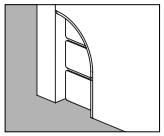
Support drawers and shelves can be used as support on top of low storage. 5"H support drawer unit is for use with 22"H low storage; 11"H support shelf is for use with 15"H low storage. They replace the need for a T-leg end panel as worksurface support on low storage. Component top for low storage must be specified.

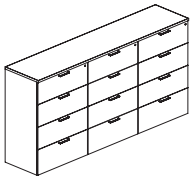
Finished top two-, three-, and four-drawer lateral files feature an interlock mechanism that allows only one drawer to be open at a time. Two-drawer units feature a finished back and cord openings; three- and four-drawer units have an unfinished back and no cord openings.



24"D pedestals feature two cord openings with black grommets—one in the back lower corner of each side panel.

30" and 36"D hinged-door pedestals include one fixed shelf and no cord openings.

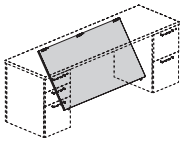
Connections



Ganging adjacent lateral files is recommended.

Planning Factors

Classic undersurface pedestals can support the end of Classic worksurfaces. Pedestal depth must match desk worksurface end depth.



Hinged modesty panel always spans between two pedestals or between a pedestal and an end-support panel. It cannot extend behind the back of a pedestal.

Pull Options:

Storage & Tables

Overview

Furniture that works in both Classic & Progressive applications

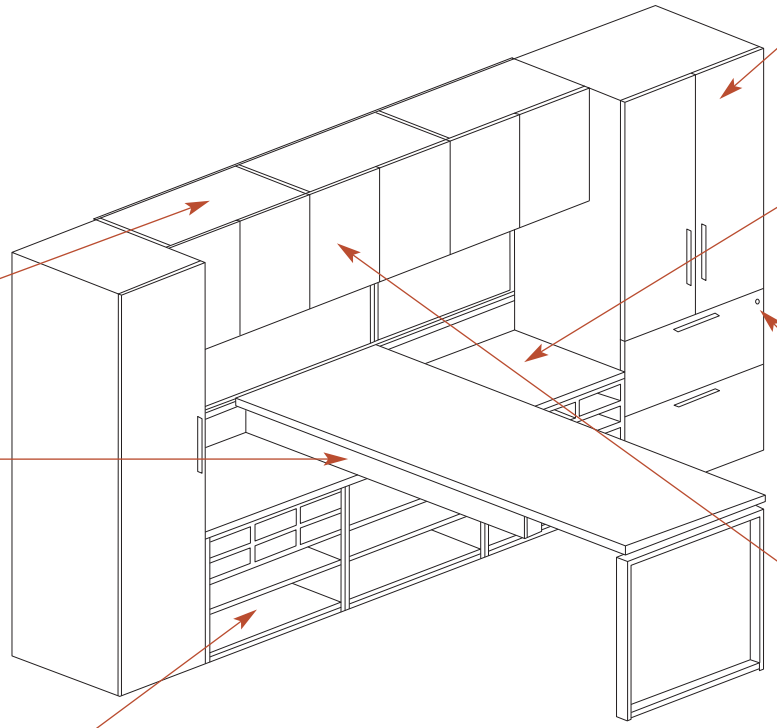
Typical Configurations	➤See page 8
Statement of Line	28
Base Requirements	87
Finishes & Materials	209

Products in this section are universal to both Progressive and Classic styles. Items not mounted below the worksurface, such as low storage, overheads, highback organizers, vertical storage, and tables, can complement both classic and progressive office layouts.

Overheads, highback organizers, and set-on-surface storage are available in a variety of door selections.

Modesty panel/cable surround conceals power and data below the surface and can also provide support in progressive and classic applications.

Utilize low storage for storage, extra work area, occasional seating and to divide space.



Vertical storage can be used in private office, open plan, and benching applications.

Low storage, when used with component worksurfaces and additional support such as a short end panels or modesty panel/cable surround, can provide support for worksurfaces and create a layered affect to the workstation.

Face-mounted locks are standard on all undersurface storage and optional on storage doors above the worksurface.

Progressive/classic overheads can be wall-mounted or Traxx-mounted as shown here.

Stand-alone tables utilizing fixed, round, or square bases complete the office.

➤See page 6 for Progressive and Classic distinctives.

Undersurface & Low Storage

Product Information

Abbreviation Key	➤See page 00
Product Information	00
Finishes & Materials	00
Locking Information	00

Details

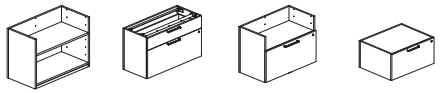
Pedestals and low storage units are available in wood or laminate and are finished on all sides. Laminate units offer flexibility in color selection in on drawer fronts, back and chassis. This option enables you to utilize storage elements to create an environment to meet your brand and image.

Anti-tip mechanism and lock are standard on all mobile pedestals and low storage with drawers. Mobile low storage units also include counterweights.

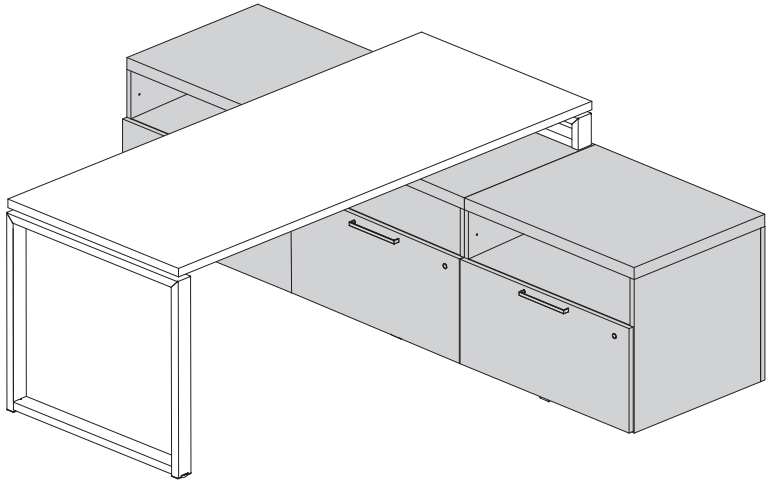
Mobile cushion-top pedestal provides occasional seating as well as storage. The 24"H box/file mobile pedestal easily stows under surfaces in both progressive and classic applications.

Mobile box/box/file and file/file pedestals stow under surfaces in Classic applications only. IMPORTANT: In Progressive applications, these pedestals interfere with the undersurface support rails; they can be used next to a progressive surface but not underneath.

23"H active file provides two divided sections in the top area to place papers and folders for easy access to work-in-progress. The open slot in the rear of the pedestal allows for hanging Pendaflex® folders for hot project files. Lock in bottom drawer locks both box and file drawer. Active file easily stores under surface of Progressive and Classic offices.



Low storage is available freestanding or mobile. Units are available in two heights (15 3/16" and 21 3/8"H), two widths (30" and 36"W), and in two depths (16" and 24"D). Low storage is available in a variety of configurations, including open bookcase, open/lateral file and box/lateral file.



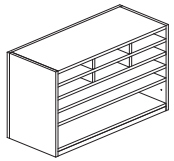
Mobile low storage units feature inset casters enabling the mobile and freestanding units to align when sitting next to each other. Mobile low storage cannot be used to support worksurfaces or other storage.

Priority low storage bottom drawers align with other Priority storage units to keep a consistent visual within the office.

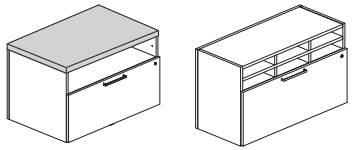
Connections

Use component tops to span multiple low storage units for a cleaner aesthetic.

15"H open bookcase features three holes spaced 3 3/16" apart and accepts either three straight or organizer shelves, specified separately.



22"H open bookcase features a fixed shelf. There are two holes spaced 3 3/16" apart above the fixed shelf to accept either two straight or organizer shelves. There are 3 holes below the fixed shelf to accept either three straight shelves or organizer shelves, specified separately.



22"H open/lateral file unit accepts either two straight or organizer shelves in open area. If using as a pedestal cushion or component top with an open/lateral, shelves cannot be used in the top position.

Planning Factors

Component tops in either softened or knife rim are required for the box/lateral file units. Knife rim component tops extend ¼" beyond the drawer fronts.

If using low height storage in conjunction with end panels for support, 1 3/16" component tops are required to span the low storage. 5" or 11" end panels are then placed atop the storage and properly align to undersurface height.

If using low height storage as freestanding units, component tops are required for the box/lateral unit but not required on other units.

Low storage cushion, specified separately, is the same thickness as the component tops (1 3/16") for visual alignment. In depth, the pedestal cushion aligns with the drawer fronts on the low height storage.

Open areas in the low storage accept either straight or organizer shelves. Organizer shelves should be installed with the organizer leg pointed downward. To add color contrast to units, specify shelves in different finish or material than the low storage unit.

33"H highback organizers can be used above freestanding, fixed-height low storage with component tops to divide space and provide additional storage.

If using low storage in a freestanding application without component tops or with a high-back organizer, pedestal ganging bracket (KACGB1) is recommended.

Modesty Panel/Cable Surround

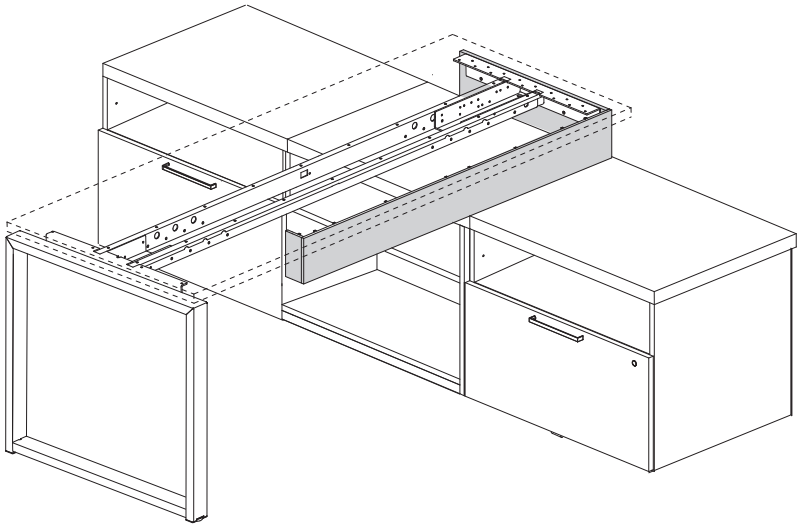
Product Information

Overview	➤See page 77
Statement of Line	29
Pricing	173
Finishes & Materials	209

Details

Modesty panel/cable surround is available in wood 6"H or 12"H models to conceal power and data cables below the surface.

Modesty panel/cable surround can be used in either Progressive or Classic applications. It features 1 3/16"-thick end panels and 3/4"-thick modesty panels.



Planning Factors

For Progressive applications, specify starter bracket and appropriately sized undersurface support rails for the worksurface. Starter bracket should be mounted flush to the top edge of the surround. The “floating top” appearance will be only on the opposite end where the end panel or leg connects to the surface.

For Classic applications with unsupported spans of 48" or greater, the surround can be used as an end panel above low storage, connecting to a starter bracket mounted flush to the top of the surround. Undersurface support rails would have to be used to connect to a solid end panel or storage on the opposite side. For unsupported spans of less than 48"W, additional support is not required.

Modesty panel/cable surround also functions as an end panel when used with low storage. A component top must be specified for low storage for this application.

Overhead Storage

Overview	➤See page 77
Statement of Line	30
Pricing	174
Finishes & Materials	209

Details

Overhead storage cabinets are 16"D and with wood or laminate chassis.

Sliding-door overhead cabinets are 16"H and available in widths from 30"–72". They feature one non-locking, solid or writable glass door that can slide from side to side. One side of the unit will be open at all times; center panel divides the space.

Hinged-door overhead cabinets are available in 30", 36", 48", 60", 66", and 72" widths. These 19"H units offer solid, opaque glass, or writable gass doors.

Finished inset top, finished bottom, and apron rail conceal lighting.

2 door

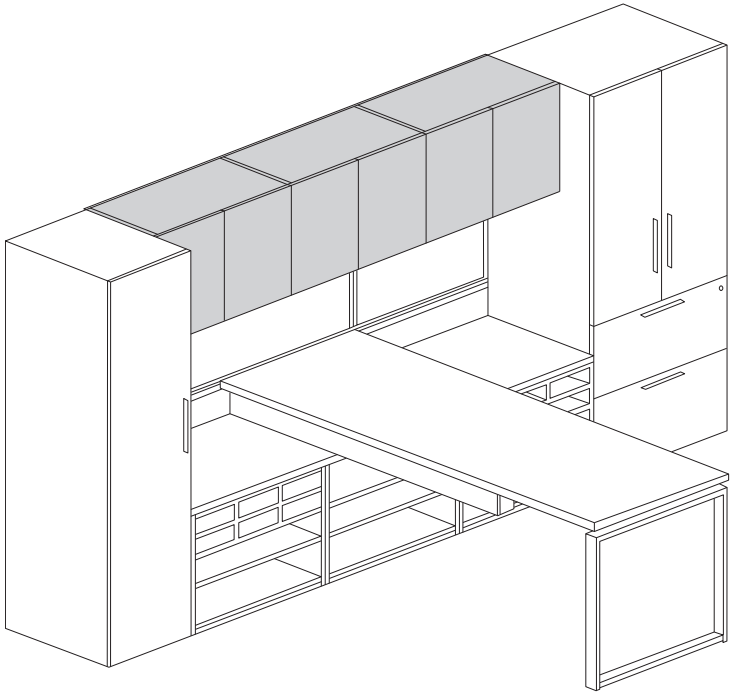
3 door

4 door

Hinged-Door Configurations:

- 30"W and 36"W overhead storage cabinets have 2 doors.
- 48"W overhead storage cabinets have 3 doors.
- 60"–72"W overhead storage cabinets have 4 doors.

Note: A support panel divides the interior into separate sections as indicated above.



Wood hinged four-door models feature one set of doors with matching grain pattern; laminate models feature two sets of two-doors that match.

Back panels are inset between the end panels on both wall-mount and Traxx-mount models for a neat appearance.

Connections

Overhead storage cabinets can be Traxx or wall mounted. 30"W overheads must be supported by at least two solid attachment points on a wall. 36"W must be supported by at least three solid attachment points on a wall. 48", 60", 66", and 72"W overheads must be supported by at least four solid attachment points on a wall.

Wall-mount models include attachment brackets and rail.

Traxx-mount models include an attachment bracket. Traxx and tiles must be specified separately.

Related Products

Interior shelves, specified separately, are available for wall-mount sliding door overheads to enhance organization.
➤See page 175.

Glass Pattern/Door Frame Finish:

- Opaque Frost glass (11) with Silver Frost frame (510); available on hinged-door models only
- Ice Gloss Writable Glass (202G) with Silver Satin frame (511)

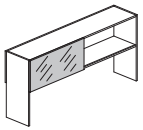
Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.

Highback Organizers

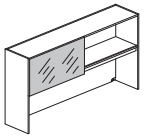
Overview	➤See page 77
Statement of Line	30
Pricing	176
Finishes & Materials	209

Details

Sliding-door highback organizers feature a wood or laminate chassis and one non-locking, solid or writable glass door that can slide from side to side. One side of the unit will be open at all times; center panel divides the space.

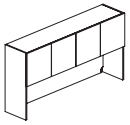


33"H sliding-door models are available in 60", 66", or 72" widths. Back is finished and the area below the cabinet is open for use in open plan applications.



