.

Steel drawer interiors are pre-painted cinder. Replacement drawer fronts can be field installed.



Locking is standard. Select key random or key specific.
Note: Lock cores must be specified separately for key specific option.

Integrated drawer slide and single interlock mechanism are part of the slide design, providing for quieter drawer operation and ensuring only one drawer may be opened at a time.

Built-in anti-rebound catch prevents drawer from accidently rolling open.

Right angle bend of the coach seam makes the strongest use of formed metal and presents a clean exterior with no exposed welds.

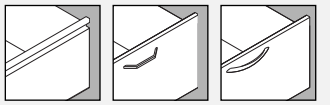
Full ball-bearing, progressive-slide drawer suspension allows both the drawer and suspension to extend together and provides smooth drawer operation.

Side-to-side file bars are standard; two per drawer.

Front-to-back file bars are available separately for easy field installation.

Label holder is standard with extended pull; one per drawer.

Drawer Pulls:



Extended Rail Arc

Extended is recessed along the full front edge and is painted the same color as the unit. Rail pull is textured black. Arc pull is available in 462 Cinder.

Locks:

Lateral files are predrilled to accept lock cores. Lock secures all drawers in the unit. Speicfy key random or key specific.

Keying:

Key Random Option—Key numbers will be assigned arbitrarily at the factory with key numbers ranging from QKSCD001 to QKSCD025. Locks are shipped separately for field installation.

Key Specific Option—Specify any key number between QKSCD001 and QKSCD025. Locks are shipped separately for field installation.
IMPORTANT: If you select the key specific option, you must specify the lock core separately.
➤See page 106.

ADA-Compliant Models:

Lock is placed at 38 5/8"H, making it accessible from a seated position. Rail or arc pulls are available.

Two-High Lateral Files

Standard Includes

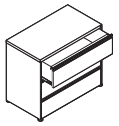
- Two drawers
- Two side-to-side file bars per drawer
- 18"D x 27¼"H

How to Specify

❶ Model:
QFND18302 = 30"W
QFND18362 = 36"W
QFND18422 = 42"W
② Pull:
E = Extended
R = Raill
ARC462 = Arc, Cinder
③ Lock option:
KRB = Key random
KSB = Key specific (-$22)
④ Finish price group:
STD = Group 1
⑤ Finish designator

Pricing

QFND18302	$833
QFND18362	$907
QFND18422	$976



Three-High Lateral Files

Standard Includes

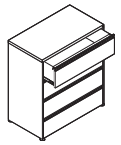
- Three drawers
- Two side-to-side file bars per drawer
- 18"D x 39³⁄₁₆"H

How to Specify

❶ Model:
QFND18303 = 30"W
QFND18363 = 36"W
QFND18423 = 42"W
② Pull:
E = Extended
R = Raill
ARC462 = Arc, Cinder
③ Lock option:
KRB = Key random
KSB = Key specific (-$22)
④ Finish price group:
STD = Group 1
⑤ Finish designator

Pricing

QFND18303	$974
QFND18363	$1107
QFND18423	$1203



Four-High Lateral Files

Standard Includes

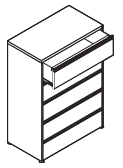
- Four drawers
- Two side-to-side file bars per drawer
- 18"D x 51⅛"H

How to Specify

❶ Model:
QFND18304 = 30"W
QFND18364 = 36"W
QFND18424 = 42"W
② Pull:
E = Extended
R = Raill
ARC462 = Arc, Cinder
③ Lock option:
KRB = Key random
KSB = Key specific (-$22)
④ Finish price group:
STD = Group 1
⑤ Finish designator

Pricing

QFND18304	$1184
QFND18364	$1333
QFND18424	$1503



Five-High Lateral Files

Standard Includes

- Five drawers
- Two side-to-side file bars per drawer
- 18"D x 64½"H

How to Specify

❶ Model:
QFND18305 = 30"W
QFND18365 = 36"W
QFND18425 = 42"W
② Pull:
E = Extended
R = Raill
ARC462 = Arc, Cinder
③ Lock option:
KRB = Key random
KSB = Key specific (-$22)
④ Finish price group:
STD = Group 1

Lock Cores for Key Specific Option and Change Keys

Important

- Lock cores must be specified separately for models with key specific option (KSB)
- Change key is equired to remove QKSCD lock cores in the field; it is not required for the initial installation of lock cores

How to Specify

❶ Model:
QKSCD = Lock core and key
QKSCD1CK = Channge key
❷ Key number (omit for change key):
001 to 025

Pricing

QKSCD	$22
QKSCD1CK	$6

FINISHES & MATERIALS

Table of Contents

Samples:

Samples of Kimball Office wood finishes and paints are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur in color and texture. Kimball Office carefully selects all materials used in every product, ensuring a commercially acceptable color and finish.

Swatch cards and memo samples of Kimball Office fabrics are available upon request. There may be slight differences between samples and actual yardage as a result of variations in dye lots.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

Kimball Office offers a diverse collection of surface materials. Please see descriptions below to ensure that you are choosing the materials that best support your requirements.

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The fabric collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on work-surfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Generations Collection:

The Generations Collection is comprised of tried and true materials that have been in the Kimball Office offering for many years. This collection is designed to support long-standing customers and to help transition you to the current offering.
➤Visit kimballoffice.com to see the Generations Collection.

IMPORTANT: Materials in this collection should not be used to set standard color palettes for new installations.

Materials in this offering can be ordered using the standard process, however, extended lead times and minimum order quantities may apply. For best results, pre-planning orders with your Customer Service Representative is recommended.

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Warranty:

Fabrics and leathers are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).
➤See page 122 for complete warranty information.

For Casegoods and Tables

Price Group	1	1	1	1
Priority		•	•	
Senator	•			•
Contemporary Table Tops & Bases		•	•	
42” Traditional Table Tops	•			•
Queen Anne Table Bases	•			•

Priority and contemporary table tops and bases feature our Pura® finish, a proprietary, water-based, ultraviolet (UV) wood finish that has virtually no volatile organic compounds (VOCs).

Senator and Traditional tables feature our conventional high-quality catalyzed lacquer or catalyzed varnish finish, incorporating the latest technology. Chemically cross-linked materials insure toughness, imprint and mar resistance, adhesion, stability against checking and chemical resistance for lasting beauty and low maintenance.

To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth following direction of the grain.
- Dry with a separate cloth if needed.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.

➤See the Casegoods Price List for additional information on wood finish characteristics, care, and maintenance.

Terratex is a registered trademark of True Textiles, Inc. Each Terratex fabric must meet these four criteria:

- Made of 100% post-consumer and/or post-industrial fiber, or compostable materials
- Made using processes that reduce waste, emissions, energy, water usage, and toxic by-products
- Meets or exceeds the same quality standards of fabrics manufactured using virgin materials and conventional processes
- Made of a single fiber type, without backcoating, so that it too can be recycled or composted.

Green-e

100% of the electricity used to make these products is matched by Green-e certified renewable energy certificates.

20095	Red

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered a normal, inherent characteristic.

Some upholsteries (i.e. Essence, leathers and some woven fabrics) may relax over time creating a loosely upholstered appearance.

Leather is a natural product. Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristic of leather.

Kimball Office will always ship a satisfactory commercial match. Because of industry dye-lot variation, colors may not match exactly.

Fabrics and leathers are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).

Contrasting Upholstery:

Contrasting upholstery is defined by entire back and seat upholstery application. Contrasting upholstery is available on the following seating series:
- Beo
- Event (all models)
- Pose (lounge models)
- Wish (all models)

Select any contrasting Kimball Office, Alliance Program, COM, or COL upholstery.

IMPORTANT: When specifying contrasting fabric, use an electronic specification tools for pricing. If one is not available, you may contact Customer Service.

Special Applications:
Pose contrasting back upholstery applies to the cushion back only. Remainder of the chair (seat, arms, and outer shell) is contrasting.

Cleaning Fabrics:

Cleaning Code B
- Cleanable with diluted bleach solution

Cleaning Code WS
- Use water-based cleaning agents or foam. Mild water-free solvents may also be used.
- Cleaning by a professional furniture service is recommended.

Cleaning Leather:

Regular Cleaning
- Remove as much soil or staining as possible by carefully vacuuming or brushing.
- Dust with a dry or damp cloth.

Deep Cleaning
- Use mild non-detergent soap or cleaner. Wipe surface with a light circular motion. Repeat with clean water.
- Do not soak leather.
- Air dry.

Fire Codes & Flammability:

TB117
California Flammability Regulation #117 is a set of minimum allowable standards of flammability to which all upholstered furniture sold in the State of California must comply. It relates primarily to fabric coverings and resilient fillings. All shipments of Kimball Office upholstery comply with Regulation #117 and our invoices and law labels for such goods bear certification that our upholstered products comply.

UFAC
All Kimball Office seating is made in accordance with the Upholstered Furniture Action Council (UFAC) criteria to reduce chance of ignition by burning cigarettes.

TB133 Factor
TB133 factor is a full-scale fire test for furniture manufactured for public use in which an entire piece of furniture is tested as a unit. Kimball Office offers a wide variety of seating products that can be manufactured to meet TB133.

Double Upholstery Method
Kimball Office products are first upholstered with a fire barrier, the upholstery is then applied over the barrier. The addition of this barrier may slightly alter the comfort and/or aesthetics of the seating product.

Advisory
Purchaser must consult local fire and code official to determine the suitability of product being selected for any particular application.

Certain jurisdictions may require the use of additional fire retardants of composite flammability testing. Kimball Office assumes no responsibility for composite testing or for compliance with any particular code or other flammability standards different than as contained in applicable catalog information unless such requirements are specified in writing by purchaser to Kimball Office prior to confirmation of order. Cost of additional flammability treatments or testing needs of purchaser shall be borne by purchaser.

Seating Fabrics

Application Guidelines

ACT Performance Icons

Finishes ➤See page 109
Panel Fabrics 113
Seating Upholstery 114

All Kimball Office fabrics meet, and in most cases exceed, the minimum requirements set up by ACT. For the purpose of uniformity in the industry, Kimball Office will be utilizing the ACT icons on swatchcards and related materials.

The Association for Contract Textiles (ACT) has developed voluntary performance guidelines to make fabric specification easier. The five symbols give architects, designers, and end-users a vast amount of performance information in a succinct visual way. Look for these symbols on ACT member company sampling to assure that the fabrics you specify perform up to contract standards and pass all applicable testing.

These categories describe a material's performance features as measured by specified methods under standard laboratory conditions. All tests referenced here are intended to represent the most current version of a test method. Note: Individual ACT member product information may represent a different version of a test method depending on the date the product was introduced to the market.

IMPORTANT: These tests represent minimum requirements which are subject to change without notice and may not reflect requirements or laws in all locations.

Flammability:

The measurement of a fabric's performance when it is exposed to specific sources of ignition. Note: ACT guidelines specify different flammability tests dictated by the intended end use for the fabric.

Upholstery
California Technical Bulletin #117
Section E—Class 1 (Pass)

Wrapped Panels and Upholstered Walls
ASTM E 84 (Unadhered Mounting Method)—Class A or Class 1

Wet & Dry Crocking:

Transfer of dye from the surface of a dyed or printed fabric onto another surface by rubbing.

Upholstery
AATCC 8—
Dry Crocking, Grade 4 minimum
Wet Crocking, Grade 3 minimum

Wrapped Panels and Upholstered Walls
AATCC 8—
Dry Crocking, Grade 3 minimum
Wet Crocking, Grade 3 minimum

Colorfastness to Light:

A material's degree of resistance to the fading effect of light.

Upholstery
AATCC 16—Option 1 or 3
Grade 4 minimum at 40 hours

Wrapped Panels and Upholstered Walls
AATCC 16—Option 1 or 3
Grade 4 minimum at 40 hours

Physical Properties:

Pilling is the formation of fuzzy balls of fiber on the surface of a fabric that remain attached to the fabric. Breaking strength is the measurement of stress exerted to pull a fabric apart under tension. Seam slippage is the movement of yarns in a fabric that occurs when it is pulled apart at a seam.

Upholstery
Brush pill—ASTM D3511, Class 3 minimum or Martindale Tester ASTM D4970, Class 3 minimum

Breaking strength ASTM D5034 (Grab Test)—50 lbs. minimum in warp and weft

Seam slippage ASTM D4034—
25 lbs. minimum in warp and weft

Wrapped Panels and Upholstered Walls
Breaking strength ASTM D5034 (Grab Test)—35 lbs. minimum in warp and weft

Abrasion Resistance:

The surface wear of a fabric caused by rubbing and contact with another fabric.

General Contract Upholstery
ASTM D4157 (ACT approved #10 Cotton Duck)—15,000 double rubs Wyzenbeek method

ASTM D4966 (12 KPa pressure)—20,000 cycles Martindale method

Heavy Duty Upholstery
ASTM D4157 (ACT approved #10 Cotton Duck)—30,000 double rubs Wyzenbeek method

ASTM D4966 (12 KPa pressure)—40,000 cycles Martindale method

End use examples of heavy-duty installations where upholstery fabrics rated at 30,000 double rubs should be appropriate are single shift corporate, hotel rooms/suites, conference rooms and dining area usage.

ACT acknowledges that there are extreme wear situations that may require higher levels of abrasion resistance. End use examples that may require higher than 30,000 double rubs include: 24 hour transportation terminals, 24 hour telemarketing, 24 hour healthcare emergency rooms, 24 hour casino gambling areas, and such public gathering places as theatres, stadiums, lecture halls and fast food restaurants.

It is strongly suggested that double rubs exceeding 100,000 are not meaningful in providing additional value in use. Higher abrasion resistance does not necessarily indicate a significant extension of the service life of the fabric.

The Wyzenbeek and Martindale tests are the two methods commonly used to predict wear-ability. Actual performance is determined by many factors such as fiber content, weaves, finishes, furniture design, maintenance, cleaning, and usage. Durability of an upholstery fabric is a complex interaction (combination) of a number of performance tests that, in addition to abrasion, includes seam slippage, pilling, tensile strength, and usage.

There is no correlation between the Wyzenbeek and Martindale tests so it is not possible to estimate the number of cycles that would be achieved on one test if the results from the other test were known.

The Kwik Office program has a limited weekly volume capacity, with orders being entered on a first come, first served basis. Casegoods, Systems, and Metal Filing orders, individually, may not exceed $100,000 list. Consult your Customer Service Team for any seating order with more than 20 of a specific model. Production schedules will be verified to ensure shipment within the time period listed above.

Operating Load Capacities

Terms & Conditions ➤See page 120
Product Warranty 122
BIFMA Chair Testing 125

Component	*Operating Load Capacity (Functional Loads)*	*Example*
Casegoods		
Desk/table <45"W	200 lbs. over 12" diameter area, concentrated loading	
Desk/table 45"W–72"W	200 lbs. over 12" diameter area, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 72"W = 288 lbs.
Desk/table >72"W	Two 200 lb. loads over two 12" diameter areas, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 84"W = 324 lbs.
Pedestal drawer	.017 lb. per cubic inch of drawer interior filing space *Note: File drawers are to support hanging files only; they are not intended for bottom loading.*	24"D x 18"W x 12"H = 88 lbs.
Transaction counter, secondary surface <16"D, or and shelf	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	12"D x 60"W = 147 lbs. t.w.
Adjustable keyboard <36"W	66 lbs. over 12" diameter area, concentrated loading 66 lbs., distrib. loading	
Writing shelf	25 lbs., distributive loading	
Extendible elements	.017 lb. per cubic inch of drawer interior filing space, distributive loading	24"D x 15"W x 12"H = 73 lbs.
Center/pencil drawers	5 lbs., distributive loading	
Storage or bookcase top <38"H	200 lbs. concentrated loading .26 lb. per square inch of surface area, distributive loading	24"D x 36"W = 225 lbs.
Storage or bookcase top 38"H–72"H	.26 lb. per square inch of surface area, distributive loading	24"D x 36"W = 225 lbs.
Storage or bookcase top >72"H	.09 lb. per square inch of surface area, distributive loading	24"D x 36"W = 78 lbs.
Storage or bookcase bottom	.017 lb. per cubic inch above surface, distributive loading (not more than 18"H)	24"D x 36"W x 18"H = 264 lbs.
Systems		
Worksurface	200 lb.s over 12" diameter area, concentrated loading; 1.5 lb. per inch of perimeter, distributive loading	24"D x 72"W = 288 lbs. total weight (t.w.)
Transaction counter	.017 lb. per cubic inch above surface (not to exceed 12"H), distrib. loading	12"D x 60"W = 147 lbs. t.w.
Round and rectangular tables	1.5 lb. per inch of perimeter, distributive loading	36" dia. = 170 lbs. t.w. 36"D x 60"W = 288 lbs. t.w.
Pedestal drawer	.017 lb. per cubic inch of drawer interior filing space (hanging load on file hangers)	24"D x 18"W x 12"H wood = 88 lbs. t.w. 24"D x 15"W x 12"H metal = 73 lbs. t.w.
Pedestal shelves	.017 lb. per cubic inch above surface (not to exceed 12"H), distrib. loading	22"D x 30"W = 134 lbs. t.w
Center-mount cabinet	.017 lb. per cubic inch above surface (not to exceed 12"H), distrib. loading	36"W x 12"H metal = 163.5 lbs. t.w
Flipper door cabinet	Top shelf—NO load; Bottom shelf—.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading*	36"W x 16"H metal = 117 lbs. t.w. 36"W x 19"H wood = 140 lbs. t.w.
Open shelves	.017 lb. per cubic inch above surface (not to exceed 12"H), distrib. loading	36"W x 19"H wood = 140 lbs. t.w.
Lateral file drawers	.017 lb. per cubic inch of drawer interior filing space (hanging load on file hangers)	30"W x 18"D x 12"H metal = 110 lbs. t.w. 30"W x 24"D x 12"H wood = 147 lbs. t.w.
Bookcase and wardrobe shelves	.017 lb. per cubic inch above surface (not to exceed 12"H), distrib. loading	36"W x 8"D metal = 59 lbs. t.w. 36"W x 12"D wood = 88 lbs. t.w.

The table at left lists the operating load capacities of various Kimball Office components. All Casegoods components meet or exceed the ANSI/BIFMA Functional and Proof Loading requirements X5.5 2008 Desk and Table Products Tests and X5.9 2004 Storage Units Tests. All Systems components meet or exceed the ANSI/BIFMA Functional and Proof Loading requirements X5.6 2010 Panel System Test, X5.5 2008 Desk/Tables Products Test, and X5.9 2012 Storage Unit Test. The Operating Load Capacities listed represent the BIFMA functional loads which are equivalent to loads that can be expected in normal use of the component.

BIFMA

MEMBER
THE BUSINESS AND INSTITUTIONAL FURNITURE MANUFACTURER'S ASSOCIATION

Cubic inches should be calculated using this formula:
Surface length x surface depth x height of available storage above the surface (limited to 12 inches above the surface for casegoods or 18 inches above the surface for systems and Perks)

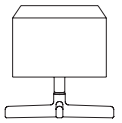
Square inches should be calculated using this formula: Surface depth x surface width of available storage

BIFMA and ANSI Chair Testing

X5.1–2011 General Purpose Office Chair Tests

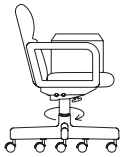
Terms & Conditions ➤See page 120
Product Warranty 122
Warranty for Bingo 123
Operating Load Capacities 124

Backrest Strength Test: Type **I**—back tilt chair, 200 lb. force applied, 300 lb. proof load. Type **II** & **III**—back tilt chair, 150 lb. force applied, 250 lb. proof load.

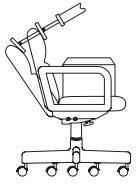


Base Test: Using 2500 lb. force for one minute, 2500 lb. proof load.

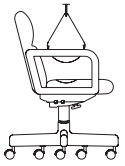
Drop Test: Using 225 lb. weight, 300 lb. proof load with 6" drop.



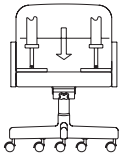
Swivel Cycle Test: 250 lb. on seat rotating base, 60,000 cycles at mid point and 60,000 lowest position.



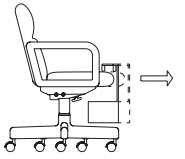
Tilt Mechanism Test: 300,000 tilts with 225 lb. in seat.



Seat Durability Test: 125 lb. weight dropped onto seat 100,000 cycles.

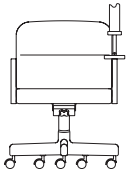


Front Load Ease: 165 lb. alternating for 40,000 cycles.

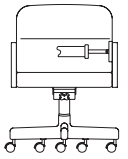


Front Stability Test: Apply 135 lb. on front edge of seat while applying horizontal 4.5 lb. force at top of seat.

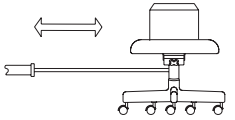
Rear Stability Test: 173 lb. on seat, no less than 20 lb. of pressure should be required to tip chair back.



Arm Strength Test—Downward Application: 169 lb. force applied downward at arm's weakest point, 253 lb. proof load.



Arm Strength Test—Outward Application: 100 lb. force applied outward at arm's weakest point, 150 lb. proof load.



Chair/Chair Base Durability Test: 2,000 cycles over obstruction, 98,000 over smooth along a 30" distance with a 250 lb. load.

Chair Testing:

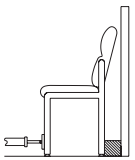
The X5.1–2011 General Purpose Office Chair Tests were developed by the Business and Institutional Furniture Manufacturer's Association (BIFMA) and approved by the American National Standards Institute (ANSI). These performance tests determine the stamina of seating in its day to day use.

Kimball Office is a member of the Business and Institutional Furniture Manufacturer's Association.

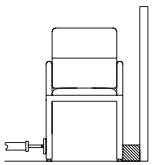
Note: This testing does not serve as a warranty or guarantee. Generally, products within this price list meet or exceed the applicable BIFMA/ANSI standards.

Terms & Conditions ➤See page 120
Product Warranty 122
Warranty for Bingo 123
Operating Load Capacities 124

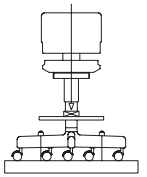
Backrest Durability Test: Type **I**—with 225 lb. on seat with chair fully reclined with 100 lb. force, 80,000 cycles. Type **II** & **III**—with 225 lb. on seat and tilting with 75 lbs. force, 80,000 cycles. After 80,000 are complete, 40,000 will be off center testing.



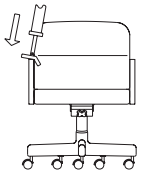
Leg Strength Test—Front Application: 75 lb. force applied, 113 lb. proof load.



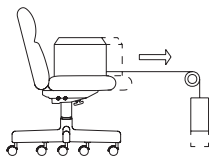
Leg Strength Test—Side Application: 75 lb. force applied, 113 lb. proof load.



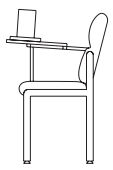
Footrest Durability Test: 200 lb. weight applied along a 4" length of the footrest, 50,000 cycles.



Arm Durability Test: Apply 90 lb. force at 10° angle for 60,000 cycles.



Out Stop Test for Chairs with Manually Adjustable Seat Depth: 163 lb. forward force with 55 lb. downward force for 25 cycles.



Tablet Arm Test—Static: 150 lb. load level for 1 minute.

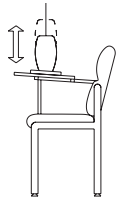


Table Arm Load Ease Test—Cyclic: 77 lb. dropped onto tablet center surface for 100,000 cycles.

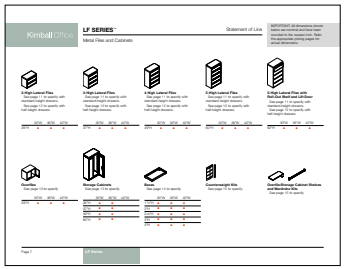
How to Use this Price List

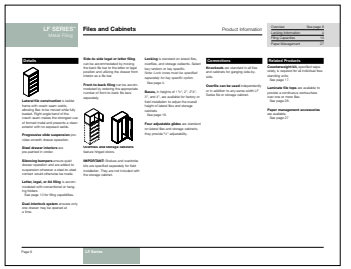
Kwik Office	➤See page 4
Sustainability	6
Finishes & Materials	27
Resources	33

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

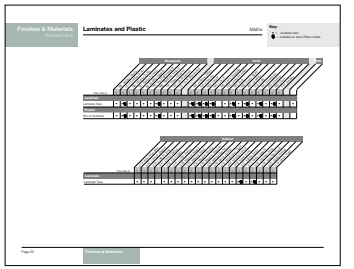
We suggest that you become familiar with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.



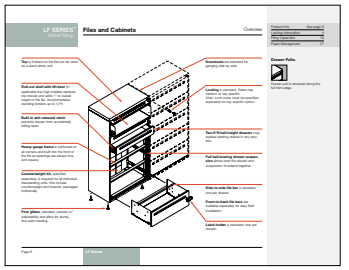
Statement of Line provides a snapshot of the entire product line. We've included an illustration, a table showing available sizes, and page cross references to the applicable pricing and how to specify pages.



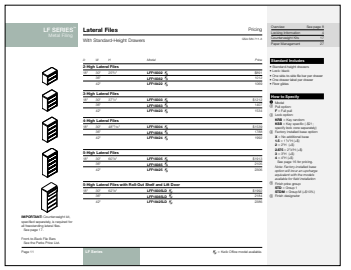
Product Information pages provide detailed information about the product, connections that can be made with other models, planning factors, and applications guidelines.



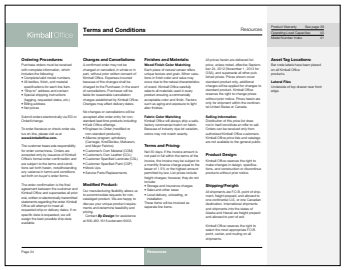
Look in the Finishes and Materials section to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product.



Overviews offer a quick look at the distinguishing features of the product line.



Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.
➤See page 3 for detailed information about how to specify Kimball Office products.



Use the Resources in the back of the price list. This repository of useful information includes Terms and Conditions, Warranty, Operating Load Capacities. You'll also find a model number index with references to the appropriate pricing page.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

How to Specify Our Products

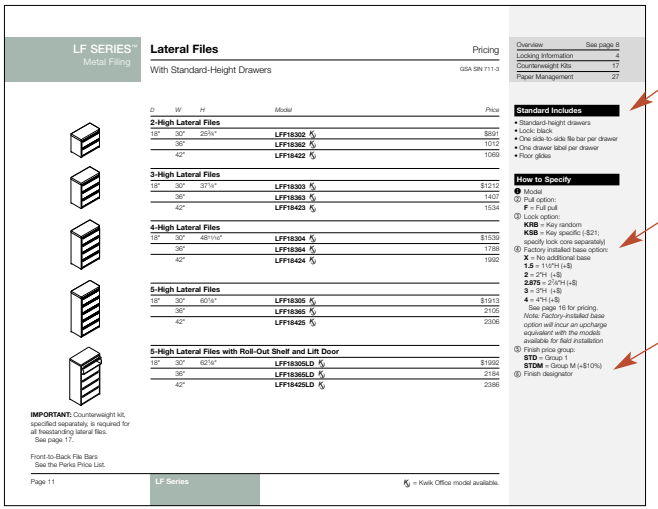
Kwik Office ➤See page 4
Sustainability 6
Finishes & Materials 27
Resources 33

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ❶, ❷, or ❸) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.



LF SERIES™ Metal Filing

Lateral Files Pricing

With Standard-Height Drawers GSA SIN 711-3

D	W	H	Model	Price
2-High Lateral Files				
18"	30"	25⅞"	LFF18302 K_J	$891
	36"		LFF18362 K_J	1012
	42"		LFF18422 K_J	1069
3-High Lateral Files				
18"	30"	37⅛"	LFF18303 K_J	$1212
	36"		LFF18363 K_J	1407

	36"		LFF18365LD K_J	2184
	42"		LFF18425LD K_J	2386

IMPORTANT: Counterweight kit, specified separately, is required for all freestanding lateral files. See page 17.

Front-to-Back File Bars See the Perks Price List.

Overview See page 8
Locking Information 4
Counterweight Kits 17
Paper Management 27

Standard Includes
- Standard-height drawers
- Lock: black
- One side-to-side file bar per drawer
- One drawer label per drawer
- Floor glides

How to Specify
❶ Model
⑵ Pull option:
F = Full pull
⑶ Lock option:
KRB = Key random
KSB = Key specific (-$21; specify lock core separately)
④ Factory installed base option:
X = No additional base
1.5 = 1½"H (+$)
2 = 2"H (+$)
2.875 = 2⅞"H (+$)
3 = 3"H (+$)
4 = 4"H (+$)
See page 16 for pricing.
Note: Factory-installed base option will incur an upcharge equivalent with the models available for field installation
⑤ Finish price group:
STD = Group 1
STDM = Group M (+$10%)
⑥ Finish designator

Page 11 LF Series K_J = Kwik Office model available.

Refer to the "standard includes" list to see what ships standard as part of the base model.

Follow these steps to build a complete model specification.

Options that incur an upcharge or decrease the base price are noted within the "How to Specify" steps.

Sample Specification:

The example below shows a complete model number for a **5-high LF Series lateral file.**
➤See page 11 for the corresponding pricing table and How to Specify steps.

Kwik Office Program

Sustainability ➤See page 6
Finishes & Materials 27
Resources 33

Kwik Office metal filing products are available to ship within ten business days upon receipt of a credit-approved order.

Specific models and options from the following lines are available:
- LF Series
- Fundamental
- Universal

Model Numbers:

Models and finishes that are available on Kwik Office have been marked with a K icon in this price list. Model numbers and the How to Specify steps differ from standard lead time products.
➤See the Kwik Office Price List to specify.

Include only Kwik Office models on your order. Any orders containing non-Kwik Office products will be treated as such and entered at standard lead times. Indicate clearly at the top of your order “Kwik Office.”

Changes and Cancellations:

No changes or cancellations will be accepted after order entry for Kwik Office products.

Order Size:

The Kwik Office program has a limited weekly volume capacity, with orders being entered on a first come, first served basis. Contact Customer Service for availability.

Kwik Office ➤See page 4

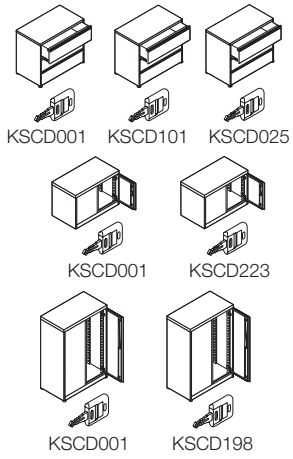
Finishes & Materials 27
Resources 33

Locking units can be specified as:
- Key random with a black lock core and hinged key (KRB); or
- Key specific (KS)

Key Random Option:

When key random option is selected, key numbers will be assigned arbitrarily at the factory with key numbers ranging from KSCD001 to KSCD300.

Randomly numbered lock core(s) will ship standard along with your order for field installation.

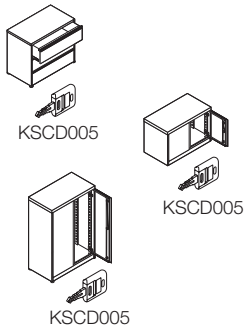


With random keying, different furniture units may or may not have the same key number. If you must have all locks keyed differently or all locks keyed the same, choose the key specific option.

Key Specific Option:

When key specific option is selected, the storage unit will be pre-drilled to accept a lock core; however, no lock cores will be shipped standard with the unit. If lock cores are standard on the unit, the price of the unit is reduced by the price of the lock core or cores.

You must specify lock core(s) separately for key specific option; specify any key number from KSCD001 to KSCD300.



To key all the furniture units in a workstation or department alike, choose the key specific option and order the quantity of locks needed for your installation.

Black lock cores and hinged keys are identical to the ones used with other casegoods and systems products.

Standard key that ships with the lock core can be used for the initial installation of the lock core in the field.

Change key model KCCB1CK allows removal of lock cores for key numbers ranging from KSCD001 to KSCD300.

IMPORTANT: A change key, specified separately, is required to remove lock cores in the field.

Master key model KC2GMK will unlock any lock with key numbers ranging from KSCD001 to KSCD300.

Model/Key Range	*Price*
Black Lock Cores	
KSCD001 to KSCD300	$22
For Kwik Office Models	
QKSCD001 to QKSCD025 K	$22
Change Key	
KCCB1CK	$6
Master Key	
KC2GMK	$12

How to Specify

❶ Specify exact key number for lock cores as the model number or model number for change or master key

K = Kwik Office model available.

Sustainability

Enhancing the Home We All Share

Kwik Office ➤See page 4
Finishes & Materials 27
Resources 33

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤Find more specific details regarding the environmental aspects of our product offerings at: **www.kimballoffice.com**

ANSI/BIFMA level™
100% of the products manufactured by Kimball Office are level® certified. We offer the most sustainable portfolio in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet and exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

ecoScorecard℠

Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:
- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification
Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:

SCScertified™ INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality
One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

Design for the Environment (DfE) is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.
➤For environmental data, visit our website at www.kimballoffice.com.

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

FSC www.fsc.org FSC® C010590
The mark of responsible forestry

FSC-Certified Wood
Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood at a 3% upcharge. Applicable models show FSCW as a finish price group designator option. Standard lead times apply to FSC orders.

ANEW

Asset Network for Education Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

Files and Cabinets

Overview

Product Info ➤See page 9
Locking Information 5
Filing Capacities 10
Paper Management 25

Top is finished so the file can be used as a stand alone unit.

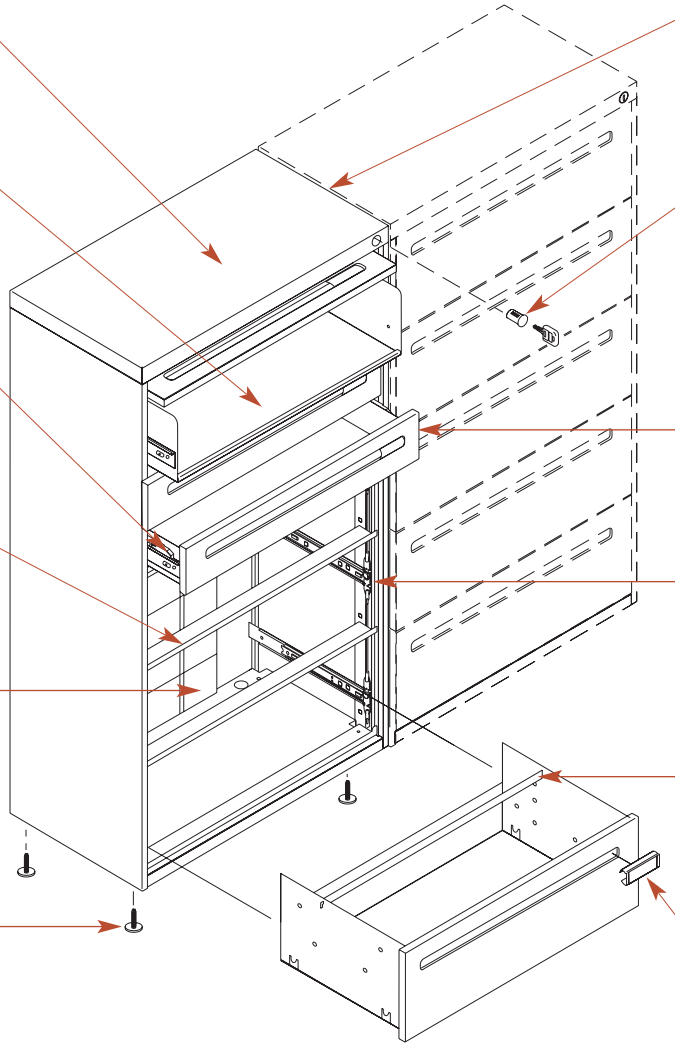
Roll-out shelf with lift door (in applicable five-high models) replaces top drawer and adds 1" to overall height of the file. Accommodates standing binders up to 12"H.

Built-in anti-rebound catch prevents drawer from accidentally rolling open.