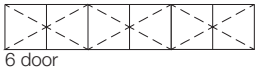
38"H sliding-door models are available in 60", 66", 72", 90", and 96" widths. Back is unfinished and is for use in private office applications. Back panel features three black plastic grommets with cover (one at top center and one in each lower corner).

Grain direction on laminate backs 60"W or wider runs horizontally.



Hinged-door highback organizers are available in widths ranging from 60"–108"; they are 38"H (nominal). Back is unfinished for use in private office applications. These units are offered with solid, opaque glass, or writable gass doors.

4 door



6 door

Hinged-Door Configurations:

- 60"–72"W overhead storage and highback organizers have 4 doors.
- 90"–108"W highback organizers have six doors.

Note: A support panel divides the interior into separate sections as indicated above.

Wood hinged four-door models feature one set of doors with matching grain pattern; laminate models feature two sets of two-doors that match.

Finished, inset top and apron rail conceals lighting.

Back panels on overhead storage cabinets are inset between the end panels on both wall-mount and Traxx-mount models for a neat appearance.

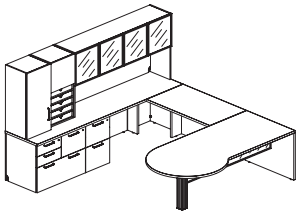
Connections

33"H highback organizers can be used above freestanding, fixed-height low storage with component worksurfaces to divide space and provide additional storage.
➤See dimensions and illustrations at right.

If using low storage in a freestanding application without component tops or with a highback organizer, pedestal ganging bracket (KACGB1) is recommended.

Highback organizers require proper support, such as non-adjustable legs, end panels, or pedestals directly under the worksurface where the end panel of the highback rests.

Planning Factors

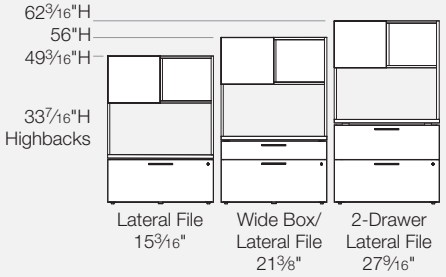


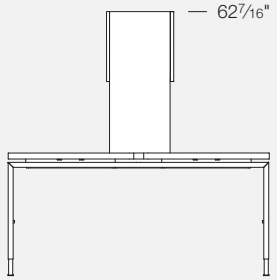
Highback organizers can be specified with set-on-surface storage to create a variety of configurations.

Related Products

38"H highback organizers accept slat tiles or tackboards, specified separately.

Dimensions:





Glass Pattern/Door Frame Finish:

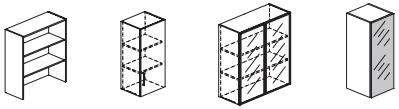
- Opaque Frost glass (11) with Silver Frost frame (510); available on hinged-door models only
- Ice Gloss Writable Glass (202G) with Silver Satin frame (511)

Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.

Set-on-Surface Storage

Overview	➤See page 77
Statement of Line	31
Pricing	180
Finishes & Materials	209

Details



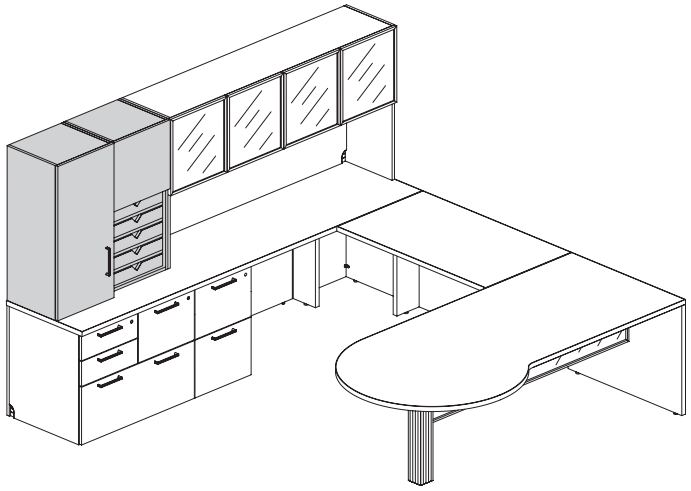
Set-on-surface bookcases are for use on top of worksurfaces. Chassis is 16"D and available in wood or laminate. Single-door, double-door, and open bookcase models feature two ¾"-thick shelves; top shelf is adjustable.

Set-on-surface organizers can be used in conjunction with set-on-surface bookcases, highback organizers, and overheads.

Doors are available in solid, opaque glass, and writable glass options. Glass doors are non-locking.

Connections

Ganging adjacent units is recommended. Ganging bolts are included.



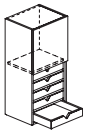
Planning Factors

Set-on-surface models align with highback organizers for a clean aesthetic.

Nominal widths of 15", 18", 30", and 36" can be used together to create a workwall. Bookcases and organizers can be used together.

IMPORTANT: Set-on-surface storage is not intended for freestanding applications.

Related Products



Project trays, specified separately, are available for use in 18"W set-on-surface organizer models; they will accommodate up to five project trays.
➤See page 182.

Glass Pattern/Door Frame Finish:

- Opaque Frost glass (11) with Silver Frost frame (510); available on hinged-door models only
- Ice Gloss Writable Glass (202G) with Silver Satin frame (511)

Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.

Vertical Storage

Product Information

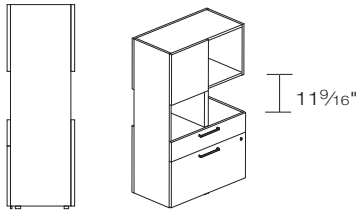
16"D

Overview	➤See page 77
Statement of Line	32
Pricing	183
Finishes & Materials	209

Details

16"D vertical storage is available in space divider and bookcase/lateral file models. Both are offered in laminate or wood.

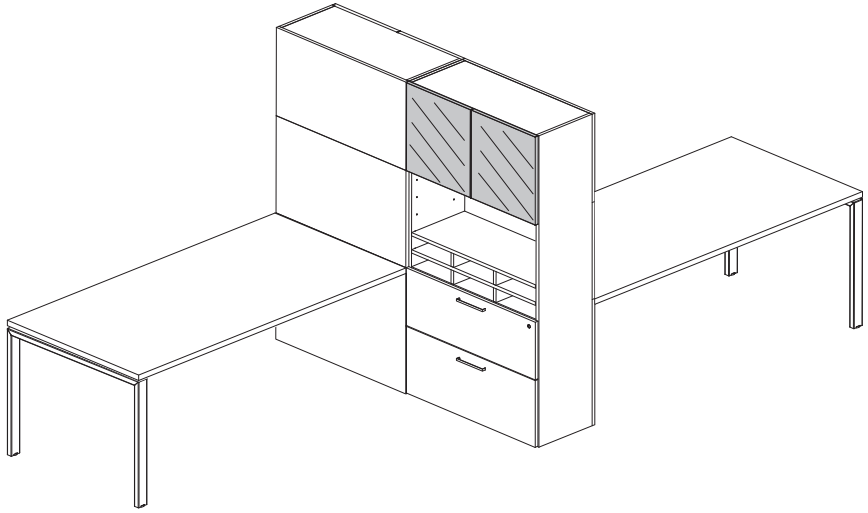
➤See applicable price list for additional information on options.

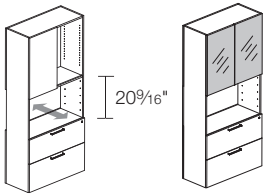


Space divider vertical storage units provide storage as well as side-to-side privacy. These units can be positioned so that the overhead section spans above the worksurface while the box/lateral file spans below the surface; open area is 11 9/16". Units are 16"D x 29 15/16"W and 48 7/8"H and available in left or right orientation. Units feature a two piece, non-matched back panel set for the upper and lower sections.

Each space divider unit consists of:

- Bottom section with a wide box/lateral file with lock in bottom drawer; anti-tip device is standard in bottom drawer.
- Middle section with cubby area on one side (with back panel on full back model) and open area on the other.
- Top section with hinged door on one side and cubby area on the other.





Bookcase with two-drawer lateral files are available in nominal heights of 50", 67" and 80"H in wood or laminate. Lock in top drawer position. These units can be used to divide space in open plan areas. Units feature finished backs with finished inset top. Full back units for the 67" and 80"H units feature three-piece matched back panel set. Partial back units have open center sections and feature two-piece non-matched back panel sets.

All bookcase vertical storage models accept straight or organizer shelves in 20 9/16"H center area, specified separately. 50"H units feature bookcase area with five holes spaced 3¼" apart. 67" and 80"H units feature center section with five holes spaced 3¼" apart.

Top section with center divider is available with one sliding door (non-locking) or two hinged doors in wood, laminate or writable glass. Hinged doors feature pulls in vertical position with locking or non-locking doors. Top section has 7 holes on 67"H model or 17 holes on the 80" model, spaced 1¼" apart to accept straight interior shelves for additional organization.

Connections

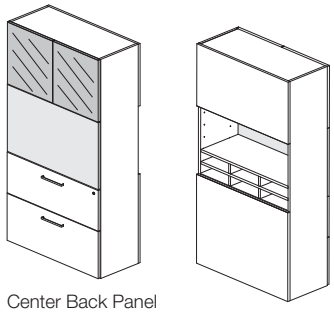
IMPORTANT: **All units must be ganged** with provided ganging bolt and are not intended for use as a single, freestanding unit.

Starter brackets, specified separately, can be attached to back of unit. Starter brackets connect to undersurface support rails to support surfaces, displacing the need for a support leg on that side. Storage unit will be defaced.

➤See page 54 for starter bracket planning information.

Planning Factors

Units are designed so that the middle sections align with worksurface heights; see illustration at left.



Center Back Panel
Installed on Opposite Side

Specify back panels separately in a different material or finish to add a band of color to the center section to create a non-monochromatic aesthetic. Center back panels on full-back models can be removed in the field and replaced with another in a different material or finish, or moved to the front of the unit, exposing the center section to the opposite side.

Vertical Storage

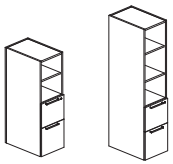
Product Information

24" and 30"D

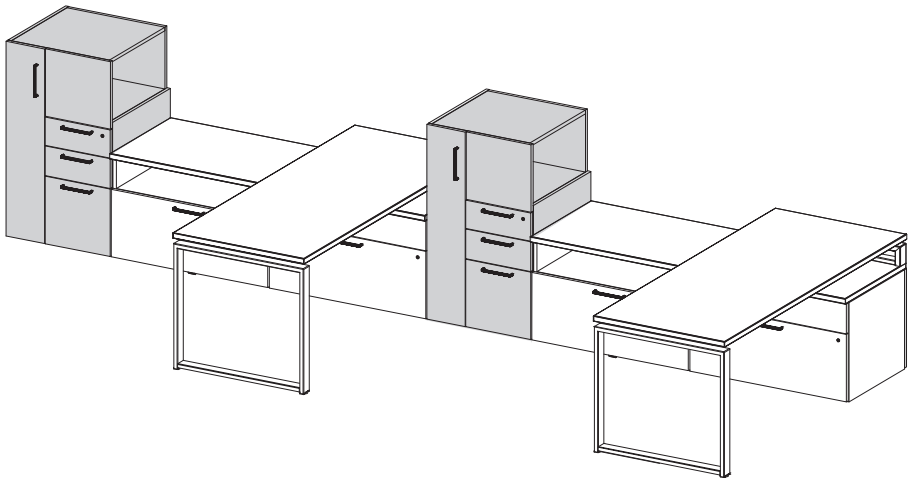
Overview	➤See page 77
Statement of Line	32
Pricing	190
Finishes & Materials	209

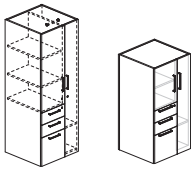
Details

24" and 30"D vertical storage is available in a variety of shelf, door, drawer, and wardrobe configurations.

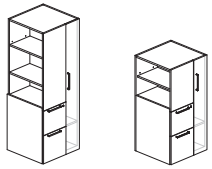


Open bookcase with letter-width file drawers have finished inset top and are 23½"D and 14 15/16"W. Three height options: nominal 42" and 50"H units have finished backs and one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf.

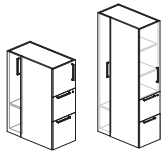




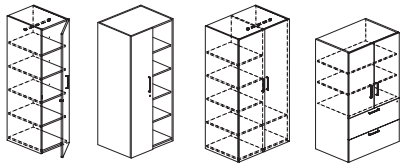
Front access vertical storage towers with finished inset top are available in left or right configurations and in nominal heights 42", 50", and 67". Nominal 42" and 50" H units have finished backs for use in open plan. Select from either box/box/file or file/file letter width drawer options with lock. Shelf storage above drawers include and one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf. Wardrobe area in applicable models includes removable coat rod and one fixed shelf 12" above bottom panel; interior width is 7⅞"W. Door pulls are in vertical application and feature optional locking.



Side-access bookcase vertical storage towers with finished inset top are available in left or right configurations and in nominal heights 42", 50", and 67". Nominal 42" and 50"H units have finished backs for use in open plan. Select from either box/box/file or file/file letter width drawer options with lock. Shelf storage above drawers includes one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf. Wardrobe area includes removable coat rod and one fixed shelf 12" above bottom panel; interior width is 7⅞"W. Door pulls are in vertical application and feature optional locking.



Side-access wardrobe units are 29 11/16"D and are intended for end-of-run applications with wardrobe sections facing outward in left or right configurations. Available in nominal heights of 42", 50", and 67" with finished inset tops. 42" and 50" units have finished backs for use in open plan; 67" units have unfinished backs. Units are 15"W with either letter width box/box/file or file/file configurations with lock. Front-access single-door storage area has one adjustable shelf on 50"H units; and one fixed and one adjustable shelf in 67" units. Wardrobe area is 7⅞"W; 42" wardrobe has one coat hook while the 50" and 67" units contain removable coat rod and fixed shelf 12" above bottom panel.



Single- and double-door units are 68"H nominal heights feature combinations of shelf storage. Single-door units are 18" or 30"W nominal with left or right hinged doors with shelf or wardrobe storage. Double-door units offer combinations of shelves and lateral file or shelves and wardrobe. All doors are optional locking; drawers are standard locking.

Connections

Starter brackets, specified separately, can be attached to back of unit. Starter brackets connect to undersurface support rails to support surfaces, displacing the need for a support leg on that side. Storage unit will be defaced.

➤See page 54 for starter bracket planning information.

Planning Factors

Units are designed to complement Progressive and Classic applications.

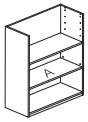
When using storage in place of support legs, be aware of starter bracket location. In Progressive applications, bracket is mounted ¾" higher than in Classic applications.

Overview	➤See page 77
Statement of Line	33
Pricing	196
Finishes & Materials	209

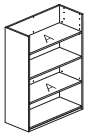
Details

Freestanding shelving units are available in 42" or 50"H with finished backs. Shelves are ¾" thick. These units align with other vertical units and can be used to divide space as well as provide storage. Top section accepts straight and organizer shelves or can remain open for binder storage.

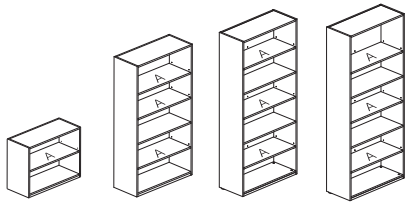
Freestanding bookcases are available with arc front or straight front in laminate or wood. These units have finished inset tops and unfinished backs. Shelves are ¾" thick. Both straight and arc front models are 35⅞" wide and feature 11⅞" shelf openings when shelves are in center position unless otherwise noted.



42"H shelving unit accepts up to four organizer shelves and one straight shelf. Straight shelf must always be used in top position. One adjustable shelf can be positioned up or down 1¼"; shelves are ¾" thick. 11⅞" shelf openings when shelves are in center position (excluding top section). Accommodates five straight shelves or four organizer shelves, and/or component top.

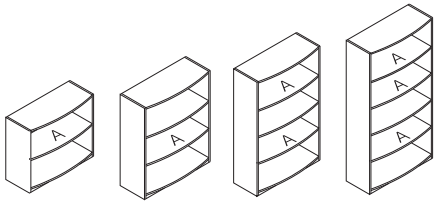


50"H unit accepts up to two organizer shelves and one straight shelf. Straight shelf must always be used in top position. Two adjustable shelves can be positioned up or down 1¼"; shelves are ¾" thick. 11⅞" shelf openings when shelves are in center position (excluding top section). Top area holds two organizer shelves or three straight shelves, and/or component top.



Straight front units are 15³⁄₁₆"D and feature adjustable shelves as noted below that can be positioned up or down 1¼".

- Two-shelf unit features one adjustable shelf and is 27⁹⁄₁₆"H.
- Five shelf unit features three adjustable shelves and is 66⅞"H. Top opening is 13⅜".
- Six-shelf unit is available in two heights: 79³⁄₁₆" or 84". Both units offer three adjustable shelves. 79"H unit has 13⅜" opening in top position while the 84" model has a 17¹⁵⁄₁₆" top opening. 84" ships with a tip-resistant kit and must be attached to a wall.



Arc-front bookcases feature shelves that extend 3" beyond the 15¹³⁄₁₆" end panels.

- Two shelf unit is 27⅝"H with one adjustable shelf.
- Three shelf unit is 40¼"H with one adjustable shelf.
- Four shelf unit is 35⅞"H with two adjustable shelves.
- Five shelf unit is 52⅞"H with three adjustable shelves.

Table Tops & Bases

Overview	➤See page 77
Statement of Line	34
Pricing	199
Finishes & Materials	209

Details

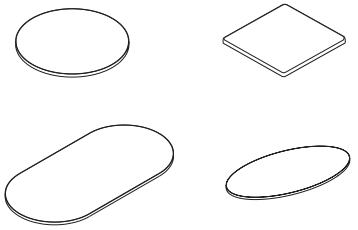


Table tops are available in wood, laminate with wood rim, and laminate with a PVC rim. Select from round, square, racetrack, and ellipse shapes.

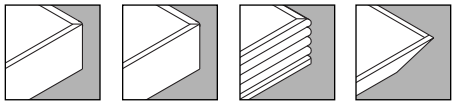
Table tops are 1 3/16" thick, 3-ply, balanced construction. Rims are 1/8" thick.



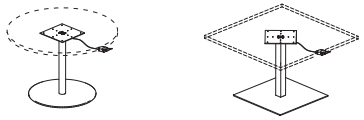
P Softened PVC rim | **F** Softened wood rim | **M** Reed wood rim | **S** Knife wood rim

Laminate models are available with a softened PVC (P) rim profile.

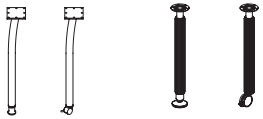
Wood and laminate/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

Base requirements differ based on the table top shape and size.
➤See page 87 for base requirements.

Cylinder base is available in wood or laminate. For use with round, square, and racetrack tops. Specify two for racetrack tops.

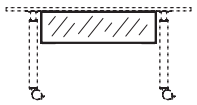


Round and square bases are available in fixed and adjustable-height (gas lift) models. Height-adjustable models are standard with a release paddle for field installation on the underside of the top. Adjustment range is 16" from 26"–42"H. Accepts round 36" or 42" 1 3/16" table tops only; neither base accepts casters.



Column legs are specified singly and are available in static model with glide or mobile model with locking caster. They are available in a paint finishes or chrome. These can be used to support table tops or as support at the end of a worksurface.

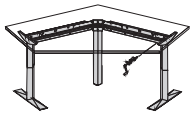
Adjustable-height column legs feature a fluted surface and are available in cinder, platinum metallic, or silver frost metallic finish. Static model or mobile model with locking caster are available; both models may be set to heights ranging from 25 3/4"–34 5/8" (without top) to allow the table to nest under other worksurfaces or tables. Mobile models are not applicable to 36" round top. Standard model includes set of four legs.



Modesty panels are available to attach to the underside of 36" x 72" racetrack or 40" x 72" elliptical table tops. They feature a metal frame with silver frost finish and an opaque frost glass insert.

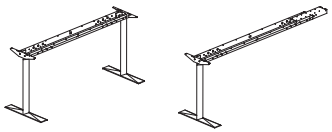
Select contemporary table bases, available as part the Kimball Office contemporary tables offering, are available for use Priority table tops:
- 24"-diameter cylinder base (CBS2724CYL)
- 16" soft-square (CBS1627SSW)
- 16" square (CBS1627SQW)
- 24" square (CBS2427SQW)

➤See the Tables Price List to specify.



Fixed-height T-leg and post-leg style bases, similar to Progressive height-adjustable bases, but with no height adjustability, are available. Fixed-height T-leg bases are applicable to rectangular worksurfaces or racetrack table tops. Fixed-height 90° and 120° bases (shown above) are applicable to 90° and 120° worksurfaces, respectively. These bases ship ready to assemble. Plastic leveling inserts located at the bottom of the feet provides 1" of adjustment. Aluminum foot on T-legs can be specified in polished (upcharge applies) or in a contrasting color from the column. The maximum kneespace clearance is 20 9/16".

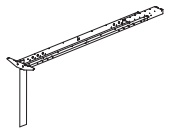
➤See the pricing pages for the size of base required based on the table top size.



Fixed-height T-leg bases, for use with 24", 30", and 36"D worksurfaces, consist of one or two T-legs with feet and a set of undersurface support rails that run underneath the center of the worksurface. Return mounting bracket is included with the return model. Specify two flat brackets separately for return applications.

Maximum load*: 400 lbs. BIFMA/670 lbs. UL
Max. load L-config*: 775 lbs. BIFMA/1300 lbs. UL

*Maximum load for tables with casters is 120 lbs.; applies to all table base types.

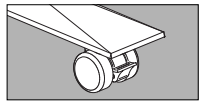


Fixed-height extension post-leg bases consist of one or post-leg and a set of undersurface support rails that run underneath the center of the worksurface. They are intended for use as a return base. Depending on the depth of the main worksurface and the depth of the extension worksurface, the post will be inset approximately 12"–15" fro the end of the extension worksurface. Return mounting bracket is included. Specify two flat brackets separately for return applications.

Maximum load*: 400 lbs. BIFMA/670 lbs. UL
Max. load L-config*: 775 lbs. BIFMA/1300 lbs. UL

*Maximum load for tables with casters is 120 lbs.; applies to all table base types.

T-leg casters for field installation may be specified separately for tables up to 36"D x 96"W.
➤See page 134.



Field installed caster kits for T-leg bases are available.
Note: Casters are not directly applicable to a 3-leg 90° or 120° base with center post. To create a mobile 3-leg table, order two caster kits, a return foot kit model 53KFKTR for the post leg, and hardware bag #2417313 (service parts) for screw to attach the foot and casters.

IMPORTANT: Support rails or height-adjustable base must be specified separately.

Undersurface Support Rails
➤See page 102.

Standard Includes

- Worksurface
- Rim on four sides

How to Specify

1. Model
2. Worksurface material:
   L = Laminate with PVC rim
   LW = Laminate with wood softened or reed rim
   1LW = Laminate with wood knife rim
   W = Wood with wood softened or reed rim
   1W = Wood with wood knife rim
3. Rim profile:
   P = Softened PVC (L models only)
   F = Softened wood (LW or W models only)
   M = Reed wood (LW or W models only)
   S = Knife wood (1LW or 1W models only)
4. Worksurface grommet/cutout option:
   ➤See page 100 for designators.
   X = No grommet or cutout
5. Worksurface finish price group:
   STD = Group 1
   STD2 = Group 2 (+20%)
   FSCW = FSC-certified group 1 wood (+3%)
6. Worksurface finish designator
7. Rim finish price group (omit for L, W, and 1W models):
   STD = Group 1
   STD2 = Group 2 (+20%)
8. Rim finish designator (omit for W and 1W models)

Standard Includes

- Worksurface
- Rim on three sides
- Wire manager on back side

How to Specify

❶ Model
❷ Worksurface material:
L = Laminate with PVC rim
LW = Laminate with wood softened or reed rim
1LW = Laminate with wood knife rim
W = Wood with wood softened or reed rim
1W = Wood with wood knife rim
❸ Rim option:
3 = Wire manager
④ Rim profile:
P = Softened PVC (L models only)
F = Softened wood (LW or W models only)
M = Reed wood (LW or W models only)
S = Knife wood (1LW or 1W models only)
⑤ Worksurface grommet/cutout option:
➤See page 100 for designators.
X = No grommet or cutout
⑥ Worksurface finish price group:
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑦ Worksurface finish designator
⑧ Rim finish price group (omit for L, W, and 1W models):
STD = Group 1
STD2 = Group 2 (+20%)
⑨ Rim finish designator (omit for W and 1W models)
⑩ Wire manager finish designator

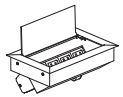
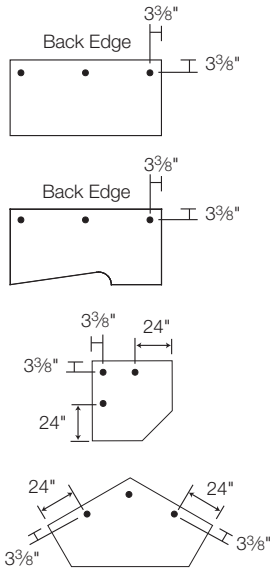
Related Products

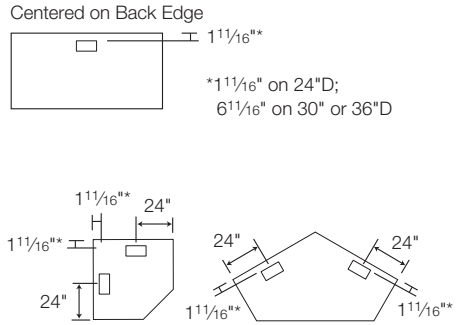
G19 metal grommets for field installation are also available. Note the location of support legs to ensure they do not interfere with grommet locations.
➤See the Perks Price List.



G20 cut-out is designed to accept 8⁵⁄₁₆" x 5⁵⁄₁₆" power/data center (model 99KPDCAM), specified separately.
➤See the Perks Price List.



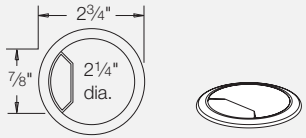
G1 or G19 Grommets



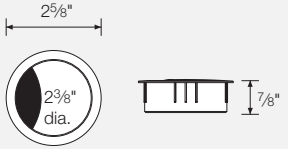
**1¹¹⁄₁₆" on 24"D; 6¹¹⁄₁₆" on 30" or 36"D*

G20 Cut-Outs

Standard Includes/Available Finishes



G1 plastic grommet is a two-piece unit with snap-in lid. Lid cutout slides open to route cables or can be closed when not in use. Available finish:
MB Matte Black



G19 metal grommet is a two-piece unit with black brush access. Available powdercoat finishes:
405 Designer White
487 Brushed Nickel
490 Polished Chrome
501 Platinum Metallic
514 Carbon Metallic
544 Silver Pearl

How to Specify

① Insert the location *and* finish designator into model number sequence as indicated on the corresponding pricing page.

Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.
For example:
G1LMB = G1 grommet, left, matte black
G19R501 = G19 grommet, right, platinum metallic

IMPORTANT: Only the grommet locations shown in the matrix with a designator and price are available. Arc-end, wedge, oval, and U-shaped worksurfaces do not offer factory-installed grommet options.

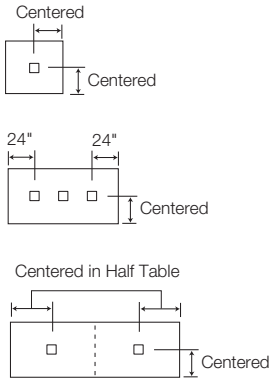
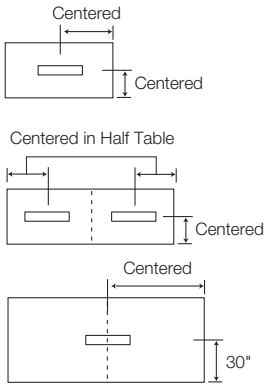
G10 Grommets



C2 Cut-Outs



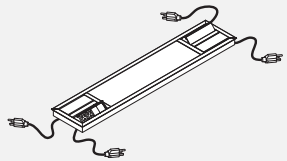
C3 Cut-Outs

Options

G10 grommet features a touch-latch for open and closure. Pops open for use; push down to close when not in use. Black plastic.

Related Products

C2 cut-out is designed to accept 10" power/data center (models KCU0810ELPDC or KCU0810ELPDCH), specified separately.
➤See the Tables Price List.



C3 cut-out is designed to accept 40" power/data center (model KCU0840ELPDC), specified separately.
➤See the Tables Price List.

How to Specify

① Insert the location *and* finish designator into model number sequence as indicated on the corresponding pricing page.

IMPORTANT: Only the grommet locations shown in the matrix with a designator and price are available. G10 grommets cannot be specified along with C2 or C3 power/data cutouts.

Return Mounting Bracket				
4 5/16"	19 11/16"	2 3/16"	**53KWBRP**	$58

Flat Bracket				
2"	5 1/2"	1/16"	**ACAWBP1**	$9

IMPORTANT: Return mounting bracket and flat brackets must be specified separately if installing rail set under a return or extension surface. Refer to the planning pages for required rail lengths of returns and bridges. If the length required is not listed above, order the next smaller size; the attaching brackets will compensate for the dimensional difference.

Standard Includes

- Set of 2 rails
- 90" and 96"W rails are comprised of 2 rails and a connecting bracket for the full length (4 rail sections)

Note: Both rails will run parallel under the same surface.

- One cord opening in top of pedestal

How to Specify

Pedestal

❶ Model
❷ Material:
L = Laminate
W = Wood
③ Pull option:
➤See page 55 for designators.
④ Lock option:
KRB = Key random, black hinged key
KRS = Key random, silver key
KS = Key specific (-$44); specify two lock cores separately
⑤ Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
⑥ Wood finish designator (omit for L model)
⑦ Drawer front finish designator (omit for W model)
⑧ Chassis finish designator (omit for W model)
⑨ Wood interior drawer option (omit for standard drawers and L models):
WD = Wood interior drawers (+10%)

Starter Bracket or Stanchion

❶ Model
② Finish designator:
405 = Designer White
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)

T-leg Casters for Individual Tables
➤See page 134.

How to Specify Our Products	➤See page 3
Abbreviation Key	3
Product Information	59
Finishes & Materials	209

Standard Includes

- Undersurface rails
- Two manually adjustable T-legs (2 3/8"D x 2 3/8"W)
  - —Incremental model adjusts from 21"–34"
  - —Click model adjusts from 22 1/2"–34 5/16"
  - —Crank model adjusts from 26 3/16"–44 1/2"; crank handle mounts on right
- Attachment hardware
- Ships ready to assemble

How to Specify

❶ Model
❷ Adjustability mechanism/base designator:
IMMP = Incremental Manual Adjust
LMMP = Click Manual Adjust
RMMP = Crank Manual Adjust
③ Rail and column finish:
405 = Designer White
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)
④ Foot finish:
405 = Designer White
497 = Polished Aluminum (+5%)
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)

Note: If the same metallic finish is specified for both the rail/column and foot, upcharge is applied only once per model.