Heavy-gauge frame is reinforced at all corners and built into the front of the file so openings are always true and square.

Counterweight kit, specified separately, is required for all individual freestanding units. Kits include counterweight and bracket, packaged individually.

Four glides, standard, provide ¾" adjustability and allow for sturdy, four-point loading.



Knockouts are standard for ganging side-by-side.

Locking is standard. Select key random or key specific.
Note: Lock cores must be specified separately for key specific option.

Two 6"H half-height drawers may replace existing drawer in any position.

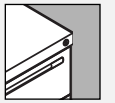
Full ball-bearing drawer suspension allows both the drawer and suspension to extend together.

Side-to-side file bar is standard; one per drawer.

Front-to-back file bars are available separately for easy field installation.

Label holder is standard; one per drawer.

Drawer Pulls:

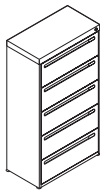


Drawer pull is recessed along the full front edge.

Files and Cabinets

Overview	➤See page 8
Locking Information	5
Filing Capacities	10
Paper Management	25

Details



Lateral file construction is ladder frame with coach seam welds, allowing files to be moved while fully loaded. Right angle bend of the coach seam makes the strongest use of formed metal and presents a clean exterior with no exposed welds.

Progressive slide suspension provides smooth drawer operation.

Steel drawer interiors are pre-painted in cinder.

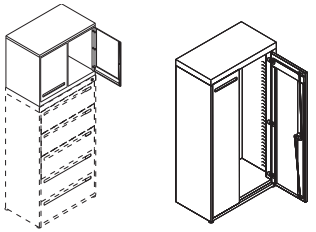
Silencing bumpers ensure quiet drawer operation and are added to suspension wherever a steel-to-steel contact would otherwise be made.

Letter, legal, or A4 filing is accommodated with conventional or hanging folders.
➤See page 10 for filing capabilities.

Dual-interlock system ensures only one drawer may be opened at a time.

Side-to-side legal or letter filing can be accommodated by moving the back file bar to the letter or legal position and utilizing the drawer front interior as a file bar.

Front-to-back filing can be accommodated by ordering the appropriate number of front-to-back file bars separately.



Overfiles and storage cabinets feature hinged doors.

IMPORTANT: Shelves and wardrobe kits are specified separately for field installation. Shelves are adjustable at 1" increments.

Locking is standard on lateral files, overfiles, and storage cabinets. Select key random or key specific.
Note: Lock cores must be specified separately for key specific option.
➤See page 5.

Bases, in heights of 1½", 2", 2⅞", 3", and 4", are available for factory or field installation to adjust the overall height of lateral files and storage cabinets
➤See page 14.

Four adjustable glides are standard on lateral files and storage cabinets; they provide ¾" adjustability.

Connections

Knockouts are standard in all files and cabinets for ganging side-by-side.

Overfile can be used independently or in addition to any same-width LF Series file or storage cabinet.

Related Products

Counterweight kit, specified separately, is required for all individual free-standing units.

Overview

Product Info ➤See page 19
Locking Information 5
Filing Capacities 20
Paper Management 25

Top is finished so the file can be used as a stand alone unit.

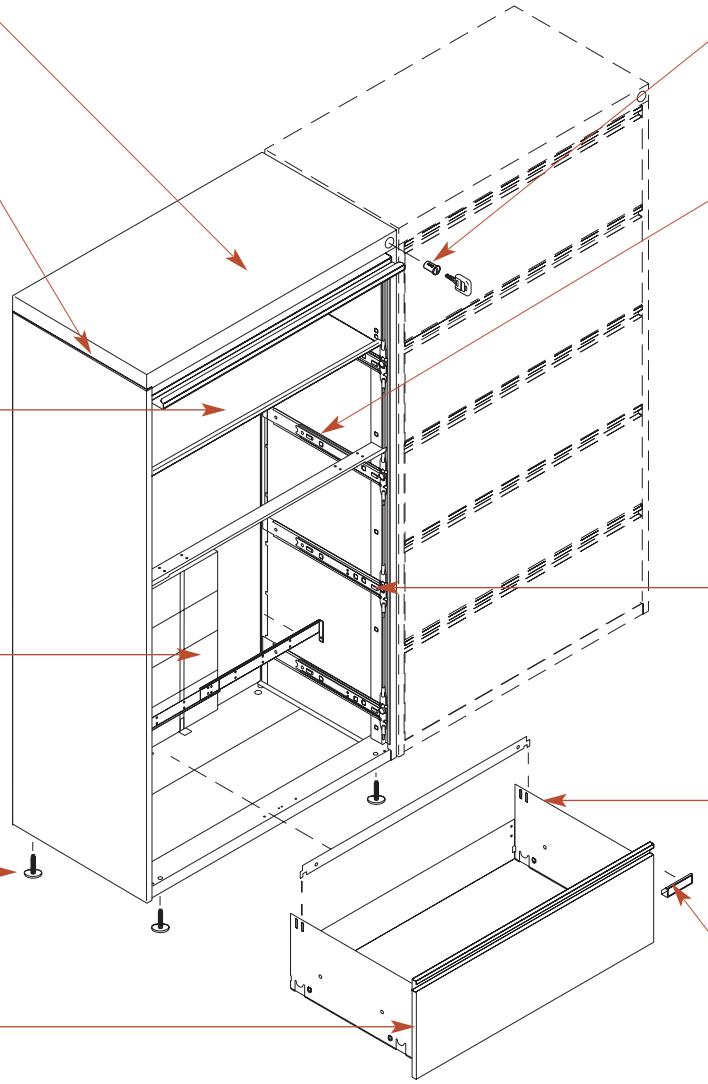
Knockouts are standard for ganging side-by-side or for securing to a wall.

Fixed shelf with lift door on applicable five-high lateral files replaces top drawer and accommodates standing binders up to 12"H.

Counterweight kit, specified separately, is required for all individual free-standing units. Kits include counterweight and bracket, packaged individually.

Four glides, standard, provide ¾" adjustability and allow for sturdy, four-point loading.

Replacement drawer fronts can be field installed.



Locking is standard. Select key random or key specific.
Note: Lock cores must be specified separately for key specific option.

Integrated drawer slide and single interlock mechanism are part of the slide design, providing for quieter drawer operation and ensuring only one drawer may be opened at a time.

Built-in anti-rebound catch prevents drawer from accidently rolling open.

Full ball-bearing drawer suspension allows both the drawer and suspension to extend together.

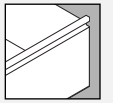
Side-to-side file bars are standard; two per drawer.

Front-to-back file bars are available separately for easy field installation.

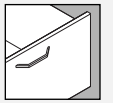
Label holder is standard with extended pull; one per drawer.

Drawer Pull Options:

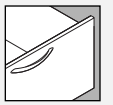
Three drawer pulls are available on Fundamental files.



Extended is recessed along the full front edge.



Rail Pull



Arc Pull

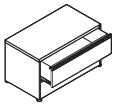
Locking Information	5
Filing Capacities	20
Paper Management	25

Details



Lateral file construction features coach seam welds. Right angle bend of the coach seam makes the strongest use of formed metal and presents a clean exterior with no exposed welds.

Progressive slide suspension provides smooth drawer operation.

Steel drawer interiors are prepainted cinder.

ADA compliant lateral files feature the choice of rail or arc pull. The lock is placed at 38⅝"H (above the third drawer), making it accessible from a seated position.

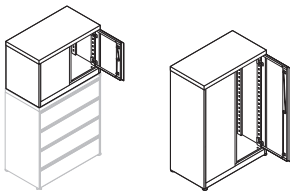
Posting shelf, available on five-high lateral file, includes magnetic spring latch to open and close. Posting shelf is located above the third drawer and is 1⅜"H.

Drawer fronts and lift doors in the top position on five-high lateral files are 1 9⁄16" taller than the other drawer fronts to accommodate the receding lift-door application.
Exception: Drawer fronts on models with posting shelf are all the same height. Posting shelf is 1⅜"H.

Letter, legal and A4 filing is accommodated with conventional or hanging folders.
➤See page 20 for filing capabilities.

Side-to-side legal or letter filing can be accommodated with file bars that ship standard in file.

Front-to-back filing can be accommodated by ordering the appropriate number of front-to-back file bars separately.



Overfiles and storage cabinets feature hinged doors.

IMPORTANT: Shelves and wardrobe kits are specified separately for field installation. Shelves are adjustable at 2" increments.

Four adjustable glides are standard, providing 1" adjustability.

Connections

Knockouts are standard in all files and cabinets for ganging side-by-side.

Overfile can be used independently or in addition to any appropriate width Fundamental file or storage cabinet.

FINISHES & MATERIALS

Table of Contents

Samples:

Samples of Kimball Office materials are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur between samples and finished products. Kimball Office carefully selects all materials used in every product, ensuring a commercially acceptable color and finish.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

Resources 33

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The fabric collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

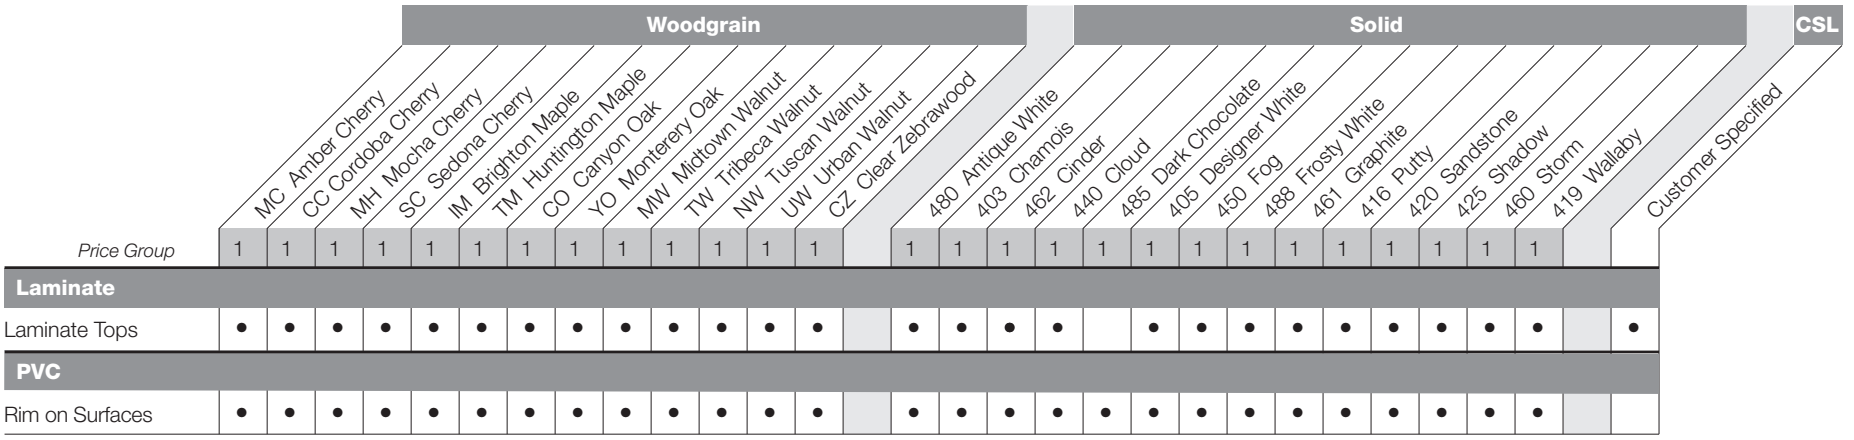
Disclaimer:

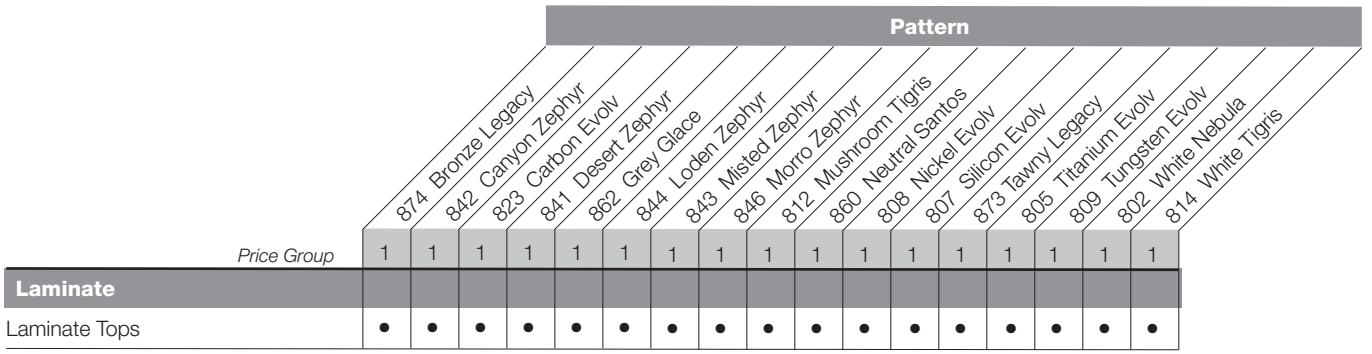
Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Laminate and PVC

Key:

- • = Available color





Woodgrain:

Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator.

CSL:

➤See page 30 for customer-specified laminate.

Customer-Specified Laminate

GSA Non-Contract

LF Series	➤See page 7
Fundamental Files	17
Finishes & Materials	27
Resources	33

Customer-specified laminate (CSL) is available on select products.
➤See page 29.

Kimball Office reserves the right to decline a customer specified laminate which may not be suitable for application.

Kimball Office assumes no responsibility for the durability, consistent coloration or any other performance characteristic of a customer specified laminate.

Metal, embossed, specialty, and supplier discontinued laminates must be custom quoted.
➤Contact ***By Design*** at 800.482.1616, extension 6001.

Kimball Office orders and procures all customer specified laminates.

Laminate sheen level must not exceed 60° for maximum durability of worksurfaces.

Lead times may vary for certain laminates. Minimum order quantities may apply.

Upcharges:

A **20%** upcharge per line item (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

How to Specify

① **Model:** Build the complete model specification (excluding the finish type and finish designator) by following the How to Specify on the appropriate pricing page for the product that is to receive the special finish.
② **Finish type:** For the “Finish type” step, insert a special finish code (in place of STD).
ZFMA1 = Formica
ZLMT1 = Lamin-Art
ZLTC1 = Lamitech
ZNEV1 = Nevamar
ZPTE1 = Pionite
ZWST1 = Wilsonart
③ **Finish designator:** For the “Finish designator” step, insert the laminate designator (color number) of the laminate to be applied to the product.

Metallic Paint:

10% upcharge applies for price group M metallic finishes, except on arc pulls.
Note: Due to the reflective qualities of metallic paints, variations in color may occur.

CSP:

➤See page 32 for customer-specified paint.

Customer-Specified Paint

GSA Non-Contract

LF Series	➤See page 7
Fundamental Files	17
Finishes & Materials	27
Resources	33

Customer-specified paint (CSP) is available on select products.
➤See page 31.

Pricing:

A **one-time fee of $300** (net) will be billed for the development of each new custom (customer-specified) paint. This fee covers all Kimball Office product lines on which the paint may be used. Models receiving a custom paint will also be assessed an upcharge.

A **10% upcharge per line item** (model) for customer-specified non-metallic paint applies. Upcharge is calculated on the base price, before other option upcharges are added.

A **20% upcharge per line item** (model) for customer-specified metallic paint applies. Upcharge is calculated on the base price, before other option upcharges are added.

The process:

① Send desired paint sample (no smaller than 3" x 5") to Customer Service along with a complete list of the products to which the custom paint is to be applied. **Include dealer name, contact, and project reference.**
② Custom paints will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.
③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a paint color.

How to Specify:

① **Model:**
Build the complete model specification (excluding finish type and finish designator) by following the "How to Specify" on the appropriate pricing page for the product that is to receive the custom paint.
② **Finish type:**
For the “Finish type” step, insert a special paint code (in place of STD):
ZPNT1 = Special non-metallic paint
ZPNTM1 = Special metallic paint
③ **Finish designator:**
For the “Finish designator” step, insert the designator provided to you by Customer Service.

Operating Load Capacities

Terms & Conditions ➤See page 34
Asset Tag Locations 34
Model Number Index 38

Component	Operating Load Capacity (Functional Loads)	Examples
Worksurface	200 lbs. over 12" diameter area, concentrated loading; 1.5 lbs. per inch of perimeter, distributive loading	24"D x 72"W = 288 lbs. total weight (t.w.)
Transaction counter	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	12"D x 60"W = 147 lbs. t.w.
Round and rectangular tables	1.5 lb. per inch of perimeter, distributive loading	36" dia. = 170 lbs. t.w. 36"D x 60"W = 288 lbs. t.w.
Pedestal drawer	.017 lb. per cubic inch of drawer interior filing space (hanging load on file hangers)	24"D x 18"W x 12"H wood = 88 lbs. t.w. 24"D x 15"W x 12"H metal = 73 lbs. t.w.
Pedestal shelves	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	22"D x 30"W = 134 lbs. t.w
Flipper door cabinet	Top shelf—NO load	
	Bottom shelf—.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading*	36"W x 16"H metal = 117 lbs. t.w. 36"W x 19"H wood = 140 lbs. t.w.
Open and enclosed shelves	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	36"W x 8"H metal = 59 lbs. t.w. 36"W x 19"H wood = 140 lbs. t.w.
Lateral file drawers	.017 lb. per cubic inch of drawer interior filing space (hanging load on file hangers)	30"W x 18"D x 12"H metal = 110 lbs. t.w. 30"W x 24"D x 12"H wood = 147 lbs. t.w.
Bookcase and wardrobe shelves	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	36"W x 8"D metal = 59 lbs. t.w. 36"W x 12"D wood = 88 lbs. t.w.

Cubic inches should be calculated using this formula:
Surface length x surface depth x height of available storage above the surface (limited to 12 inches above the surface)

The table at left lists the operating load capacities of various Kimball Office components. All components meet or exceed the ANSI/BIFMA Functional and Proof Loading requirements X5.6 2010 Panel System Test, X5.5. 2008 Desk/Tables Products Test, and X5.9 2012 Storage Units Test. The Operating Load Capacities listed represent the BIFMA functional loads which are equivalent to loads that can be expected in normal use of the component.

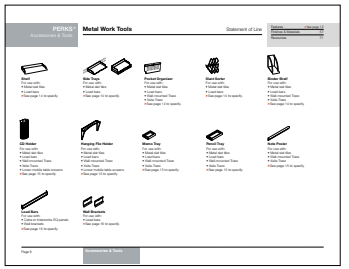
How to Use this Price List

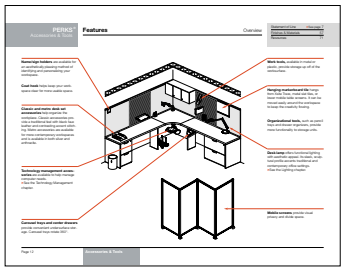
Kwik Office Program ➤See page 4
How to Specify Our Products 3
Sustainability 5

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

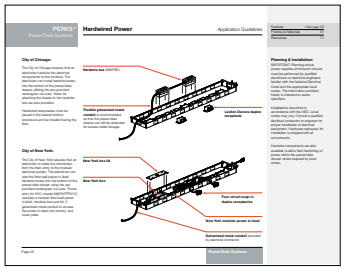
We suggest that you become familiar with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.



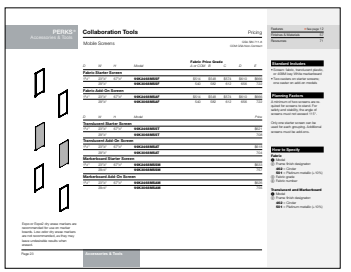
Statement of Line provides a snapshot of the entire product line. We've included an illustration and page cross references to the applicable pricing and how to specify pages.



Overviews offer a quick look at the distinguishing features of the product line.

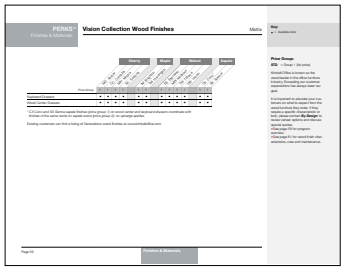


Product Information and Application Guidelines pages provide detailed information about the product, connections that can be made with other models, and planning factors.

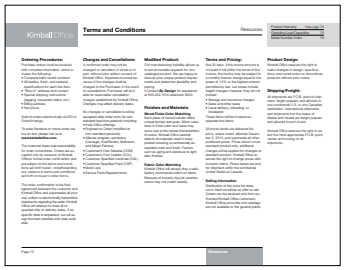


Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.

icon indicates models that are available for quick shipment.
➤See the Kwik Office Price List.



Look in the Finishes and Materials section to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product.



Use the Resources in the back of the price list. This repository of useful information includes Terms and Conditions, Warranty, Operating Load Capacities. You'll also find a model number index with references to the appropriate pricing page.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

How to Specify Our Products

Kwik Office Program ➤See page 4
How to Use this Price List 2
Sustainability 5

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ❶, ❷, or ❸) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

Expo or Expo2 dry erase markers are recommended for use on marker boards. Low-odor dry erase markers are not recommended, as they may leave undesirable results when erased.

Features ➤See page 12
Finishes & Materials 57
Resources 71

Standard Includes
- Screen: fabric, translucent plastic, or 40lM Ivory White markerboard
- Two casters on starter screens; one caster on add-on models

Planning Factors
A minimum of two screens are required for screens to stand. For safety and stability, the angle of screens must not exceed 115°.

Only one starter screen can be used for each grouping. Additional screens must be add-ons.

How to Use this Price List 2
How to Specify Our Products 3

Kwik Office Perks products are available to ship within five business days upon receipt of a credit-approved order.

Model Numbers:

Models and finishes that are available on Kwik Office have been marked with a K icon in this price list.

Kwik Office model numbers are different from standard model numbers. Base model numbers for Kwik Office products include all options and finish designators.

The K icon on standard lead-time pricing pages indicates availability; it does not provide the correct model numbers and option designators for specifying. You must use the complete model numbers listed i the Kwik Office Price List.

Include only Kwik Office models on your order. Any orders containing non-Kwik Office products will be treated as such and entered at standard lead times. Indicate clearly at the top of your order “Kwik Office.”

Changes and Cancellations:

No changes or cancellations will be accepted after order entry for Kwik Office products.

Order Size:

The Kwik Office program has a limited weekly volume capacity, with orders being entered on a first come, first served basis. Contact Customer Service for availability.

How to Specify Our Products 3

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤Find more specific details regarding the environmental aspects of our product offerings at: **www.kimballoffice.com**

ANSI/BIFMA level™
100% of the products manufactured by Kimball Office are level® certified. We offer the most sustainable portfolio in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet and exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

ecoScorecard℠
Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:
- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification
Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:
- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:
- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:
- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

SCScertified™ INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality
One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

Design for the Environment (DfE) is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.
➤For environmental data, visit our website at www.kimballoffice.com.

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

FSC www.fsc.org FSC® C010590
The mark of responsible forestry

FSC-Certified Wood
Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood at a 3% upcharge. Applicable models show FSCW as a finish price group designator option. Standard lead times apply to FSC orders.

ANEW

Asset Network for Education Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

Features

Overview

Statement of Line ➤See page 7
Finishes & Materials 55
Resources 67

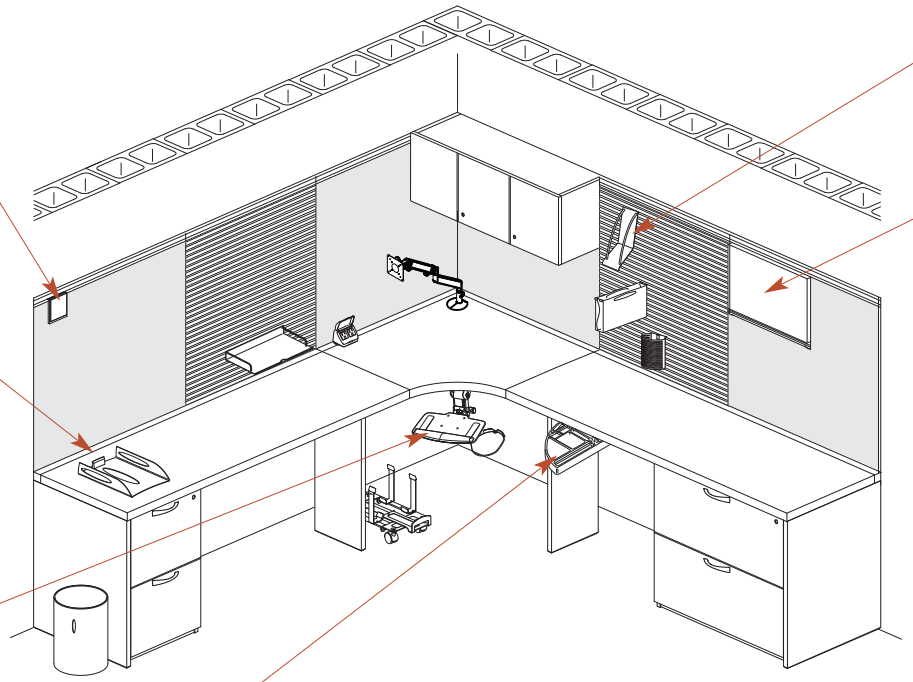
Name/sign holders are available for an aesthetically pleasing method of identifying and personalizing your workspace.

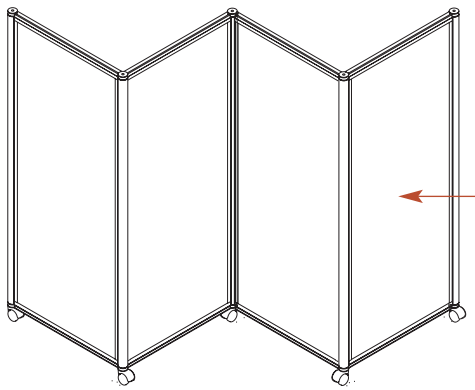
Coat hook helps keep your workspace clear for more usable space.

Classic and metro desk set accessories help organize the workplace. Classic accessories provide a traditional feel with black faux leather and contrasting accent stitching. Metro accessories are available for more contemporary workspaces and is available in both silver and anthracite.

Technology management accessories are available to help manage computer needs.
➤See the Technology Management chapter.

Carousel trays and center drawers provide convenient undersurface storage. Carousel trays rotate 360°.





Work tools, available in metal or plastic, provide storage up off of the worksurface.

Hanging markerboard tile hangs from Xsite Traxx, metal slat tiles, or lower mobile table screens. It can be moved easily around the workspace to keep the creativity flowing.

Organizational tools, such as pencil trays and drawer organizers, provide more functionality to storage units.

Mobile screens provide visual privacy and divide space.

Expo or Expo2 dry erase markers are recommended for use on marker boards. Low-odor dry erase markers are not recommended, as they may leave undesirable results when erased.

Standard Includes

- Screen: fabric, translucent plastic, or 409M Icey White markerboard
- Two casters on starter screens; one caster on add-on models

Planning Factors

A minimum of two screens are required for screens to stand. For safety and stability, the angle of screens must not exceed 115°.

Only one starter screen can be used for each grouping. Additional screens must be add-ons.

Features

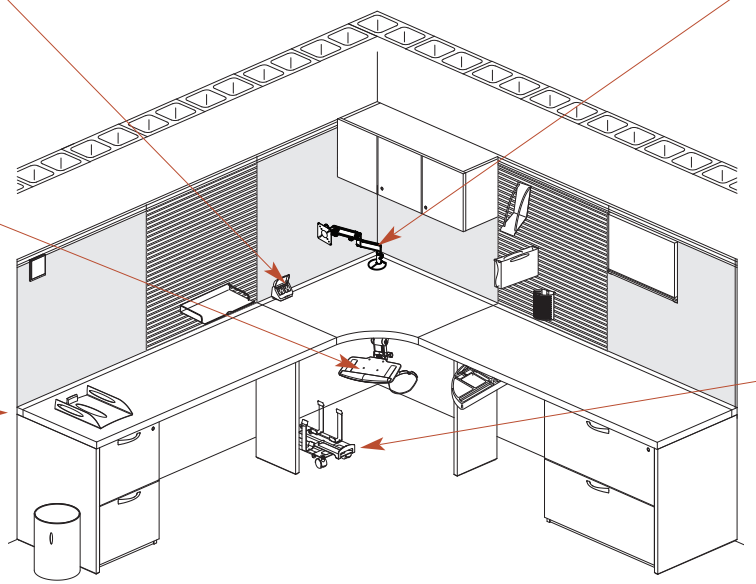
Overview

Finishes & Materials ➤See page 55
Resources 67

Power and voice/data modules provide convenient access to power and data on the worksurface. Modules slip securely into worksurface wire manager; no field scribing is necessary and they may be relocated as needed.

Keyboard kits, adjusters, or trays attach below the surface to provide adjustability and storage for computer keyboards.

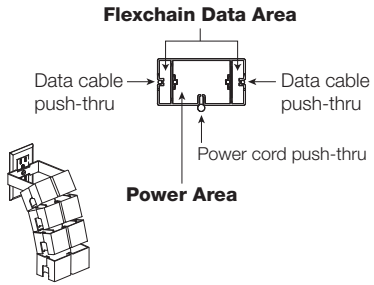
Wire manager fillers provide a finished end to wire manager at the end of a worksurface.



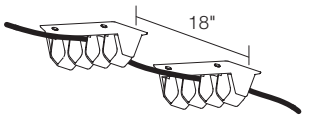
Monitor arms can be positioned at optimum height and distance to minimize strain and fatigue, preventing discomfort and injury.

Grommets are available for field installation to allow cords and cables to pass through the worksurface. ➤See the applicable price list for factory-installed grommets.

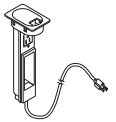
Mobile CPU cart provides easy access to the back of your unit. It automatically adjusts to support CPUs up to 9"W. It adds 3¾" to the height of the installed CPU.



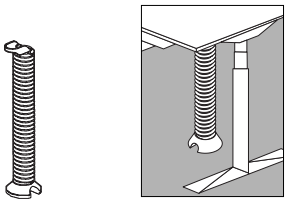
Flexchain manages cables and power-in feeds from under the surface to the floor. Flexchain U-bracket, specified separately, mounts to a standard wall outlet to manage cords from the outlet to under the surface. Flexchain has a center area for electrical cords and power in-feeds, and two side areas for data cables.



Undersurface cable manager is available to manage cords and cables under the worksurface. Cables pressure fit between loops.



Retractable power/communication center provides convenient access to power, voice, and/or data at worksurface height. A center column slides and locks in an upright position. After equipment is plugged in, it can be concealed below the surface. Field scribing of surface is required.



Expandable cable manager provides cable management from under the worksurface to the floor. It is ideal for use with height-adjustable tables.

Adjustable Keyboard Kits:

Keyboard kits cannot be used with President and Senator kneespace credenzas due to the central locking mechanism; nor can they be used with Scenario tables and Fluent worksurfaces as they interfere with the support channels.

Keyboard kits can be used with Xsede when undersurface support rails are not used.

Only keyboard kit models 99K1706KK2 and 99K1706KK1 work with Priority Progressive support rails and height-adjustable tables. Keyboard mount slide will need to be oriented parallel with the front edge of the worksurface. To store, lower the keyboard and swing under the surface.

The following adjustable keyboard kit models comply with ANSI/HFES method 2.

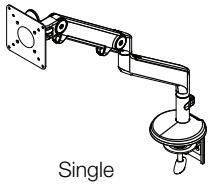
Monitor Arms

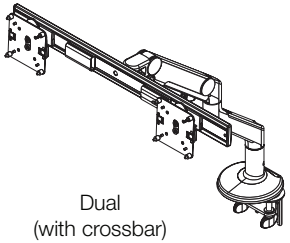
Single and Dual

Features ➤See page 27
Finishes & Materials 55
Resources 67

Details



Single



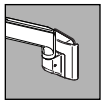
Dual
(with crossbar)

Monitor arms in this collection feature 4D adjustment, adjusting in and out, up and down, swiveling left and right, and tilting back and forward.

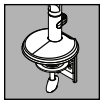
Arm with integrated cable management reach is 20" on single models and 22" on dual models. Height adjustment range is 10" on single models and 11½" on dual models.

Monitors up to 20 lbs. can be accommodated. Single-monitor arm supports one monitor. Dual-monitor arm supports two monitors up to 20 lbs. each and features a crossbar design with Allen head screws to keep monitors secure in public areas.
Note: Dual-arm monitors must have two monitors attached at all times for balance.

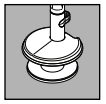
100mm x 100mm VESA plates are standard. A 75mm x 75mm plate can be accommodated. The standard VESA plates are not compatible with Apple monitors.
➤Contact Apple Computer directly to purchase an appropriate VESA plate separately.



Slat



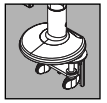
Clamp



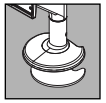
Grommet

Accessory Rail

Single-monitor arms are available in slat-mount, clamp-mount, grommet/bolt-through, and Xsede accessory rail models.



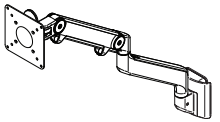
Clamp



Grommet

Dual-monitor arms are available in clamp-mount and grommet/bolt-through models.

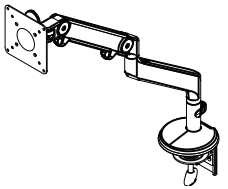
Connections



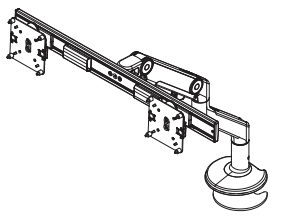
Slat-mount single-monitor arms are for use on metal slat tiles.
The number of single-monitor arms per slat tile is limited:

- Wall-mounted, full, metal slat tiles accommodate one monitor arm per tile. Trim channels included with the slat tile must be used.
- 24" or 30"W Cetra slat tiles accommodate one monitor arm per tile.
- 18", 24", or 30"W 1-high or 2-high Xsite slat tiles accommodate one monitor arm per tile. 2-high Xsite slat tiles require an extra mid-frame support for stability, specified separately. Trim channels included with the slat tile must be used.
- Xsite technology tile can hold two monitors per tile.
- Priority slat or fabric/slat tiles will accommodate two monitor arms if spaced at least 24" apart.
- Xsede slat tiles will accommodate two monitor arms if spaced at least 24" apart.

Slat-mount model cannot be used on wall-mounted Traxx, wall-mounted fabric/slat tiles, or Xsite Traxx.



Clamp-mount models must be mounted on the straight edge of a 1$^{3}/_{16}$" or 1$^{9}/_{16}$" worksurface; they are not applicable for knife, reverse knife, and sloped edge profile surfaces. When using on wire manager worksurfaces, the hard plastic underneath will have to be notched so the clamp is flush to a straight edge. The flexible topside durometer will bend.
Note: Clamp-mount models compatible with Xsede can be mounted to the back of the worksurface.



Grommet/bolt-through models can be used in holes up to 2.3" in diameter. They cannot be placed over a pedestal, modesty panel, or support panel. They can be used with 1$^{3}/_{16}$" or 1$^{9}/_{16}$" worksurfaces. Bolt-through application can utilize a hole as small as ½" in the surface.
➤Refer to assembly instructions.

Planning Factors

IMPORTANT: Monitor mounts are specific to arm style and are not are interchangeable between single and dual monitor applications.

Dual-monitor arms with cross bar can be used for a single-monitor application; however, the cross bar would be exposed.

Planning Factors

22"D adjustable keyboard kits can be used in corner-mount applications.

Width of keyboard kits includes mouse tray. Mouse tray is non-handed and can be mounted on the left or right.

Manual and intuitive adjustable keyboard kits slide in and out under the surface.

Keyboard kits will not be flush with the worksurface edge (in the stored, recessed position) when mounted in accordance with the manufacturer's directions.

Keyboard kits can be used with Xsede when undersurface support rails are not used.

➤See page 27 for a cross reference chart by furniture series of keyboard kits that comply to ANSI/HFES Method 2.