Product Information	60
Finishes & Materials	209

Standard Includes

- Undersurface rails
- Two electronically adjustable T-legs (2⅜"D x 2⅜"W)
  - —Single-stage model adjusts from 26¼"–45⅛"
  - —Dual-stage model adjusts from 21 1/16"–47 1/16"
- Control box with up/down control switch; one box/switch will control main or main plus a return surfaces in an L-configuration
  Note: Control boxes are not interchangeable. Specify based on application.
- Attachment brackets
- Ships ready to assemble

How to Specify

❶ Model
❷ Adjustability mechanism/base designator:
SEMP = Single-Stage Electric Adjust
DEMP = Dual-Stage Electric Adjust
③ Height-adjustment switch/control box:
STD_MAIN = Non-programmable for use with single main surface without a return or extension
PROG_MAIN = Programmable with digital readout (+$124) for use with single main surface without a return or extension
STD_RETURN = Non-programmable for use in L-configuration when main surface is attached to a return or extension
PROG_RETURN = Programmable with digital readout (+$176) for use in L-configuration when main surface is attached to a return or extension
④ Rail and column finish:
405 = Designer White
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)
⑤ Foot finish:
405 = Designer White
497 = Polished Aluminum (+5%)
501 = Platinum Metallic (+10%)
514 = Carbon Metallic (+10%)
544 = Silver Pearl (+10%)

Note: If the same metallic finish is specified for both the rail/column and foot, upcharge is applied only once per model.

**Knife rim overhangs user side by 1¼".*

IMPORTANT: Single-pedestal credenzas are not intended for use as standalone units.

Standard Includes

- File/file letter-width pedestal or 30"W lateral file
- One lock
- Hinged modesty
- Finished back
- Two cord openings with black grommets

How to Specify

❶ Model

❷ Worksurface/chassis materials:
L = Laminate with PVC rim/laminate
LW = Laminate with wood rim/wood
W = Wood with wood rim/wood

❸ Pedestal option:
2 = File/File **6** = Lateral File

④ Rim profile:
P = Softened PVC (L models only)
F = Softened wood (LW or W models only)
M = Reed wood (LW or W models only)
S = Knife wood (LW or W models only)

⑤ Pull option:
➤See page 76 for designators.

⑥ Lock option:
KRB = Key random, black lock core
KRS = Key random, silver lock core
KS = Key specific (-$22); specify lock core separately

⑦ Worksurface grommet option:
➤See page 150 for designators.
X = No grommet

⑧ Modesty panel grommet option:
MG1MB = Center (+$57)
X = No grommet

⑨ Worksurface finish price group:
STD = Group 1 **STD2** = Group 2 (+20%)

⑩ Worksurface finish designator

⑪ Drawer front finish designator (omit for LW and W models)

⑫ Chassis finish designator (omit for LW and W)

⑬ Rim finish price group (omit for L & W models):
STD = Group 1 **STD2** = Group 2 (+20%)

⑭ Rim finish designator (omit for W models)

⑮ Wood interior drawer option (omit for standard drawers and L models):
WD = Wood interior drawers (+10%)

K = Kwik Office model available.

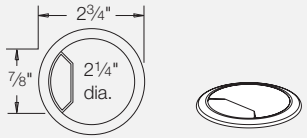
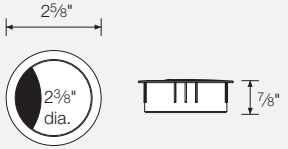
Worksurface grommets are located 3⅜" from the side edge. Location relative to the approach or back edge is 13½" on arc worksurfaces (to top of arc), 7½" on all rectangular and extended desk worksurfaces, and 3⅜" for all other surface shapes.

Standard Includes/Available Finishes



G1 plastic grommet is a two-piece unit with snap-in lid. Lid cutout slides open to route cables or can be closed when not in use. Available finish:
MB Matte Black



G19 metal grommet is a two-piece unit with black brush access. Available powdercoat finishes:
405 Designer White
487 Brushed Nickel
490 Polished Chrome
501 Platinum Metallic
514 Carbon Metallic
544 Silver Pearl

How to Specify

① Insert the location *and* finish designator into model number sequence as indicated on the corresponding pricing page.

Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.
For example:
G1LMB = G1 grommet, left, matte black
G19R501 = G19 grommet, right, platinum metallic

IMPORTANT: Only the grommet locations shown in the matrix with a designator and price are available. Note: P-shaped and U-shaped worksurfaces do not offer factory-installed grommet options.

How to Specify our Products ➤See page 3
Product Information 76
Finishes & Materials 209
Locking Information 232

Standard Includes

- Finished back panel
- Open top
- Lock (except on printer/CPU storage model)
- Adjustable shelf on hinged-door model
- One lock on hinged-door, two-drawer lateral file, and box/box/open/lateral multi-file pedestal; two locks on box/box/file/lateral multi-file pedestal
- Door and drawer pull on each door/drawer; lateral file drawer on box/box/file/lateral multi-file pedestal has two pulls
- One adjustable shelf at top of printer/CPU storage; printer (bottom) shelf has a 100 lb. weight limit
- Interlock mechanism (allows only one drawer to be open at a time to help prevent tipping)
- Two cord openings with black grommets; one in the back lower corner of each side panel

How to Specify

❶ Model
❷ Material:
L = Laminate
W = Wood
③ Pull option (omit for printer/CPU storage model):
➤See page 76 for designators.
④ Lock option (omit for printer/cpu storage):
KRB = Key random, black lock core
KRS = Key random, silver lock core
KS = Key specific (-$22 per lock); specify lock core(s) separately
⑤ Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood; available on hinged-door and printer/cpu storage only (+3%)
⑥ Wood finish designator (omit for L model)
⑦ Drawer front finish designator (omit for W model)
⑧ Chassis finish designator (omit for W model)
⑨ Wood interior drawer option (omit for standard drawers, L models, and printer/cpu storage):
WD = Wood interior drawers (+10%)

Standard Includes

- Lock
- Finished front, back, sides, and ¾"-thick self-edge top
- Anti-tip device on bottom drawer
- Dual-wheel locking casters
- Upholstered cushion top on box/file model: seating upholstery (except leather)
  COM yardage = .8 yard 54"W non-directional fabric
- Active file model top area: two sections for storage and hanging Pendaflex® folders in the rear section

How to Specify

❶ Model
② Pull option:
➤See page 77 for designators.
③ Lock option:
KRB = Key random, black lock core
KRS = Key random, silver lock core
KS = Key specific (-$22); specify lock core separately
④ Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
⑤ Wood finish designator (omit for L model)
⑥ Front laminate designator (omit for W model)
⑦ Chassis laminate designator (omit for W model)
⑧ Back laminate designator (omit for W model)
⑨ Fabric grade (include for cushion-top model only)
⑩ Fabric designator (include for cushion-top model only)
⑪ Wood interior drawer option (omit for standard drawers and L models):
WD = Wood interior drawers (+10%)

Standard Includes

- One non-locking door
- Back:
  –On 33"H, finished back on storage cabinet part and open below
  –On 38"H, unfinished back/back panel with three black plastic grommets with cover (one at top center and one in each lower corner)
- Horizontal grain direction on laminate backs 60"W and wider
- Finished inset top
- Center divider

How to Specify

Solid Door Models:

❶ Model
❷ Material:
L = Laminate
W = Wood
③ Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
④ Wood finish designator (omit for L model)
⑤ Front laminate designator (omit for W model)
⑥ Chassis laminate designator (omit for W model)
⑥ Back laminate designator (omit for 38"H model and all W models)

Writable Glass Door Models:

❶ Model
❷ Door material:
G2 = Writable glass
❸ Chassis material:
L = Laminate
W = Wood
④ Glass pattern:
202G = Ice Gloss Writable
⑤ Door frame paint finish:
511 = Silver Satin
⑥ Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
⑦ Chassis finish designator
⑧ Back laminate designator (omit for 38"H model and all W models)

Filler Strips
➤See page 207.

IMPORTANT:
Traxx-mounted overhead storage requires Traxx and tiles, specified separately.
➤See the Systems Price List.

Standard Includes

- Recessed back panel: full height on wall-mount models; ¾-height on Traxx-mount models
- Finished inset top
- Doors on four-door models: one set of matching doors on wood models; two sets of two matching doors on laminate models
- Attachment brackets and rail on wall-mount models; Traxx overhead brackets on traxx-mount
- Ganging bolt

How to Specify

Solid Door Models:

❶ Model
❷ Attachment method:
M = Wall mount **T** = Traxx mount
❸ Material:
L = Laminate **W** = Wood
④ Lock option:
KRB = Key random, black lock cores (+$58 for two-door, +$116 for three- and four-door)
KRS = Key random, silver lock cores (+$58 for two-door, +$116 for three- and four-door)
KS = Key specific (+$36 for two-door [specify 1 lock core separately]; +$72 for three- and four-door [specify 2 lock cores separately])
X = Non-locking
⑤ Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑥ Wood finish designator (omit for L model)
⑦ Front laminate designator (omit for W model)
⑧ Chassis laminate designator (omit for W model)

Glass or Writable Glass Models:

❶ Model
❷ Attachment method:
M = Wall mount **T** = Traxx mount
❸ Door material:
G = Glass **G2** = Writable glass
❹ Chassis material:
L = Laminate **W** = Wood
⑤ Glass pattern/door frame finish:
11 510 = Opaque Frost Glass/Silver Frost
202G 511 = Ice Gloss Writable/Silver Satin
⑥ Wood finish price group (omit for L model):
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑦ Chassis finish designator

Notes

Samples:

Samples of Kimball Office wood finishes and paints are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur in color and texture. Kimball Office carefully selects all materials used in every product, ensuring a commercially acceptable color and finish.

Swatch cards and memo samples of Kimball Office fabrics are available upon request. There may be slight differences between samples and actual yardage as a result of variations in dye lots.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

Kimball Office offers a diverse collection of surface materials. Please see descriptions below to ensure that you are choosing the materials that best support your requirements.

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The Fabric Collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Generations Collection:

The Generations Collection is comprised of tried and true materials that have been in the Kimball Office offering for many years. This collection is designed to support long-standing customers and to help transition you to the current offering. ➤Visit kimballoffice.com to see the Generations Collection.

IMPORTANT: Materials in this collection should not be used to set standard color palettes for new installations.

Materials in this offering can be ordered using the standard process, however, extended lead times and minimum order quantities may apply. For best results, pre-planning orders with your Customer Service Representative is recommended.

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Warranty:

Fabrics and leathers are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).
➤See page 235 for complete warranty information.

Special Wood Finishes

Standard Finishes on Alternate Wood Species

Wood Finishes ➤See page 211
Laminate 215
Paint 217
Fabrics 219

Standard finish colors on alternate wood species are available.

Applicability of special finish colors depends on the wood species to which they are applied. Priority is available in:

- Cherry (price group 1)
- Maple (price group 1)
- Walnut (price group 1)
- Sapele (price group 2)

Note: Priority is also standard in Zebrawood, Canyon Oak, Monterey Oak, or Tuscan Walnut veneers; however, special finishes are not available on these veneers.

If one of our standard finishes is not appropriate, Kimball Office also has a library of previously developed special finishes, which may be an acceptable match for your application. A custom finish can also be developed to meet specific needs.
➤See next page for previously developed and custom finishes.

Upcharges:

A **10%** upcharge per line item (model) for special wood finishes applies. Upcharge is calculated on the base price, before other option upcharges are added.

Special Finish Designators:

	Wood Species		
Color	*Cherry*	*Maple*	*Walnut*
Amber	Standard/MC	MA00174KOG	WA02905KOG
Espresso	×	×	Standard/ES
Mocha	Standard/MH	×	WA02920KOG

× = Not feasible on wood species

Note: We have not yet developed special finish designators for standard finishes on alternate wood species for other wood finishes.

How to Specify

① Model:
Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② Finish type:
For the “Finish type” step, insert a special code (in place of STD):
ZCHY1 = Special cherry finish
ZMAP1 = Special maple finish
ZWAL1 = Special walnut finish
ZSAP1 = Special sapele finish

③ Finish designator:
For the “Finish designator” step, insert the designator from the table at left.

Special Wood Finishes

Application Guidelines

Previously Developed and Custom Finishes

Wood Finishes	➤See page 211
Laminate	215
Paint	217
Fabrics	219

Previously developed and custom finishes are available for special requirements. Kimball Office has an extensive library of previously developed special finishes which may be an acceptable match for your application. If not, a custom finish can be developed to meet specific needs.

Samples of previously developed special finishes are available from Customer Service upon request.

Applicability of special finish colors depends on the wood species to which they are applied. Priority is available in:

- Cherry (price group 1)
- Maple (price group 1)
- Walnut (price group 1)
- Sapele (price group 2)

Note: Priority is also standard in Zebrawood, Canyon Oak, Monterey Oak, or Tuscan Walnut veneers; however, special finishes are not available on these veneers.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a finish color.

Approval Process:

① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the $300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.

② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. Custom finishes will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.

③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

Upcharges:

A one-time fee of **$300** (net) will be billed for the development of each new custom finish. This fee covers all Kimball Office product lines on which the finish may be used. Models receiving a special finish will also be assessed an upcharge.

A **10%** upcharge per line item (model number) for special wood finish is calculated on the Grade 1 upholstery price, then added to the price for the selected fabric grade, to arrive at the list price.

How to Specify

① Model:
Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② Finish type:
For the “Finish type” step, insert a special code (in place of STD):
ZCHY1 = Special cherry finish
ZMAP1 = Special maple finish
ZWAL1 = Special walnut finish
ZSAP1 = Special sapele finish

③ Finish designator:
For the “Finish designator” step, insert the designator provided to you by customer service.

Wood Finish Characteristics

Application Guidelines

Including Care and Maintenance Tips

Wood Finishes	➤See page 211
Laminate	215
Paint	217
Fabrics	219

Kimball Office's experience in wood finishing extends from past generations of craftsmen to present day state-of-the-art technology.

Our Pura® finish is a proprietary, water-based, ultra-violet (UV) wood finish that has virtually no volatile organic compounds (VOCs). It uses less energy than our conventional finishing process and meets or exceeds BIFMA Furniture Emission Standards (FES) and U.S. Green Building Council LEED requirements for indoor air quality. Pura is exceptionally clear and durable and allows the beauty of our wood to shine through. The durability, depth, clarity, and beauty of Pura meets the high expectations customers have of Kimball Office finishes.

Finish fill and sheen level for the top surfaces is appropriate for the design and wood species. If different specifications are required, contact Customer Service.

All wood products are very susceptible to darkening from age and exposure to UV rays (sunlight and other sources), especially cherry and maple. Although a special UV inhibitor is added to finishes, care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change of the wood.

Grain characteristics of cherry veneer such as gum streaks and gum pockets occur naturally and add to the authentic look and feel of natural veneer. These are inherent to this veneer and should not be considered defects.

Brighton maple is a clear finish for those who appreciate the inherent beauty of wood. Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

Fine scratches from everyday use may be more visible on furniture with dark finishes. Darker finishes absorb more light, while fine scratches reflect the light. Therefore, scratches can be more emphasized due to this contrast. The use of a desk pad is recommended to keep scratching to a minimum.

To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth following direction of the grain.
- Dry with a separate cloth if needed.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.

Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminate surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

Customer Specified Laminate

Application Guidelines

GSA Non-Contract

Wood Finishes	➤See page 211
Laminate	215
Paint	217
Fabrics	219

Customer specified laminate (CSL) is available on Priority HPL surfaces. CSL is not available for TFL surfaces.
➤Contact Customer Service to initiate approval.

Kimball Office reserves the right to decline a customer specified laminate which may not be suitable for application.

Kimball Office assumes no responsibility for the durability, consistent coloration or any other performance characteristic of a customer specified laminate.

Metal, embossed, specialty, and supplier discontinued laminates must be custom quoted.
➤Contact By Design at 800.482.1616 extension 6002.

Kimball Office orders and procures all customer specified laminates.

Laminate sheen level must not exceed 60° for maximum durability of worksurfaces.

Lead times may vary for certain laminates. Minimum order quantities may apply.

Upcharges:

A **20%** upcharge per line item (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

How to Specify

① Model:
Build the complete model specification (excluding the finish type and finish designator) by following the How to Specify on the appropriate pricing page for the product that is to receive the special finish.

② Finish type: For the “Finish type” step, insert a special finish code (in place of STD).
ZFMA1 = Formica
ZLMT1 = Lamin-Art
ZLTC1 = Lamitech
ZNEV1 = Nevamar
ZPTE1 = Pionite
ZWST1 = Wilsonart

③ Finish designator: For the “Finish designator” step, insert the laminate designator (color number) of the laminate to be applied to the product.

Terratex is a registered trademark of True Textiles, Inc. Each Terratex fabric must meet these four criteria:

- Made of 100% post-consumer and/or post-industrial fiber, or compostable materials
- Made using processes that reduce waste, emissions, energy, water usage, and toxic by-products
- Meets or exceeds the same quality standards of fabrics manufactured using virgin materials and conventional processes
- Made of a single fiber type, without backcoating, so that it too can be recycled or composted.

Green-e
100% of the electricity used to make these products is matched by Green-e certified renewable energy certificates.

Alliance Fabrics:

Kimball Office has formed partnerships with top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Lead times for alliance fabrics are based on supplier availability. Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply.
➤Contact Customer Service for availability before finalizing orders.

The information provided in this section is the most current information available at the time this price list was printed.

Application of Alliance Program upholstery will be as depicted on the swatch card unless otherwise instructed on the order.

For memo samples of Alliance fabrics, contact our alliance partners directly.

Terratex is a registered trademark of True Textiles, Inc. Each Terratex fabric must meet these four criteria:

- Made of 100% post-consumer and/or post-industrial fiber, or compostable materials
- Made using processes that reduce waste, emissions, energy, water usage, and toxic by-products
- Meets or exceeds the same quality standards of fabrics manufactured using virgin materials and conventional processes
- Made of a single fiber type, without backcoating, so that it too can be recycled or composted.

Green-e

100% of the electricity used to make these products is matched by Green-e certified renewable energy certificates.

Leather Characteristics:

Different coverings and seating constructions will respond better than others to specific seating applications. Certain leathers are more prone to relaxing over time and may demonstrate characteristics such as wrinkling or puddling. This does not indicate that the covering or application is deficient, but is considered a normal, inherent characteristic.

Some Kimball Office leathers and faux leathers may relax over time creating a loosely upholstered appearance.

Leather is a natural product. Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristic of leather.

Kimball Office will always ship a satisfactory commercial match. Because of industry dye-lot variation, colors may not match exactly.

Cleaning Leather:

Regular Cleaning

- Remove as much soil or staining as possible by carefully vacuuming or brushing.
- Dust with a dry or damp cloth.

Deep Cleaning

- Use mild non-detergent soap or cleaner. Wipe surface with a light circular motion. Repeat with clean water.
- Do not soak leather.
- Air dry.

Note: Never use furniture polishes, oils, solvents, varnishes, abrasive cleaners, ammonia, wax, or saddle soaps on leather.

Alliance Program Fabrics

Overview

For Use on Cushion-Top Pedestals and Low Storage Cushions

Carded Patterns ➤See page 229

Kimball Office has formed partnerships with the top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

Patterns from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics are available in a variety of design aesthetics and price points to meet all of your fabric needs. Carded fabrics are listed in this price list. ➤See Surface Materials at www.kimballoffice.com for a wide variety of additional graded-in fabrics from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Application of Alliance Program fabrics will be as depicted on the website or memo sample unless otherwise instructed on the order.

Directional fabrics, such as stripes, patterns, and plaids, may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return.

Fabric that requires non-stock special treatments such as flame proofing, anti-microbial treatment, electrical conductive backing, water repellent, stain repellent, or acrylic backing are not part of this program. Such orders should be specified as a COM.

Alliance graded pricing includes the cost of the material. Repeat is also accounted for and no additional upcharge is required.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

IMPORTANT: The information provided in this section of the price list is the most current information available at the time this price list was published. Contact Customer Service before finalizing any orders to check availability.

Lead Time:

Lead times for alliance fabrics are based on supplier availability.
Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply. Contact Customer Service for availability before finalizing orders.

TB133:

Contact Customer Service about TB133 requirements.
Note: Many of these fabrics may pass additional flammability tests. Please inquire about compliance with specific regulations.

Samples:

For memo samples, contact our alliance partners directly.

Program Overview	➤See page 210
Cut Yardage	220
Seating Upholstery	223
Cleaning Codes	222

Customer's Own Material (COM) Policy:

While Kimball Office inspects fabrics for mill imperfections, some are difficult to recognize. Kimball Office is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring, appearance, or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Customers are responsible for ordering COM/COL and expediting delivery of the material, sent prepaid, to Kimball Office.

IMPORTANT: Kimball Office reserves the right to decline a fabric that may not be suitable for application to product.

COM Application Testing:

Application testing on product for non-preapproved fabrics is required.
➤Contact your Customer Service Team for the appropriate forms to initiate application testing.

The application test will render your fabric either:
- Approved
- Not recommended
- Restricted

A "not recommended" result is usually due to questionable construction of the material or pattern that is difficult to align. You will be required to sign a waiver to use any "not recommended" COM.

U.L. Listing/Flammability:

COM must be U.L. listed for use on tiles for benching stanchions before Kimball Office accepts and enters an order which will have COM fabrics. All COM testing and processing costs are the responsibility of the customer. A minimum of 2 yards of production run yardage is required for U.L. testing and flammability testing. Approval of a COM fabric may result in extended lead times. For cost estimates, yardage requirements and project lead times, consult your Customer Service Team.

Customer is responsible for fabric meeting the appropriate Cal. TB133.

Customer's Own Leather (COL)

Customer's Own Leather (COL) is available for use on pedestal and low storage cushions.

Leather is a natural product and variations in texture is a pleasing quality belong exclusively to high grade, full top-grain leathers.

Yardage/Sq. Footage Requirements:

➤See the product's pricing pages for COM yardage and COL square footage requirements.

Shipment of COM/COL:

After the fabric has passed the approval process described, Kimball Office will enter the product order and send an acknowledgement of the tentative ship date. A notification will be sent giving the date the COM must be received. If it is not received by the specified date, your ship date will be reassigned.

For Priority tackboards:
Kimball Office
COM Department
Dock 11
1620 Cherry Street
Jasper, IN 47549

For Priority tiles for benching stanchions:
Kimball Office
COM Department—Kimball Office
1881 West Seltice Way
Post Falls, ID 83854

For Priority mobile pedestal cushion and low storage cushions:
Kimball Office
COM Department
340 East 11th Avenue
Jasper, IN 47549-1001

IMPORTANT: Tag all materials with the Kimball Office dealer name and the purchase order number.

Production of Order:

When COM production yardage is received, COM is cut for the order and inspected for flaws. If flaws are found, you will be notified of the additional fabric required.

A return tag (e.g. COD shipment, UPS call tag) is required from the specifier within 45 days of the acknowledged ship date or all excess COM yardage will be discarded.

Preapproved COM:

➤Contact your Customer Service Team to obtain information on preapproved COMs.

Repeat Fabrics:

It is Kimball Office standard process to match repeat fabrics on fabric covered Overhead and Highback Organizer doors.

Repeat fabrics will be matched in what Kimball Office deems the best possible application of the pattern.

Additional COM yardage is required for repeat fabrics.

Repeat	*Additional Yardage required per Overhead Door*
0–6"	None
6"–12"	0.166 yards
12"–18"	0.500 yards
18"–24"	0.666 yards
24" or more	1.000 yard

Note: If the customer requires that the repeat fabric be applied in a random fashion, Kimball Office requires written notification in advance of order processing to that effect.
➤Contact your Customer Service Team to obtain necessary waiver.

Checklist:

When ordering COM for Kimball Office products, please make sure you have done the following:
- Supplied vendor name, fabric name, color name and number.
- Supplied arrival date of COM to Kimball Office.
- Received application testing approval before sending purchase order (or signed waiver if not approved for application).
- Received U.L. listing before sending purchase order.

Locking Information

GSA SIN 711-8

Terms & Conditions	➤See page 233
Product Warranty	235
Operating Load Capacities	236
Filing Capabilities	237

Locking storage units can be specified as:
- Key random with a black lock core and hinged key (KRB);
- Key random with a silver (matte nickel) lock core and round-head key (KRS); or
- Key specific (KS)

Black lock cores and hinged keys are identical to the ones used with other casegoods and systems products.

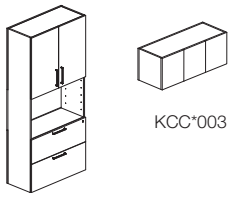
Silver lock cores and round keys are matte nickel. These lock cores and keys are identical to the ones used with Fluent and Hum. Minds at Work. series.

Key Random:

When key random option is selected, key numbers will be assigned arbitrarily at the factory with key numbers ranging from KCCB001 to KCCB300 (black) or KCCG001 to KCCG100 (silver).

Randomly numbered lock core(s) will ship standard along with your order for field installation. *Exception: Randomly numbered lock cores on Kwik Office models are shipped installed.*

KCC*001 KCC*002 KCC*001



KCC*003

KCC*001

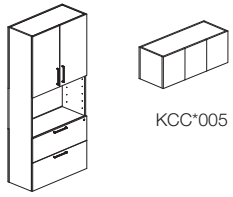
With random keying, different furniture units may or may not have the same key number. If you must have all locks keyed differently or all locks keyed the same, choose the key specific option.

Key Specific:

When key specific option is selected, the storage unit will be pre-drilled to accept a lock core; however, no lock cores will be shipped standard with the unit. If lock cores are standard on the unit, the price of the unit is reduced by the price of the lock core or cores.

You must specify lock core(s) separately for key specific option; specify any key number from KCCB001 to KCCB300 (black) or KCCG001 to KCCG100 (silver).

KCC*005 KCC*005 KCC*005



KCC*005

KCC*005

To key all the furniture units in a workstation or department alike, choose the key specific option and order the quantity of locks needed for your installation.

Installing Locks:

Standard key that ships with the lock core can be used for the initial installation of the lock core in the field.

Changing Locks:

IMPORTANT: A change key, specified separately, is required to remove lock cores in the field.

Change key model KCCB1CK allows removal of keys within these ranges:
KCCB001–KCCB300
KCCG001–KCCG100

Master Keys:

Master key model KC2GMK will unlock any lock within these key ranges:
KCCB001–KCCB300
KCCG001–KCCG100

Model/Key Range *Price*

Black Lock Cores & Hinged Key

KCCB001 to KCCB300 $22

Silver (Matte Nickel) Lock Cores & Round Key

KCCG001 to KCCG100 $22

Change Key

KCCB1CK $6

Master Key

KC2GMK $12

How to Specify

❶ Specify exact key number for lock cores or model number for change or master key

Operating Load Capacities

Locking Information ➤See page 232
Terms & Conditions 233
Product Warranty 235
Filing Capabilities 237

Component	*Operating Load Capacity (Functional Loads)*	*Example*
Desks and worksurfaces <45"W	200 lbs. over 12" diameter area, concentrated loading	
Desks and worksurfaces 45"W–72"W	200 lbs. over 12" diameter area, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 72"W = 288 lbs.
Desks and worksurfaces >72"W	Two 200 lb. loads over two 12" diameter areas, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 84"W = 324 lbs.
Transaction counter, shelf, or secondary surface <16"D	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	12"D x 60"W = 147 lbs. t.w.
Extendible elements (pedestal drawer, shelves, etc.)	.017 lb. per cubic inch of drawer interior filing space, distributive loading *Note: File drawers are to support hanging files only; they are not intended for bottom loading.*	24"D x 15"W x 12"H = 73 lbs.
Center/pencil drawers	5 lbs., distributive loading	
Freestanding storage or bookcase top <38"H	200 lbs. concentrated loading .26 lb. per square inch of surface area, distributive loading	24"D x 36"W = 225 lbs.
Freestanding storage or bookcase top 38"H–72"H	.26 lb. per square inch of surface area, distributive loading	24"D x 36"W = 225 lbs.
Freestanding storage or bookcase top >72"H	.09 lb. per square inch of surface area, distributive loading	24"D x 36"W = 78 lbs.
Storage or bookcase bottom	.017 lb. per cubic inch above surface, distributive loading (not more than 18" in height)	24"D x 36"W x 18"H = 264 lbs.
Storage or hutch bottom <60"H	.20 lb. per square inch of surface area, distributive loading	
Storage or hutch bottom >60"H	.09 lb. per square inch of surface area, distributive loading	

Square inches should be calculated using this formula: Surface depth x surface width of available storage

Cubic inches should be calculated using this formula: Surface length x surface depth x height of available storage above the surface (limited to 18 inches above the surface)

The table at left lists the operating load capacities of various Kimball Office components. All components meet or exceed the ANSI/BIFMA Functional and Proof Loading requirements X5.5 (2008 Desk and Table Products Tests) and X5.9 (2004 Storage Units Tests). The Operating Load Capacities listed represent the BIFMA functional loads which are equivalent to loads that can be expected in normal use of the component.

	24"	36"	15"	32⅜"	9"	Legal, letter, and EDP	Legal and letter
Center Drawers	22"	18"	17"	14½"	1½"	—	—
	22"	30"	17"	26⅜"	1½"	—	—
	22"	36"	17"	32⅜"	1½"	—	—

**For built-up units, such as desks, returns, and credenzas, please reference the applicable pricing page for width (letter or legal) of the pedestal.*

Filing Reference:

- Legal size paper is 8½" x 14".
- Letter size paper is 8½" x 11".
- EDP size paper is 8½" x 14⅞".

IMPORTANT: For all pedestals where legal front-to-back filing is standard, letter front-to-back filing is possible by specifying universal file bars separately.

PRIORITY™ enhancements Price List

Casegoods

This price list is effective December 15, 2014 and supercedes all previously printed or electronically released versions.

A competitively engineered casegoods and benching platform, Priority supports every type of work environment and allows you to only pay for the specific features you need. Priority, truly, offers functionality—from its most elemental form to it's most option-rich models.

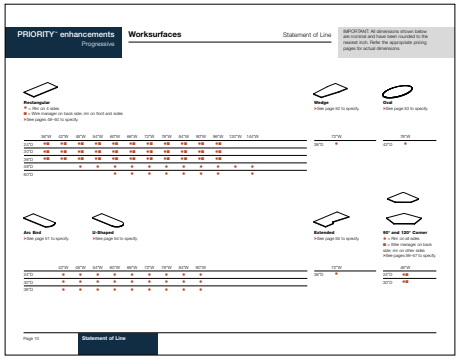
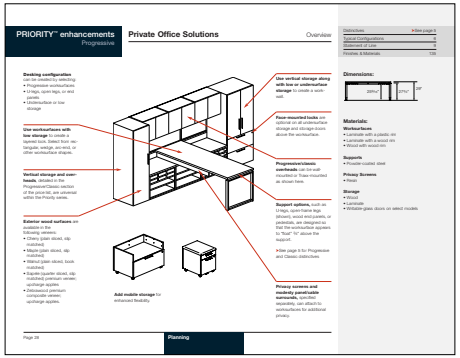
How to Use this Price List

Statement of Line	➤See page 9
Planning	27
Pricing	47
Finishes & Materials	135

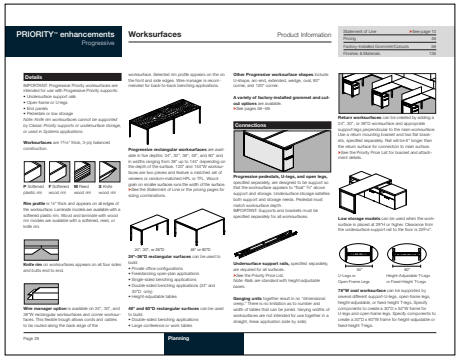
We suggest that you familiarize yourself with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.