Standard Includes

Adjustable Keyboard Kit

- Keyboard arm: black
- Foam gel wrist rest: black
- High-density polyethylene tray and ABS mouse tray: black

Features

Overview

Statement of Line ➤See page 41
Finishes & Materials 55
Resources 67

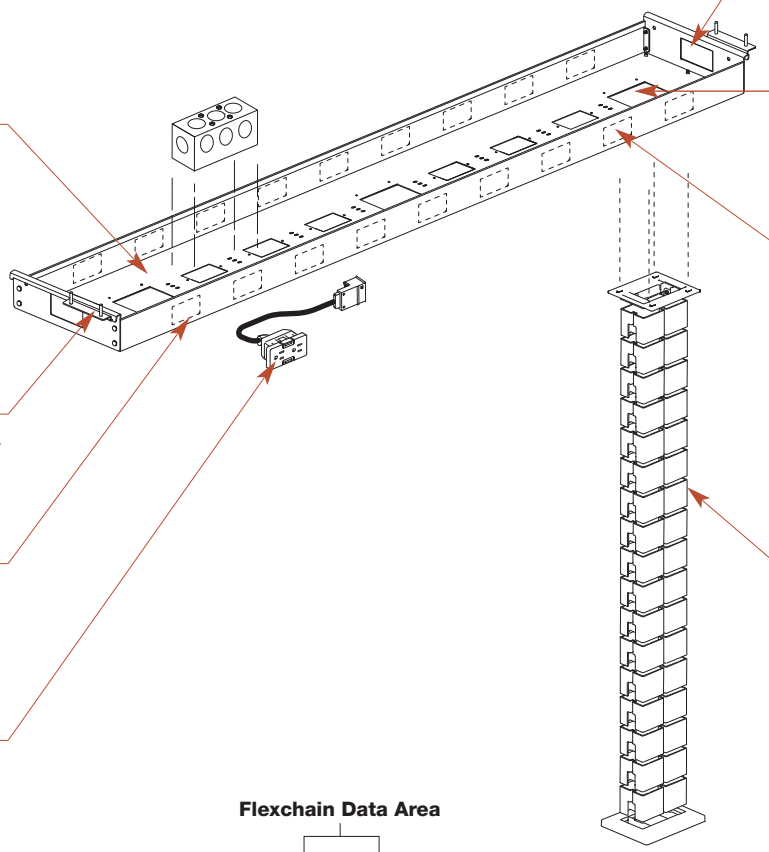
Power/data drawers and electrical components are for use in open planning and freestanding applications. They are recommended for use with Priority™, Definition®, Fluent® (where modesty panel is not used), and Footprint®.

Perks power/data sliding drawer brings both power and data to the underside of the worksurface. Unlike fixed troughs or baskets, the drawer pulls out to allow routing of excess cabling once the initial connection has been made.

Mounting hardware is field installed.

Metal knock-outs in the front face and back of the drawer can be removed as needed for data or electrical outlets.

Single-circuit, four-circuit, and hardwire electrical components are for use in power/data drawers.



Cut-outs on the ends (sides) of the drawer allow jumpers to exit for connection inside the next drawer.

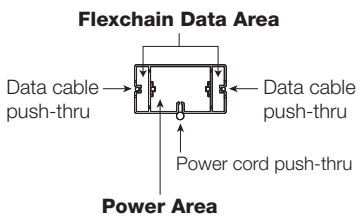
Large cut-outs on the bottom of the drawer allow power in-feed to enter the drawer.

Data/telecommunication modules can be used in the power/data drawer bottom cut-outs or the knock-outs on the front or back of the drawer.

Data cables can also be routed in the drawer to service the workstation.

Flexchain (shown) or expandable cable manager manages cables from under the surface to the floor.

IMPORTANT: Flexchain, expandable, vertical, and undersurface cable managers are required to protect 8-wire components from physical damage.



Circuitry Options:

Power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably. Power/data drawers are U.L. listed.

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed. ➤See page 44 for application guidelines.

Four-circuit components combine to form an 8-wire, 4-circuit, power system. ➤See page 45 for application guidelines.

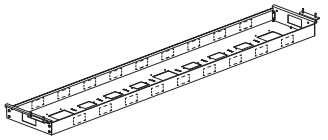
Hardwire components are also available to allow field hardwiring of power within the power/data drawer where required by local codes. ➤See page 48 for application guidelines.

c UL US LISTED

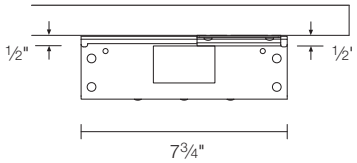
Power/Data Drawer

Features ➤See page 42
Finishes & Materials 55
Resources 67

Details



Power/data drawer is a powder-coated metal tray that mounts to the underside of a worksurface using two bent sheet metal drawer slides.



½" gap between the worksurface and the front and back edges of the drawer allows cords to exit. Cut-outs in the sides allow cables to pass to adjacent drawers.

Holes centered in the floor of the power/data drawer are provided to attach Perks laptop/equipment lock.

Planning Factors

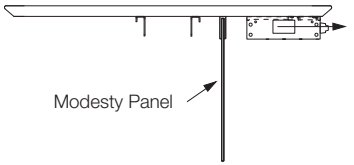
Power/data drawers are for use in open plan and freestanding applications. Recommended for use with Priority, Definition, Fluent, and Footprint. They are designed to work with 24", 30" and 36"W worksurfaces in single or back-to-back configurations.

Determine drawer size based on the width of the surface to which it will attach. Specify the drawer to be 10" shorter than the worksurface width to allow for it to mount inboard of the surface support. For example, specify a 62"W drawer for a 72"W worksurface. If using a surface with storage, base your calculation on the unsupported surface dimension to determine drawer size.

Depending on user electrical needs, one drawer can be shared in back-to-back configurations. Some users may require an individual drawer.

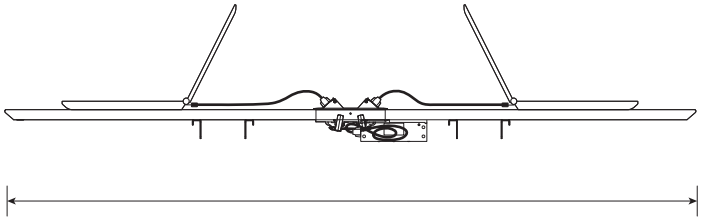
➤See illustration at top right.

Power/data drawers are not intended for use against a wall or in conjunction with Systems panels.



Modesty panel must be located behind the power/data drawer to allow the drawer to extend forward toward the approach side of the worksurface for cable access.

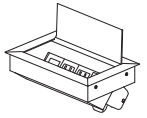
➤See the Priority Price List for additional information.



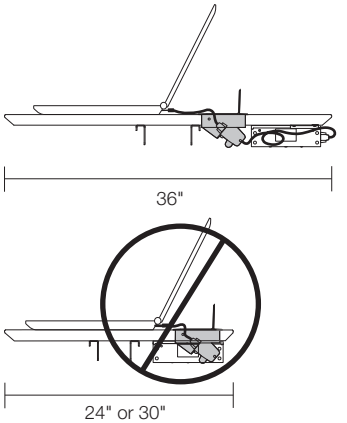
On 48" and 60"D worksurfaces (depicted above), power/data drawer can be located so that when the drawer is extended, it is located on the centerline of the surfaces. Both the 10" rectangular power/data center (KCU0810ELPDC) and the 40" rectangular power/data center (KCU0840ELPDC) will work in conjunction with the power/data drawer in this application.

➤See the Tables Price List for 10" and 40" power/data centers.

Factory-installed grommets in worksurfaces are located so excess cabling will fall directly into the drawer.



Power/data center (99KPDCAM) may be mounted (recessed) on 36"D worksurfaces with a power/data drawer.



Use of a power/data center on a 24" or 30"D surface in conjunction with single power/data drawer is not possible due to clearance.
Note: Use two smaller power/data drawers on a single worksurface to allow power/data center, clamp-mounted accessories, or through-grommet accessories to extend below the surface between the power/data drawers.

Knockouts & Cutouts:

Knockouts in the front and back of the drawer are compatible with industry-standard data faceplates, such as Tyco/Amp, Panduit, ECA and Hubbell. Individual knockouts are 1⅜" x 2¹¹⁄₁₆". Data and telecommunication modules are the responsibility of the user.

Floor of the drawer features similarly sized pre-punched cut-outs for additional electrical or data outlets. Use these cut-outs for hardwire applications. Receptacles placed in the drawer bottom cut-outs must be installed facing the floor.

Each knockout is 6" on center. Distance between knockouts is 3¼".

Single-Circuit Power System

Features ➤See page 42
Finishes & Materials 55
Resources 67

Details

The following components comprise the single-circuit system:

- Power in-feed
- Duplex receptacles with an attached 12" modular feed
- 12", 24", 48", 74", 96" and 120" jumper cables

For ease in installation, the connectors will only plug in one way.

Power in-feed is a 10' cord with a "smart box" that monitors the number of receptacles connected. The system will automatically shut off if more than eight receptacles are plugged into the power in-feed. One end of the cord features a three-prong plug that plugs into a standard 110 volt, 15 amp wall or floor outlet.

Duplex receptacles snap into the power/data drawer. Receptacles feature a 12" modular feed with a double-out interface. Power is brought to the receptacle by a power in-feed or jumper cable. Power is passed to adjacent components by a jumper cable, forming a daisychain.

Jumper cables feature a squeeze-latch connector on each end.

Planning Factors

When planning jumper cable lengths to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

For jumping between receptacles inside a power/data drawer, 12" jumpers are recommended for drawers that are 50"W or smaller; 24" jumpers are for 56"W and wider drawers.

In 120° applications, 24" jumper cables can be used to jump from one power/data drawer to another.

Jumpers must be secured every 24" when spanning under the worksurfaces.

This system should not be plugged into a GFCI outlet receptacle. The single-circuit system contains an overload breaker, and the sensing circuit in the "smart box" can affect the sensitivity of a GFCI power feed, causing the GFCI duplex receptacle to trip.

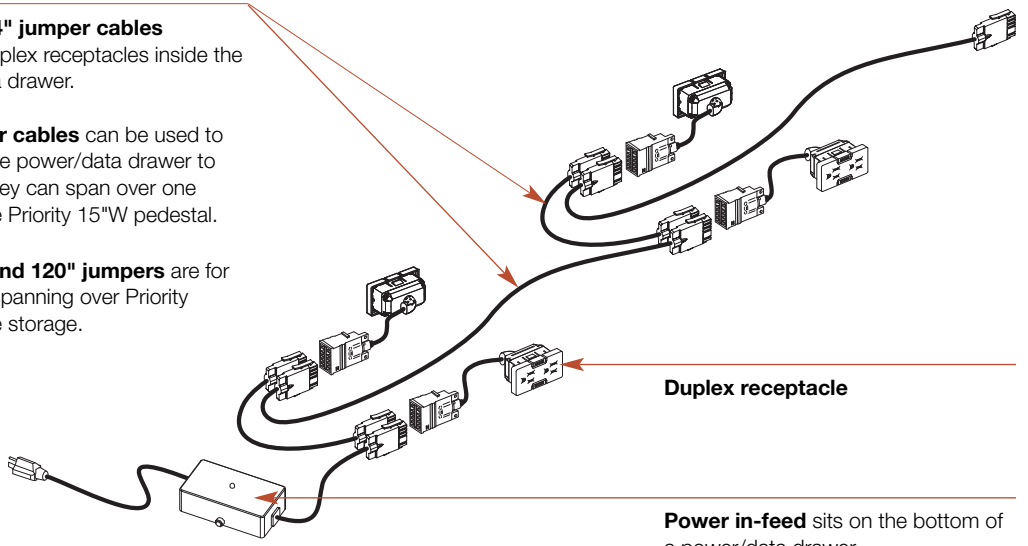
Related Products

Single-circuit mini-adapt power module features an 18" modular feed with a double-over interface. The unit contains two receptacles for desktop power access. A hand-tightened clamp on the back of the unit allows flexibility for positioning it at the back of the personal space worksurface.

12" and 24" jumper cables connect duplex receptacles inside the power/data drawer.

48" jumper cables can be used to connect one power/data drawer to another. They can span over one Progressive Priority 15"W pedestal.

74", 96", and 120" jumpers are for use when spanning over Priority Progressive storage.



Duplex receptacle

Power in-feed sits on the bottom of a power/data drawer.

Power/Data Drawers:

Power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably.
➤See page 49.

Approval/Compliance:

All Perks single-circuit components are U.L. 962 Listed and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. *Note: Any field modification of the electrical components voids the UL listing.*

Four-Circuit (8-Wire) Power System

Features ➤See page 42
Finishes & Materials 55
Resources 67

Details

The following components combine to form an 8-wire, four-circuit system:

- Hardwire power in-feeds (two options) or ceiling power entry
- Power distribution assemblies
- Duplex receptacles
- Jumper cables

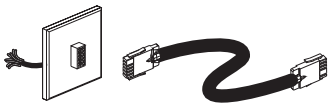
For ease in installation, the connectors will only plug in one way.

There are three ways to bring power to the system:

- 10' floor/wall power in-feed;
- Modular wall starter and modular 10' power in-feed; or
- 12' ceiling power in-feed

IMPORTANT: Power in-feeds entering the power/data drawer from the floor or wall must be secured/ protected by a flexchain, expandable cable manager, vertical cable manager, or secured to the legs.

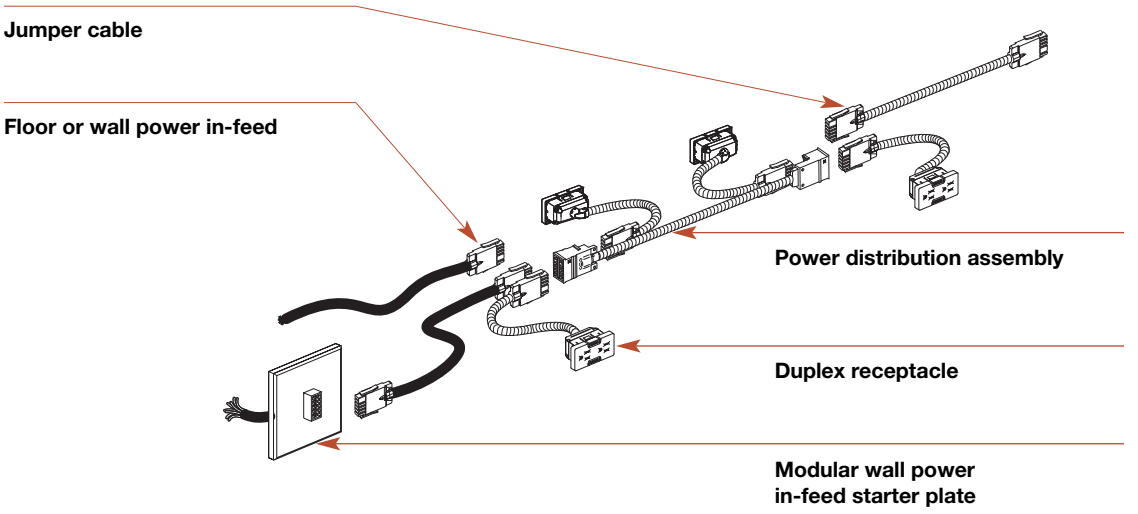
Floor/wall power in-feed features a 10' liquid tight conduit with a pigtail on one end that must be wired by a licensed electrician to a wall or floor-mounted junction box. The other end features a single squeeze-latch connector to attach to a power distribution assembly.



Modular wall power in-feed features a 10' modular conduit with a squeeze-latch connector on each end. One end must connect to modular wall starter, specified separately, the other end connects to a power distribution assembly. Modular wall starter must be wired to building power by licensed electrician. *Note: This modular power in-feed option allows you to unplug the cable from the wall and store away when not in use.*

Ceiling power in-feed features a 12' flexible, galvanized metal conduit with a pigtail on one end that must be wired by a licensed electrician to a junction box in the ceiling. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

Ceiling power pole can be field installed on Progressive Priority upmount stanchion shelf. Power can be routed between tiles to the bottom of the worksurface.



Power/Data Drawers:

Power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably.
➤See page 49.

Approval/Compliance:

All Perks four-circuit components are U.L. 1286 Listed and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. *Note: Any field modification of the electrical components voids the UL listing.*

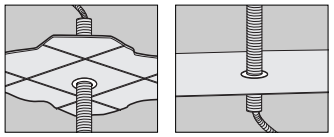
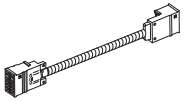
Four-Circuit (8-Wire) Power System

continued

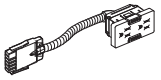
Features ➤See page 42
Finishes & Materials 55
Resources 67



Trim plates can be specified for field installation to conceal the intersection of the flexible ceiling pole at the ceiling and worksurface.



Power distribution assembly supplies power for four duplex receptacles within a power/data drawer. Power distribution assemblies are 36" long.



Duplex receptacles feature a 12" flexible, metal conduit and a single squeeze-latch connector to attach it to the power distribution assembly.

Receptacles models are numbered 1, 2, 3, 4, or 5 to correspond to the circuit to which they will provide access.

Jumper cables feature a squeeze-latch connector on each end and are available in 24", 36", 48", 74", 96" and 120" widths. Jumpers are encased in a flexible, galvanized metal conduit.

Use 24" and 36" jumper cables inside the power/data drawer to connect power distribution assemblies and duplex receptacles.

When planning jumper cable lengths to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

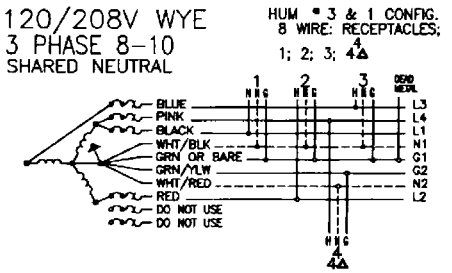
Use a 48" jumper cables to connect a two power/data drawers on adjacent surfaces. 48" jumpers may also be used to span over one Priority Progressive 15"W pedestal.

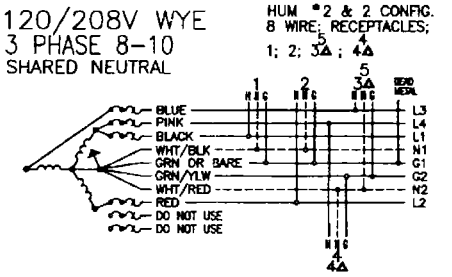
78", 96", and 120" jumpers are for use when spanning over Priority Progressive storage.

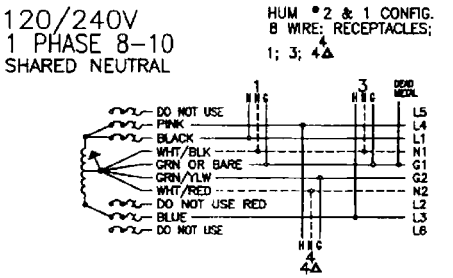
Jumpers must be secured every 24" when spanning under the worksurfaces.

Wiring Schematics:

The 8-wire, multi-circuit configuration provides up to four circuits. Ideally a 4-wire, WYE, 208 volt service provides the best utilization.







Planning & Installation:

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Hardware necessary for installation is shipped with all components.

Four-Circuit (8-Wire) Power System

continued

Features ➤See page 42
Finishes & Materials 55
Resources 67

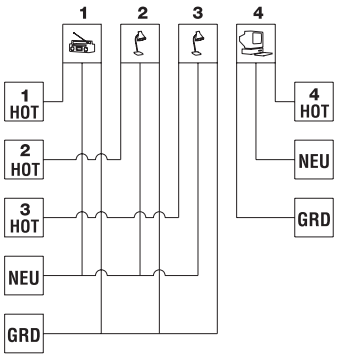
Planning Factors

Two wiring configurations are possible—3 and 1 or 2 and 2—utilizing the same components.
➤See wiring configurations at right.

Duplex receptacles used for both types of wiring configurations are the same. This simplifies specifications and allows a faster understanding of the system.

A maximum of 13 duplex receptacles can be accommodated per circuit.

3 and 1 (8-wire):

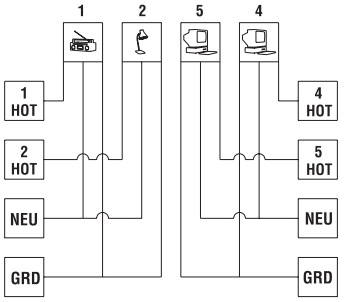


- Three utility circuits share a neutral and common ground.
- One circuit with a DEDICATED hot, neutral and ground.
- Utilize receptacles #1, 2, 3 for utility and #4 for the DEDICATED ground circuit.

Circuits 1, 2, and 3 can be used for general electrical needs. Customarily, one or more of the circuits is reserved for lighting or other everyday uses, which allows control by central or master switching.

Circuit 4 consists of three separate conductors (hot, neutral, and ground) and meets the BIFMA/ANSI definition for a dedicated circuit.

2 and 2 (8-wire):



- Two DESIGNATED utility circuits and two DESIGNATED computer circuits.
- Utilize receptacles #1 and #2 for the designated utility circuits and receptacles #4 and #5 for the designated computer circuits.

Note: Receptacle #3 cannot be used in the 2 and 2 configuration. If receptacle #3 is used, possible cross feed or interference from utility circuits one and two can be introduced to computer circuits.

Circuits 1 and 2 provide a pair of designated circuits for general electrical needs, as described for the 3 & 1.

Circuits 4 and 5 provide a pair of designated circuits for computer applications.

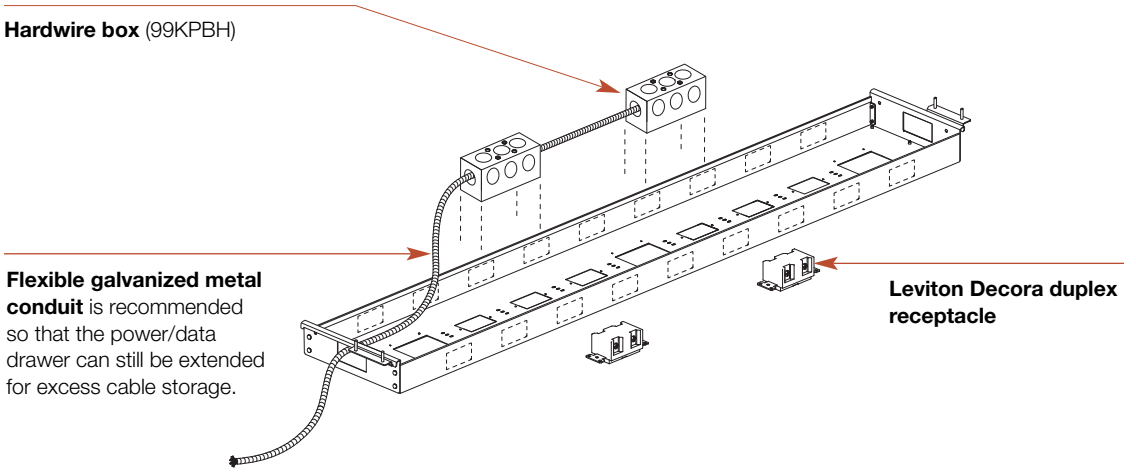
Hardwired Power

Features ➤See page 42
Finishes & Materials 55
Resources 67

City of Chicago:

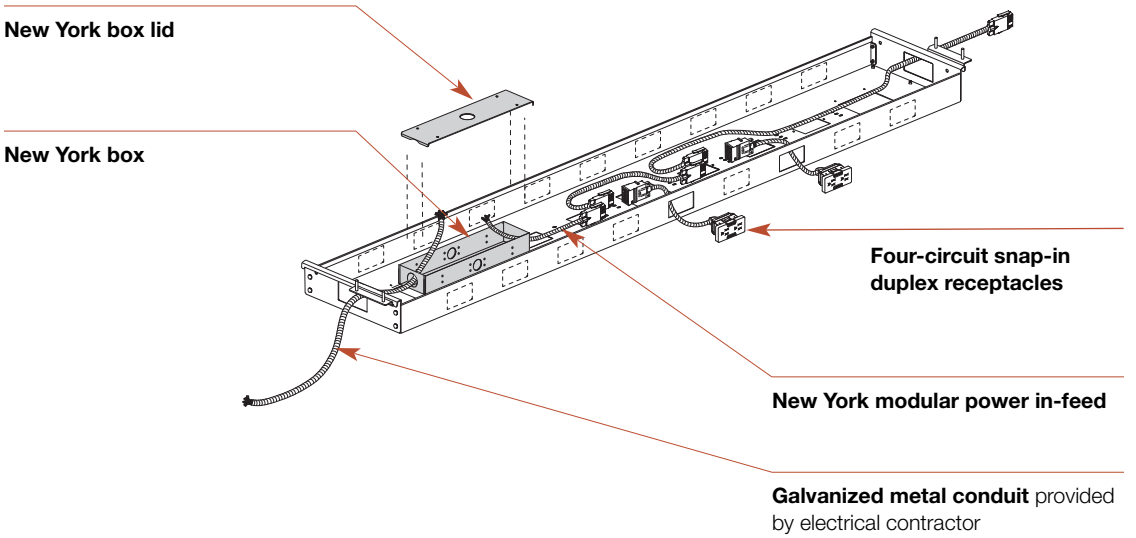
The City of Chicago requires that an electrician hardwire the electrical components to the furniture. The electrician can install hardwire boxes into the bottom of the power/data drawer utilizing the pre-punched rectangular cut-outs. Holes for attaching the duplex to the hardwire box are also provided.

Hardwired receptacles must be placed in the drawer bottom knockouts and be installed facing the floor.



City of New York:

The City of New York requires that an electrician to make the connection from the floor entry to the modular electrical system. The electrician can wire the floor/wall power in-feed hardwire boxes into the bottom of the power/data drawer using the pre-punched rectangular cut-outs. Power entry for NYC (model 99KP4FPFNYC) includes a modular floor/wall power in-feed, hardwire box and lid, 2' galvanized metal conduit to encase the power in-feed (not shown), and cover plate.



Planning & Installation:

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Hardware necessary for installation is shipped with all components.

Hardwire components are also available to allow field hardwiring of power within the power/data drawer where required by local codes.

Program Overview

Wood Finishes	➤See page 57
Paints & Plastic	60
Fabrics	63
COM	66

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The fabric collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Special Wood Finishes

GSA Non-Contract

Wood Finishes	➤See page 57
Paints & Plastic	60
Fabrics	63
COM	66

Kimball Office offers the following options for special wood finishes:
- Standard finish color on alternate wood species
- Previously developed special finish
- Custom finish

Standard finish colors available on an alternate wood species include:
- Amber on Maple
- Amber on Walnut
- Mocha on Walnut

These finishes can be specified without going through the finish approval process described at right.

Previously developed special finishes can be selected from an extensive library developed by Kimball Office. Samples of previously developed special finishes are available from Customer Service upon request.

Custom finishes can be developed to meet specific needs, if an acceptable match is not available in our library.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a finish color.

Applicability:

Applicability of special finish colors depends on the wood species to which they are applied. The matrix below shows the types of woods used for each series.

	Cherry	*Maple*	*Walnut*	*Sapele*
Price Group	*1*	*1*	*1*	*2*

Villa Tables	•	•	•	•

• = standard wood species

Note: Special finishes are not available on Zebrawood, Canyon Oak, Monterey Oak, or Tuscan Walnut.

Upcharges:

A one-time fee of **$300** (net) will be billed for the development of each new custom finish. This fee covers all Kimball Office product lines on which the finish may be used.

A **10%** upcharge per line item (model number) will be applied for a standard finish on an alternative wood species, a previously developed special finish, or a custom finish. This upcharge is calculated on the base price, before other option upcharges are added.

For upholstered products, the upcharge is calculated on the Grade 1 upholstery price then added to the price for the selected fabric grade, to arrive at the list price.

Custom Finish Approval Process:

① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the $300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.

② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. If not, a custom finish will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.

③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

Note: The one-time fee of $300 will not be charged unless a custom match finish is required.

How to Specify

① **Model:**
Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② **Finish type:**
For the "Finish type" step, insert a special code (in place of STD):
ZCHY1 = Special cherry finish
ZMAP1 = Special maple finish
ZWAL1 = Special walnut finish
ZSAP1 = Special sapele finish
Note: Choose the special finish code based on the standard wood species used in the case-goods line (see matrix at left).

③ **Finish designator:**
For the "Finish designator" step, insert the designator below or the one provided to you by Customer Service:
MA00174KOG = Amber on Maple
WA02905KOG = Amber on Walnut
WA02905KOG = Mocha on Walnut

Wood Finish Characteristics

Including Care and Maintenance Tips

Wood Finishes	➤See page 57
Paints & Plastic	60
Fabrics	63
COM	66

Kimball Office's experience in wood finishing extends from past generations of craftsmen to present day state-of-the-art technology.

Our Pura® finish is a proprietary, water-based, ultraviolet (UV) wood finish that has virtually no volatile organic compounds (VOCs). It uses less energy than our conventional finishing process and meets or exceeds BIFMA Furniture Emission Standards (FES) and U.S. Green Building Council LEED requirements for indoor air quality. Pura is exceptionally clear and durable and allows the beauty of our wood to shine through. The durability, depth, clarity, and beauty of Pura meets the high expectations customers have of Kimball Office finishes.

Finish fill and sheen level for the top surfaces is appropriate for the design and wood species. If different specifications are required, contact Customer Service.
➤See the individual chapters for fill and sheen information by line.

All wood products are very susceptible to darkening from age and exposure to UV rays (sunlight and other sources), especially cherry and maple. Although a special UV inhibitor is added to finishes, care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change of the wood.

Fine scratches from everyday use may be more visible on furniture with dark finishes. Darker finishes absorb more light, while fine scratches reflect the light. Therefore, scratches can be more emphasized due to this contrast. The use of a desk pad is recommended to keep scratching to a minimum.

The beauty of wood is that, as a natural product, it will have differences in grain characteristics, color, and other features among wood species. The characteristics of our top grade veneers are appreciated and welcomed; it's the differences in characteristics that offer each office a unique look.

Maple veneers are slip matched. Brighton Maple is a clear finish for those who appreciate the inherent beauty of wood. Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

Walnut veneers are flat cut and applied book and center matched, except for Tuscan Walnut which is quarter cut.

Cherry veneers are slip matched. Grain characteristics of cherry veneer such as gum streaks and gum pockets occur naturally and add to the authentic look and feel of natural veneer. These are inherent to this veneer and should not be considered defects.

Oak veneer is quarter cut.

Specification of particular cuts, characteristics, or wood species can be accommodated. For example, a customer may ask for a limited amount of cathedrals or very limited variation in color from one veneer flitch to the next. Kimball Office systems products are able to satisfy those expectations, as long as we are notified prior to order placement. Depending on the request, the higher grade veneer may require an upcharge. Orders would also need to be handled through our custom quote process.

The wood species on seating may vary from the wood species on the casegood or system. Different wood species offer unique texture and grain which provide more variation in finish color; however seating finishes are compatible with casegoods and systems finishes.

To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth following direction of the grain.
- Dry with a separate cloth if needed.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.

10% upcharge applies for price group M metallic finishes.
IMPORTANT: Due to the reflective qualities of metallic paints, variations in color may occur.

CSP:

➤See page 61 for customer-specified paint.

Customer-Specified Paint

GSA Non-Contract

Wood Finishes	➤See page 57
Paints & Plastic	60
Fabrics	63
COM	66

Customer-specified paint (CSP) is available on select products.
➤See page 60.

Pricing:

A **one-time fee of $300** (net) will be billed for the development of each new custom (customer-specified) paint. This fee covers all Kimball Office product lines on which the paint may be used. Models receiving a custom paint will also be assessed an upcharge.

A **10% upcharge per line item** (model) for customer-specified non-metallic paint applies. Upcharge is calculated on the base price, before other option upcharges are added.

A **20% upcharge per line item** (model) for customer-specified metallic paint applies. Upcharge is calculated on the base price, before other option upcharges are added.

The process:

① Send desired paint sample (no smaller than 3" x 5") to Customer Service along with a complete list of the products to which the custom paint is to be applied. **Include dealer name, contact, and project reference.**
② Custom paints will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.
③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a paint color.

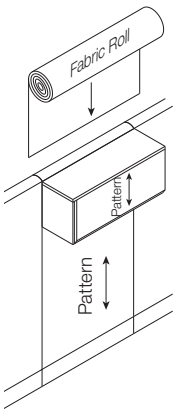
How to Specify:

① **Model:**
Build the complete model specification (excluding finish type and finish designator) by following the "How to Specify" on the appropriate pricing page for the product that is to receive the custom paint.
② **Finish type:**
For the “Finish type” step, insert a special paint code (in place of STD):
ZPNT1 = Special non-metallic paint
ZPNTM1 = Special metallic paint
③ **Finish designator:**
For the “Finish designator” step, insert the designator provided to you by Customer Service.

Fabric Application

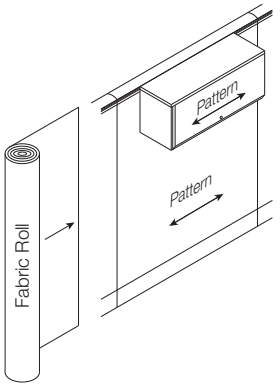
Wood Finishes	➤See page 57
Paints & Plastic	60
Panel Fabrics	63
COM	66

Standard Application:



Directional fabrics are “cut up the roll” for standard application unless specified differently.

Railroad Application:



All fabrics will be applied in railroad (horizontal) fashion to:

- Xsite tiles
- Xsede tiles
- Priority tiles
- Stow wallpanels
- Tackboards greater than 48"W when using a seating fabric or greater than 60"W when using a panel fabric

When viewing swatch cards or memo samples, turn 90° to get an accurate indication of how the fabric will appear on when railroaded.

Railroad application of Kimball Office panel fabrics and COM for all products that are not listed above or do not have railroading listed as an option in the price list requires a custom quote.
➤Please contact ***By Design.***

Price Grade D

No fabrics available in price grade D at this time.

Price Grade E

Alliance Fabrics:

Kimball Office has formed partnerships with top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Lead times for alliance fabrics are based on supplier availability. Preplanning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply. ➤Contact Customer Service for availability before finalizing orders.

The information provided in this section is the most current information available at the time this price list was printed.

Application of Alliance Program upholstery will be as depicted on the swatch card unless otherwise instructed on the order.

For memo samples of Alliance fabrics, contact our alliance partners directly.

Cleaning Codes:

Cleaning Code D
- Dry clean only.

Cleaning Code S
- Use only mild, pure water-free cleaning solvents.
- Cleaning by a professional furniture service is recommended.

Cleaning Code W
- Use water-based cleaning agents or foam.

Cleaning Code WS
- Use water-based cleaning agents or foam. Mild water-free solvents may also be used.
- Cleaning by a professional furniture service is recommended.

Directional Fabrics:

Fabric alignment for directional fabrics may vary slightly from panel to panel or tile to tile.

Customer's Own Material (COM)

GSA Non-Contract

Wood Finishes	➤See page 57
Paints & Plastic	60
Fabrics	63

COM Policy:

While Kimball Office inspects fabrics for mill imperfections, some are difficult to recognize. Kimball Office is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring, appearance, or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Customers are responsible for ordering COM fabrics and expediting delivery of the material to Kimball Office.

IMPORTANT: Kimball Office reserves the right to decline a fabric that may not be suitable for application to product.

COM Application Testing:

Application testing on systems product for non-preapproved fabrics is required.
➤Contact your Customer Service Team for the appropriate forms to initiate application testing.

The application test will render your fabric either:
- Approved
- Not recommended
- Restricted

A "not recommended" result is usually due to questionable construction of the material or pattern that is difficult to align. You will be required to sign a waiver to use any "not recommended" COM.

U.L. Listing/Flammability:

COM must be U.L. listed on Cetra, Xsite, and Interworks EQ panels, and Xsede and Priority tiles before Kimball Office accepts and enters an order which will have COM fabrics. All COM testing and processing costs are the responsibility of the customer. A minimum of 2 yards of production run yardage is required for U.L. testing and flammability testing. Approval of a COM fabric may result in extended lead times. For cost estimates, yardage requirements and project lead times, consult your Customer Service Team.

Yardage/Measurements

Directional and non-directional yardage requirements have been calculated based on 66"W panel fabrics for Tiles, Panels, Overheads, Highback Organizers, and Tackboards. Directional and non-directional yardage requirements have also been calculated based on 54"W seating fabric for Overheads, Highback Organizers, and Tackboards.

If your fabric is less than 66"W, some size restrictions may apply.

COM yardage listed in the Resource section of the price list reflects the amount of fabric required to upholster one panel. Additional yardage may be required if patterns require matching.

Shipment of COM

After the fabric has passed the approval process described, Kimball Office will enter the product order and send an acknowledgement of the tentative ship date. A notification will be sent giving the date the COM must be received. If it is not received by the specified date, your ship date will be reassigned.

Where to ship COM:

Kimball Office, Jasper
COM Department—Kimball Office
Dock 11
1620 Cherry Street
Jasper, IN 47549

Applies to:
- Wall-mount tackboards
- Mobile screens

Production of Order:

When COM production yardage is received, COM is cut for the order and inspected for flaws. If flaws are found, you will be notified of the additional fabric required.

A return tag (e.g. COD shipment, UPS call tag) is required from the specifier within 45 days of the acknowledged ship date or all excess COM yardage will be discarded.

Preapproved COM:

➤Contact your Customer Service Team to obtain information on preapproved COMs.

Yardage Requirements:

Directional and non-directional yardage requirements have been calculated based on 66"W panel fabrics and 54" seating fabrics for Mobile screens and tackboards.

Model	*66"W Dir*	*54"W Dir*	*66"W Non*
Mobile Screens

If your fabric is less than 66"W, some size restrictions may apply.
Additional yardage may be required if patterns require matching.

Checklist:

When ordering COM for Kimball Office products, please make sure you have done the following:
- Supplied vendor name, fabric name, color name and number.
- Supplied arrival date of COM to Kimball Office.
- Received application testing approval before sending purchase order (or signed waiver if not approved for application).
- Received U.L. listing before sending purchase order.

The table at right lists the operating load capacities (functional load) of various Kimball Office components. All components meet or exceed the ANSI/BIFMA Functional and Proof Loading requirements X5.6—2003 Panel System Test, X5.5.–2008 Desk/Tables Products Test, X5.2–1992 Lateral File Test, and X5.9–2004 Storage Units Test. The Operating Load Capacities listed below represent the BIFMA functional loads which are equivalent to loads that can be expected in normal use of the component.

BIFMA

MEMBER
THE BUSINESS AND INSTITUTIONAL FURNITURE MANUFACTURER'S ASSOCIATION

Component	Operating Load Capacity (Functional Loads)	Examples
Center drawer	5 lbs., distributive loading	22"D x 24"W wood: 5 lbs. t.w.
Carousel center drawer	2 lbs., distributive loading	
Carousel tray, keyboard tray, Keyboard drawer	10 lb. evenly distributed cycling load	
Metal shelves (work tools)	.017 lb. per cubic inch of available space, but not to exceed 12 inches in height	24"W: 45 lbs. t.w.; 30"W: 56 lbs. t.w. 36"W: 67 lbs. t.w.; 42"W: 78 lbs. t.w. 48"W: 89 lbs. t.w.
Metal work tools	Single side tray: 40 lbs. t.w. Double side tray: 47 lbs. t.w. Pocket organizer: 4 lbs. t.w. Slant Sorter: 19 lbs. t.w. Binder shelf: 10 lbs. t.w. CD holder: 10 lbs. t.w. Hanging file folder: 5 lbs. t.w. Memo box: 10 lbs. t.w. Pencil tray: 5 lbs. t.w.	
Plastic work tools	Paper tray: 5 lbs. t.w. Slant sorter, binder shelf, and file folder hangers: 10 lbs. t.w. Phone holder and accessory tray: 5 lbs. t.w. Pencil cup and CD sorter: 4 lbs. t.w. Shelf: 15 lbs. t.w. Utility tray and accessory dish: 2.5 lbs. t.w.	
Power/data drawer	50 lbs.	
Manual and intuitive adjustment monitor arms	20 lbs. (see pricing page for application restrictions)	

U.L. Information:

Only Underwriters' Laboratory (U.L.) or Canadian Standards Association (C.S.A.) listed electrical components are used in electrical devices and are so labeled.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

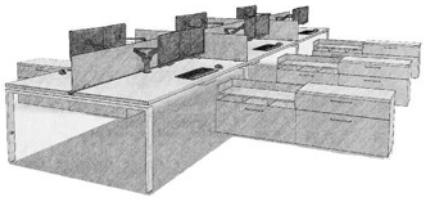
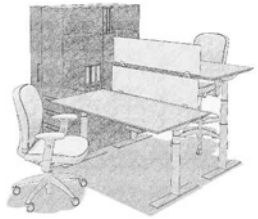
Kimball® Office

PRIORITY™ Price List

Casegoods & Benching

This price list is effective December 15, 2014 and supercedes all previously printed or electronically released versions.





Priority focuses on flexibility and real estate efficiency.

With private office and open plan furnishings, Priority supports classic and progressive work modes for groups and individuals. Priority benching undersurface support rails enable long spans between legs, and ganging of adjacent tables. Height-adjustable tables include manual or electric adjustment—from seated adjustment to sit-to-stand options with programmable memory for three settings. Priority is SCS Indoor Advantage™ certified, may contribute to LEED credits, and is ANSI/BIFMA level® 3 certified.

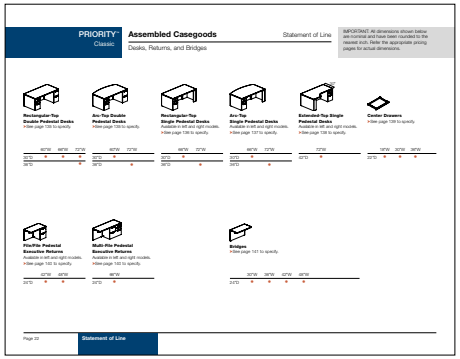
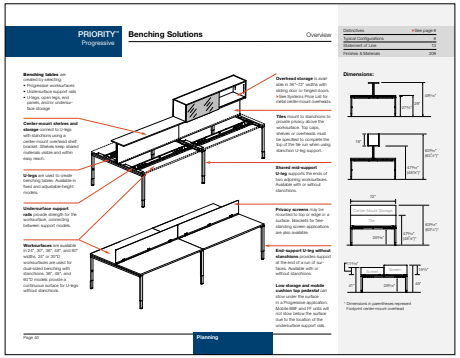
How to Use this Price List

Statement of Line	➤See page 13
Planning	39
Pricing	89
Finishes & Materials	209

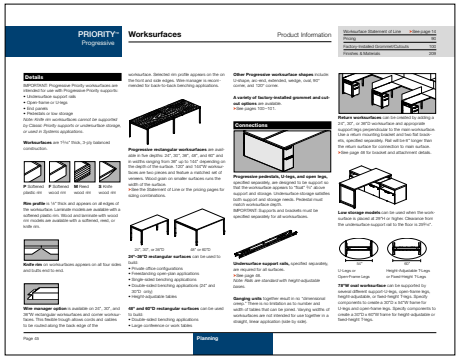
We suggest that you familiarize yourself with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.



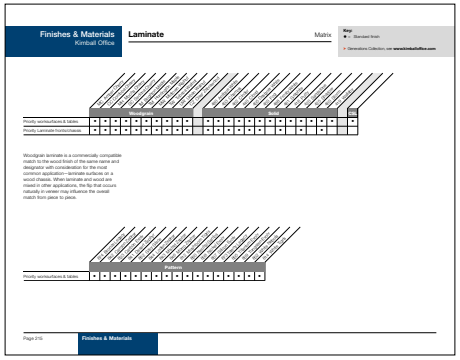
Statement of Line provides a snapshot of the entire product line. We've included an illustration, a table showing available sizes, and page cross references to the applicable pricing and how to specify pages.



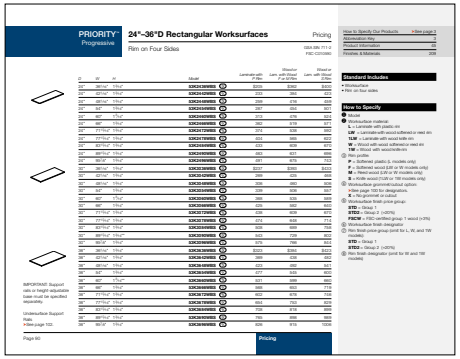
Overviews offer a quick look at the distinguishing features of the product line.



Product Information pages provide detailed information about the product, connections that can be made with other models, planning factors, and applications guidelines.

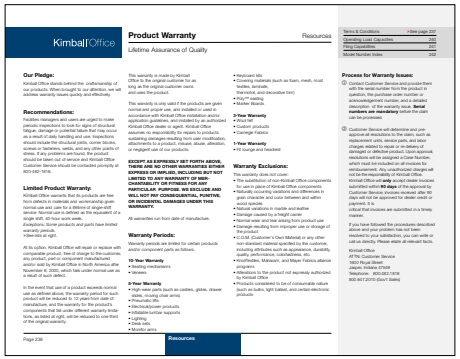


Look in the Finishes and Materials section to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product.



Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.

➤See page 3 for detailed information about how to specify Kimball Office products.



Use the Resources in the back of the price list. This repository of Locking Information, Terms and Conditions, Warranty, Operating Load Capacities, and Filing Capacities. You'll also find a model number index with references to the appropriate pricing page.

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Standard product modifications are available on select products.
➤See the Product Modifications Price List at www.kimballoffice.com

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

Only Underwriters' Laboratory (U.L.) or Canadian Standards Association (C.S.A.) listed electrical components are used in electrical devices and are so labeled.

Priority Progressive products (excluding electric height-adjustable tables) are U.L. 962 listed. Electric height-adjustable tables use U.L. recognized components.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

How to Specify Our Products

Statement of Line	➤See page 13
Planning	39
Pricing	89
Finishes & Materials	209

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ❶, ❷, or ❸) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

Finishes & Materials 209

Standard Includes
- Worksurface
- Rim on four sides

How to Specify
❶ Model
❷ Worksurface material:
L = Laminate with plastic rim
LW = Laminate with wood softened or read rim
1LW = Laminate with wood knife rim
W = Wood with wood softened or read rim
1W = Wood with wood knife rim
③ Rim profile:
P = Softened plastic (L models only)
F = Softened wood (LW or W models only)
M = Read wood (LW or W models only)
S = Knife wood (1LW or 1W models only)
④ Worksurface grommet/cutout option:
➤See page 100 for designations.
X = No grommet or cutout
⑤ Worksurface finish price group:
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑥ Worksurface finish designator
⑦ Rim finish price group (omit for L, W, and 1W models):
STD = Group 1
STD2 = Group 2 (+20%)
⑧ Rim finish designator (omit for W and 1W models)

"Standard Includes" lists what is included as part of the base model.

Follow these steps to build a complete model number.

Selections that will incur an upcharge or decrease to the base price are noted within the "How to Specify" steps.

Sample Specification:

The example below shows a complete model number for an **arc-top double pedestal desk.**
➤See page 135 for the corresponding pricing table and How to Specify steps.

Finishes & Materials	209

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤Find more specific details regarding the environmental aspects of our product offerings at: **www.kimballoffice.com**

ANSI/BIFMA level™
100% of the products manufactured by Kimball Office are level® certified. We offer the most sustainable portfolio in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet and exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

ecoScorecard℠

Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:
- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification
Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:
- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:
- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:
- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

SCScertified™
INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality
One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

Design for the Environment (DfE)
is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.
➤For environmental data, visit our website at www.kimballoffice.com.

Pura

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

FSC
www.fsc.org
FSC® C010590
The mark of responsible forestry

FSC-Certified Wood
Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood at a 3% upcharge. Applicable models show FSCW as a finish price group designator option. Standard lead times apply to FSC orders.

ANEW

Asset Network for Education Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

Finishes & Materials	209

Organizations now require flexible solutions for a variety of workplace strategies addressing work modes, behaviors, locations, patterns and ultimately configurations. Priority is a versatile planning solution with the ability to adapt as business needs change— supporting a dynamic workplace for progressive organizations. Priority offers a broad line of desks, tables, storage units and screens to create intuitive solutions for all generations of individuals, and groups.

Priority enables facility planners to strike a balance between individual and group activities in the workplace. Priority enables people to work healthy, move freely and seamlessly between independent and interactive work modes and multiple work behaviors including enhanced collaboration.

Distinctives

of Progressive and Classic Priority

Statement of Line	➤See page 13
Planning	39
Pricing	89
Finishes & Materials	209

Priority offers you two distinctive styles and aesthetics to select from when planning with Priority:

Progressive Priority details promote a table based product with a lighter scale and ideal for more compact offices. The floating top affect on storage and open leg supports are the signature of Progressive Priority. This aesthetic is evident throughout the progressive section of this price list from benching to private office components.

Classic Priority is the foundational elements of this series. In this section, you will find built up desks as well as modular components that feature a more transitional style with worksurfaces attaching directly to storage element.

Similarities:

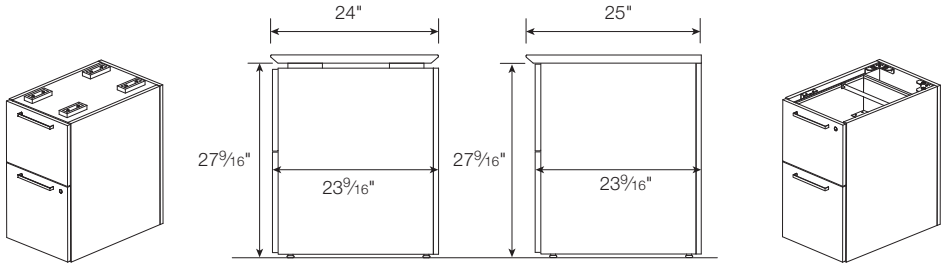
- Storage is available in the same heights, widths and depths.
- Overall storage depth, width, and height are the same in both Progressive and Classic.
- Softened- and reed-rim worksurfaces feature the rim on all four sides of the surface.

Differences:

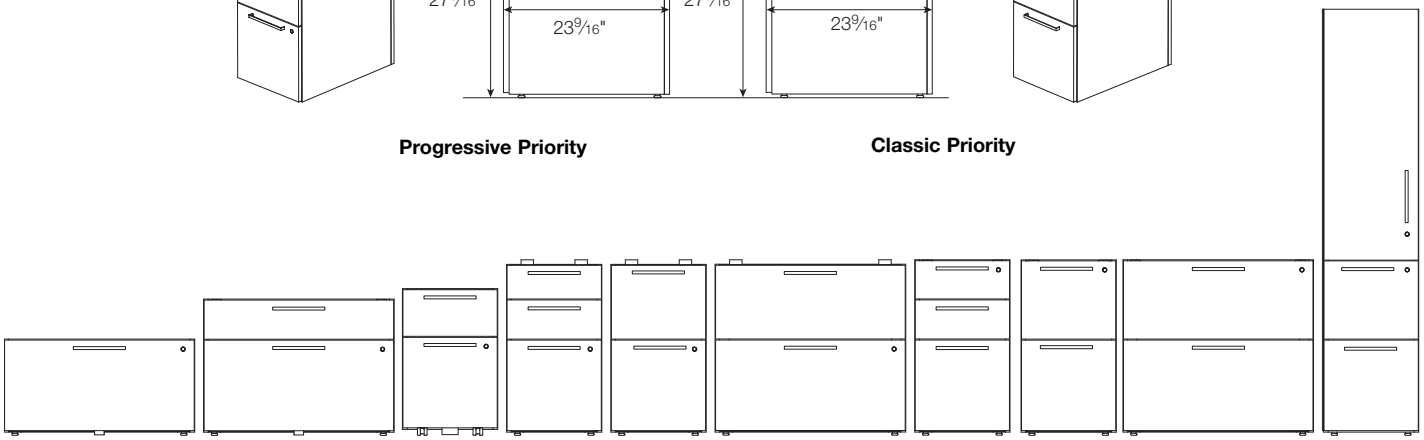
- Classic knife-rim surfaces have the mitred rim on the user edge only and overhangs the storage by 1¼". Knife-rim surfaces on returns and bridges feature a reverse knife edge for a flush fit with the adjoining surface.
- Progressive knife-rim surfaces have the mitred rim on all four sides of the surface and align with the storage. Knife-rim surfaces join together without a coped rim.
- Classic undersurface storage features an unfinished, open top.
- Progressive Priority utilizes finished-top storage with ¾" spacers that mount to the worksurfaces and undersurface support rails providing a "floating" top affect.
- Classic pedestals feature a lock in the top drawer
- Progressive pedestals feature a lock in the bottom drawer.

Mixing Progressive and Classic Priority:

- There are numerous items in the Priority offering that work well with both styles of Priority. Those items not mounted below the worksurface, such as low storage, overheads, highback organizers, vertical storage, and tables, can be used with both classic and progressive office layouts.
- As a general guideline, classic undersurface storage units, modesty panels, and support panels should not be used with Progressive knife-rim worksurfaces.
- Progressive pedestals can be used with Classic surfaces.
- Mixing softened- or reed-rim worksurfaces will work with either Progressive or Classic arrangements.
- Progressive knife-rim worksurfaces cannot be mixed with Classic bridge and return knife-rim surfaces.
- Pedestal starter brackets, undersurface support rails, and U-leg supports were designed to work with Progressive products. However, pedestal starter brackets and undersurface support rails can be used between Classic storage units where an unsupported span of more than 48"W is desired. These brackets would be mounted at a different height on Classic storage.
- Progressive end panels and Classic modesty panels and end supports should not be mixed in the arrangement.



Progressive Priority **Classic Priority**



Low height and mobile storage **Progressive Priority** **Classic Priority** **Vertical Storage**

Sustainability Features

Statement of Line	➤See page 13
Planning	39
Pricing	89
Finishes & Materials	209

Post-Consumer Recycled Content:

- Priority steel components—up to 25%
- Cast aluminum parts—up to 70%

Pre-Consumer Recycled Content:

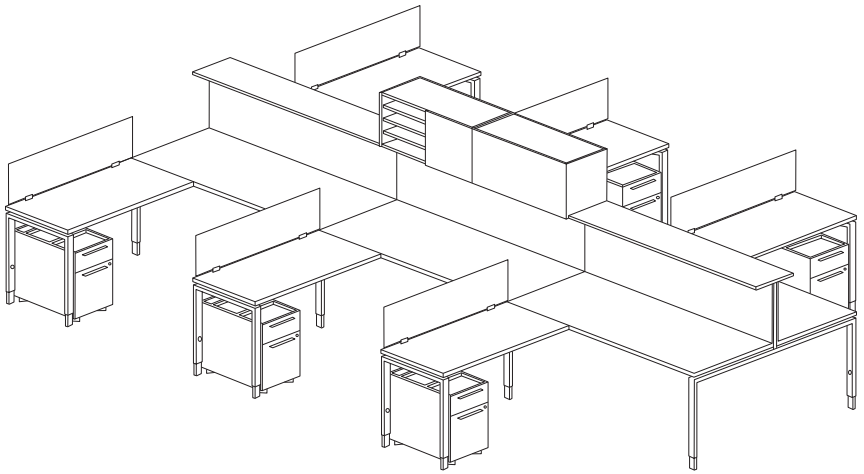
- Plastic components—up to 30%
- Wood components—up to 85%

Energy:

- LED lighting produces virtually no heat and uses 20% of the energy used in standard fluorescent, for an 80% savings.

Durability:

- Priority is a durable product with a limited lifetime warranty.
- It is designed and constructed for longevity with the potential for a second life.
- It can be refurbished with new components and/or enhancements.



ANSI/BIFMA e3 Sustainability:

- Priority is level 3 certified to the ANSI/BIFMA E3 2010 Sustainability Standard.

LEED for Commercial Interiors:

- Priority an help customers earn valuable LEED CI credits:
  Credit 4.1 and 4.2 Recycled Content
  Credit 4.5 Low-Emitting Materials
  Credit 5.1 and 5.2 Regional Materials (dependant on location)
  Pilot Credit 43: Certified Products

Clean Technology:

The powder coating process for metal components is virtually VOC free.

IAQ/Indoor Air Quality:

- Certified to meet or exceed the indoor air quality requirements set by the U.S. Green Building Council's LEED® rating system.
- Certified to the SCS Indoor Advantage™ standard.
- Wood components are sealed with Pura®, our proprietary water-based ultraviolet (UV) wood finish.
- Metal components are sealed witha powder-coating process that is virtually VOC free

Recyclability:

- Most Priority components are recyclable at the end of the furniture's useful life.

Benching Solutions

Overview

Distinctives	➤See page 6
Typical Configurations	8
Statement of Line	13
Finishes & Materials	209

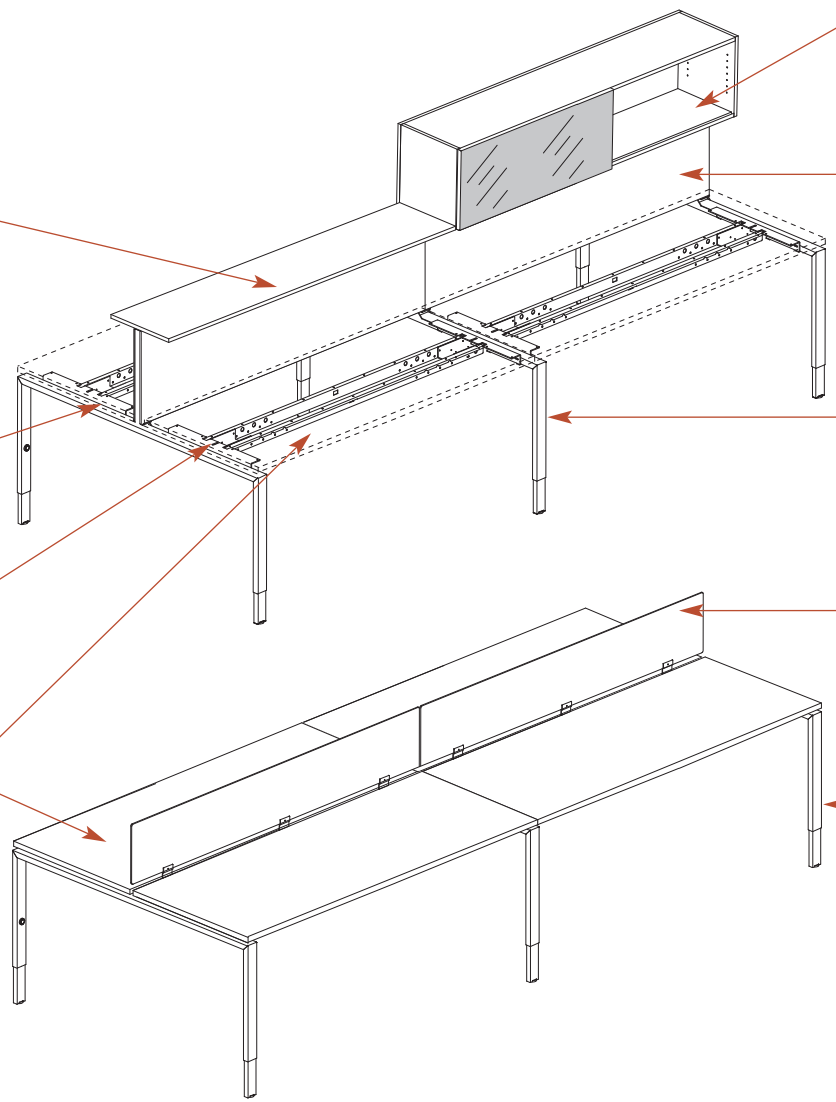
Benching tables are created by selecting:
- Progressive worksurfaces
- Undersurface support rails
- U-legs, open legs, end panels, and/or undersurface storage

Center-mount shelves and storage connect to U-legs with stanchions using a center-mount overhead shelf bracket. Shelves keep shared materials visible and within easy reach.

U-legs are used to create benching tables. Available in fixed and adjustable-height models.

Undersurface support rails provide strength for the worksurface, connecting between support models.

Worksurfaces are available in 24", 30", 36", 48", and 60" widths. 24" or 30"D worksurfaces are used for dual-sided benching with stanchions; 36", 48", and 60"D models provide a continuous surface for U-legs without stanchions.



Overhead storage is available in 36"–72" widths with sliding door or hinged doors. ➤See Systems Price List for metal center-mount overheads.

Tiles mount to stanchions to provide privacy above the worksurface. Top caps, shelves or overheads must be specified to complete the top of the tile run when using stanchion U-leg support.

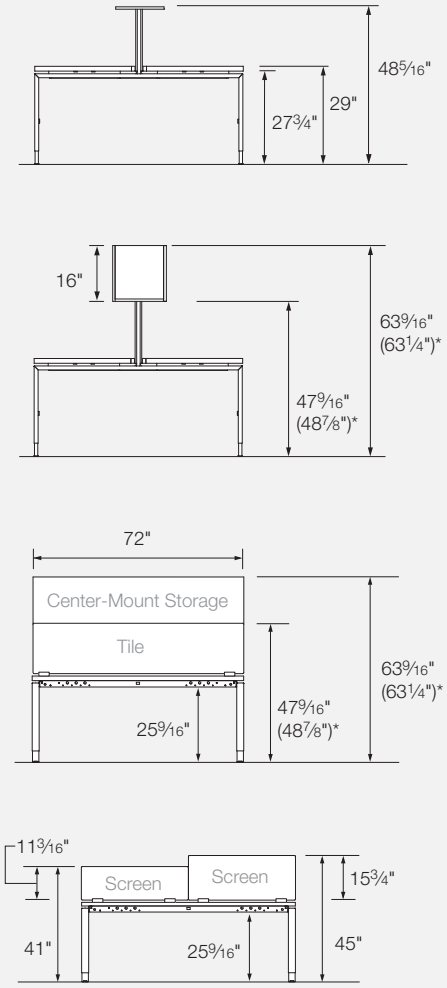
Shared mid-support U-leg supports the ends of two adjoining worksurfaces. Available with or without stanchions.

Privacy screens may be mounted to top or edge or a surface. Brackets for free-standing screen applications are also available.

End-support U-leg without stanchions provides support at the end of a run of surfaces. Available with or without stanchions.

Low storage and mobile cushion top pedestal can stow under the surface in a Progressive application. Mobile BBF and FF units will not stow below the surface due to the location of the undersurface support rails.

Dimensions:

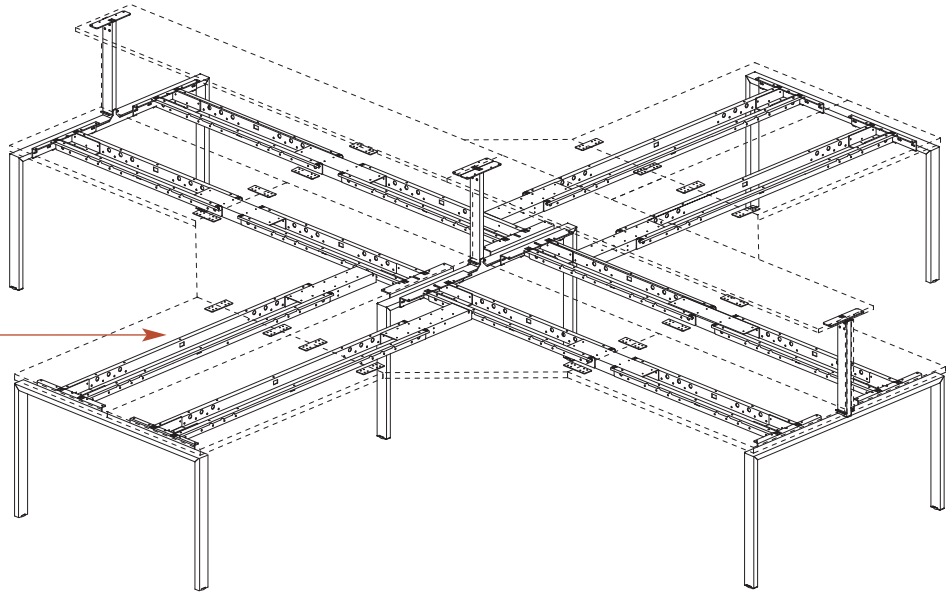


* Dimensions in parentheses represent Footprint center-mount overhead

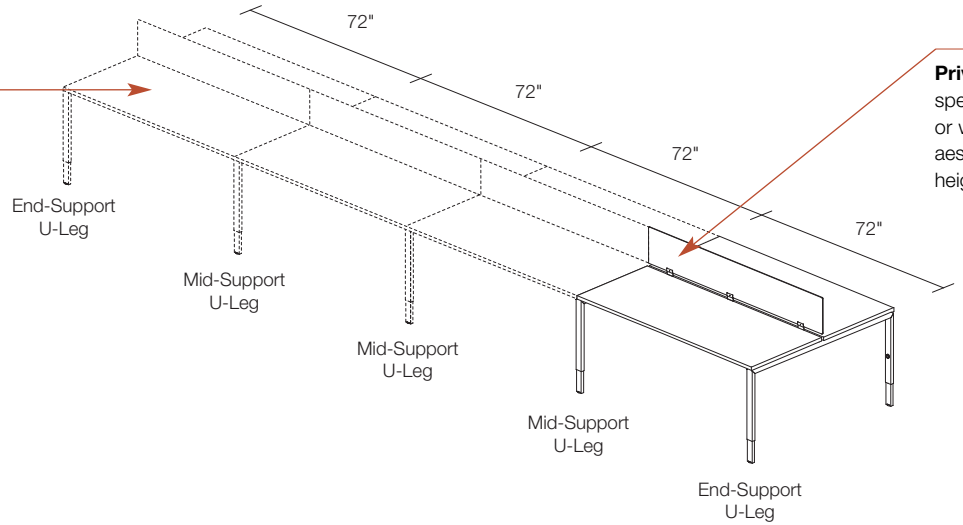
Benching Solutions

continued

Distinctives	➤See page 6
Typical Configurations	8
Statement of Line	13
Finishes & Materials	209



Returns are created with 24", 30", and 36"D worksurfaces, undersurface support rails, return mounting brackets, flat brackets, and legs.



There is no length limitation as to the number of tables that can be linked. There is no dimensional creep.

Privacy screens may be specified at the same height or width for consistent aesthetics or at different heights for function.

Materials:

Worksurfaces
- Laminate with a PVC rim
- Laminate with a wood rim
- Wood with wood rim

Supports
- Powder-coated steel

Storage
- Laminate
- Wood

Tiles
- Fabric
- Slat

Privacy Screens
- Resin

Collaboration Solutions

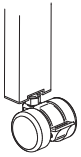
Overview

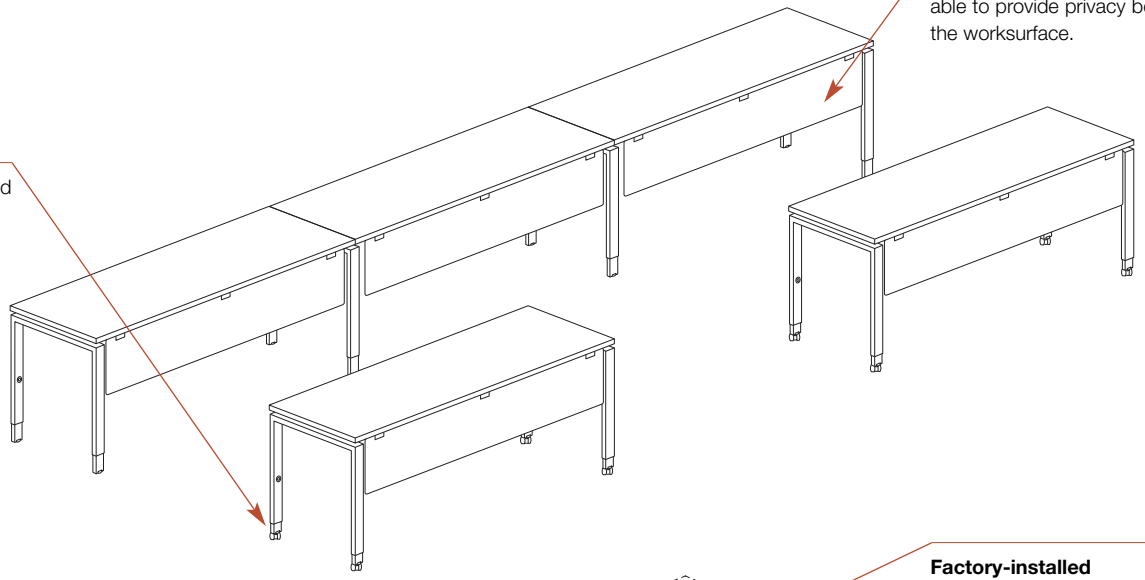
Work Tables & Conference Tables

Distinctives	➤See page 6
Typical Configurations	8
Statement of Line	13
Finishes & Materials	209

Collaboration work and conference tables are created by selecting:
- Progressive worksurfaces
- Undersurface support rails
- U-legs or open legs

Casters are available for field installation, specified separately, on individual tables. Caster height is 1⅞".

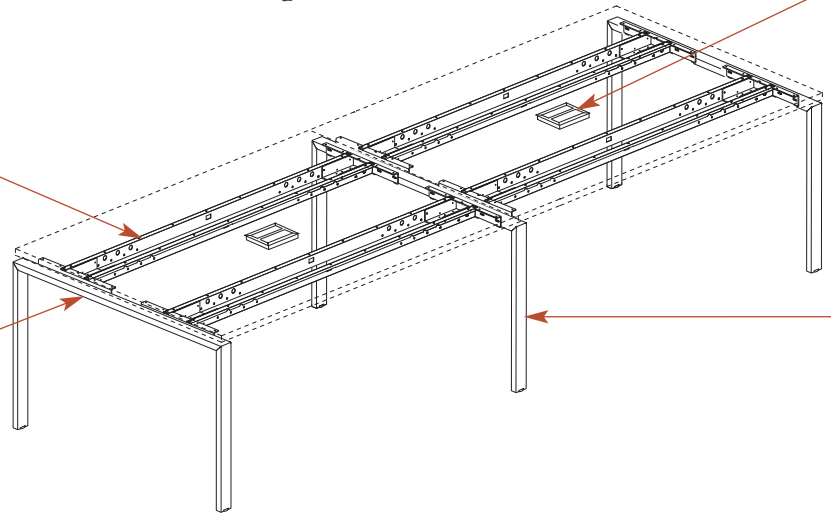




Privacy screens are available to provide privacy below the worksurface.

Factory-installed grommets and cutouts are available for power/data centers.

For field-installed grommets, note the location of support legs to eliminate interference with grommets.



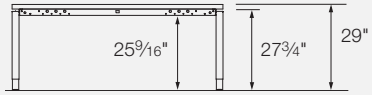
Two sets of undersurface support rails connect to U-legs to provide strength.

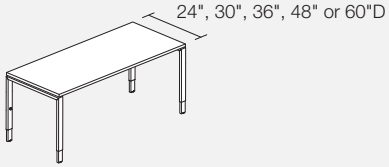
48" and 60" U-legs are used to create conference tables.

Worksurface depth matches the depth of the U-legs.

Shared mid-support U-leg supports the ends of two adjoining worksurfaces.