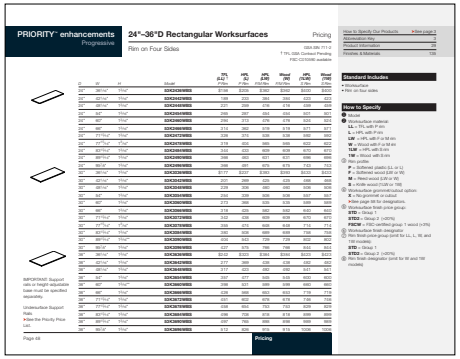
Statement of Line provides a snapshot of the entire product line. We've included an illustration, a table showing available sizes, and page cross references to the applicable pricing and how to specify pages.



Overviews offer a quick look at the distinguishing features of the product line.

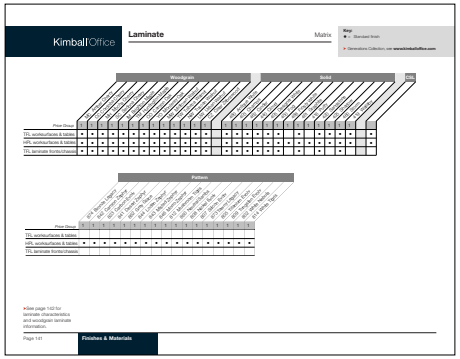


Product Information pages provide detailed information about the product, connections that can be made with other models, planning factors, and applications guidelines.

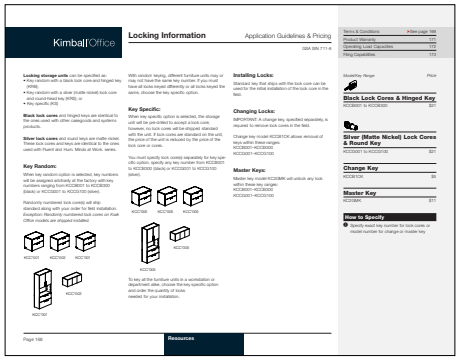


Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.

➤See page 3 for detailed information about how to specify Kimball Office products.



Look in the Finishes and Materials section to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product.



Use the Resources in the back of the price list. This repository of Locking Information, Terms and Conditions, Warranty, Operating Load Capacities, and Filing Capacities. You'll also find a model number index with references to the appropriate pricing page.

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Standard product modifications are available on select products.
➤See the Product Modifications Price List at www.kimballoffice.com

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

Only Underwriters' Laboratory (U.L.) or Canadian Standards Association (C.S.A.) listed electrical components are used in electrical devices and are so labeled.

Priority Progressive products (excluding electric height-adjustable tables) are U.L. 962 listed. Electric height-adjustable tables use U.L. recognized components.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

How to Specify Our Products

Statement of Line	➤See page 9
Planning	27
Pricing	47
Finishes & Materials	135

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ❶, ❷, or ❸) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

Standard Includes
- Box/box/file letter-width pedestal, left
- File/file letter-width pedestal, right
- Breakfront modesty panel

How to Specify
❶ Model
❷ Worksurface/chassis materials:
LL = TFL/TFL
L = HPL/TFL
LW = HPL/wood
W = Wood/wood
❸ Pedestal option:
B = BBF/FF
④ Rim profile:
P = Softened plastic (LL or L)
F = Softened wood (LW or W)
M = Read wood (LW or W)
S = Knife wood (LW or W)
⑤ Pull option:
➤See page 37 for designators.
⑥ Lock option:
X = Non-locking
KS = Key specific (+$100); specify two lock cores separately
KRB = Key random, black lock core (+$150)
KRS = Key random, silver lock core (+$150)
⑦ Worksurface grommet option:
➤See page 77 for designators.
X = No grommet
⑧ Worksurface finish price group:
STD = Group 1
STD2 = Group 2 (+20%)
⑨ Worksurface finish designator
⑩ Drawer front finish designator (omit for LW and W models)
⑪ Chassis finish designator (omit for LW and W)
⑫ Rim finish price group (omit for LL, L, and W models):
STD = Group 1
STD2 = Group 2 (+20%)
⑬ Rim finish designator (omit for W models)
⑭ Wood interior drawer option (omit for standard drawers and LL & L models):
WD = Wood interior drawers (+10%)

"Standard Includes" lists what is included as part of the base model.

Follow these steps to build a complete model number.

Selections that will incur an upcharge or decrease to the base price are noted within the "How to Specify" steps.

Sample Specification:

The example below shows a complete model number for an **arc-top double pedestal desk.**
➤See page 62 for the corresponding pricing table and How to Specify steps.

❶	❷❸	④	⑤	⑥	⑦	⑧	⑨	⑩	⑪
53KE3060DDFBA	LL	8	P	61MB	KRB	G1LRMB	STD	MW	MW	MW

Base Model

Note: Steps ⑩ and ⑪ were not applicable for the laminate with wood rim model and were omitted for the specification as indicated in the How to Specify steps.

Pricing Table Abbreviations:

D = Depth

W = Width

H = Height

T = Thickness

AO = Approach Overhang

ED = End Depth

KW = Kneespace Width

KH = Kneespace Height

WC = Worksurface Clearance

Finishes & Materials	135

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤Find more specific details regarding the environmental aspects of our product offerings at: **www.kimballoffice.com**

ANSI/BIFMA level™
100% of the products manufactured by Kimball Office are level® certified. We offer the most sustainable portfolio in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet and exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

ecoScorecard℠

Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:
- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification
Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:
- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:
- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:
- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

SCScertified™
INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality
One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

Design for the Environment (DfE)
is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.
➤For environmental data, visit our website at www.kimballoffice.com.

pura

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

FSC
www.fsc.org
FSC® C010590
The mark of responsible forestry

FSC-Certified Wood
Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood at a 3% upcharge. Applicable models show FSCW as a finish price group designator option. Standard lead times apply to FSC orders.

ANEW

Asset Network for Education Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

Distinctives

of Progressive and Classic Priority

Statement of Line	➤See page 9
Planning	27
Pricing	47
Finishes & Materials	135

Priority offers you two distinctive styles and aesthetics to select from when planning with Priority:

Progressive Priority details promote a table based product with a lighter scale and ideal for more compact offices. The floating top affect on storage and open leg supports are the signature of Progressive Priority. This aesthetic is evident throughout the progressive section of this price list from benching to private office components.

Classic Priority is the foundational elements of this series. In this section, you will find built up desks as well as modular components that feature a more transitional style with worksurfaces attaching directly to storage element.

Similarities:

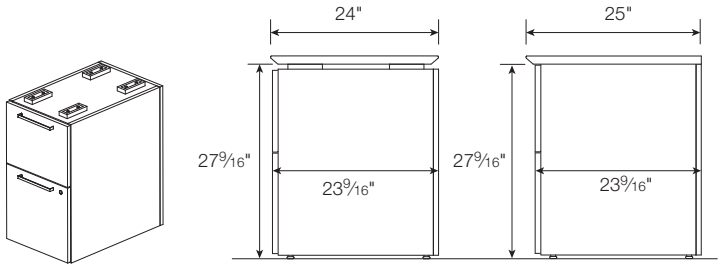
- Storage is available in the same heights, widths and depths.
- Overall storage depth, width, and height are the same in both Progressive and Classic.
- Softened- and reed-rim worksurfaces feature the rim on all four sides of the surface.

Differences:

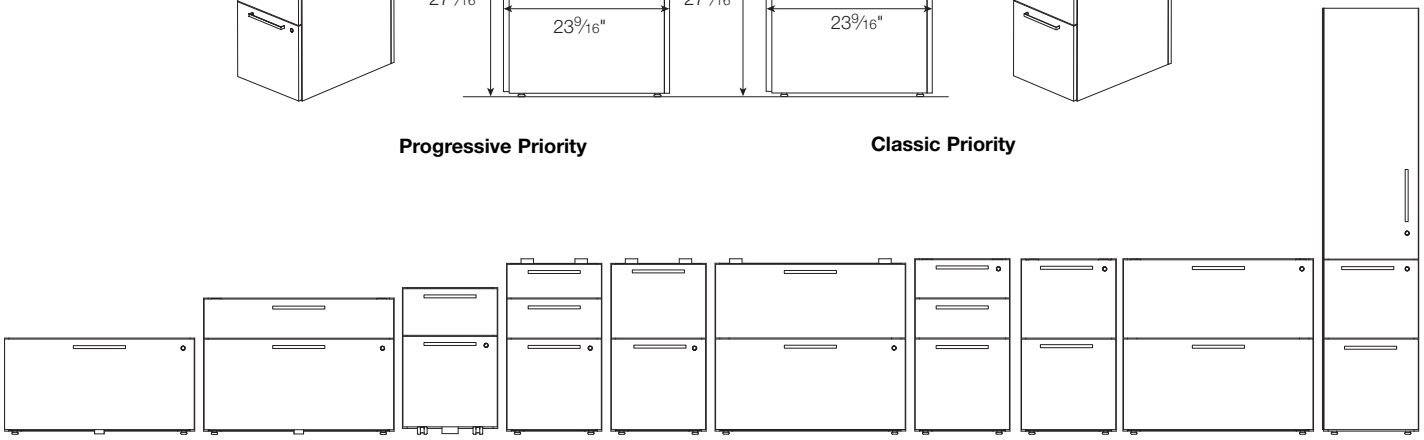
- Classic knife-rim surfaces have the mitred rim on the user edge only and overhangs the storage by 1¼". Knife-rim surfaces on returns and bridges feature a reverse knife edge for a flush fit with the adjoining surface.
- Progressive knife-rim surfaces have the mitred rim on all four sides of the surface and align with the storage. Knife-rim surfaces join together without a coped rim.
- Classic undersurface storage features an unfinished, open top.
- Progressive Priority utilizes finished-top storage with ¾" spacers that mount to the worksurfaces and undersurface support rails providing a "floating" top affect.
- Classic pedestals are available with lock in the top drawer.
- Progressive pedestals are available with a lock in the bottom drawer.

Mixing Progressive and Classic Priority:

- There are numerous items in the Priority offering that work well with both styles of Priority. Those items not mounted below the worksurface, such as low storage, overheads, highback organizers, vertical storage, and tables, can be used with both classic and progressive office layouts.
- As a general guideline, classic undersurface storage units, modesty panels, and support panels should not be used with Progressive knife-rim worksurfaces.
- Progressive pedestals can be used with Classic surfaces.
- Mixing softened- or reed-rim worksurfaces will work with either Progressive or Classic arrangements.
- Progressive knife-rim worksurfaces cannot be mixed with Classic bridge and return knife-rim surfaces.
- Pedestal starter brackets, undersurface support rails, and U-leg supports were designed to work with Progressive products. However, pedestal starter brackets and undersurface support rails can be used between Classic storage units where an unsupported span of more than 48"W is desired. These brackets would be mounted at a different height on Classic storage.
- Progressive end panels and Classic modesty panels and end supports should not be mixed in the arrangement.



Progressive Priority **Classic Priority**



Low height and mobile storage **Progressive Priority** **Classic Priority** **Vertical Storage**

Private Office Solutions

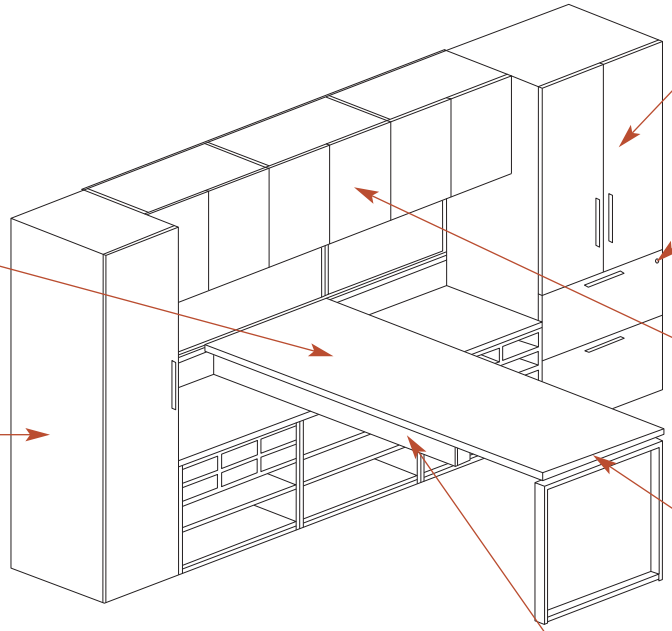
Overview

Distinctives	➤See page 5
Typical Configurations	6
Statement of Line	9
Finishes & Materials	135

Desking configuration can be created by selecting:
- Progressive worksurfaces
- U-legs, open legs, or end panels
- Undersurface or low storage

Use worksurfaces with low storage to create a layered look. Select from rectangular, wedge, arc-end, or other worksurface shapes.

Vertical storage and overheads, detailed in the Progressive/Classic section of the price list, are universal within the Priority series.



Use vertical storage along with low or undersurface storage to create a work-wall.

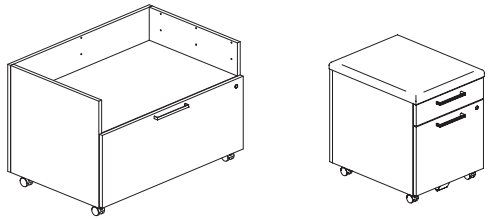
Face-mounted locks are optional on all undersurface storage and storage doors above the worksurface.

Progressive/classic overheads can be wall-mounted or Traxx-mounted as shown here.

Support options, such as U-legs, open-frame legs (shown), wood end panels, or pedestals, are designed so that the worksurface appears to "float" ¾" above the support.

➤See page 5 for Progressive and Classic distinctives

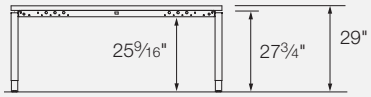
Exterior wood surfaces are available in the following veneers:
- Cherry (plain-sliced, slip-matched)
- Maple (plain-sliced, slip-matched)
- Quarter-cut Oak
- Walnut (plain-sliced, book-matched)
- Quarter-cut Walnut
- Sapele (quarter-sliced, slip-matched); premium veneer, upcharge applies
- Zebrawood; premium veneer, upcharge applies



Add mobile storage for enhanced flexibility.

Privacy screens and modesty panel/cable surrounds, specified separately, can attach to worksurfaces for additional privacy.

Dimensions:



Materials:

Worksurfaces
- **W** Wood worksurface, rim, and chassis
- **LW** HPL worksurface, wood rim and wood chassis
- **L** HPL worksurface, PVC rim, and TFL chassis
- **LL** TFL worksurface, PVC rim, and TFL chassis

Supports
- Powder-coated steel

Privacy Screens
- Resin

Storage
- Wood
- Laminate
- Writable-glass doors on select models

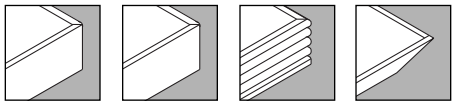
Statement of Line	➤See page 10
Pricing	48
Factory-Installed Grommet/Cutouts	58
Finishes & Materials	135

Details

IMPORTANT: Progressive Priority worksurfaces are intended for use with Progressive Priority supports:
- Undersurface support rails
- Open-frame or U-legs
- End panels
- Pedestals or low storage

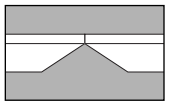
Note: Knife rim worksurfaces cannot be supported by Classic Priority supports or undersurface storage, or used in Systems applications.

Worksurfaces are 1 3/16" thick, 3-ply balanced construction.

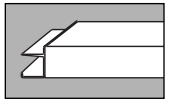


P Softened PVC rim | **F** Softened wood rim | **M** Reed wood rim | **S** Knife wood rim

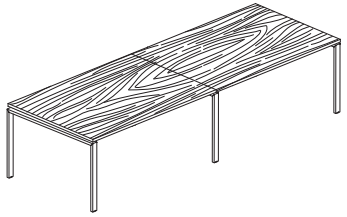
Rim profile is 1/8" thick and appears on all edges of the worksurface. Laminate models are available with a softened PVC rim. Wood and laminate with wood rim models are available with a softened, reed, or knife rim.



Knife rim on worksurfaces appears on all four sides and butts end to end.

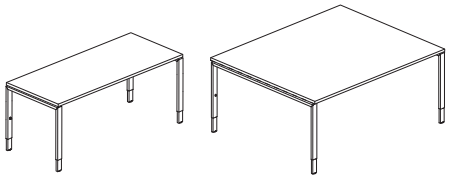


Wire manager option is available on 24", 30", and 36"W rectangular worksurfaces and corner worksurfaces. This flexible trough allows cords and cables to be routed along the back edge of the worksurface. Selected rim profile appears on the on the front and side edges. Wire manager is recommended for back-to-back benching applications.



Progressive rectangular worksurfaces are available in five depths: 24", 30", 36", 48", and 60" and in widths ranging from 36" up to 144" depending on the depth of the surface. 120" and 144"W worksurfaces are two pieces and feature a matched set of veneers or random-matched laminate (HPL or TFL). Wood-grain on smaller surfaces runs the width of the surface.

➤See the Statement of Line or the pricing pages for sizing combinations.



24", 30", or 36"D | 48" or 60"D

24"–36"D rectangular surfaces can be used to build:
- Private office configurations
- Freestanding open-plan applications
- Single-sided benching applications
- Double-sided benching applications (24" and 30"D only)
- Height-adjustable tables

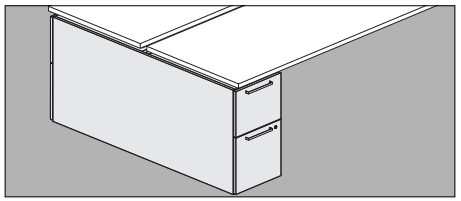
48" and 60"D rectangular surfaces can be used to build:
- Double-sided benching applications
- Large conference or work tables

Other Progressive worksurface shapes include: U-shape, arc-end, extended, wedge, oval, 90° corner, and 120° corner.

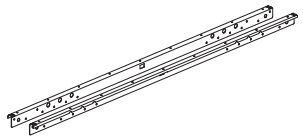
A variety of factory-installed grommet and cut-out options are available.

➤See pages 58–59.

Connections



Progressive pedestals, U-legs, and open legs, specified separately, are designed to be support so that the worksurface appears to "float" 3/4" above support and storage. Undersurface storage satisfies both support and storage needs. Pedestal must match worksurface depth.
IMPORTANT: Supports and brackets must be specified separately for all worksurfaces.

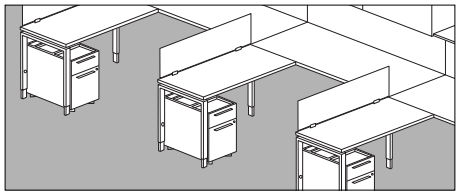


Undersurface support rails, specified separately, are required for all surfaces.

➤See the Priority Price List.

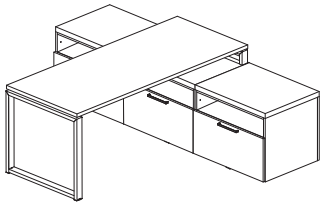
Note: Rails are standard with height-adjustable bases.

Ganging units together result in no "dimensional creep." There is no limitation as to number and width of tables that can be joined. Varying widths of worksurfaces are not intended for use together in a straight, linear application (side by side).

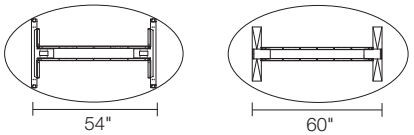


Return worksurfaces can be created by adding a 24", 30", or 36"D worksurface and appropriate support legs perpendicular to the main worksurface. Use a return mounting bracket and two flat brackets, specified separately. Rail will be 6" longer than the return surface for connection to main surface.

➤See the Priority Price List for bracket and attachment details.



Low storage models can be used when the worksurface is placed at 29"H or higher. Clearance from the undersurface support rail to the floor is 25 9/16".



U-Legs or Open-Frame Legs | Height-Adjustable T-Legs or Fixed-Height T-Legs

78"W oval worksurface can be supported by several different support-U-legs, open-frame legs, height-adjustable, or fixed-height T-legs. Specify components to create a 30"D x 54"W frame for U-legs and open-frame legs. Specify components to create a 30"D x 60"W frame for height-adjustable or fixed-height T-legs.

Assembled & Modular Casegoods

Overview

Statement of Line	➤See page 12
Assembled Casegoods Product Info	31
Modular Worksurfaces Product Info	32
Finishes & Materials	135

Fully assembled and modular casegoods fit an extensive range of design, application, space, and budget challenges.

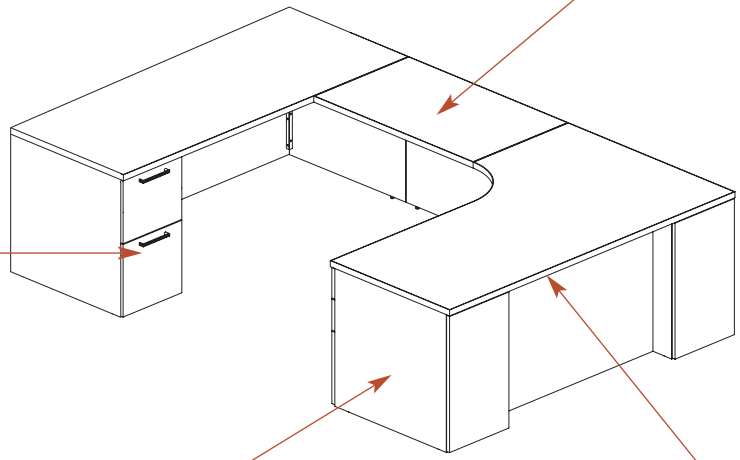
Wood veneers on wood and laminate with wood rim models are carefully selected and matched to assure proper balance and consistency.

Chassis and drawer/door fronts on laminate models feature thermally fused laminate (TFL). Grain direction runs top to bottom.

Laminate models offer great flexibility in finish selections. The worksurface, rim, drawer/door fronts, and chassis may be specified in different colors.

Pedestals are full height and letter width on assembled units. They connect directly to surfaces. Locks are optional.

Drawer fronts are ¾"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.



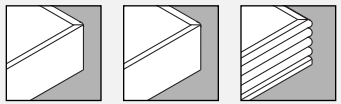
Worksurfaces are 1 3/16"-thick, 3-ply, balanced construction and available in wood, high-pressure laminate (HPL), or thermally fused laminate (TFL).

Worksurface rims are ⅛" thick. Softened and reed rim profiles appear on all four edges of the worksurface. Knife rim profile appears on the user edge and overhangs by 1¼"; side and back edges are flat.
Exception: Desks feature knife rim on the approach and user sides.

Materials:

W Wood worksurface, rim, and chassis
LW HPL worksurface, wood rim and wood chassis
L HPL worksurface, PVC rim, and TFL chassis
LL TFL worksurface, PVC rim, and TFL chassis

Worksurface Rim Profiles:



P Softened PVC rim
F Softened wood rim
M Reed wood rim

S Knife wood rim

Laminate models are available with a softened PVC (P) rim profile. Wood and laminate/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

Pull Options:

➤See page 34.

Statement of Line	➤See page 12
Overview	30
Pricing	62
Finishes & Materials	135

Details

Exterior wood surfaces are available in the following veneers:
- Cherry (plain-sliced, slip-matched)
- Maple (plain-sliced, slip-matched)
- Quarter-cut Oak
- Walnut (plain-sliced, book-matched)
- Quarter-cut Walnut
- Sapele (quarter-sliced, slip-matched); premium veneer, upcharge applies
- Zebrawood; premium veneer, upcharge applies

Joints are securely fastened with dowels and mechanical fasteners to ensure maximum strength.

Drawer fronts are ¾"-thick, 3-ply construction. Five-sided drawer construction allows easy removal of drawer fronts.

Drawer sides and back are ½" thick and wrapped in natural woodgrain vinyl. Bottoms are 3/16" thick.

Optional wood drawers are available on wood and laminate with wood rim/chassis units. Drawer sides and back are ½" thick with veneer faces. Bottoms are ¼" thick with veneer faces. Interiors are sealed, sanded, and finished with a clear durable topcoat.

Drawer suspensions feature black slides with precision steel ball bearings to ensure long-lasting, quiet, smooth operation. Box, file, and lateral file drawers feature full extension slides.

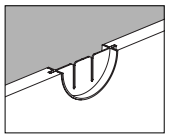
Black filing rods are standard in all file drawers to accommodate various filing requirements.
➤See page 165 for filing capabilities.

Face-mounted locks are optional on all desks, credenzas, returns, and undersurface pedestals. Lock cylinders are removable if rekeying is necessary. Key random and key specific options are available.
➤See page 160 for lock information.
Note: Details above also apply to Priority Classic modular worksurfaces, support, and storage.

Technology Features

Structural panel separates the drawers from the cable routing compartment to prevent unwanted access to the drawer contents.

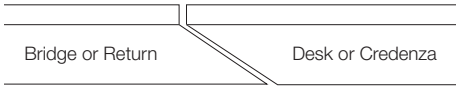
Hinged modesty panel, optional on assembled bridges, returns, kneespace, and single pedestal credenzas, swings inward to allow access to wall outlets. It lifts from the floor and is held in place by leveling feet.



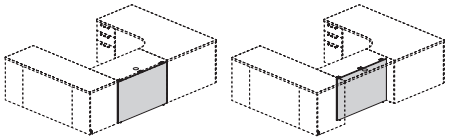
Black half-round grommet is available factory installed at the top center of hinged modesty panels; upcharge applies.

A variety of factory-installed worksurface grommet options are available.
➤See page 77.

Connections



Returns and bridges with knife rim profile have a reverse knife edge on abutting edges to provide a flush fit with the adjoining surface.



Flush installation Recessed installation

Hinged modesty panels can be installed in a flush or recessed location. Flush installation visually lines up modesty panel with the adjoining side panels for an exposed orientation. Recessed installation insets modesty panel 6" from the back edge of the worksurfaces to create an area to store cords and cables. Recessed modesty panel allows the whole unit to be placed flush against the wall.

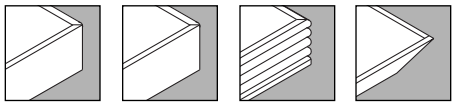
IMPORTANT: Single-pedestal desks and single-pedestal credenzas are not intended for use as standalone units.

Statement of Line	➤See page 14
Overview	30
Pricing	72
Finishes & Materials	135

Details

Modular worksurfaces are sized in 6" increments that correspond to Priority pedestals and storage. Appropriate bracketry is included. They are available in thermally fused laminate (TFL), high-pressure laminate (HPL), HPL with a wood rim, and wood.

IMPORTANT: Fully assembled models and modular components may be used together in the same configuration.



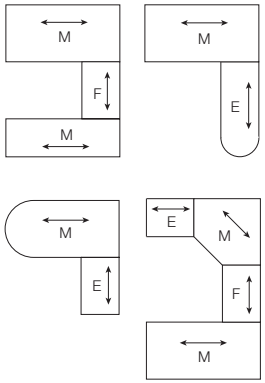
P Softened PVC rim | **F** Softened wood rim | **M** Reed wood rim | **S** Knife wood rim

Laminate (HPL and TFL) models are available with a softened PVC (P) rim profile.

Wood and HPL/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

Attachment brackets based on the application specified are standard on all worksurface shapes.

Connections



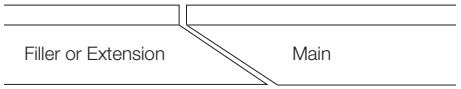
Note: Arrows on illustration indicate grain direction.

Modular worksurfaces are interchangeable; however, to receive the correct brackets, the application—main (M), extension (E), or filler (F)—must be specified. Main surfaces receive no attachment hardware; extension surfaces receive 2 flat brackets; and filler surfaces receive 4 flat brackets.
➤See pricing pages for bracketry options by worksurface shape.

If the application or position of the worksurface needs to be changed, it can be accomplished by changing the bracketry.
Exception: All desk worksurfaces must be used as a "main" worksurface.

24"D rectangular worksurfaces are for use with 24"D pedestals.

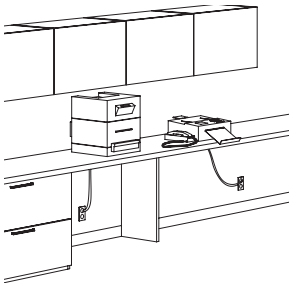
Worksurfaces can be scribed on site to conform with oblique angles, irregular column placement, and historical preservation guidelines. These are just a few instances where this capability becomes an asset.



Filler and extension surfaces with knife rim profile have a reverse knife edge on abutting edges to provide a flush fit with the adjoining surface. Back and exposed side edge of extension worksurfaces are flat.

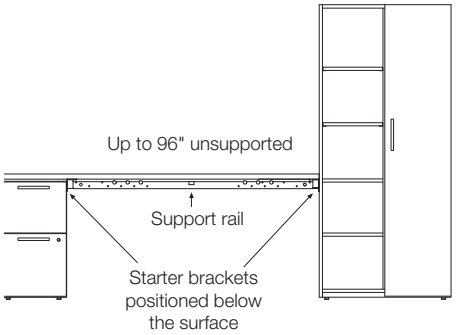
Main knife rim worksurfaces cannot be used adjacent to a corner worksurface.

Planning Factors



The maximum recommended span of an unsupported worksurface is 48" using Classic storage and support; longer distances require additional support.

A variety of factory-installed worksurface grommet options are available.
➤See page 77.



The maximum span for an unsupported worksurface can be extended to 96" between Classic pedestals, end panels, or storage units by utilizing Progressive starter brackets and appropriately sized undersurface support rails. Starter brackets would be placed at the side of the storage unit and/or end panels even with the top of the pedestal. Rails would connect to starter brackets at both ends. Storage units will be defaced.
For example: To span 72" unsupported, specify a 72"W (nominal) undersurface support rail and a starter bracket for each storage unit/end panel.
➤See the Progressive planning section for more information.

Consider the load a worksurface will carry when planning support. Additional support is recommended for surfaces where heavy equipment will be placed. Support can be placed where needed without the limitations of predrilled or predetermined locations.
➤See following page for modular support product information.