Dimensions:





Materials:

Worksurfaces
- Laminate with a PVC rim
- Laminate with a wood rim
- Wood with wood rim

Supports
- Powder-coated steel

Privacy Screens
- Resin

Private Office Solutions

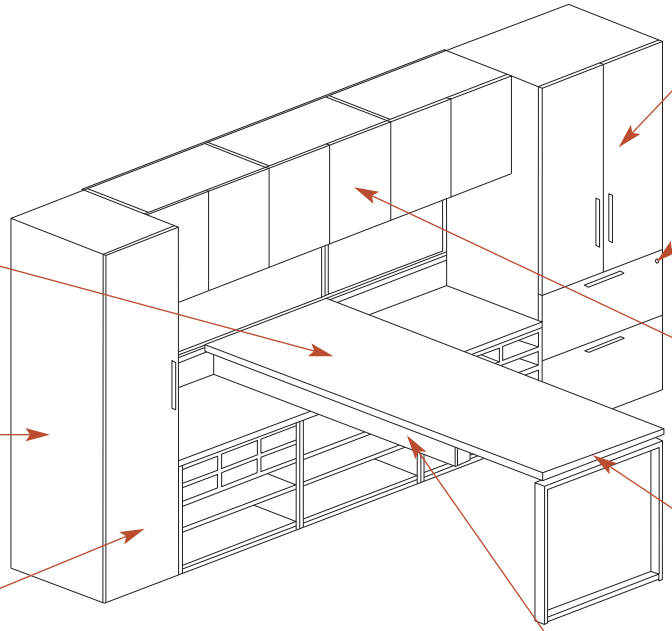
Distinctives	➤See page 6
Typical Configurations	8
Statement of Line	13
Finishes & Materials	209

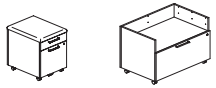
Desking configuration can be created by selecting:
- Progressive worksurfaces
- U-legs, open legs, or end panels
- Undersurface or low storage

Use worksurfaces with low storage to create a layered look. Select from rectangular, wedge, arc-end, or other worksurface shapes.

Vertical storage and overheads, detailed in the Progressive/Classic section of the price list, are universal within the Priority series.

Exterior wood surfaces are available in the following veneers:
- Cherry (plain sliced, slip matched)
- Maple (plain sliced, slip matched)
- Walnut (plain sliced, book matched)
- Sapele (quarter sliced, slip matched) premium veneer; upcharge applies
- Zebrawood premium composite veneer; upcharge applies are available.





Add mobile storage for enhanced flexibility.

Use vertical storage along with low or undersurface storage to create a work-wall.

Face-mounted locks are standard on all undersurface storage and optional on storage doors above the worksurface.

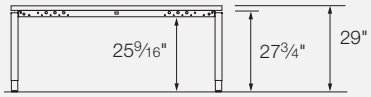
Progressive/classic overheads can be wall-mounted or Traxx-mounted as shown here.

Support options, such as U-legs, open-frame legs (shown), wood end panels, or pedestals, are designed so that the worksurface appears to "float" ¾" above the support.

➤See page 6 for Progressive and Classic distinctives

Privacy screens and modesty panel/cable surrounds, specified separately, can attach to worksurfaces for additional privacy.

Dimensions:



Materials:

Worksurfaces
- Laminate with a PVC rim
- Laminate with a wood rim
- Wood with wood rim

Supports
- Powder-coated steel

Privacy Screens
- Resin

Storage
- Wood
- Laminate
- Writable-glass doors on select models

Height-Adjustable Solutions

Overview

Distinctives	➤See page 6
Typical Configurations	8
Statement of Line	13
Finishes & Materials	209

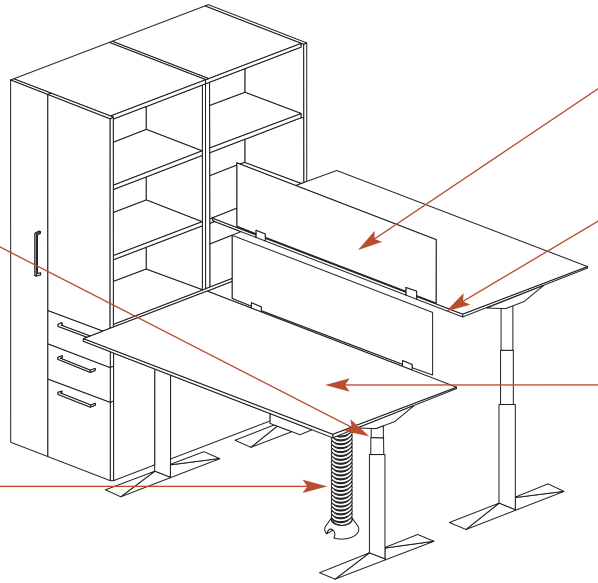
Height-adjustable tables are created by selecting progressive worksurfaces and a height-adjustable base.

Table bases are available in stand-alone models, returns, and extension post-leg.

Manual-adjust bases are available in incremental, click, and crank models.

Electric-adjust bases are available in single- and dual-stage models.

Expandable cable manager is ideal to manage cords below height-adjustable tables.

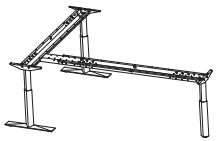


Resin privacy screens and modesty panels can be specified for privacy.

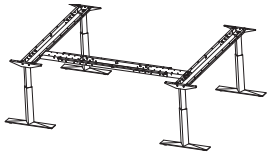
Consider possible pinch points when using height-adjustable tables within your workstation.

Worksurfaces, specified separately from the bases, are not undersized.

Table Configurations:

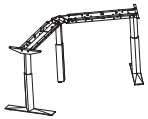


L Configuration (non-handed)
- Main T-Leg Base
- Post-Leg Extension

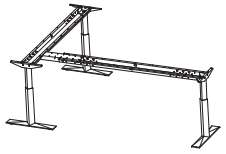


U Configuration
- Two Main T-Leg Bases
- Bridge Mounting Kit

90° Corner
- 90° Base (includes two T-Legs and a corner post leg)



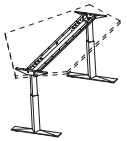
120° Corner
- 120° Base (includes two T-Legs and a corner post leg)



L Configuration (non-handed)
- Main T-Leg Base
- Return T-Leg Base

Rectangle
- Main T-Leg Base

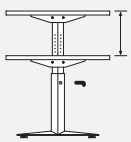
90° Corner
(alternate configuration)
- Main T-Leg Base



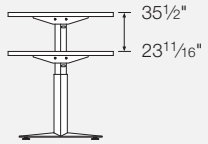
120° Corner
(alternate configuration)
- Main T-Leg Base

Note: L-configurations are possible with incremental-, click-, or electric-adjust models; U-configurations are possible with incremental- or click-adjust models only.

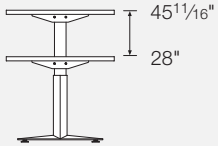
Dimensions:



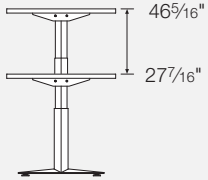
Incremental
Manual Adjust



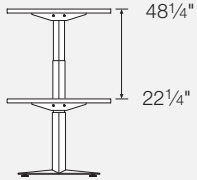
Click
Manual Adjust



Crank
Manual Adjust



Single-Stage
Electric Adjust



Dual-Stage
Electric Adjust

Note: Worksurface is included in the height ranges shown above. Calculate kneespace by subtracting 3 5/16" from desired height to allow for worksurface and rails.

Materials:

Bases
- Powder-coated steel
- Aluminum foot

Worksurfaces (specified separately)
- Laminate with a PVC rim
- Laminate with a wood rim
- Wood with wood rim

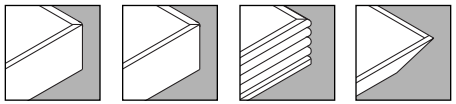
Worksurface Statement of Line	➤See page 14
Pricing	90
Factory-Installed Grommet/Cutouts	100
Finishes & Materials	209

Details

IMPORTANT: Progressive Priority worksurfaces are intended for use with Progressive Priority supports:
- Undersurface support rails
- Open-frame or U-legs
- End panels
- Pedestals or low storage

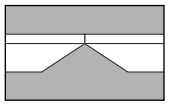
Note: Knife rim worksurfaces cannot be supported by Classic Priority supports or undersurface storage, or used in Systems applications.

Worksurfaces are 1 3/16" thick, 3-ply balanced construction.

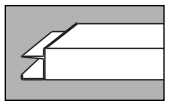


P Softened PVC rim | **F** Softened wood rim | **M** Reed wood rim | **S** Knife wood rim

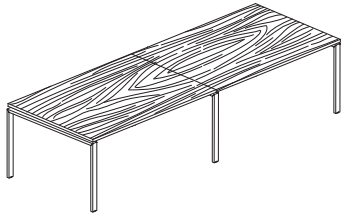
Rim profile is 1/8" thick and appears on all edges of the worksurface. Laminate models are available with a softened PVC rim. Wood and laminate with wood rim models are available with a softened, reed, or knife rim.



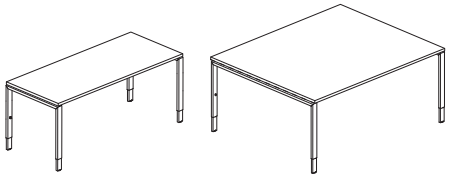
Knife rim on worksurfaces appears on all four sides and butts end to end.



Wire manager option is available on 24", 30", and 36"W rectangular worksurfaces and corner worksurfaces. This flexible trough allows cords and cables to be routed along the back edge of the worksurface. Selected rim profile appears on the on the front and side edges. Wire manager is recommended for back-to-back benching applications.



Progressive rectangular worksurfaces are available in five depths: 24", 30", 36", 48", and 60" and in widths ranging from 36" up to 144" depending on the depth of the surface. 120" and 144"W worksurfaces are two pieces and feature a matched set of veneers. Wood grain on smaller surfaces runs the width of the surface.
➤See the Statement of Line or the pricing pages for sizing combinations.



24", 30", or 36"D | 48" or 60"D

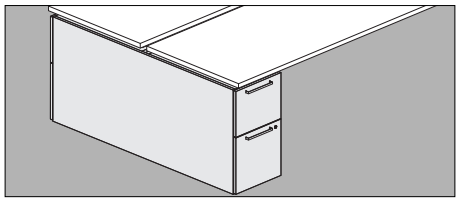
24"–36"D rectangular surfaces can be used to build:
- Private office configurations
- Freestanding open-plan applications
- Single-sided benching applications
- Double-sided benching applications (24" and 30"D only)
- Height-adjustable tables

48" and 60"D rectangular surfaces can be used to build:
- Double-sided benching applications
- Large conference or work tables

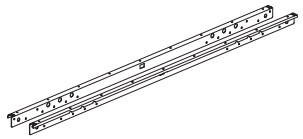
Other Progressive worksurface shapes include: U-shape, arc-end, extended, wedge, oval, 90° corner, and 120° corner.

A variety of factory-installed grommet and cut-out options are available.
➤See pages 100–101.

Connections

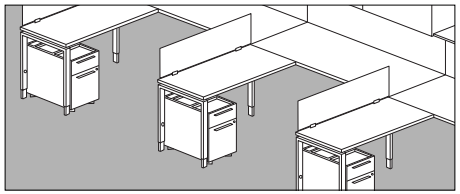


Progressive pedestals, U-legs, and open legs, specified separately, are designed to be support so that the worksurface appears to "float" 3/4" above support and storage. Undersurface storage satisfies both support and storage needs. Pedestal must match worksurface depth.
IMPORTANT: Supports and brackets must be specified separately for all worksurfaces.

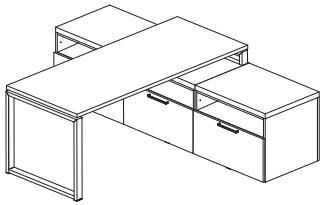


Undersurface support rails, specified separately, are required for all surfaces.
➤See page 46.
Note: Rails are standard with height-adjustable bases.

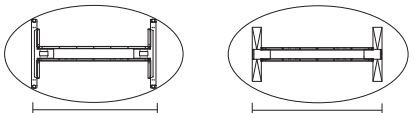
Ganging units together result in no "dimensional creep." There is no limitation as to number and width of tables that can be joined. Varying widths of worksurfaces are not intended for use together in a straight, linear application (side by side).



Return worksurfaces can be created by adding a 24", 30", or 36"D worksurface and appropriate support legs perpendicular to the main worksurface. Use a return mounting bracket and two flat brackets, specified separately. Rail will be 6" longer than the return surface for connection to main surface.
➤See page 46 for bracket and attachment details.



Low storage models can be used when the worksurface is placed at 29"H or higher. Clearance from the undersurface support rail to the floor is 25 9/16".



U-Legs or Open-Frame Legs | Height-Adjustable T-Legs or Fixed-Height T-Legs

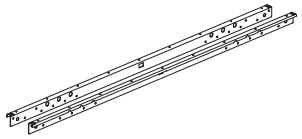
78"W oval worksurface can be supported by several different support-U-legs, open-frame legs, height-adjustable, or fixed-height T-legs. Specify components to create a 30"D x 54"W frame for U-legs and open-frame legs. Specify components to create a 30"D x 60"W frame for height-adjustable or fixed-height T-legs.

Undersurface Support Rails

Product Information

Support Statement of Line	➤See page 15
Pricing	102
Integrating with Traxx & Xsite	63
Classic Modular Applications	72

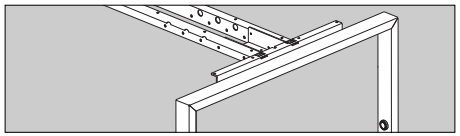
Details



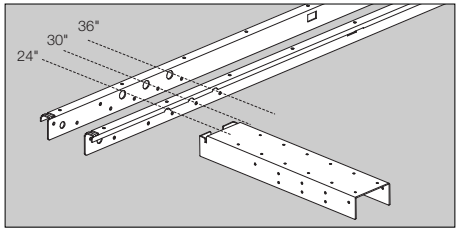
Undersurface support rails are required for all Progressive worksurfaces to provide strength and allow connection of U-legs, open-frame legs, and storage. Rails are powder-coated steel, non-handed, and come in a set of 2; they are 2¼"H and are installed 4½" apart.

Available in 9 lengths from 36"–96" in 6" increments to correspond to worksurface widths.

Connections



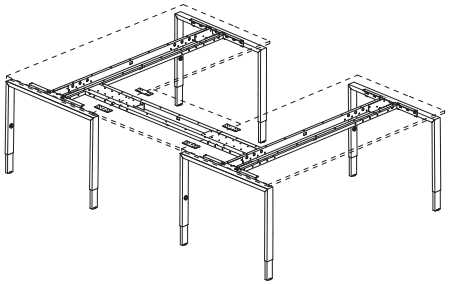
Undersurface support rails attach to starter brackets. Starter brackets are welded to all U-legs and open-frame legs. Specify starter brackets separately for attaching rails to undersurface pedestals or end panels.

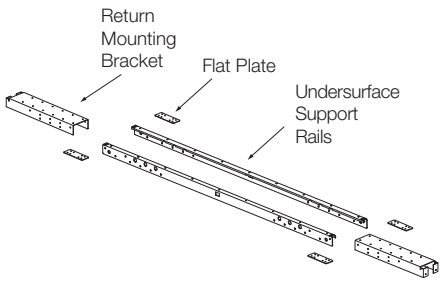


Return mounting bracket is non-handed and can be attached to either end of an undersurface support rail to attach a 24", 30", or 36"D worksurfaces to the main worksurface as a return. Two flat plates (model ACAWBP1), specified separately, are also required when mounting each return.

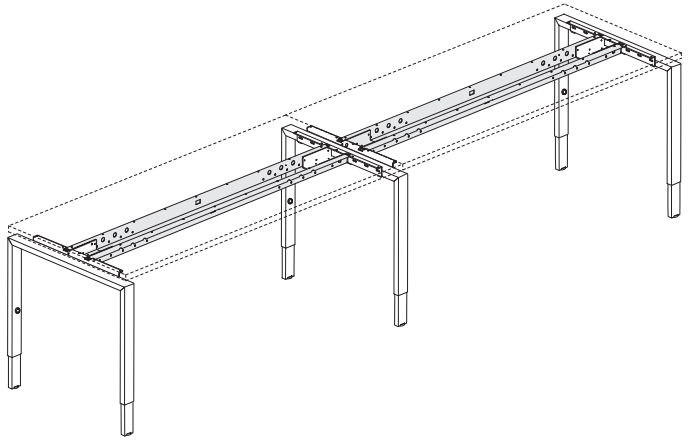
Mounting holes are located on the undersurface support rail in several locations to accommodate various return depths. For a 24"D main worksurface, bolt to the first set of holes; for a 30"D main worksurface, bolt to the middle set of holes; for a 36"D main worksurface, bolt to the nearest set of holes.

Data cabling can be secured to undersurface support rails utilizing cable ties and holes in the rails.

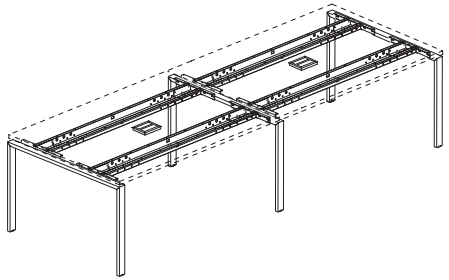




Bridge mounting kits consist of two return mounting brackets and set of undersurface support rails. Undersurface support rails in each kit are 12" longer than the bridge length. For example, 48"W bridge kits ships with 60" undersurface support rails to allow for 6" of connection to the brackets on either side. Four flat plates (model ACAWBP1), specified separately, are required to link surfaces.



Planning Factors



48" and 60"D applications require two sets of undersurface support rails.

For linear applications, specify support rail length to match the width of the worksurface.

IMPORTANT: **For returns,** specify support rail length that is 6" longer than the width of the return surface. Rail will extend under the main surface and connect to a return mounting bracket.

If the length of rail required is not a size offered, specify the next smaller size. The starter bracket will compensate for the dimensional difference.

When using storage as support, calculate the length of the rail required by deducting the width of the storage from the width of the corresponding worksurface. For example, a 72"W surface with two 15"W pedestals would require a 42"W rail, the length of the unsupported span. A 72"W surface with one 15"W pedestal has an unsupported span of 57" and would require a 54"W rail, the next available smaller size.

Clearance from the rail to the worksurface edge:

Surface Size	*Softened or Reed Rim*	*Knife Rim*
24" or 48"D	8¾"	7¾"
30" or 60"D	11¾"	10¾"
36"D	14¾"	13¾"
24"x48" 90° corner	23⅞"	22⅞"
30"x48" 90° corner	19⅝"	18⅝"
24"x48" 120° corner	15"	14"
30"x48" 120° corner	20¼"	19¼"

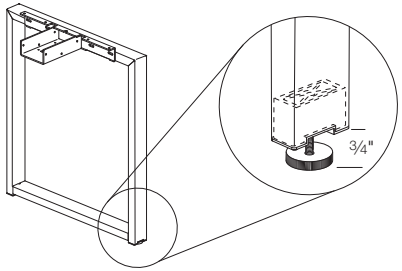
Open-Frame Legs

Typical Configurations	➤See page 8
Support Statement of Line	15
Pricing	103
Finishes & Materials	209

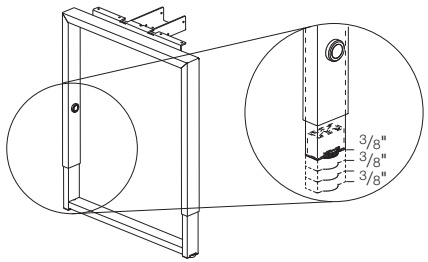
Details

IMPORTANT: Only Progressive Priority 1 3/16" worksurfaces are for use with Progressive open-frame legs. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

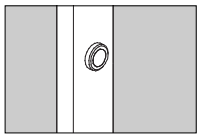
Open-frame legs are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. They connect directly to undersurface support rails and aligns to solid end panels or progressive pedestals. Open-frame leg models are for use in benching, work table, open plan, conferencing or private office applications.



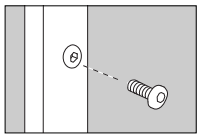
Fixed-height open-frame legs are 27 3/4"H from undersurface to the floor. Available in 24", 30", 36", 48", and 60" depths. Plastic leveler insert is located at the bottom of each leg. The glide stem is 1" long and provides 3/4" of adjustment.



Adjustable-height open-frame legs are 25 7/16"H from undersurface to the floor, at the lowest position. Available in 24", 30", 36", 48", and 60" depths.



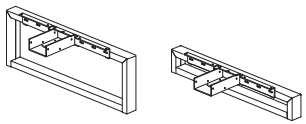
Push Button



Screw-Adjust

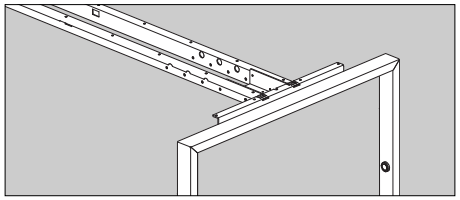
24", 30", and 36"D adjustable-height open-frame legs feature a push button that indexes into notches in the inner leg member. By depressing the button, the leg releases the lower leg assembly. These models provide maximum height adjustment of 7 7/16" in 3/8" increments from 25 7/16" to 32 7/8"H, plus an additional 3/4" of adjustment utilizing the plastic leveling insert.

48" and 60"D adjustable-height open-frame legs feature a mechanical screw-adjust mechanism that indexes into notches in the inner leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs are engineered to carry more load then the smaller width U-leg units. These models provide maximum height adjustment of 7 1/16" in 3/8" increments from 25 7/16" to 32 1/2"H, plus an additional 3/4" of adjustment utilizing the plastic leveling insert.
IMPORTANT: The intent of these adjustable U-legs is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.

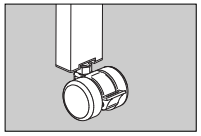


11"H and 5"H open-frame legs are for use on top of low storage. 5"H model sits atop 22"H storage; 11"H model is for use with 15"H storage. They are not intended for use with adjustable-height open-frame legs in the same configuration.
IMPORTANT: Component tops must be specified for low storage when open-frame legs will be placed on top for worksurface support.

Connections



Undersurface support rails attach to starter brackets. Starter brackets are welded to all open-frame legs.



Field installed caster kits are available for use on the individual tables up to 36"D x 96"W. They are not for use for bases that are linked together. Casters feature a tall neck with an M-10 thread; height is 1 7/8". Sold in a set of 4.

Planning Factors

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended. By extending some legs further than others, the table leg can compensate for the floors that are out of level.

Create a different visual by placing open-frame legs inboard from the end of the worksurfaces. The undersurface rails would need to be specified in a smaller width to connect the legs together. Legs may be placed inboard 12" on 24"D surfaces, 15" on 30"D surfaces, and 18" on 36"D surfaces.

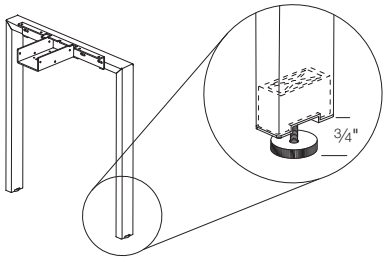
U-Legs

Typical Configurations	➤See page 8
Support Statement of Line	15
Pricing	104
Finishes & Materials	209

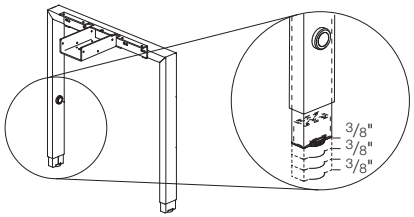
Details

IMPORTANT: Only Progressive Priority 1 3/16" worksurfaces are for use with Progressive U-legs. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

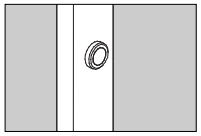
U-legs are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. They connect directly to undersurface support rails. U-leg models are for use in benching, work table, open plan, conferencing or private office applications.



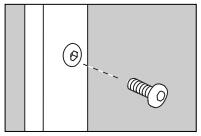
Fixed-height U-legs are 27 3/4"H from undersurface to the floor. Available with or without a stanchion. Plastic leveler insert is located at the bottom of the leg. The glide stem is 1" long and provides 3/4" of adjustment. Available with or without a stanchion.



Adjustable-height U-legs are 25 7/16"H from undersurface to the floor, at the lowest position. Adjustable-height U-legs provide the best aesthetic appearance since both the inner and exterior legs are painted the same color. Available with or without a stanchion.

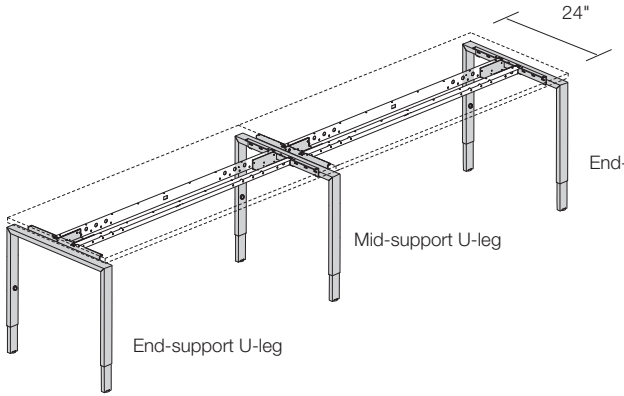


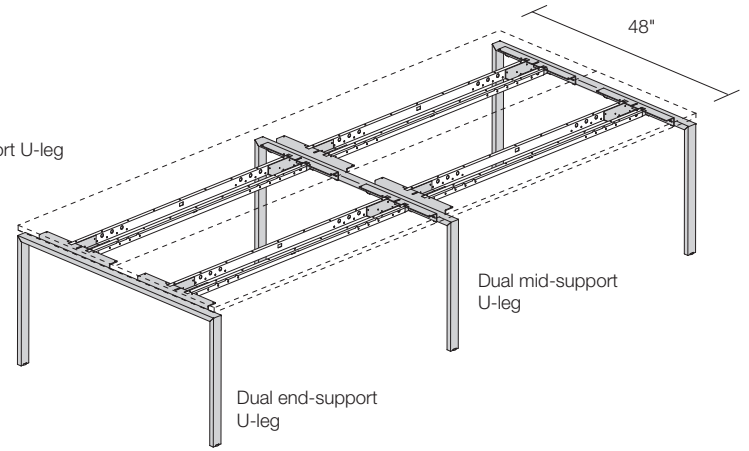
Push Button



Screw-Adjust

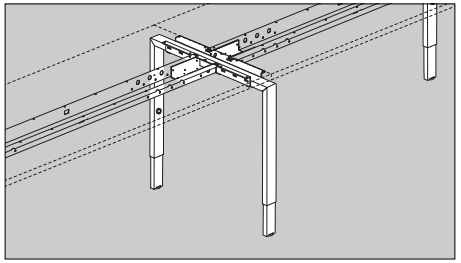
24", 30", and 36"D adjustable-height end U-legs feature a push button that indexes into notches in the inner leg member. By depressing the button, the leg releases the lower leg assembly. These models provide maximum height adjustment of 7 7/16" in 3/8" increments from 25 7/16" to 32 7/8"H, plus an additional 3/4" of adjustment utilizing the plastic leveling insert.





48," 50", 60", and 62"D adjustable-height U-legs and 24", 30", and 36"D mid-support U-legs feature a mechanical screw-adjust mechanism that indexes into notches in the inner leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs are engineered to carry more load then the smaller width U-leg units. These models provide maximum height adjustment of 7 1/16" in 3/8" increments from 25 7/16" to 32 1/2"H, plus an additional 3/4" of adjustment utilizing the plastic leveling insert.

IMPORTANT: The intent of these adjustable U-legs is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.



Mid-support U-legs link tables together using a single middle leg versus two independent legs.

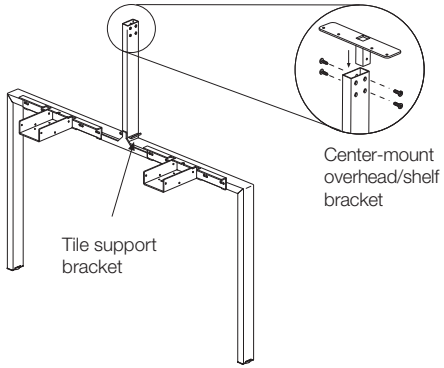
Single mid-support U-legs are available for use with 24", 30", and 36"D worksurfaces.

Dual mid-support U-legs for use with 48" or 60"D applications have two sets of brackets for mounting surfaces. Two surfaces can be used back to back or one surface can be used as long as the depth equals the U-leg depth. For example, one 48"D or two 24"D surfaces can be used on a 48"D dual mid-support leg. Dual U-leg applications require two sets of undersurface support rails.

U-Legs

continued

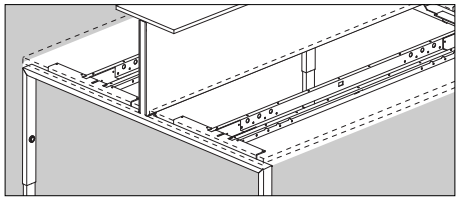
Typical Configurations	➤See page 8
Support Statement of Line	15
Pricing	104
Finishes & Materials	209



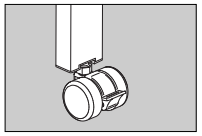
Stanchion support U-legs feature a vertical member that supports tiles and center-mount overhead shelves and cabinets. The overall leg is 2 3/8" deeper than the non-stanchion U-legs to accommodate two 24"D or two 30"D worksurfaces and two tiles.

Center-mount overhead/shelf brackets, specified separately, connect directly to the stanchion. Stanchion U-legs connect directly to undersurface support rails. They are available in end- and mid-support models.

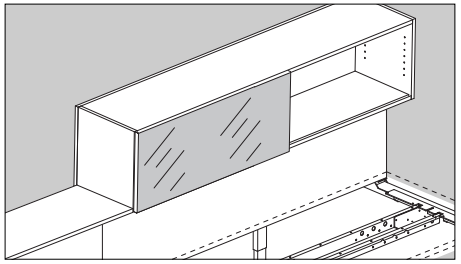
Connections



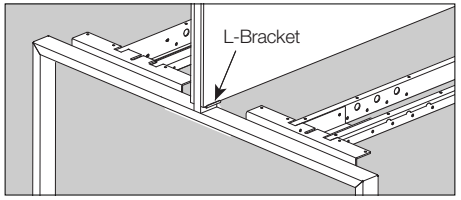
Undersurface support rails attach to starter brackets. Starter brackets are welded to all U-legs.



Field installed caster kits are available for use on the individual tables up to 36"D x 96"W. They are not for use for bases that are linked together or for stanchion models. Casters feature a tall neck with an M-10 thread; height is 1 7/8". Sold in a set of 4.



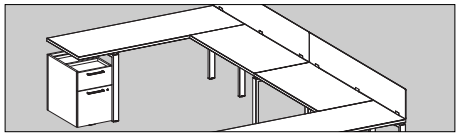
Center-mount overheads, shelves, or top caps are required to complete the top of the tile run.



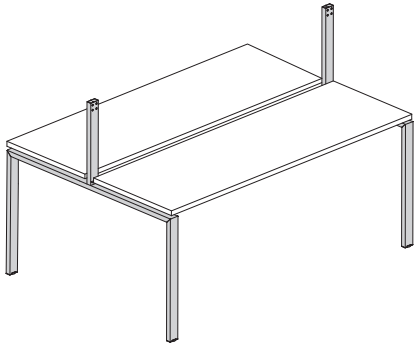
Tiles mount to the stanchions to provide visual privacy in two directions.

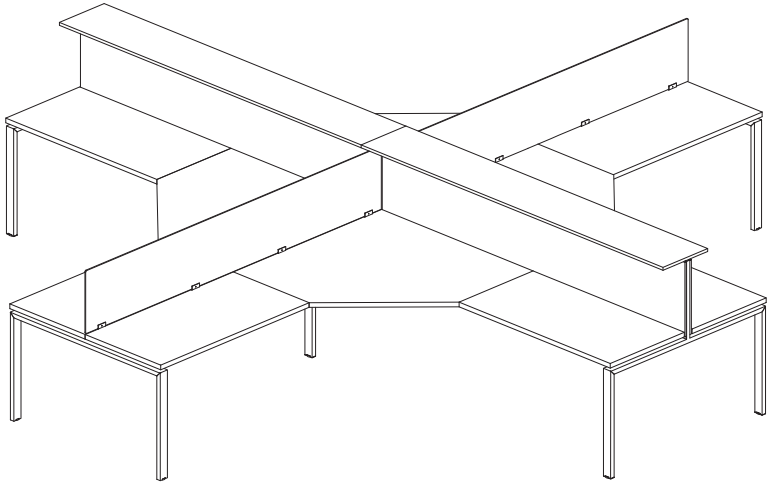
Planning Factors

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended. By extending some legs further than others, the table leg can compensate for the floors that are out of level.



Create a different visual by placing U-legs inboard from the end of the worksurfaces. The undersurface rails would need to be specified in the smaller width to connect the legs together. Legs may be placed inboard 12" on 24"D surfaces, 15" on 30"D surfaces, and 18" on 36"D surfaces.





90° Corner Support Frames

Product Information

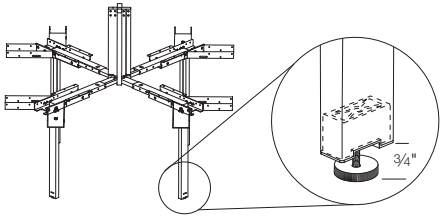
Typical Configurations	➤See page 8
Support Statement of Line	15
Pricing	108
Finishes & Materials	209

Details

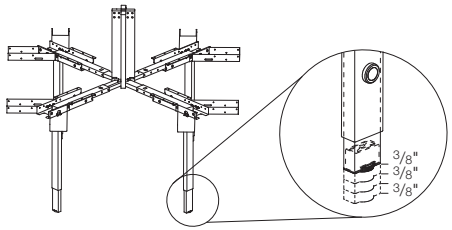
IMPORTANT: Only Progressive Priority 1 3/16" worksurfaces are for use with Progressive 90° corner supports. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

90° corner support frames with stanchion are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. Frames consist of:

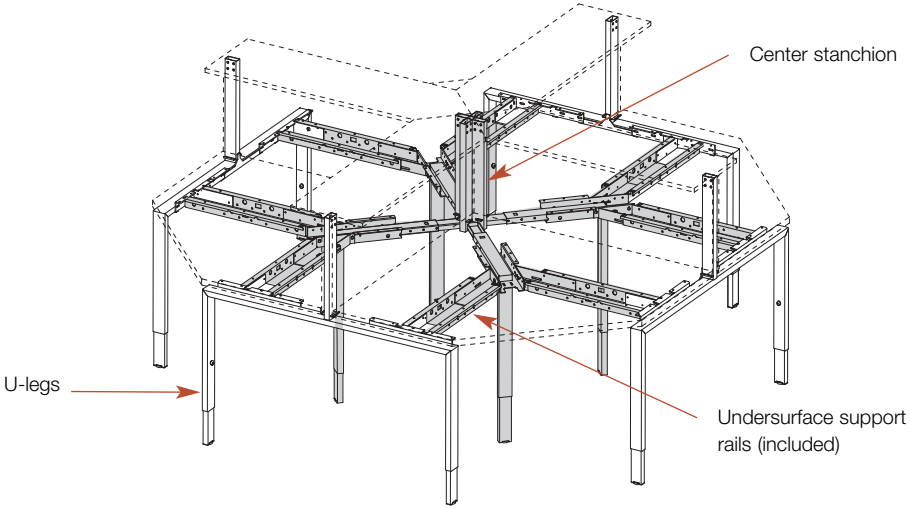
- Center four-way stanchion
- Four legs with adapter brackets
- Undersurface support rails to connect to U-legs



Fixed-height 90° corner support frames is 27 3/4"H from undersurface to the floor. Plastic leveler insert is located at the bottom of the leg. The glide stem is 1" long and provides 3/4" of adjustment.



Adjustable-height 90° corner support frames is 25 7/16"H from undersurface to the floor, at the lowest position. They provide maximum height adjustment of 7 1/16" in 3/8" increments from 25 7/16" to 32 1/2"H, plus an additional 3/4" of adjustment utilizing the plastic leveling insert. Adjustable-height U-legs provide the best aesthetic appearance since both the inner and exterior legs are painted the same color.

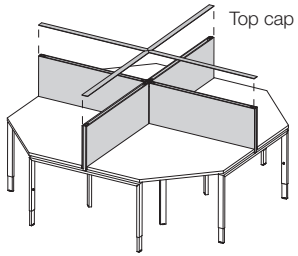


Incremental screw-adjust mechanism on adjustable-height model indexes into notches in the inner leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs are engineered to carry more load then the smaller width U-leg units.
IMPORTANT: The intent of these adjustable frames is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.

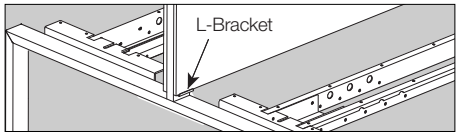
Connections

Four U-legs with stanchions, specified separately, are required. Specify end-support U-legs with stanchions to support the ends of the application or mid-support U-legs with stanchions to continue the run with additional worksurfaces.

Undersurface support rails to connect to U-legs are included with the frame.



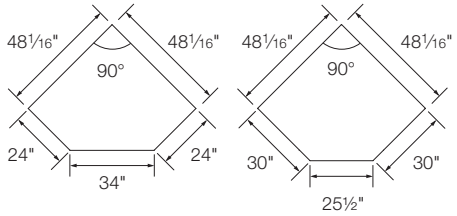
Stanchions on 90° corner support frames accept top caps or shelves, but not both. They also can support overhead storage. Overhead/shelf brackets are required, specified separately.



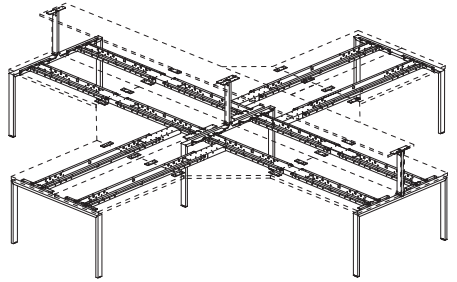
Tiles mount to the stanchions to provide visual privacy in two directions for all four users. Tiles are required.

Planning Factors

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended.



90° corner supports are available in two sizes that accept either 24"D x 48"W or 30"D x 48"W corner worksurfaces, with or without a wire manager. Larger worksurface spans are not recommended for this application.



90° corner workstations can also be created without the use of a 90° corner support by using end U-legs with stanchions and returns going in the opposite directions. Flat brackets must be specified for the returns for additional support. This applications allows for visual privacy in one direction, with tiles down the spine of the station. Privacy screens can also be mounted on the returns for additional side-to-side privacy.

➤See page 57 for privacy screens information.

120° Corner Support Frames

Product Information

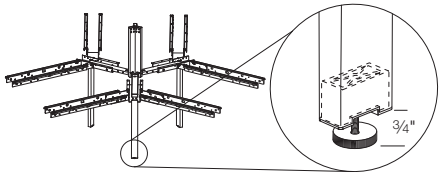
Typical Configurations	➤See page 8
Support Statement of Line	15
Pricing	109
Finishes & Materials	209

Details

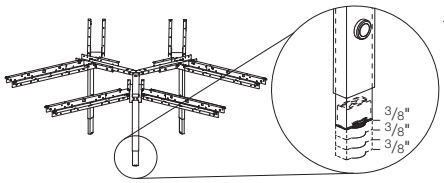
IMPORTANT: Only Progressive Priority 1 3/16" worksurfaces are for use with Progressive 90° corner supports. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

120° corner support frames are powder-coated steel and are available in carbon metallic, designer white, silver pearl, or platinum metallic paint. Frames consist of:

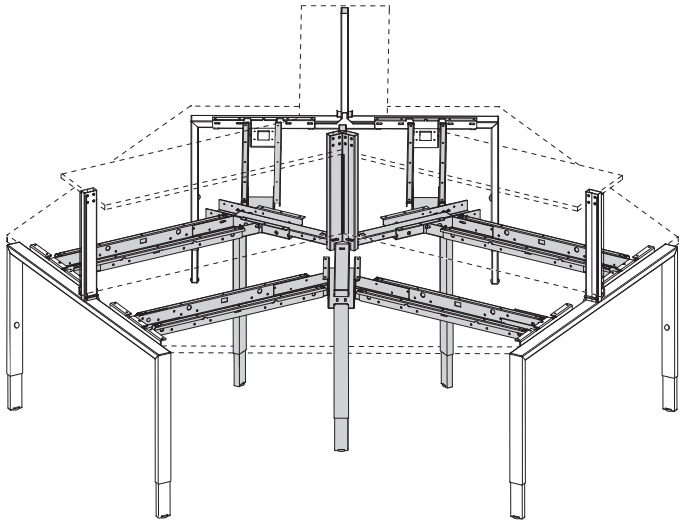
- Center three-way stanchion (stanchion model only)
- Three legs with adapter brackets
- Undersurface support rails to connect to U-legs



Fixed-height 120° corner support is 27 3/4"H from undersurface to the floor. Plastic leveler insert is located at the bottom of leg. The glide stem is 1" long and provides 3/4" of adjustment.



Adjustable-height 120° corner support is 25 7/16"H from undersurface to the floor, at the lowest position. They provide maximum height adjustment of 7 1/16" in 3/8" increments from 25 7/16" to 32 1/2"H, plus an additional 3/4" of adjustment utilizing the plastic leveling insert. Adjustable-height models provide the best aesthetic appearance since both the inner and exterior legs are painted the same color.

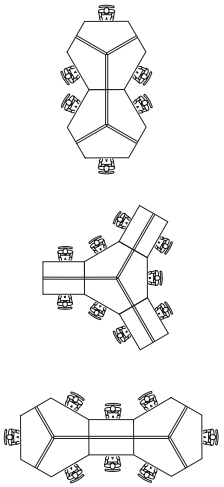


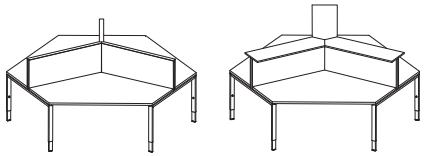
Incremental screw-adjust mechanism on adjustable-height model indexes into notches in the inner leg member. By removing the screw, the leg releases the lower leg assembly. These larger U-legs are engineered to carry more load then the smaller width U-leg units.
IMPORTANT: The intent of these adjustable frames is to provide an initial bench height adjustment at the time of installation; they are not intended to provide the user height adjustability.

Connections

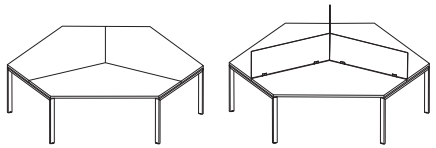
Three U-legs, specified separately, are required. Specify end-support U-legs to support the ends of the application or mid-support U-legs to continue the run with additional worksurfaces.

Undersurface support rails to connect to U-legs are included with the frame.





120° corner supports with stanchions accepts top caps or shelves, but not both. Overhead/shelf brackets are required, specified separately.



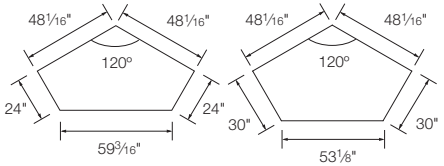
120° corner supports without stanchions can be used to create a more open work area.

12" or 16" resin privacy screens can be added for visual privacy.

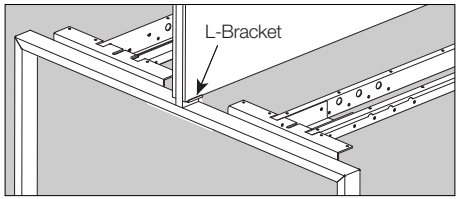
Planning Factors

The 120 station is unique to Kimball Office Priority benching. The applications shown above-left depict how the 120 degree stations provide more side-to-side visual privacy than typical lineal benching layouts. There are numerous ways to incorporate the 120 degree station in a floor plan; you are not limited to a typical 3 person station.

When planning long spans of tables or have out-of-level floors, adjustable-height legs are recommended.



Two sizes accept either 24"D x 48"W or 30"D x 48"W corner worksurfaces, with or without a wire manager.



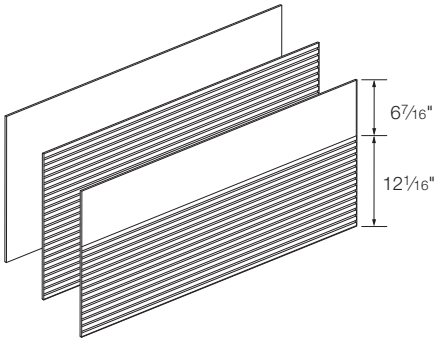
Tiles mount to the stanchions to provide visual privacy in two directions for all users. Tiles must be specified for both sides of the stanchion.

Tiles

Product Information

Benching Overview	➤See page 40
U-Legs Product Information	48
Pricing	110
Finishes & Materials	209

Details



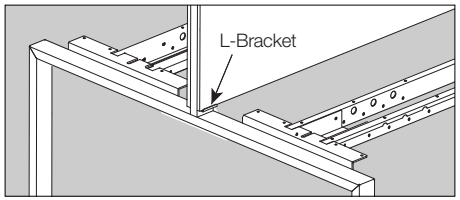
Tiles are 18½"H and available 36"–96"W (in 6" increments). Select from tackable fabric, slat and fabric/slat combination models.

Tackable fabric tiles are constructed of fiberglass and covered in fabric. Fabric is applied railroad style.

Slat tiles are powder-coated extruded aluminum. Slats are ¾"H with ½" space between each slat; total of 12 slats.

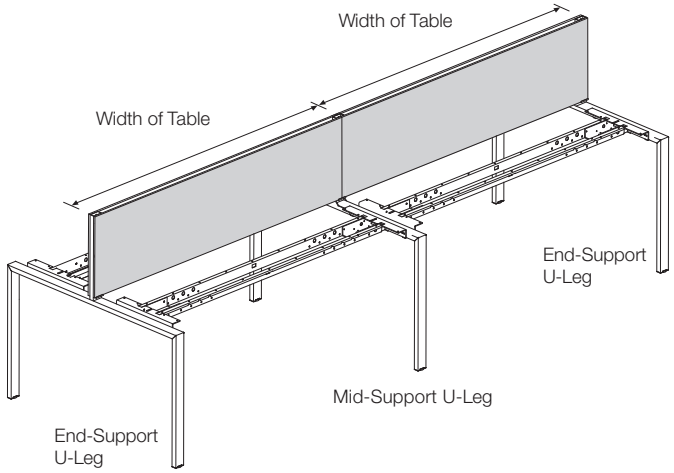
Fabric/slat tiles feature a nominal 6"H of tackable area above a 12"H of slat tile area with a total of 8 slats.

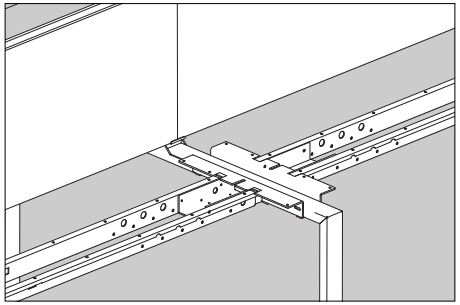
Connections



Tiles install into an L-shaped bracket that is part of the stanchion U-leg assembly.

Width of the tile aligns with the stanchion U-legs. For example, a 72"W tile is a true 72" dimension.



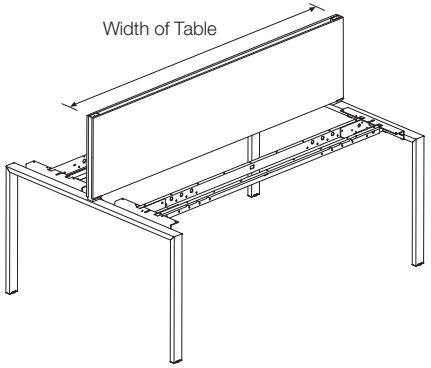


When tables are ganged together using the shared support U-leg, the tiles are centered relative to the mid-support stanchion. There is no dimensional creep.

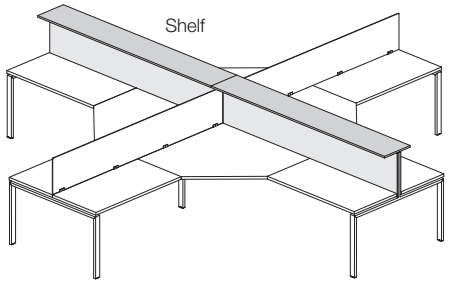
Slat tiles allow work tools to be placed in appropriate areas to accommodate individual needs. They accommodate all Kimball Office Perks work tools including monitor arm mounts.

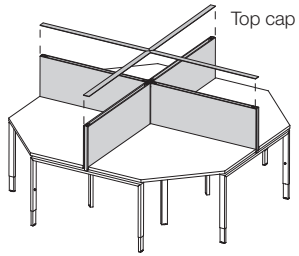
Planning Factors

Tiles are required for both sides when using stanchion support U-legs. They do not need to be the same type of tile, but must be the same width.



Tiles must be specified the same width as the surface to mount correctly to stanchions.





When using tiles with stanchion support U-legs, either top caps, shelves or overheads must be specified to complete the top of the tile run.

Related Products

Perks single-monitor arms can be mounted on slat tile and fabric/slat tiles if spaced at least 24" apart. Maximum monitor weight up to 13 lbs.
➤See the Perks Price List.

End Panels

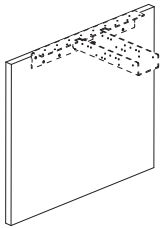
Typical Configurations	➤See page 8
Support Statement of Line	15
Pricing	113
Finishes & Materials	209

Details

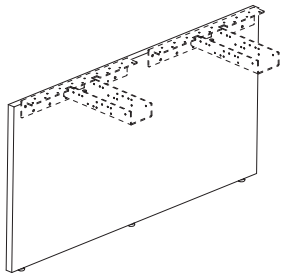
IMPORTANT: Only Progressive Priority 1 3/16" worksurfaces are for use with Progressive end panels. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

End panels are 1 3/16" and available in both veneer and laminate. They are available multiple depths for use in either benching, open plan, or private office applications. End panels can be used in conjunction with other Progressive supports, such as U-legs and open-frame legs.

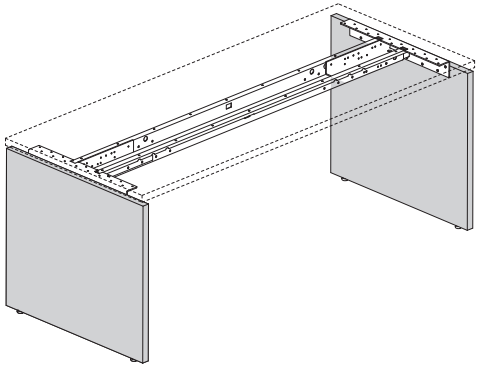
IMPORTANT: End panel illustrations on this page show end panels with a starter bracket, which must be specified separately.

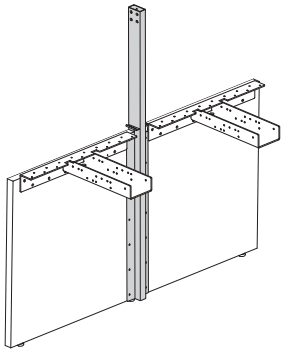


24", 30", and 36"D end panels can be used for creating private office configurations.

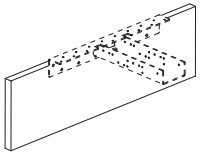


48" and 60"D end panels can be used to benching, collaboration, or conference environments.

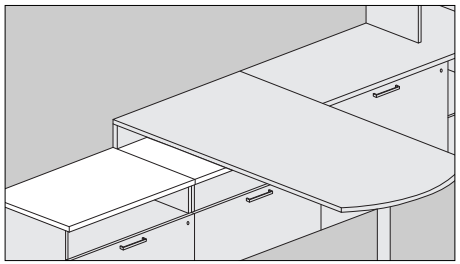




50"D and 62"D end panels are for use with end panel stanchion brackets (model 53KSSEPP), specified separately, to create dual sided benching applications. They are for use at the end of a run only.
Note: Stanchion bracket, model 53KSSDPP, cannot be used in this application.



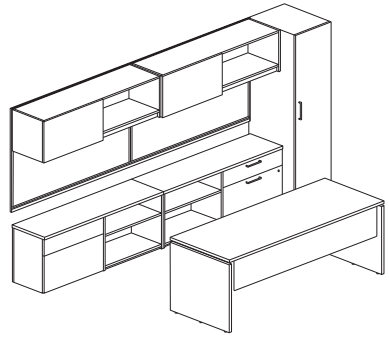
5"H or 11"H end panels can be used to create layered applications with low height storage. 5"H model sits atop 22"H storage; 11"H model is for use with 15"H storage.



IMPORTANT: Component tops must be specified for low storage when short end panels will be placed on top for worksurface support.

Connections

Starter bracket must be specified separately for all end panel applications. Starter brackets are intended to be mounted ¾" above the top edge of the panel to give the worksurface a "floating" appearance consistent with aesthetic of Progressive Priority. Specify one starter bracket for 24"–36"D end panels; specify two starter brackets for 48"–62"D end panels.
➤See page 54 for additional information.



Create conventional casegoods assemblies by specifying end panels, starter brackets, privacy screen used as a modesty screen, and undersurface support rails.

Planning Factors

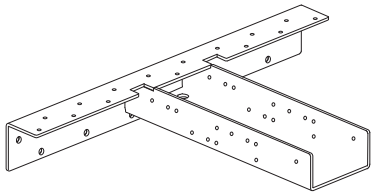
Maximum run is dictated by the length of undersurface rails and the surface size.

End panels are intended for use at the end of runs only not as a shared support.

Starter Brackets

Typical Configurations	➤See page 8
Undersurface Support Rails	46
Pricing	113
Finishes & Materials	209

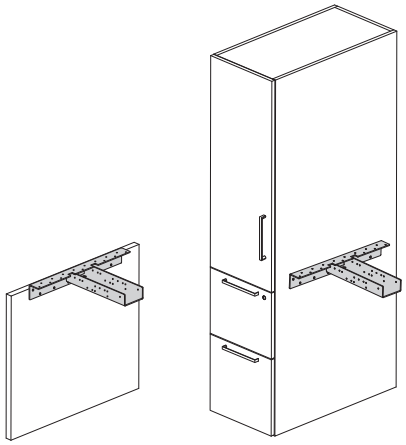
Details



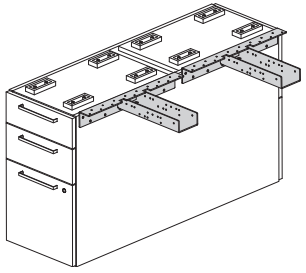
Starter brackets support many office configurations. This bracket connects to the undersurface support rails to provide support to surfaces. It is identical to, and performs the same function, as the brackets that are welded to U-legs and open-frame legs.

Starter brackets are the most versatile items in the Priority offering. Specify this bracket to begin or end an office layout with an end panel, pedestal or storage tower units. When used with an end panel, pedestal, or storage tower, this bracket replaces the need for leg support.

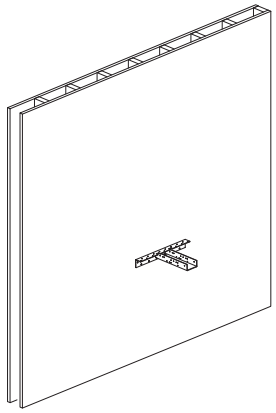
Connections



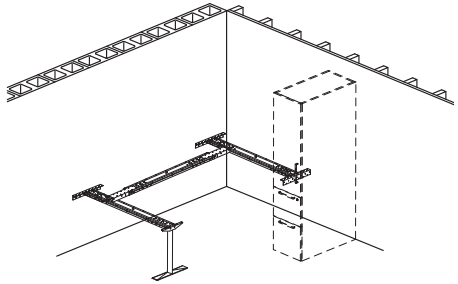
One bracket is required to connect to each set of undersurface support rails when using with 24", 30", and 36"D end panels or 36”D or smaller depth storage.



Two brackets are required when using 48", 50", 60", or 62"D storage or end panels.



Starter brackets can also be mounted directly to most interior walls, including steel or wood stud walls, masonry block, or solid masonry walls. IMPORTANT: It is the responsibility of the installer to ensure that the connection to the studs is adequate to support the worksurface load.



Bridge kits can be used between two surfaces supported by wall-mounted starter brackets to create a U-unit configuration. Connect the undersurface rails of the left and right surfaces to U-legs, open-frame legs, fixed T-legs, or any style of storage.

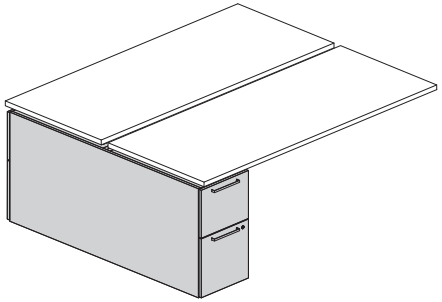
Undersurface Pedestals

Typical Configurations	➤See page 8
Storage Statement of Line	18
Pricing	114
Finishes & Materials	209

Details

IMPORTANT: Only Progressive Priority 1 3/16" worksurfaces may be used with Progressive undersurface pedestals. Classic Priority knife rim worksurfaces and Systems worksurfaces are not applicable.

Progressive undersurface pedestals are available in 24", 30", and 36"D x 15"W with box/box/file and file/file drawer configurations and 24"D x 30"W two-drawer lateral file; in wood or laminate. Chassis and door/drawer fronts on laminate models feature thermally fused laminate (TFL). Grain runs top to bottom. All units have finished backs and lock in bottom drawer.



Double-sided pedestals are a unique design to Kimball Office for creating 48"D or 60"D open plan applications. They create a clean aesthetic of one continuous end panel, eliminating the need to position two separate pedestals back to back and add filler panels to fill the gap.

Top of the double-sided pedestal features a 2 3/16" opening for cable routing.

3/4" silver-colored spacers on top of pedestals create a floating worksurface affect. Double-sided pedestals include a total of 8 spaces; regular depth pedestals have 4.

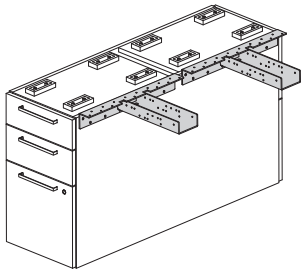
Drawer fronts are 3/4"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.

Drawer sides and back are 1/2" thick and wrapped in natural woodgrain vinyl. Bottoms are 3/16" thick.

Optional wood drawers are available on wood units. Drawer sides and back are 1/2" thick with veneer faces. Bottoms are 1/4" thick with veneer faces. Interiors are sealed, sanded, and finished with a clear durable topcoat.

Drawer suspensions feature black slides with precision steel ball bearings to ensure long-lasting, quiet, smooth operation. Box, file, and lateral file drawers feature full extension slides.

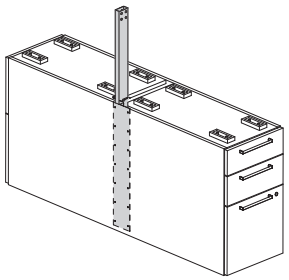
Connections



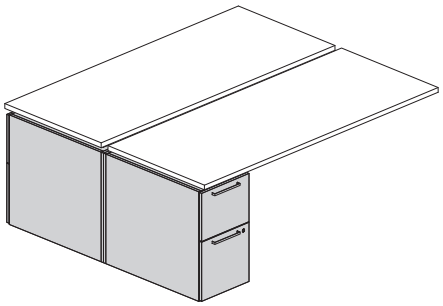
Starter bracket, specified separately, is required to connect pedestals to undersurface support rails and the worksurface.

- One starter bracket is required to connect to each set of undersurface support rails when using with 24", 30", and 36"D surfaces or 36"D or smaller depth storage.
- Two brackets are required when using 48"D or 60"D storage or surfaces.

➤See page 54 for more information on starter brackets.

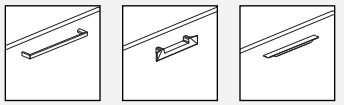


Pedestal stanchion bracket, (model 53KSSDPP) specified separately, is available for use with the 50" and 62"D double-sided pedestals. Double-sided pedestal models for use with stanchions bracket are deeper than the non-stanchion models (48" and 60"D). The difference accommodates two 24" or two 30"D worksurfaces in addition to the thickness of the stanchion plus two tiles for either side of the stanchion. The pedestal stanchion bracket aligns with stanchion support legs and features a vertical member that supports fabric tiles, slat tiles and fabric/slat tiles. Overhead/shelf brackets, specified separately, connect directly to the stanchion, to support center-mount overhead or shelf.



Two pedestals can be used in a back-to-back application; however, a double-sided pedestal is recommended for a clean visual. A stanchion bracket could not be used in the two-pedestal application.

Pull Options:



89 Studio **91** Niche **90** Trinity (+$26 per unit;

Link	160mm
Wisp	190mm

Center-Mount Overhead Storage

Product Information

Typical Configurations	➤See page 8
Storage Statement of Line	18
Pricing	116
Finishes & Materials	209

Details

IMPORTANT: Progressive center-mount overhead storage is intended for use with Progressive Priority benching stanchions, unless otherwise noted.

Center-mount overhead cabinets are available in 30"–72"W (in 6" increments) with hinged doors or sliding door. Units are finished on all sides; flat bottom.

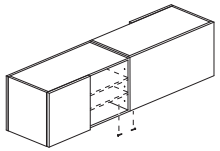
Hinged wood four-door models feature one set of grain pattern matching doors; laminate models feature two sets of two-doors that match in grain pattern.

Sliding-door units feature one door and center divider panel. These units accept five ¾"-thick interior shelves spaced 1¼" apart. Shelves intended for use on the open side of the sliding door unit, specified separately.

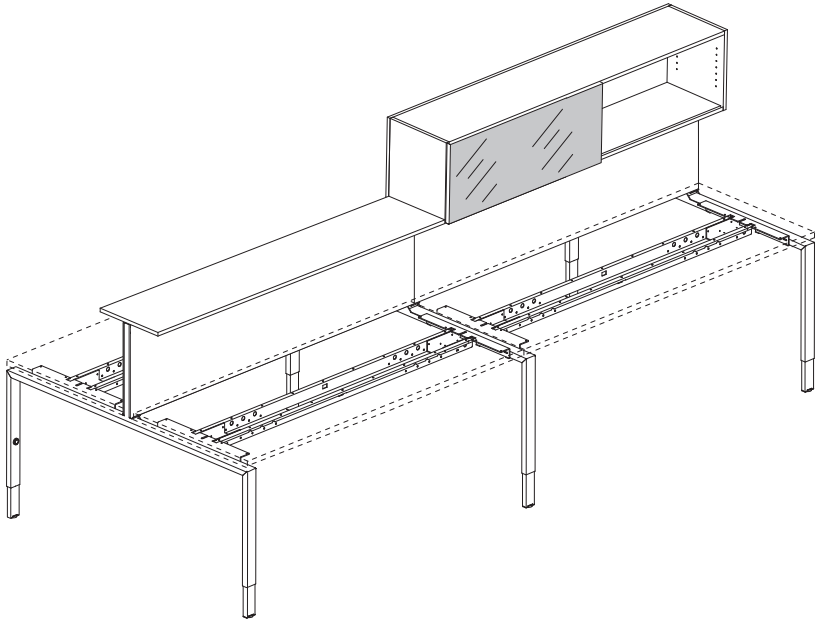
Writable glass models features thin aluminum frame finished in silver satin metallic.

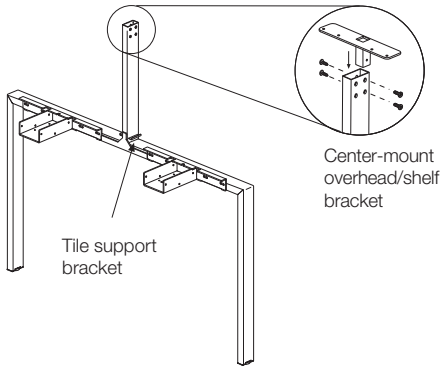
Center-mount shelves are available in 30"–96"W (in 6" increments), as well as models for use on 90° and 120° frames. Units have a finished top and bottom and feature a softened rim on all four sides of the shelf.

Connections

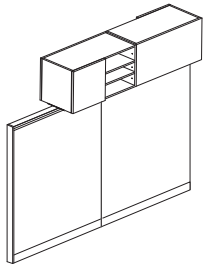


Center-mount cabinets can be ganged with the units facing the same direction side to side or facing opposite directions (shown above). Four ganging bolt assemblies ship standard with each model. *Note: Center-mount shelves and cabinets cannot be ganged to each other.*



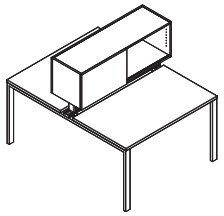


Overhead/shelf bracket (53KBP), specified separately, is required at each stanchion intersection Sold in a set of two.



Center-mount storage can be mounted on top of Xsite panels using two Xsite transaction counter support brackets. Overheads must be the same length or longer than the frame it will be placed over. For example, a 48"W center-mount overhead can be mounted above a 30"W Xsite frame; however, a 30"W center-mount overhead cannot be mounted onto a 48"W Xsite frame. Not for use on Xsite stackable panels.

➤See the Systems Price List for other guidelines.



Center-mount storage can be mounted to Xsede accessory rail using an Xsede stanchion kit. Overhead can be any width.

Planning Factors

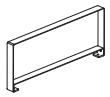
Multiple units can be ganged and then connected at the stanchion intersection. For example, two 36"W center-mount overheads can be ganged in opposite directions above a 72"W surface, and then connected to the stanchions as an assembled unit.

Shelves and overheads cannot be mixed between stanchions, but can be specified to align at the stanchion intersection (see illustration at left).

On laminate units 60"W and greater, the grain on the back panel runs horizontal.

Related Products

Interior shelves may be specified separately.



Shelf divider Shelf divider provides further organization to shared materials stored on center-mount shelves. Shelf divider, made of powder-coated metal, slides onto the center-mount shelf and attaches to the underside of shelf.

Expo or Expo2 dry-erase markers are recommended for use on writable glass doors.

Resin Privacy Screens

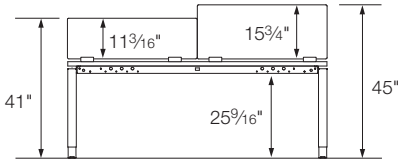
Product Information

Typical Configurations	➤See page 8
Privacy Screens Statement of Line	20
Pricing	121
Finishes & Materials	209

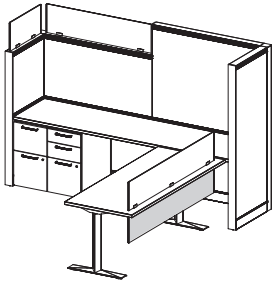
Details

Resin privacy screens provide visual privacy for users when in the seated position. Screens can mount onto worksurfaces in private office, benching, or height-adjustable table applications. Privacy screens are available in nominal 12" and 16"H models and in widths from 24"–90" (in 6" increments).

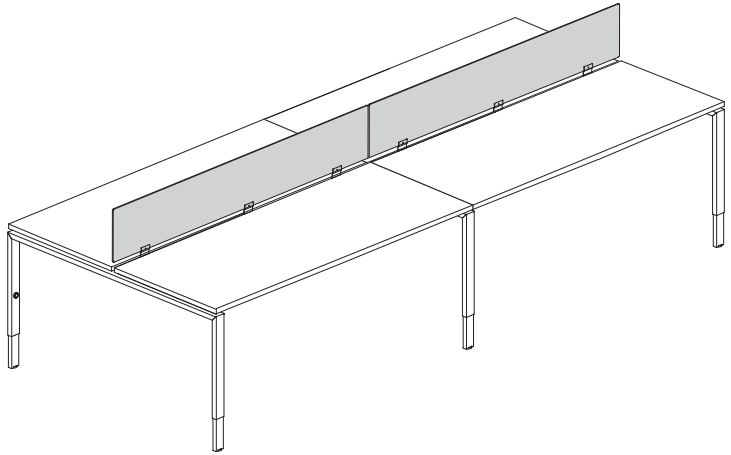
Screen material is ¼"-thick resin with a bullnose edge. Screens are available in three colors: Mist, Breeze, and Alpine White (upcharge applies). Both sides of the screen have a matte texture.

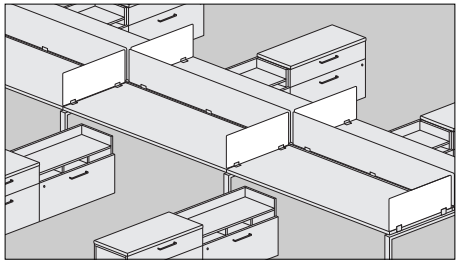


Two different heights provide different levels of visual privacy.



12"H screens can also be used as an undersurface modesty panel. When used with U-legs or open-frame legs, screens must be specified 6" smaller in width than the nominal worksurface width to allow proper clearance from legs.





End-support screens provide side-to-side visual privacy, and are available in 12" and 16" heights and 22", 28", and 34"W. They are sized 2" smaller in width than the nominal worksurface depth and are mounted inboard of the table legs.

Connections

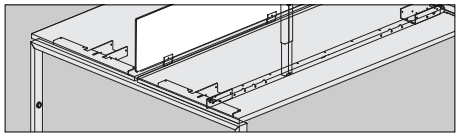
Four bracket styles are available: freestanding, surface mount, square-edge undersurface mount, and knife-edge undersurface mount. Brackets are extruded aluminum and have a powder-coated finish. Brackets must be specified separately.

Freestanding brackets allow privacy screens to be placed freely on any surface or storage unit.

Surface-mount brackets can be used to mount screens above or below the worksurface. This bracket can also be used to mount screens to Priority top caps in benching applications.
Note: Using this bracket will deface the surface to which it is attached.

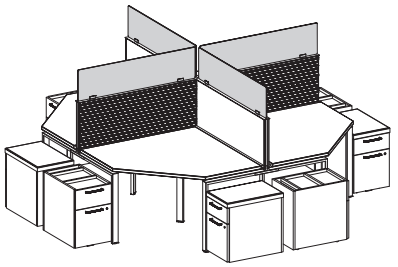
Square edge-mount brackets are for use on any worksurface with a softened rim, reed rim, or any worksurface with a wire manager.

Knife edge-mount brackets are for use on any worksurface with a knife rim.



Brackets should be placed 6" inward of either end and then evenly spaced for the remainder of the screen. For example, 72"W screen should have 27" between the center of each bracket.

Brackets are packaged as a set of two. Specify the appropriate number of brackets based on the screen size:
- 24"–54"W screens require 2 brackets
- 60"–78"W screens require 3 brackets
- 84"–90"W screens require 4 brackets



Add another layer of privacy with screens on top of Priority top caps or Xsite flat top caps using surface-mount brackets.

Accessories cannot be mounted on screens.

Planning Factors

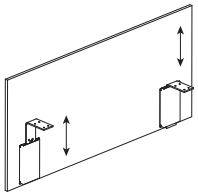
Accessories and work tools cannot be mounted on screens.

Click-Adjust Privacy Screens

Product Information

Typical Configurations	➤See page 8
Privacy Screens Statement of Line	20
Pricing	124
Finishes & Materials	209

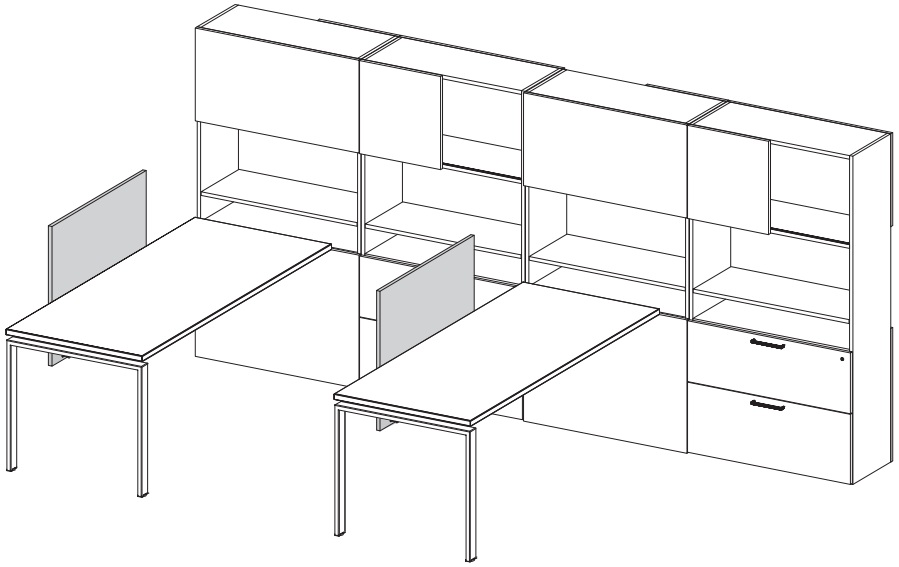
Details



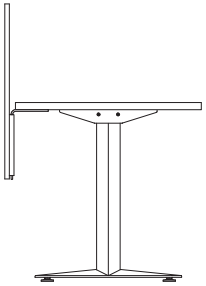
Click-adjust privacy screens are available in three widths: 36", 42", 48". They are constructed of ¾"-thick wood or laminate with a softened rim detail; finished on both sides.

Screen can be adjusted up or down to provide various heights of user-privacy. The screen features a mechanical ratchet mechanism that provides 4" of height adjustment in 1" increments. The height of screens adjusts from 12" above the worksurface to 16" above the worksurface and coordinates with the heights of the resin privacy screens.

At the 16" height position, the privacy screen will clear the underside of an overhead or shelf.
The modesty section of the privacy screen varies in height from 7" to 11" depending on the position of the screen.



Connections



Click-adjust privacy screens can be attached to the underside of any style of table.

Planning Factors

Privacy screens do not accept accessories and work tools or carry load.

Take support placement into consideration when using the privacy screens.

Height-Adjustable T-Leg Table Bases Product Information

Manual Adjust

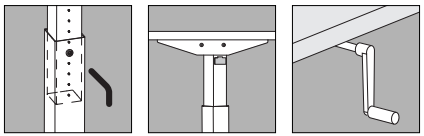
Statement of Line	➤See page 21
Worksurfaces Product Information	45
Pricing	125
Finishes & Materials	209

Details

IMPORTANT: Only Progressive Priority 1 3/16" worksurfaces are for use with Progressive height-adjustable table bases. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

Height-adjustable T-leg table bases consist of one or two T-legs and a set of undersurface support rails that run underneath the center of the worksurface. Return T-legs include a return bracket for connecting to a main base at a 90° angle. Bases ship ready to assemble.

Manual-adjust bases are available in three styles: incremental, click, and crank. The T-legs on manual bases feature powder-coated steel 2"D x 2"W upper column, a 2 3/8"D x 2 3/8"W lower column, and a die-cast aluminum base (foot). Glide provides 15/16" of adjustment.

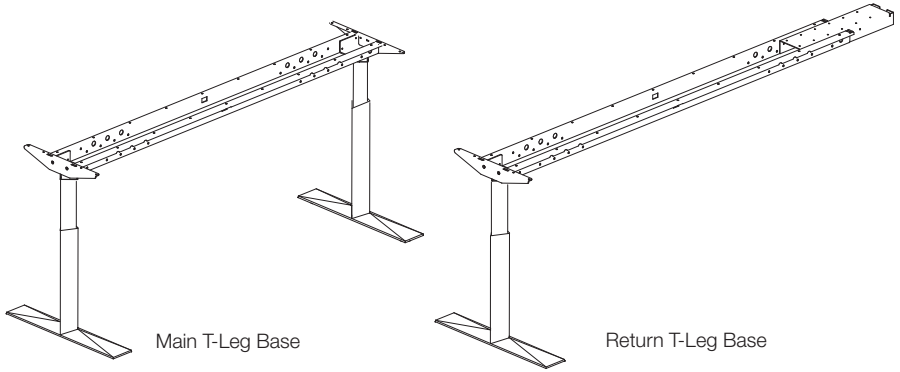


Incremental Click Crank

Incremental-adjust models can be adjusted in 1" increments using a 5mm Allen wrench.

Click-adjust models feature an adjustment mechanism on each leg that works like a ratchet. Table height can be adjusted upward in 3/16" increments by lifting the table. To lower the table, pull and hold the small handle.

Two people are recommended when adjusting height for incremental- and click-adjust models.



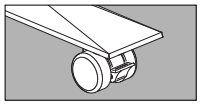
Main T-Leg Base Return T-Leg Base

Crank-adjust models feature an adjustment handle located on the right side of the base. On rectangular surface applications, the crank can be positioned on the left or right side of the base. Handle pulls in and out, receding to store flat under the worksurface. Crank-adjust models also include a hex rod that runs beneath the worksurface that allows both legs to raise and lower simultaneously; ships ready to assemble. These models are not applicable for L- or U-configurations.

Connections

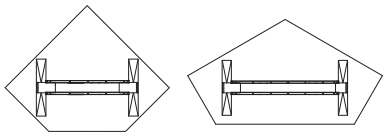
IMPORTANT: Above-surface storage, highbacks, and organizers should not be used with height-adjustable tables.

Create a different visual by placing T-leg table base inboard from the end of the worksurface; specify a smaller width table base. Legs may be placed inboard 12" on 24"D surfaces, 15" on 30"D surfaces, and 18" on 36"D surfaces.



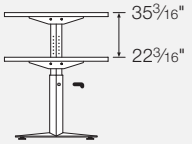
Field installed caster kits are available for use on the main T-leg table bases up to 36"D x 96"W and in L-configurations. Casters feature a low neck with an M-8 thread; height is 1 5/8"; set of 4.

Planning Factors

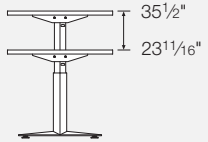


90° and 120° corner worksurfaces can also be supported by height-adjustable T-leg bases placed parallel to the front edge of the worksurface. To create 48"W 90° application, use a 36"W base; for a 120° application, use a 54"W base. This application provides a lower-cost alternative to using a 3-leg base. Casters are not recommended for this application.

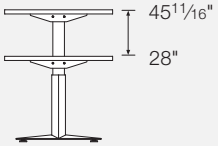
Adjustability:



Incremental Adjust
Range: 13"



Click Adjust
Range: 11 13/16"



Crank Adjust
Range: 17 11/16"
Cranks per inch: 12

Note: Worksurface is included in the height ranges shown above. Calculate kneespace by subtracting 3 5/16" from desired height to allow for worksurface and rails.

Load Capacity:

Note: Load capacity is defined as the recommended maximum distributed weight of items on or attached to the worksurface.

	Main only	*L-Config.*
Incremental- or Click-Adjust T-Leg Base		
BIFMA maximum load*	400 lbs.	775 lbs.
UL maximum load*	670 lbs.	1300 lbs.
Max. load with casters	120 lbs.	1300 lbs.
Crank-Adjust T-Leg Base		
BIFMA maximum load*	400 lbs.	n/a
UL maximum load*	135 lbs.	n/a
Max. load with casters	120 lbs.	n/a
Maximum lift**	100 lbs.	n/a

* Static

** With or without casters; reflects the total weight allowed for the table to raise and lower

Height-Adjustable T-Leg Table Bases Product Information

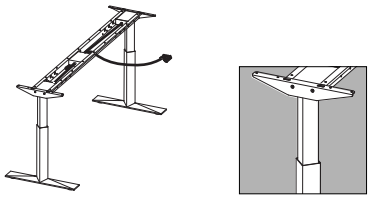
Finishes & Materials	209

Details

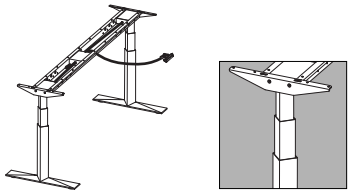
IMPORTANT: Only Progressive Priority 1 3/16" worksurfaces are for use with Progressive height-adjustable table bases. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

Height-adjustable T-leg table bases consist of T-leg(s) and a set of undersurface support rails that run underneath the center of the worksurface. Bases ship ready to assemble. The T-legs on electric bases feature powder-coated steel 2"D x 2"W upper column, a 2 3/8"D x 2 3/8"W lower column, and a die-cast aluminum base (foot). Glide provides 1 5/16" of adjustment.

Electric-adjust bases provide sit-to-stand capabilities.

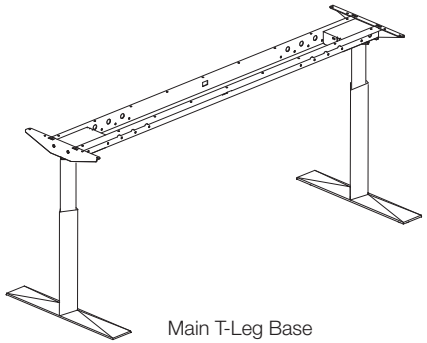


Single-stage electric models features a two-column leg, that compresses inside itself when in the lower positions.

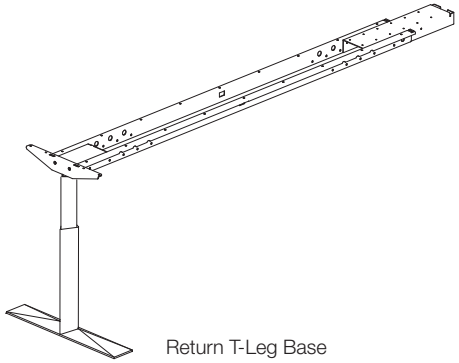


Dual-stage electric models features a three-column leg, that compresses inside itself when in the lower positions.

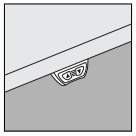
90° and 120° height-adjustable 3-leg bases are also available. Center leg is a post leg.



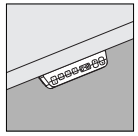
Main T-Leg Base



Return T-Leg Base



Standard



Programmable

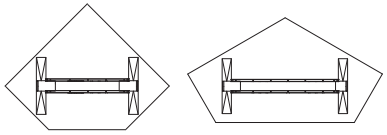
Select either a standard switch or a programmable switch. Standard switch features up and down arrows, and is 2½"W x .625" thick x 2½"D (front to back). Programmable switch allows the user to pre-set up to four-different table heights, and is 5½"W x .625" thick x 2½"D (front to back); upcharge applies. To move the table to one of the pre-set heights, the user must depress the button while the table is in motion. A digital indicator shows the overall height of the table. Switch can be located on either side of the table.

Connections

IMPORTANT: Above surface storage, highbacks, and organizers should not be used with height-adjustable tables.

Control box on main table without a return or extension is not interchangeable with control box with 3 outlets that is standard on main table base specified along with a return or extension.

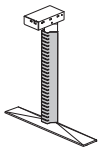
Planning Factors

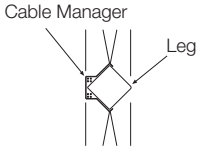


90° and 120° corner worksurfaces can also be supported by height-adjustable T-leg bases placed parallel to the front edge of the worksurface. To create 48"W 90° application, use a 36"W base; for a 120° application, use a 54"W base. This application provides a lower-cost alternative to using a 3-leg base. Casters are not recommended for this application.

Related Products

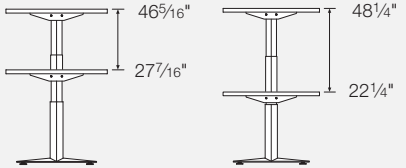
Field installed caster kits are available for use on the main T-leg table bases up to 36"D x 96"W.
➤See page 134.





Snap-on cable managers are available.
➤See page 134.

Adjustability:



Single-Stage Adjust
Range: 18 7/8"
Lift Speed: 1.5" per sec.

Dual-Stage Adjust
Range: 26"
Lift Speed: 1.5" per sec.

Note: Worksurface is included in the height ranges shown above. Calculate kneespace by subtracting 3 5/16" from desired height to allow for worksurface and rails.

Load Capacity:

Note: Load capacity is defined as the recommended maximum distributed weight of items on or attached to the worksurface.

	Main only	*L-Config.*
Single-Stage Adjust T-Legs		
BIFMA maximum load*	400 lbs.	775 lbs.
UL maximum load*	135 lbs.	1300 lbs.
Max. load with casters	120 lbs.	1300 lbs.
Maximum lift**	100 lbs.	150 lbs.
Dual-Stage Adjust T-Legs		
BIFMA maximum load*	400 lbs.	775 lbs.
UL maximum load*	135 lbs.	1300 lbs.
Max. load with casters**	120 lbs.	1300 lbs.

Height-Adjustable Post-Leg Bases

Product Information

Manual or Electric Adjust

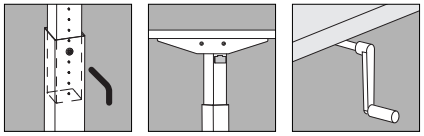
Statement of Line	➤See page 21
Worksurfaces Product Information	45
Pricing	127
Finishes & Materials	209

Details

IMPORTANT: Only Progressive Priority 1³⁄₁₆" worksurfaces are for use with Progressive post legs. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

Post legs are a versatile table base extension that can be used in conjunction with other leg styles including U-legs, open-frame legs, fixed-height T-legs, and height-adjustable T-legs.

Rectangular, U-shape, extended, and arc-end worksurfaces can be supported by post legs when used as a return or extension surface.

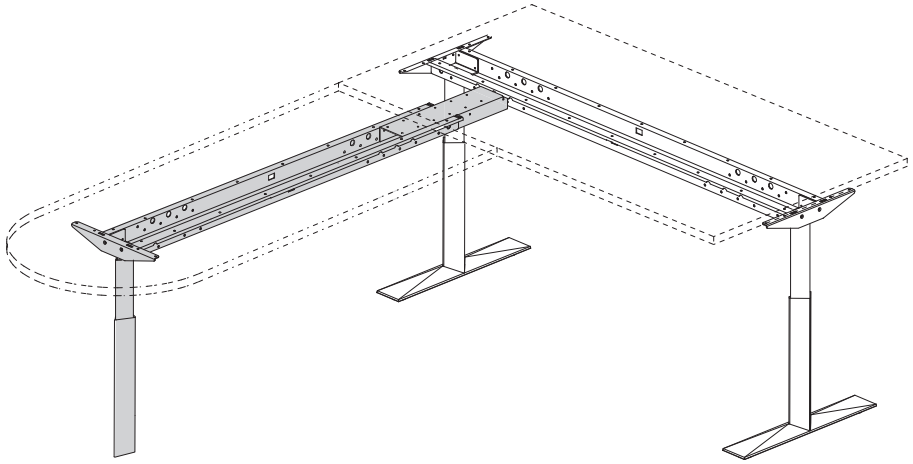


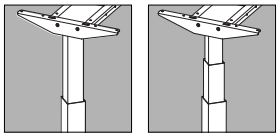
Incremental Click Crank

Incremental-adjust models can be adjusted manually in 1" increments using a 5mm Allen wrench.

Click-adjust models feature an adjustment mechanism on each leg that works like a ratchet. Pull upward on the handle to extend the height of the leg; to lower the table, depress the release handle and lift slightly.

Two people are recommended when adjusting height for incremental- and click-adjust models.



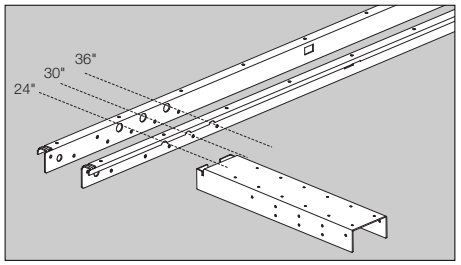


Single Stage Dual Stage

Single-stage electric models features a two-column leg, that nests inside itself when in the lower positions.

Dual-stage electric models features a three-column leg, that nests inside itself when in the lower positions.

Connections



Return mounting bracket is included with post-leg models for connection to main worksurface undersurface support rails. Post-leg is non-handed and can be attached to either end of an undersurface support rail to attach a 24", 30", or 36"D worksurfaces to the main worksurface as a return. Two flat brackets (model ACAWBP1), specified separately, are also required when mounting each return.

Mounting holes are located on the undersurface support rail in several locations to accommodate various return depths. For a 24"D main worksurface, bolt to the first set of holes; for a 30"D main worksurface, bolt to the middle set of holes; for a 36"D main worksurface, bolt to the end set of holes.

Planning Factors

Extension post-leg base model should be specified to match the adjustability mechanism of the main T-leg table base. For example, if specifying a single-stage electric-adjust height-adjustable T-leg as the main base, specify a single-stage electric-adjust extension post-leg base.

Extension post-leg bases are intended to be used as a return. Depending on the depth of the main worksurface and the depth of the extension worksurface, the post will be inset approximately 12"–15" from the end of the extension worksurface.

Height-Adjustable 90° and 120° Bases Product Information

Manual or Electric Adjust

Statement of Line	➤See page 21
Worksurfaces Product Information	45
Pricing	127
Finishes & Materials	209

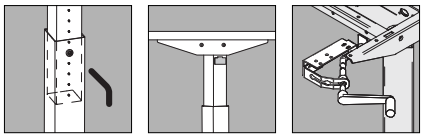
Details

IMPORTANT: Only Progressive Priority 1 3/16" worksurfaces are for use with Progressive post legs. Classic Priority worksurfaces and Systems worksurfaces are not applicable.

90° and 120° height-adjustable 3-leg bases are available in manual or electric adjust models. These bases must be used with a corresponding size 90° or 120° corner worksurface. Center leg is a post leg.

90° and 120° tables are freestanding use only; L- and U-configurations are not applicable.

T-leg adjustable bases is powder-coated steel. with a 2"D x 2"W upper column, a 2 3/8"D x 2 3/8"W lower column, and a die-cast aluminum base (foot). Glide provides 15/16" of adjustment.



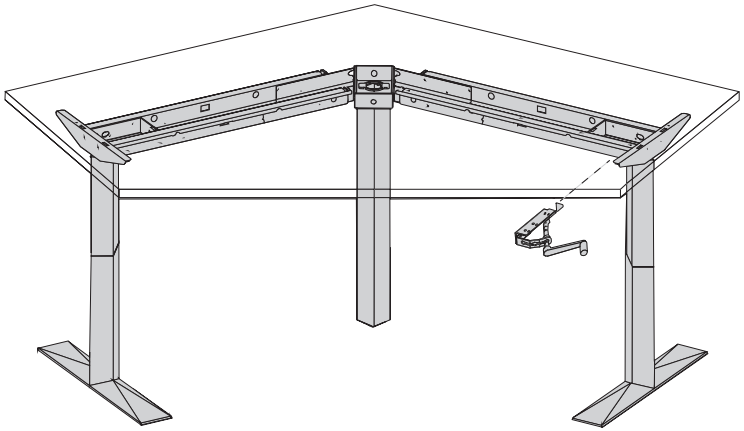
Incremental Click Crank

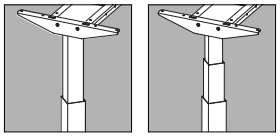
Incremental-adjust models can be adjusted manually in 1" increments using a 5mm Allen wrench.

Click-adjust models feature an adjustment mechanism on each leg that works like a ratchet. Pull upward on the handle to extend the height of the leg; to lower the table, depress the release handle and lift slightly.

Two people are recommended when adjusting height for incremental- and click-adjust models.

Crank-adjust models feature an adjustment handle located on the right side of the base. The handle pulls in and out, receding to store flat under the worksurface. The handle is mounted so that it swings to the side. Crank-adjust models include a hex rod that runs beneath the worksurface that allows both legs to raise and lower simultaneously; ships ready to assemble. These models are not applicable for L- or U-configurations.



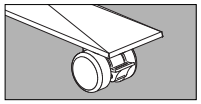


Single Stage Dual Stage

Single-stage electric models features a two-column leg, that nests inside itself when in the lower positions.

Dual-stage electric models features a three-column leg, that nests inside itself when in the lower positions.

Connections



Field installed caster kits are available; however, they are not directly applicable to a 90° or 120° 3-leg base with center post. To create a mobile 3-leg table, order two caster kits, a return foot kit model 53KFKTR for the post leg, and hardware bag #2417313 (service parts) for screw to attach the foot and casters.

Related Products

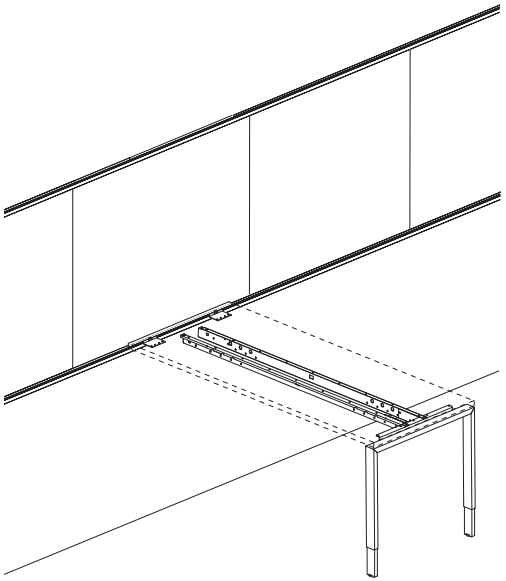
Integrating with Traxx® & Xsite®

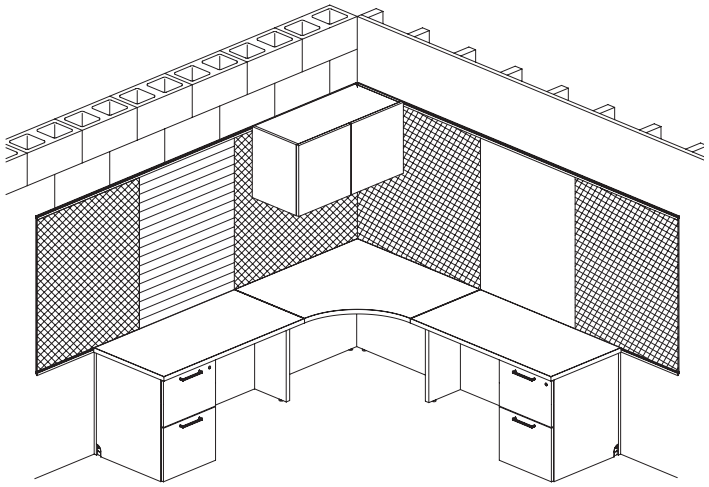
Application Guidelines

and Fixed Wall Applications

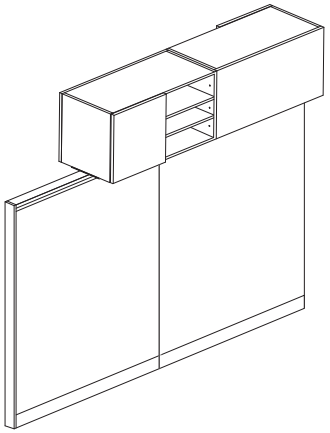
Typical Configurations	➤See page 8
Undersurface Support Rails	46
Starter Bracket Product Information	54
Center-Mount Storage Product Info	56



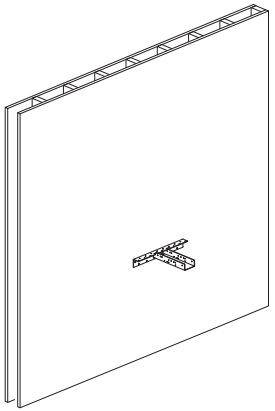
Progressive Priority Wall-Mounted Traxx Application



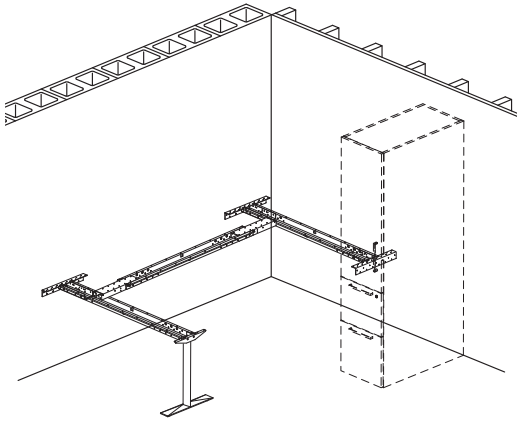
Classic and Progressive/Classic Priority Wall-Mounted Traxx Application



Xsite-Mounted Center-Mount Overhead Cabinets



Structural Wall-Mounted Application



Structural Wall-Mounted Application with Bridge Kit

Guidelines:

- Progressive and Classic Priority worksurfaces and overhead storage can also be attached to Traxx using standard Traxx brackets. Traxx should be installed at heights that correspond with Cetra or Xsite panels.
  ➤See the Systems Price List.
- For 48"W and wider Progressive worksurfaces, undersurface support rails must be specified. When using U- or open-frame legs, undersurface support rails must be used regardless of worksurface width.
- For 48"W or wider Classic worksurfaces, additional support is required. If spanning 48"W or less, pedestals can be used for end support without support rails.
- Progressive Priority worksurfaces, excluding surfaces with knife rim on all four sides, can also be attached to Xsite Traxx.
  ➤See the Xsite chapter in the Systems Price List.
- Progressive Priority center-mount overheads can also be mounted on top of Xsite panels using two Xsite transaction counter support brackets. Overheads must be the same length or longer than the frame it will be placed over. For example, a 48"W center-mount overhead can be mounted above a 30"W Xsite frame; however, a 30"W center-mount overhead cannot be mounted onto a 48"W Xsite frame. Not for use on Xsite stackable panels.
- Footprint center-mount overheads can be mounted on top of Priority stanchion U-legs.
  ➤See the Systems Price List.
- Follow the standard overhead/panel guidelines in the Xsite Price List for further Xsite integration.
- Starter brackets can also be mounted directly to most interior walls, including steel or wood stud walls, masonry block, or solid masonry walls. IMPORTANT: It is the responsibility of the installer to ensure that the connection to the studs is adequate to support the worksurface load.
- When using pedestal starter brackets in a fixed wall application, you can connect a bridge kit to create a U-unit configuration. Connect the undersurface rails to U-legs, open-frame legs, fixed T-legs, or any style of storage.

Perks® Power/Data

Overview

For Use with Priority

Perks Power/Data Drawer	➤See page 65
Single-Circuit Power	67
Four-Circuit Power	68
Hardwire Power	71

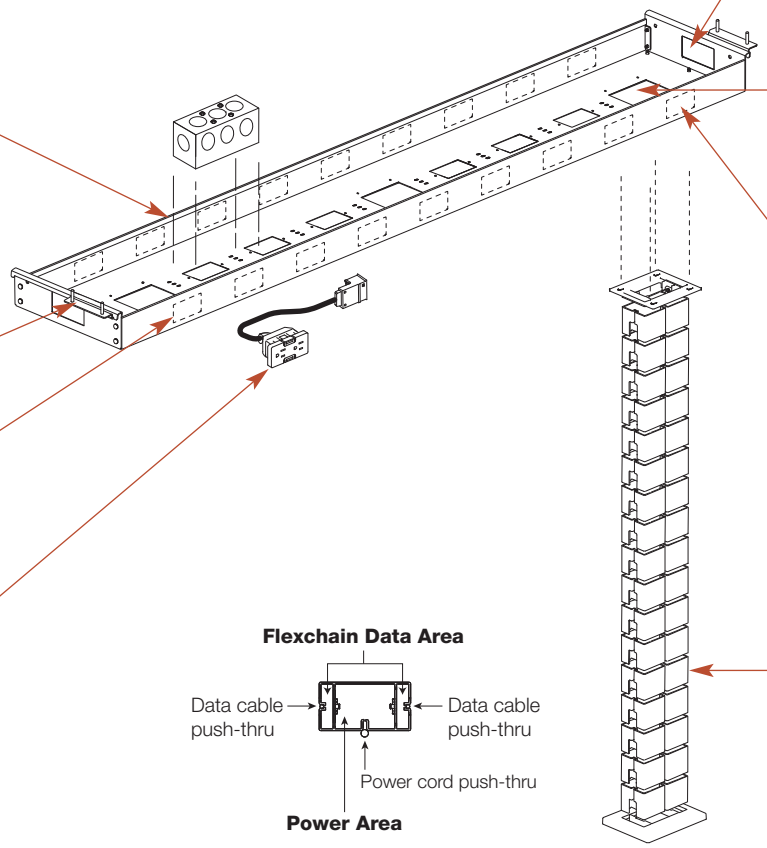
IMPORTANT: The power/data products shown in this section are part of the Perks offering.
➤See Perks Price List to specify.

Perks power/data sliding drawer brings both power and data to the underside of the worksurface. Unlike fixed troughs or baskets, the drawer pulls out to allow routing of excess cabling once the initial connection has been made.

Mounting hardware is field installed

Metal knock-outs in the front face of the drawer can be removed as needed for data or electrical outlets.

Single-circuit, four-circuit, and hardwire electrical components are for use in power/data drawers.



Cut-outs on the ends (sides) of the drawer allow jumpers to exit for connection inside the next drawer.

Large cut-outs on the bottom of the drawer allow power in-feed to enter the drawer.

Data/telecommunication modules can be used in the power/data drawer bottom cut-outs or the knock-outs on the front or back of the drawer.

Data cables can also be routed in the drawer to service the workstation.

Flexchain (shown) or expandable cable manager, along with undersurface cable managers, are required to protect 8-wire components from physical damage.

Circuitry Options:

Power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or multi-circuit; they cannot be used interchangeably.

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.
➤See page 67 for application guidelines.

Four-circuit components combine to form an 8-wire, 4-circuit, power system.
➤See page 68 for application guidelines.

Hardwire components are also available to allow field hardwiring of power within the power/data drawer where required by local codes.
➤See page 71 for application guidelines.

Perks® Power/Data Drawers

Product Information

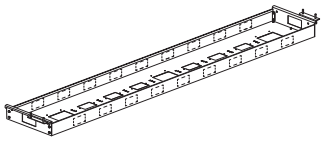
For Use with Priority

Power/Data Overview	➤See page 64
Single-Circuit Power	67
Four-Circuit Power	68
Hardwire Power	71

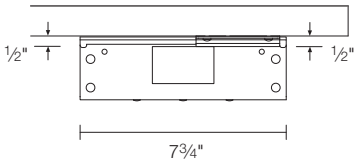
Details

IMPORTANT: The power /data products shown in this section are part of our Perks offering.
➤See Perks Price List to specify.

Power/data drawers are for use in open planning and freestanding applications. They are designed to work with 24", 30" and 36"W worksurfaces in single or back-to-back configurations.

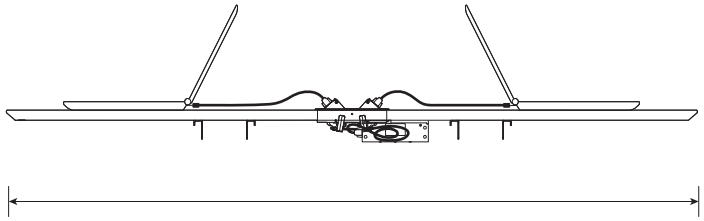


Power/data drawer is powder-coated metal tray that mounts to the underside of a worksurface using two bent sheet metal drawer slides.



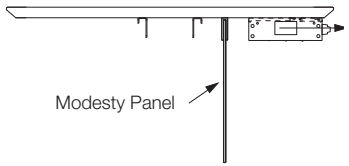
½" gap between the worksurface and the front and back edges of the drawer allows cords to exit. Cut-outs in the sides allow cables to pass to adjacent drawers.

Holes centered in the floor of the power/data drawer are provided to attach Perks laptop/equipment lock (model 99KLTCK).

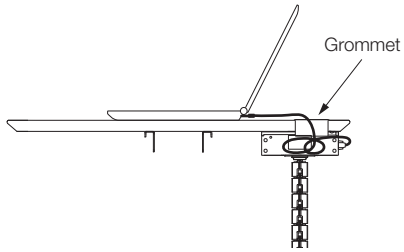


Connections

In single worksurface applications, the power/data drawer should be inset 1" from the back of the worksurface.



Modesty panel must be located behind the power/data drawer to allow the drawer to extend forward toward the approach side of the worksurface for cable access.



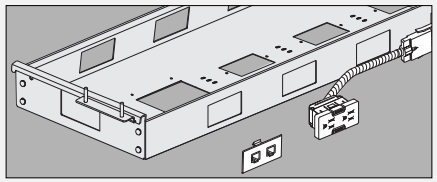
Factory-installed grommets in benching worksurfaces are located so excess cabling will fall directly into the drawer.

Planning Factors

Specify the drawer size based on the width of the surface to which it will attach. Specify the drawer to be 10" shorter than the worksurface width to allow for it to mount inboard of the surface support. For example, specify a 62"W drawer for a 72"W worksurface. If using a surface with storage, base your calculation on the unsupported surface dimension to determine drawer size.

90° and 120° corner worksurfaces can accommodate a power/data drawer. Specify model 99K26PDD for use with a 90° corner support frame; specify model 99K26PDD or 99K32PDD, for use with 120° corner support frame.

Knock-Outs & Cut-Outs:



Knockouts in the front and back of the drawer are compatible with industry-standard data faceplates, such as Tyco/Amp, Panduit, ECA and Hubbell. Individual knockouts are 1⅜" x 2¹¹⁄₁₆". Data and telecommunication modules are the responsibility of the user.

Floor of the drawer features similarly sized prepunched cut-outs for additional electrical or data outlets. Use these cut-outs for hardwire applications. Receptacles placed in the drawer bottom cut-outs must be installed facing the floor.

Each knockout is 6" on center. Distance between knockouts is 3¼".

Surface Width	*Drawer Width**	*Front Knockouts*	*Small Bottom Cut-outs*	*Large Flexchain Cut-outs*

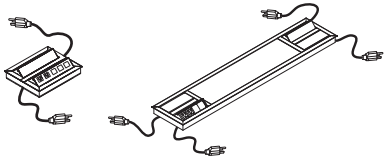
Perks® Power/Data Drawers

continued

Power/Data Overview	➤See page 64
Single-Circuit Power	67
Four-Circuit Power	68
Hardwire Power	71

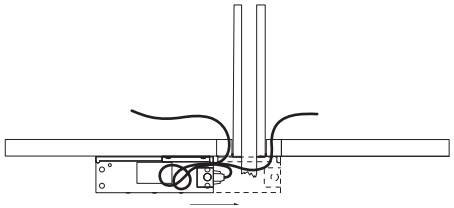


On 48" and 60"D worksurfaces (depicted above), power/data drawer can be located so that when the drawer is extended, it is located on the centerline of the surfaces. Both the 10" rectangular power/data center (KCU0810ELPDC) and the 40" rectangular power/data center (KCU0840ELPDC) will work in conjunction with the power/data drawer in this application.

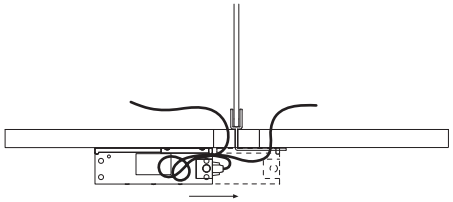
➤See the Tables Price List for 10" and 40" power/data centers.

➤See page 101 for factory cutout options.

Note: Not available on all surface widths due to interference with support legs.



Depending on user electrical needs, one drawer can be shared in back-to-back configurations. Some users may require an individual drawer.

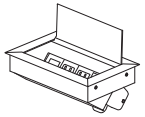


When using wire manager worksurfaces in back-to-back configurations, the power/data drawer can be shared between the users depending on user electrical needs. It should align with the wire manager. The drawer can extend forward to store the excess cabling under the wire manager.

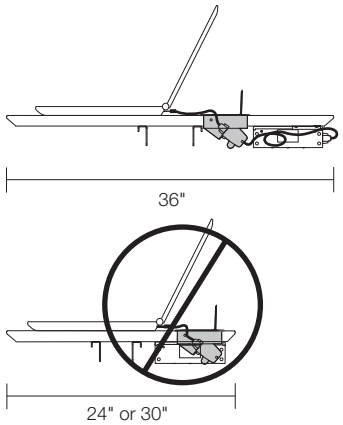
Power/data drawers are not intended for use against a wall or in conjunction with Systems panels.

Related Products

Factory-installed grommets in worksurfaces are located so excess cabling will fall directly into the drawer.



Power/data center (99KPDCAM) may be mounted above the surface on 36"D worksurfaces with a power/data drawer.



Use of a power/data center on a 24" or 30"D surface in conjunction with single power/data drawer is not possible due to clearance.

Note: Use two smaller power/data drawers on a single worksurface to allow power/data center, clamp-mounted accessories, or through-grommet accessories to extend below the surface between the power/data drawers.

Receptacle Recommendations:

86	8*	4–6

*Limited by circuit availability.

Perks® Single-Circuit Power

Application Guidelines

Power/Data Overview	➤See page 64
Perks Power/Data Drawer	65
Four-Circuit Power	68
Hardwire Power	71

IMPORTANT: The power/data products shown in this section are part of our Perks offering.
➤See Perks Price List to specify.

Perks power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or four-circuit; they cannot be used interchangeably.

Single-circuit components access power from a standard wall or floor electrical outlet. This flexible, non-sequential, daisy-chaining system allows power to be distributed to a maximum of eight duplex receptacles per power in-feed.

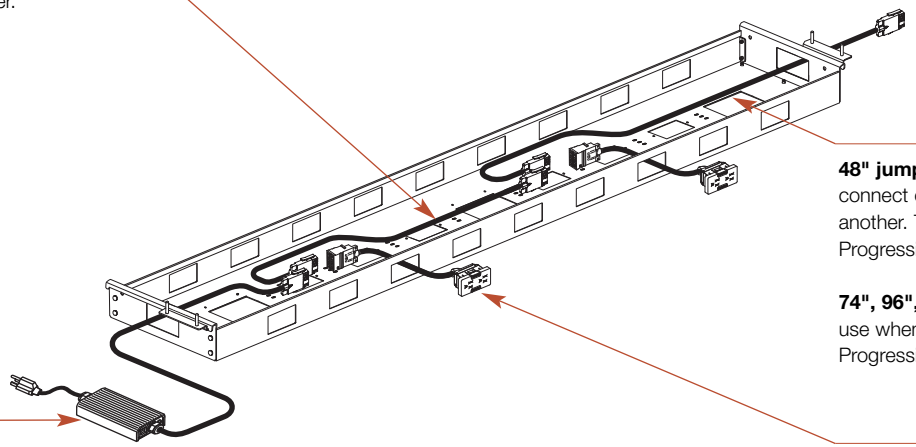
All single-circuit components are U.L. 962 Recognized and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.
Note: Any field modification of the electrical components voids the U.L. listing.

The following components comprise the single-circuit system:
- Power in-feed
- Duplex receptacles with an attached 12" modular feed
- 12", 24", 48", 74", 96" and 120" jumper cables

For ease in installation, jumper cables feature a squeeze-latch connector and will only plug in one way.

Power in-feed is a 10' cord with a "smart box" that monitors the number of receptacles connected. The system will automatically shut off if more than eight receptacles are plugged into the power in-feed. One end of the cord features a three-prong plug that plugs into a standard 110 volt, 15 amp wall or floor outlet.

12" and 24" jumper cables connect duplex receptacles inside the power/data drawer.



48" jumper cables can be used to connect one power/data drawer to another. They can span over one Progressive Priority 15"W pedestal.

74", 96", and 120" jumpers are for use when spanning over Priority Progressive storage.

Power in-feed sits on the bottom of a power/data drawer.

Duplex receptacle

Duplex receptacles snap into the power/data drawer. Receptacles feature a 12" modular feed with a double-out interface. Power is brought to the receptacle by a power in-feed or jumper cable, and power is passed to adjacent components by a jumper cable forming a daisychain.
➤See page 66 for receptacle recommendation chart.

Jumper cables feature a squeeze-latch connector.

When planning jumper cable lengths to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

For jumping between receptacles inside a power/data drawer, 12" jumpers are recommended for drawers that are 50"W or smaller; 24" jumpers are for 56"W and wider drawers.

In 120° applications, 24" jumper cables can be used to jump from one power/data drawer to another.

Jumpers must be secured every 24" when spanning under the worksurfaces.

This system should not be plugged into a GFCI outlet receptacle. The single-circuit system contains an overload breaker, and the sensing circuit in the "smart box" can affect the sensitivity of a GFCI power feed, causing the GFCI duplex receptacle to trip.

Single-circuit mini-adapt power module features an 18" modular feed with a double-over interface. The unit contains two receptacles for desktop power access. A hand-tightened clamp on the back of the unit allows flexibility for positioning it at the back of the worksurface.

Perks® Four-Circuit Power

Application Guidelines

Power/Data Overview	➤See page 64
Perks Power/Data Drawer	65
Single-Circuit Power	67
Hardwire Power	71

Perks power/data drawers accept single-circuit or four-circuit electrical components. Components are specific to either single or four-circuit; they cannot be used interchangeably.

Four-circuit components combine to form an 8-wire, 4-circuit, power system.

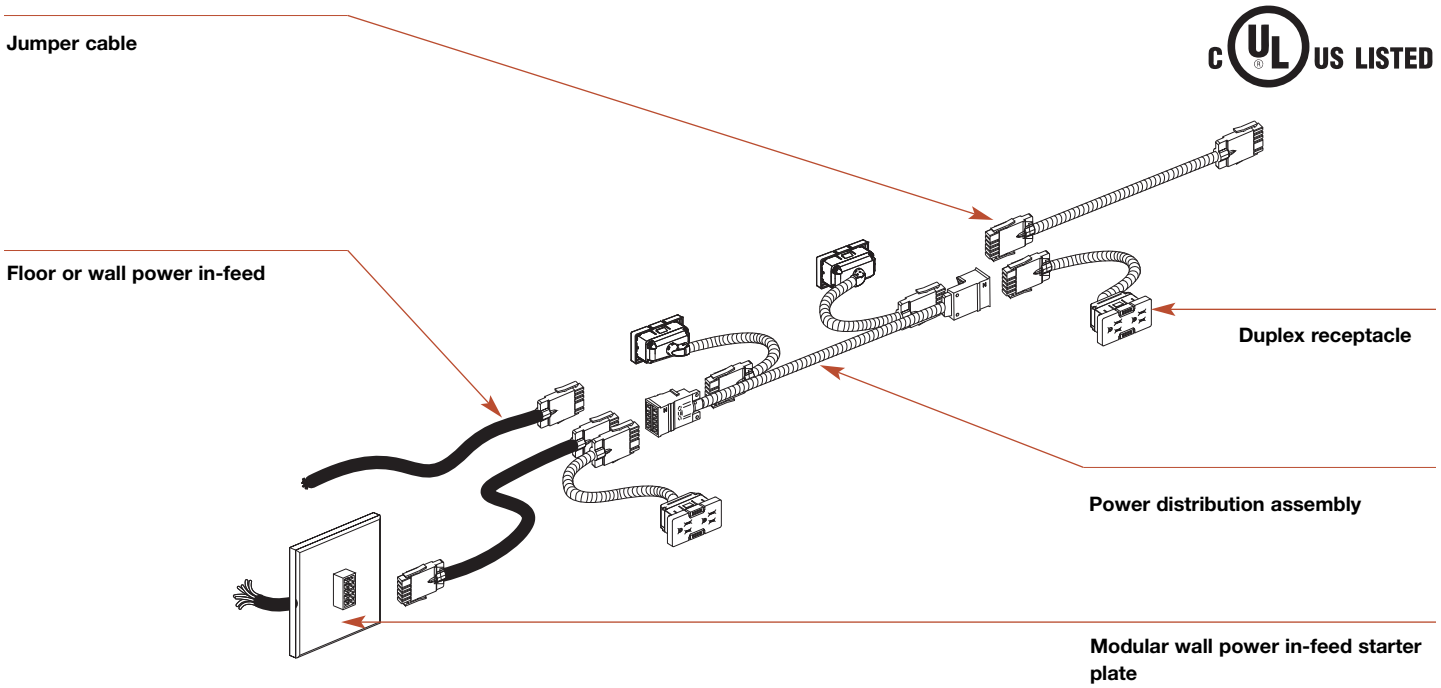
All four-circuit components are U.L. 1286 Listed and comply with the National Electrical Code (NEC). Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.
Note: Any field modification of the electrical components voids the U.L. listing.

The following components comprise the four-circuit system:
- Hardwire power in-feeds (two options) or ceiling power entry
- Power distribution assemblies
- Duplex receptacles
- Jumper cables

For ease in installation, the connectors will only plug in one way.

There are three ways to bring power to the system:
- 10' floor/wall power in-feed;
- Modular wall starter and modular 10' power in-feed; or
- 12' ceiling power in-feed

IMPORTANT: Power in-feeds entering the power/data drawer from the floor or wall must be secured/protected by a flexchain, expandable cable manager, vertical cable manager, or secured to the legs.



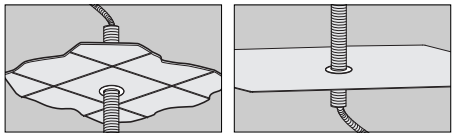
Floor/wall power in-feed features a 10' liquid tight conduit with a pigtail on one end that must be wired by a licensed electrician to a wall or floor-mounted junction box. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

Modular wall power in-feed features a 10' modular conduit with a squeeze-latch connector on each end. One end must connect to modular wall starter, specified separately, the other end connects to a power distribution assembly. Modular wall starter must be wired to building power by licensed electrician.
Note: This modular power in-feed option allows you to unplug the cable from the wall and store away when not in use.

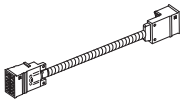
Ceiling power in-feed features a 12' flexible, galvanized metal conduit with a pigtail on one end that must be wired by a licensed electrician to a junction box in the ceiling. The other end features a single squeeze-latch connector to attach to a power distribution assembly.

Power/Data Overview	➤See page 64
Perks Power/Data Drawer	65
Single-Circuit Power	67
Hardwire Power	71

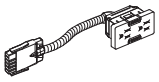
Power/data flexible ceiling pole is available to conceal ceiling power in-feed and other data cables. Pole is a flexible, metal conduit. Outer diameter of pole is 2 1/8"; inner diameter is 2".



Trim plates can be specified for field installation to conceal the intersection of the flexible ceiling pole at the ceiling and worksurface.



Power distribution assembly supplies power for four duplex receptacles within a power/data drawer. Power distribution assemblies are 36" long.



Duplex receptacles feature a 12" flexible, metal conduit and a single squeeze-latch connector to attach it to the power distribution assembly.

Receptacle models are numbered 1, 2, 3, 4, or 5 to correspond to the circuit to which they will provide access.

Jumper cables feature a squeeze-latch connector on each end and are available in 24", 36", 48", 74", 96" and 120" widths. Jumpers are encased in a flexible, galvanized metal conduit.

Use 24" and 36" jumper cables inside the power/data drawer to connect power distribution assemblies and duplex receptacles.

When planning jumper cable lengths to connect two adjacent power/data drawers, calculate that an additional 24" of the cable is required inside the drawers (12" per drawer) to make connection to the receptacles' modular feeds.

Use a 48" jumper cables to connect a two power/data drawers on adjacent surfaces. 48" jumpers may also be used to span over one Priority Progressive 15"W pedestal.

78", 96", and 120" jumpers are for use when spanning over Priority Progressive storage.

Jumpers must be secured every 24" when spanning under the worksurfaces.

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

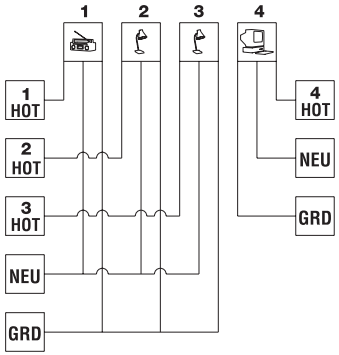
Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Hardware necessary for installation is shipped with all components.

Two wiring configurations are possible—3 and 1 or 2 and 2—utilizing the same components.

Duplex receptacles used for both types of wiring configurations are the same. This simplifies specifications and allows a faster understanding of the system.
➤See page 66 for receptacle recommendation chart.

A maximum of 13 duplex receptacles can be accommodated per circuit.

3 and 1 (8-wire):

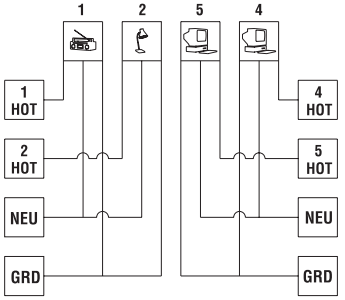


- Three utility circuits share a neutral and common ground.
- One circuit with a DEDICATED hot, neutral and ground.
- Utilize receptacles #1, 2, 3 for utility and #4 for the DEDICATED ground circuit.

Circuits 1, 2, and 3 can be used for general electrical needs. Customarily, one or more of the circuits is reserved for lighting or other everyday uses, which allows control by central or master switching.

Circuit 4 consists of three separate conductors (hot, neutral, and ground) and meets the BIFMA/ANSI definition for a dedicated circuit.

2 and 2 (8-wire):



- Two DESIGNATED utility circuits and two DESIGNATED computer circuits.
- Utilize receptacles #1 and #2 for the designated utility circuits and receptacles #4 and #5 for the designated computer circuits.

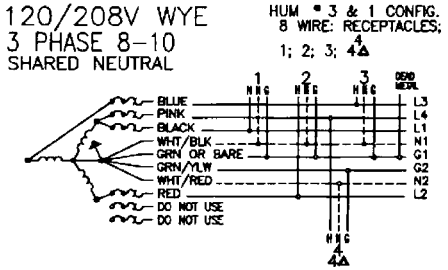
Note: Receptacle #3 cannot be used in the 2 and 2 configuration. If receptacle #3 is used, possible cross feed or interference from utility circuits one and two can be introduced to computer circuits.

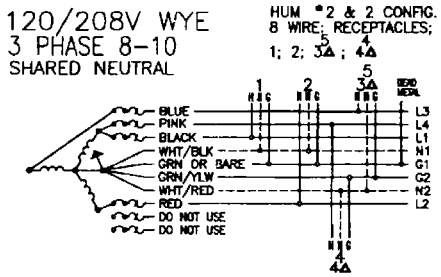
Circuits 1 and 2 provide a pair of designated circuits for general electrical needs, as described for the 3 & 1.

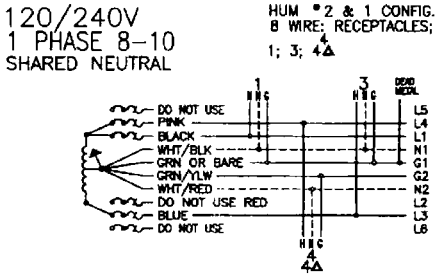
Circuits 4 and 5 provide a pair of designated circuits for computer applications.

Power/Data Overview	➤See page 64
Perks Power/Data Drawer	65
Single-Circuit Power	67
Hardwire Power	71

The 8-wire, four-circuit configuration provides up to four circuits. Ideally a 4-wire, WYE, 208 volt service provides the best utilization.







Hardwire Power

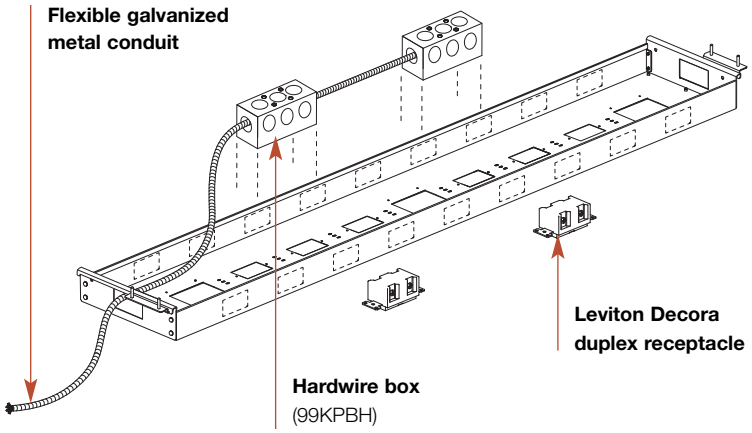
Power/Data Overview	➤See page 64
Perks Power/Data Drawer	65
Single-Circuit Power	67
Four-Circuit Power	68

City of Chicago:

The City of Chicago requires that an electrician hardwire the electrical components to the furniture. The electrician can install hardwire boxes into the bottom of the power/data drawer utilizing the pre-punched rectangular cut-outs. Holes for attaching the duplex to the hardwire box are also provided.

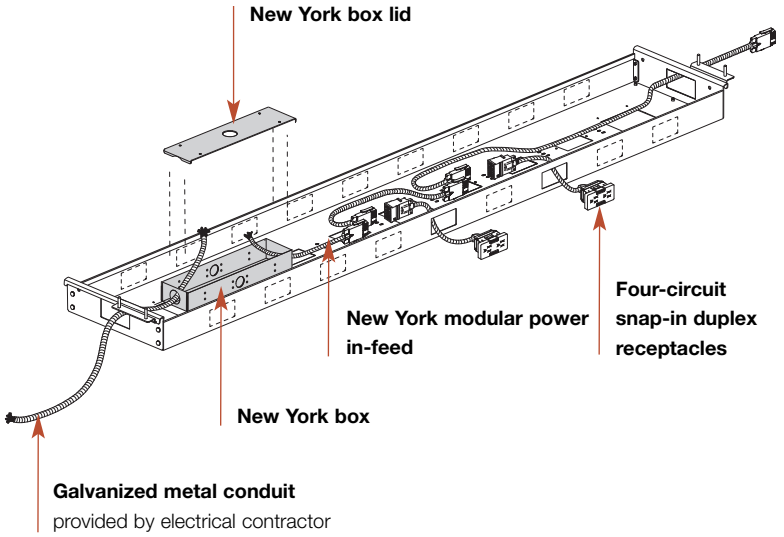
Hardwired receptacles must be placed in the drawer bottom knockouts and be installed facing the floor.

Flexible galvanized metal conduit is recommended so that the power/data drawer can still be extended for excess cable storage.



City of New York:

The City of New York requires that an electrician to make the connection from the floor entry to the modular electrical system. The electrician can wire the floor/wall power in-feed hardwire boxes into the bottom of the power/data drawer using the pre-punched rectangular cut-outs. Power entry for NYC (model 99KP4FPFNYC) includes a modular floor/wall power in-feed, hardwire box and lid, 2' galvanized metal conduit to encase the power in-feed (not shown), and cover plate.



IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment. Hardware necessary for installation is shipped with all components.

Hardwire components are also available to allow field hardwiring of power within the power/data drawer where required by local codes.

Assembled & Modular Casegoods

Overview

Statement of Line ➤See page 22
Assembled Casegoods Product Info 73
Modular Worksurfaces Product Info 74
Finishes & Materials 209

Fully assembled and modular casegoods fit an extensive range of design, application, space, and budget challenges.

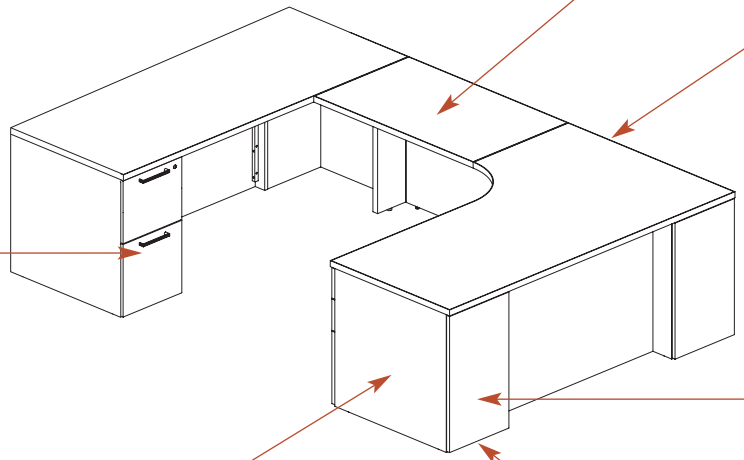
Wood veneers on wood and laminate with wood rim models are carefully selected and matched to assure proper balance and consistency.

Chassis and drawer/door fronts on laminate models feature thermally fused laminate (TFL). Grain direction runs top to bottom.

Laminate models offer great flexibility in finish selections. The worksurface, rim, drawer/door fronts, and chassis may be specified in different colors.

Pedestals are full height and letter width on assembled units. They connect directly to surfaces.

Drawer fronts are ¾"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.



Worksurfaces are 1 3/16"-thick, 3-ply, balanced construction and available in wood or high-pressure laminate (HPL).

Worksurface rims are ⅛" thick. Softened and reed rim profiles appear on all four edges of the worksurface. Knife rim profile appears on the user edge and overhangs by 1¼"; side and back edges are flat.
Exception: Desks feature knife rim on the approach and user sides.

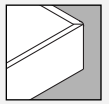
Hinged access doors allow access to cable routing compartment. Both single- and double-pedestal desks feature two access doors, one on the left and one on the right on the approach side.

Opening below hinged access door allows cord to enter or exit the cable routing compartment on the approach side.

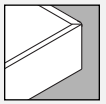
Materials:

W Wood worksurface, rim, and chassis
LW Laminate worksurface, wood rim and wood chassis
L Laminate worksurface, PVC rim, and chassis

Worksurface Rim Profiles:



P Softened PVC rim



F Softened wood rim

M Reed wood rim

S Knife wood rim

Laminate models are available with a softened PVC (P) rim profile. Wood and laminate/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

Pull Options:

Overview	72
Pricing	135
Finishes & Materials	209

Details

Exterior wood surfaces are available in the following veneers:
- Cherry (plain sliced, slip matched)
- Maple (plain sliced, slip matched)
- Walnut (plain sliced, book matched)
- Sapele (quarter sliced, slip matched) premium veneer; upcharge applies
- Zebrawood premium composite veneer; upcharge applies

Joints are securely fastened with dowels and mechanical fasteners to ensure maximum strength.

Drawer fronts are ¾"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.

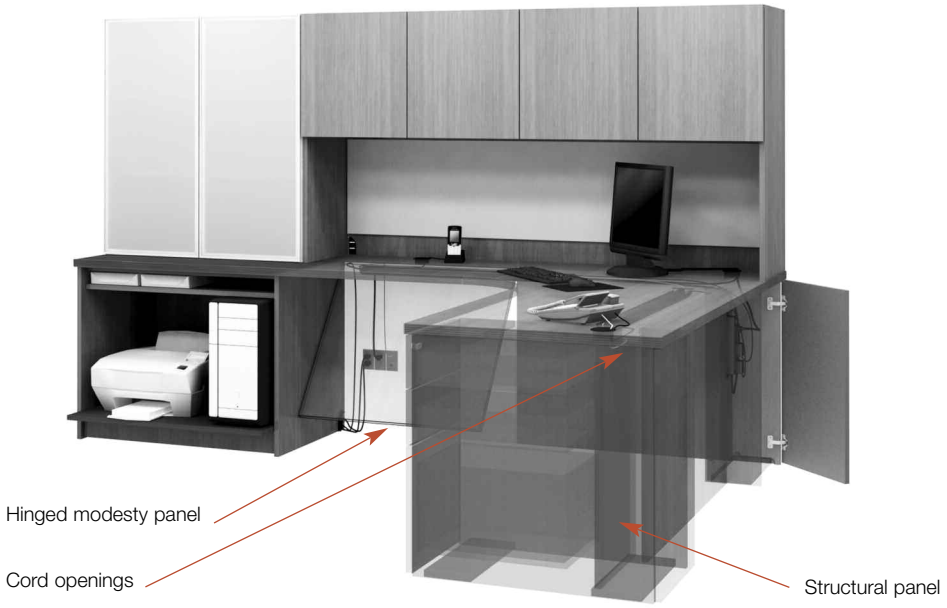
Drawer sides and back are ½" thick and wrapped in natural woodgrain vinyl. Bottoms are 3/16" thick.

Optional wood drawers are available on wood and laminate with wood rim/chassis units. Drawer sides and back are ½" thick with veneer faces. Bottoms are ¼" thick with veneer faces. Interiors are sealed, sanded, and finished with a clear durable topcoat.

Drawer suspensions feature black slides with precision steel ball bearings to ensure long-lasting, quiet, smooth operation. Box, file, and lateral file drawers feature full extension slides.

Black filing rods are standard in all file drawers to accommodate various filing requirements.
➤See page 237 for filing capabilities.

Face-mounted locks are standard on all desks, credenzas, returns, and undersurface pedestals. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.
➤See page 232 for lock information.
Note: Details above also apply to Priority Classic modular worksurfaces, support, and storage.



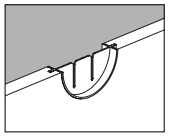
Technology Features

Hinged access doors allow access to cable routing compartment. Both single and double pedestal desks feature two access doors, one on the left and one on the right on the approach side.

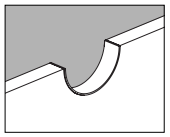
Opening below hinged access door allows cord to enter or exit the cable routing compartment on the approach side.

Structural panel separates the drawers from the cable routing compartment to prevent unwanted access to the drawer contents.

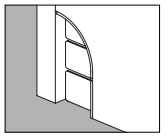
Hinged modesty panel, standard on assembled bridges, returns, kneespace, and single pedestal credenzas, swings inward to allow access to wall outlets. It lifts from the floor and is held in place by leveling feet.



Black half-round grommet is available factory installed at the top center of hinged modesty panels; upcharge applies.



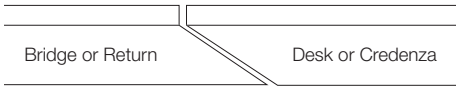
Cord openings are standard on fully assembled desks on the kneespace side of each pedestal just below the worksurface, as well as on the user's side of end panels on single-pedestal desks and single-pedestal credenzas for routing cables to return units.



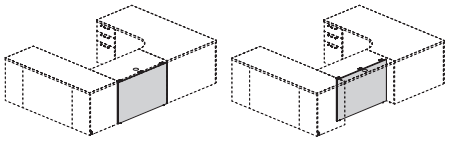
Two cord openings with black grommets—one in the back lower corner of each pedestal side panel—are standard on assembled returns and credenzas.

A variety of factory-installed worksurface grommet options are available.
➤See page 150.

Connections



Returns and bridges with knife rim profile have a reverse knife edge on abutting edges to provide a flush fit with the adjoining surface.



Flush installation Recessed installation

Hinged modesty panels can be installed in a flush or recessed location. Flush installation visually lines up modesty panel with the adjoining side panels for an exposed orientation. Recessed installation insets modesty panel 6" from the back edge of the worksurfaces to create an area to store cords and cables. Recessed modesty panel allows the whole unit to be placed flush against the wall.

IMPORTANT: Single-pedestal desks and single-pedestal credenzas are not intended for use as standalone units.

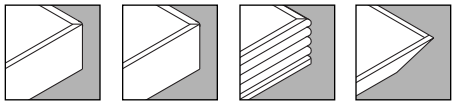
Modular Worksurfaces

Statement of Line	➤See page 22
Overview	72
Pricing	145
Finishes & Materials	209

Details

Modular worksurfaces are sized in 6" increments that correspond to Priority pedestals and storage. Appropriate bracketry is included. They are available in laminate, laminate with a wood rim, and wood.

IMPORTANT: Fully assembled models and modular components may be used together in the same configuration.



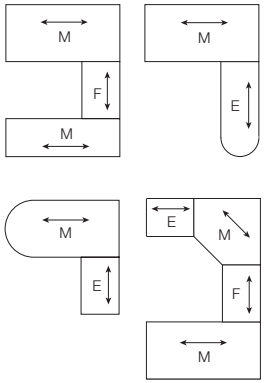
P Softened PVC rim | **F** Softened wood rim | **M** Reed wood rim | **S** Knife wood rim

Laminate models are available with a softened PVC (P) rim profile.

Wood and laminate/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

Attachment brackets based on the application specified are standard on all worksurface shapes.

Connections



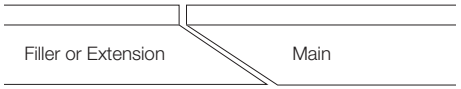
Note: Arrows on illustration indicate grain direction.

Modular worksurfaces are interchangeable; however, to receive the correct brackets, the application—main (M), extension (E), or filler (F)—must be specified. Main surfaces receive no attachment hardware; extension surfaces receive 2 flat brackets; and filler surfaces receive 4 flat brackets.
➤See pricing pages for bracketry options by worksurface shape.

If the application or position of the worksurface needs to be changed, it can be accomplished by changing the bracketry.
Exception: All desk worksurfaces must be used as a "main" worksurface.

24"D rectangular worksurfaces are for use with 24"D pedestals.

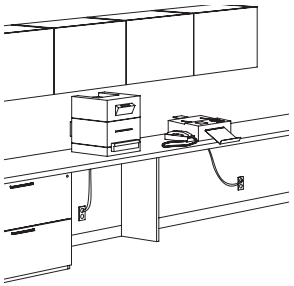
Worksurfaces can be scribed on site to conform with oblique angles, irregular column placement, and historical preservation guidelines. These are just a few instances where this capability becomes an asset.



Filler and extension surfaces with knife rim profile have a reverse knife edge on abutting edges to provide a flush fit with the adjoining surface. Back and exposed side edge of extension worksurfaces are flat.

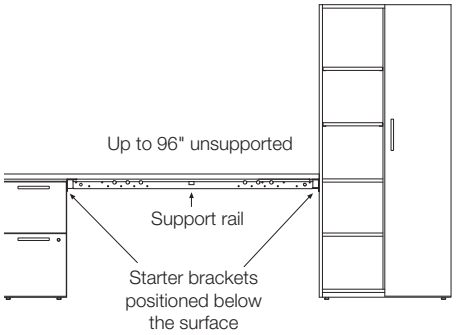
Main knife rim worksurfaces cannot be used adjacent to a corner worksurface.

Planning Factors



The maximum recommended span of an unsupported worksurface is 48" using Classic storage and support; longer distances require additional support.

A variety of factory-installed worksurface grommet options are available.
➤See page 150.



The maximum span for an unsupported worksurface can be extended to 96" between Classic pedestals, end panels, or storage units by utilizing Progressive starter brackets and appropriately sized undersurface support rails. Starter brackets would be placed at the side of the storage unit and/or end panels even with the top of the pedestal. Rails would connect to starter brackets at both ends. Storage units will be defaced.
For example: To span 72" unsupported, specify a 72"W (nominal) undersurface support rail and a starter bracket for each storage unit/end panel.
➤See the Progressive planning section for more information.

Consider the load a worksurface will carry when planning support. Additional support is recommended for surfaces where heavy equipment will be placed. Support can be placed where needed without the limitations of predrilled or predetermined locations.
➤See following page for modular support product information.

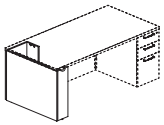
Modular Support

Statement of Line	➤See page 22
Overview	72
Pricing	157
Finishes & Materials	209

Details

IMPORTANT: Fully assembled models and modular components may be used together in the same configuration.

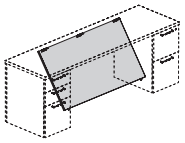
Modular support components are designed to support classic worksurfaces.



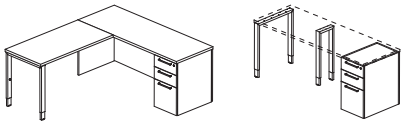
End supports can support the non-pedestal end of a worksurface to create a single pedestal desk or credenza for use in an L- or U-configuration. End support consists of an end panel, back/modesty panel, and two support panels. The support panel on the front user's side include a cutout for routing cables from the desk to a return. End supports for use with 24" or 25" worksurfaces include a second cutout on the kneespace support panel.

Undersurface pedestals, low storage with support drawers or shelves, and modesty panel/cable surround can also support the end of worksurfaces.

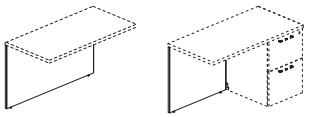
➤See page 25 for Classic storage components.
➤See page 78 for Progressive/Classic storage components.



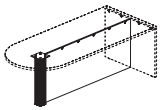
Hinged modesty panels are for use in conjunction with undersurface pedestals and worksurfaces to create an enclosed kneewell. A black half-round grommet is available factory-installed at the top center on hinged modesty panels; upcharge applies.



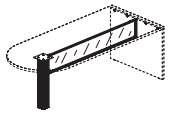
Classic height-adjustable U-leg is 27¾"H and adjusts from 24¾"–32¼" in ⅜" increments. U-legs can be used to displace wood end panels on desks, returns or modular return and extension worksurfaces; not intended for use to create a freestanding table. End U-legs are available in 24", 30", and 36"D. Mid-support U-leg is 10"D and is for use on 24"D, 30"D, and 36"D surfaces only. All adjustable U-legs feature a button that indexes into notches in the inner leg member. By depressing the button, the leg releases the lower leg assembly. This gives the user the ability to change the height as needed throughout the day. Legs can be used with classic Priority, Definition or Footprint worksurfaces. For 1⅜16" worksurfaces, support is required every 48"; for 1⅝16" worksurfaces, support is required every 60".



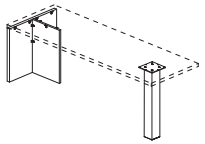
Hinged modesty panels are used to build bridges and returns along with worksurfaces and pedestals.



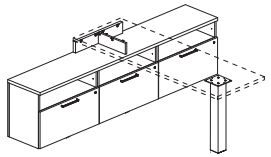
Full-height wood or laminate modesty panels are for use in conjunction with rectangular, P-shaped, or U-shaped worksurfaces, an end panel, and a square metal column base or wood half-cylinder base. Grain runs horizontal on laminate model. Field installation of grommets is recommended to ensure placement of the grommet on the user's side of the modesty panel.



Partial-height glass modesty panels are for use in with P-or U-shaped worksurfaces, an end panel, and a square metal column base or wood half-cylinder base.



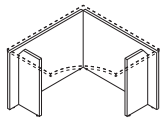
T-leg end panels can also be used to support the end of a worksurface when there is no pedestal. Modesty panel cannot be used in conjunction with T-leg end panels. They cannot be used with a modesty panel.



5" and 11" T-leg end panels are for use on top of low storage to support worksurfaces. 5"H model sits atop 22"H storage; 11"H model is for use with 15"H storage. Component top is required.

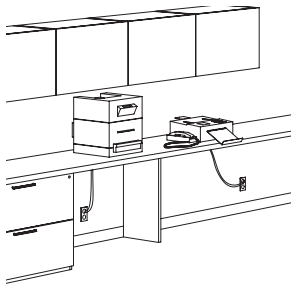
Connections

Hinged modesty panel always spans between two pedestals or between a pedestal and an end-support panel. It cannot extend behind the back of a pedestal. They attach to the underside of the worksurface and do not deface the sides of adjacent pedestals. They can be installed flush with pedestal back or recessed. Hinge feature on modesty panels allows easy access to wall power.



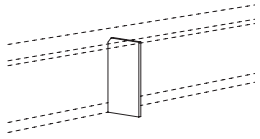
Corner-support panels are used with corner worksurface. Assembly includes modesty and wing support panels. Corner worksurface is specified separately.

Planning Factors



The maximum recommended span of an unsupported worksurface is 48"; longer distances require additional support.

Consider the load a worksurface will carry when planning support. Additional support is recommended for surfaces where heavy equipment will be placed. Support can be placed where needed without the limitations of predrilled or predetermined locations.



12"D worksurface mid-support panel (model 53K1128SSW) can be used for additional support. Worksurface support panel does not allow modesty panel to hinge forward. Back edge is chamfered for cable management.

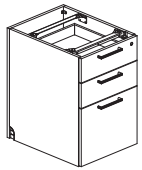
Details



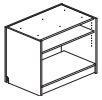
Classic undersurface pedestals feature an open top or unfinished and a fully finished back panel. Pedestals connect directly to worksurfaces. Undersurface pedestals are available as:

- Box/box/file
- File/file
- Two-drawer lateral file
- Multi-file
- Hinged-door storage
- Printer/CPU storage

IMPORTANT: Classic storage models with open tops must be used with Classic modular worksurfaces, specified separately; they cannot be used with Progressive knife rim worksurfaces.

Three-drawer and four-drawer lateral files with open top are also available. These models have an unfinished back.

Locks are located in the upper right corner of the top drawer face.



Printer/CPU storage organizes printers, CPUs, and paper for easy accessibility.