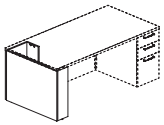
Modular Support

Statement of Line	➤See page 17
Overview	30
Pricing	84
Finishes & Materials	135

Details

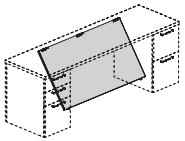
IMPORTANT: Fully assembled models and modular components may be used together in the same configuration.

Modular support components are designed to support classic worksurfaces.

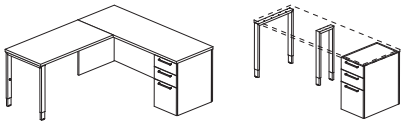


End supports can support the non-pedestal end of a worksurface to create a single pedestal desk or credenza for use in an L- or U-configuration. End support consists of an end panel, back/modesty panel, and two support panels. End supports for use with 24" or 25" worksurfaces include a second cutout on the kneespace support panel.

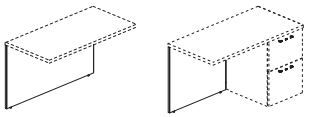
Undersurface pedestals, low storage with support drawers or shelves, and modesty panel/cable surround can also support the end of worksurfaces.
➤See page 15 for Classic storage components.
➤See page 38 for Progressive/Classic storage components.



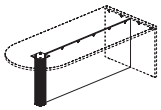
Hinged modesty panels are optional. They are for use in conjunction with undersurface pedestals and worksurfaces to create an enclosed kneewell. A black half-round grommet is available factory-installed at the top center on hinged modesty panels; upcharge applies.



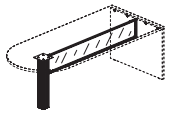
Classic height-adjustable U-leg is 27¾"H and adjusts from 24¾"–32¼" in ⅜" increments. U-legs can be used to displace wood end panels on desks, returns or modular return and extension worksurfaces; not intended for use to create a freestanding table. End U-legs are available in 24", 30", and 36"D. Mid-support U-leg is 10"D and is for use on 24"D, 30"D, and 36"D surfaces only. All adjustable U-legs feature a button that indexes into notches in the inner leg member. By depressing the button, the leg releases the lower leg assembly. This gives the user the ability to change the height as needed throughout the day. Legs can be used with classic Priority, Definition or Footprint worksurfaces. For 1⅜16" worksurfaces, support is required every 48"; for 1⅝16" worksurfaces, support is required every 60".



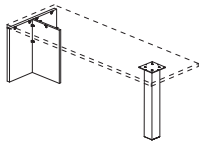
Hinged modesty panels are used to build bridges and returns along with worksurfaces and pedestals.



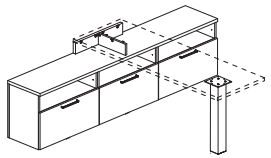
Full-height wood or laminate modesty panels are for use in conjunction with rectangular, P-shaped, or U-shaped worksurfaces, an end panel, and a square metal column base or wood half-cylinder base. Grain runs horizontal on laminate model. Field installation of grommets is recommended to ensure placement of the grommet on the user's side of the modesty panel.



Partial-height glass modesty panels are for use in with P-or U-shaped worksurfaces, an end panel, and a square metal column base or wood half-cylinder base.



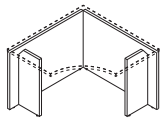
T-leg end panels can also be used to support the end of a worksurface when there is no pedestal. Modesty panel cannot be used in conjunction with T-leg end panels. They cannot be used with a modesty panel.



5" and 11" T-leg end panels are for use on top of low storage to support worksurfaces. 5"H model sits atop 22"H storage; 11"H model is for use with 15"H storage. Component top is required.

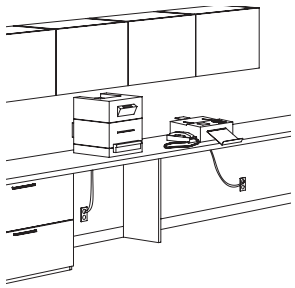
Connections

Hinged modesty panel always spans between two pedestals or between a pedestal and an end-support panel. It cannot extend behind the back of a pedestal. They attach to the underside of the worksurface and do not deface the sides of adjacent pedestals. They can be installed flush with pedestal back or recessed. Hinge feature on modesty panels allows easy access to wall power.



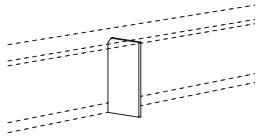
Corner-support panels are used with corner worksurface. Assembly includes modesty and wing support panels. Corner worksurface is specified separately.

Planning Factors



The maximum recommended span of an unsupported worksurface is 48"; longer distances require additional support.

Consider the load a worksurface will carry when planning support. Additional support is recommended for surfaces where heavy equipment will be placed. Support can be placed where needed without the limitations of predrilled or predetermined locations.



12"D worksurface mid-support panel (model 53K1128SSW) can be used for additional support. Worksurface support panel does not allow modesty panel to hinge forward. Back edge is chamfered for cable management.

Statement of Line ➤See page 15
Overview 30
Pricing 78
Finishes & Materials 135

Details

Classic undersurface pedestals feature an open top or unfinished and a fully finished back panel. Pedestals connect directly to worksurfaces. Undersurface pedestals are available as:

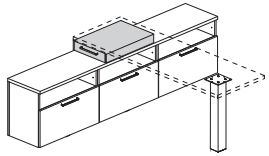
- Box/box/file
- File/file
- Two-drawer lateral file
- Multi-file
- Hinged-door storage
- Printer/CPU storage

IMPORTANT: Classic storage models with open tops must be used with Classic modular worksurfaces, specified separately; they cannot be used with Progressive knife rim worksurfaces.

Three-drawer and four-drawer lateral files with open top are also available. These models have an unfinished back.

Locks are optional on all peds and located in the upper right corner of the top drawer face.

Printer/CPU storage organizes printers, CPUs, and paper for easy accessibility.

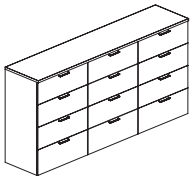


Support drawers and shelves can be used as support on top of low storage. 5"H support drawer unit is for use with 22"H low storage; 11"H support shelf is for use with 15"H low storage. They replace the need for a T-leg end panel as worksurface support on low storage. Component top for low storage must be specified.

Finished top two-, three-, and four-drawer lateral files feature an interlock mechanism that allows only one drawer to be open at a time. Two-drawer units feature a finished back and cord openings; three- and four-drawer units have an unfinished back and no cord openings.

30" and 36"D hinged-door pedestals include one fixed shelf and no cord openings.

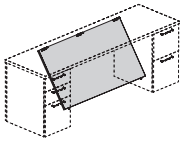
Connections



Ganging adjacent lateral files is recommended.

Planning Factors

Classic undersurface pedestals can support the end of Classic worksurfaces. Pedestal depth must match desk worksurface end depth.



Hinged modesty panel always spans between two pedestals or between a pedestal and an end-support panel. It cannot extend behind the back of a pedestal.

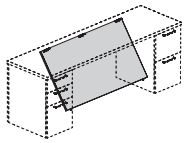
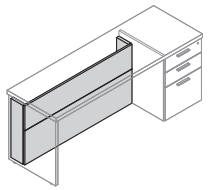
Modular Modesty Panels

Statement of Line	➤See page 16
Overview	30
Pricing	82
Finishes & Materials	135

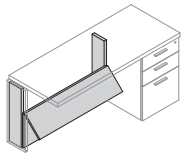
Details



Hinged modesty panel always spans between two pedestals or between a pedestal and an end-support panel. It cannot extend behind the back of a pedestal.



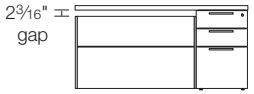
Technology modesty panels are available to provide wall access for units built from modular components. Assembled bridges and returns without a modesty panel will not accept the technology modesty panel. Widths are available up to 46".



Face of unit is hinged at the center to fold down to access wall.

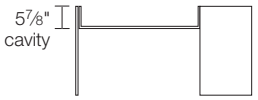
Connections

Technology modesty panel is not freestanding and must be secured between storage, end panels, or support panels.



Elevation View

Gap between the top of the modesty and underside of the worksurface of 2 3/16" allows cords from adjoining extensions or main worksurfaces to exit into the cavity.

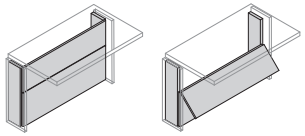


Plan View

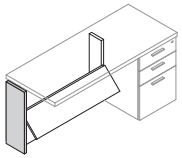
When mounted flush with the back of storage or end panel, the modesty creates a 5 7/8" cavity to store cords. The unit can be mounted forward to create a larger cavity to the wall.

Planning Factors

Specify the same size modesty panel as the kneespace width into which it will fit.



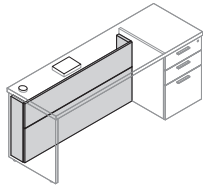
Bridge worksurfaces can be placed above a technology modesty panel. Two 12"D worksurface support panels are required to which the technology modesty panel will attach.
The technology panel and the support panels do not attach to or provide support for the bridge; bridge is supported by adjacent worksurfaces with flat brackets.



Returns and credenzas created from modular components can accommodate a technology panel. One 12"D worksurface support panels is required to mount on the open end. Order the modesty to correspond with the kneespace width for assembled returns without modesty.

For modular returns, calculate the kneespace opening to determine the modesty panel width. For example: 72"W worksurface – 15"W pedestal = 57"W technology modesty panel.

Related Products



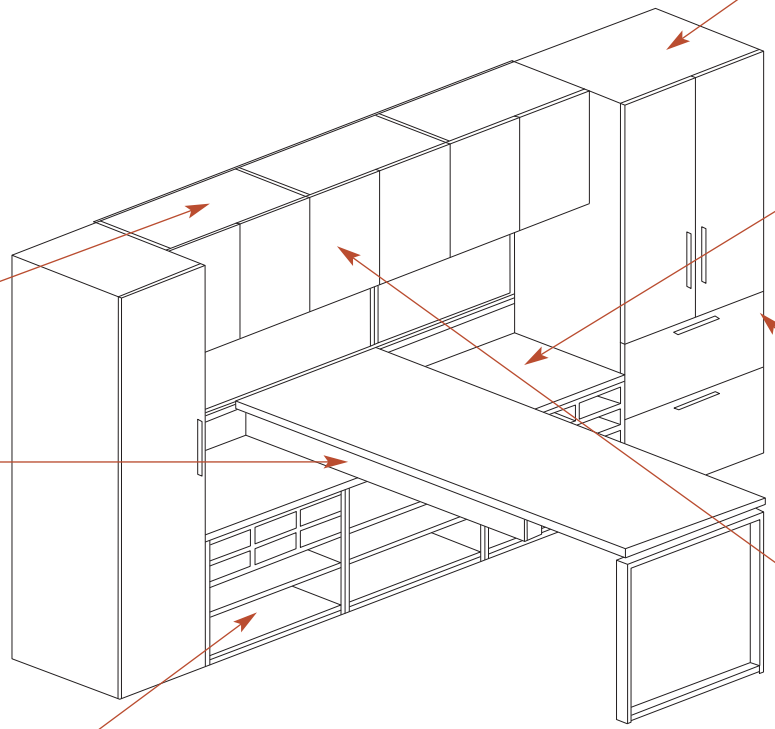
Factory-installed worksurface grommet options (G1 and G19) are designed to allow cords to fall directly into the technology modesty panel's cavity.
➤See the Perks Price List for power/data center and field-installed grommets.

Storage & Tables

Overview

Typical Configurations	➤See page 6
Statement of Line	18
Base Requirements	46
Finishes & Materials	135

Products in this section are universal to both Progressive and Classic styles. Items not mounted below the worksurface, such as low storage, overheads, highback organizers, vertical storage, and tables, can complement both classic and progressive office layouts.



Overheads, highback organizers, and set-on-surface storage are available in a variety of door selections.

Modesty panel/cable surround conceals power and data below the surface and can also provide support in progressive and classic applications.

Utilize low storage for storage, extra work area, occasional seating and to divide space.

Vertical storage can be used in private office, open plan, and benching applications.

Low storage, when used with component worksurfaces and additional support such as a short end panels or modesty panel/cable surround, can provide support for worksurfaces and create a layered affect to the workstation.

Face-mounted locks are standard on all undersurface storage and optional on storage doors above the worksurface.

Progressive/classic overheads can be wall-mounted or Traxx-mounted as shown here.

Stand-alone tables utilizing fixed, round, or square bases complete the office.

➤See page 5 for Progressive and Classic distinctives.

Undersurface & Low Storage

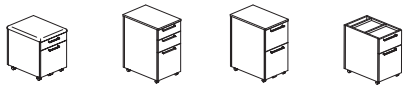
Product Information

Overview	➤See page 36
Statement of Line	18
Pricing	93
Finishes & Materials	135

Details

Pedestals and low storage units are available in wood or laminate and are finished on all sides. Laminate units offer flexibility in color selection in on drawer fronts, back and chassis. This option enables you to utilize storage elements to create an environment to meet your brand and image.

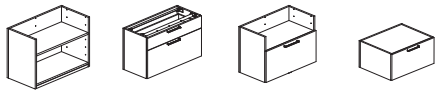
Anti-tip mechanism and lock are standard on all mobile pedestals and low storage with drawers. Mobile low storage units also include counterweights.



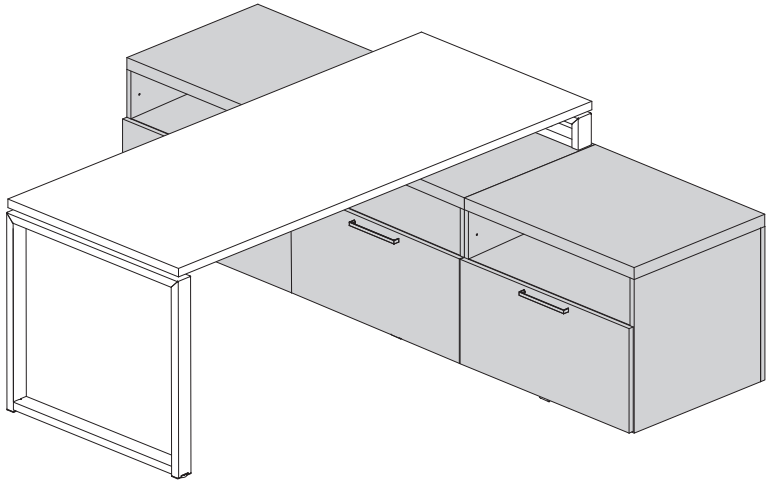
Mobile cushion-top pedestal provides occasional seating as well as storage. The 24"H box/file mobile pedestal easily stows under surfaces in both progressive and classic applications.

Mobile box/box/file and file/file pedestals stow under surfaces in Classic applications only. IMPORTANT: In Progressive applications, these pedestals interfere with the undersurface support rails; they can be used next to a progressive surface but not underneath.

23"H active file provides two divided sections in the top area to place papers and folders for easy access to work-in-progress. The open slot in the rear of the pedestal allows for hanging Pendaflex® folders for hot project files. Lock in bottom drawer locks both box and file drawer. Active file easily stores under surface of Progressive and Classic offices.



Low storage is available freestanding or mobile. Units are available in two heights (15 3/16" and 21 3/8"H), two widths (30" and 36"W), and in two depths (16" and 24"D). Low storage is available in a variety of configurations, including open bookcase, open/lateral file and box/lateral file.



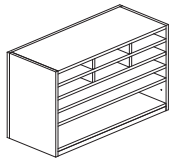
Mobile low storage units feature inset casters enabling the mobile and freestanding units to align when sitting next to each other. Mobile low storage cannot be used to support worksurfaces or other storage.

Priority low storage bottom drawers align with other Priority storage units to keep a consistent visual within the office.

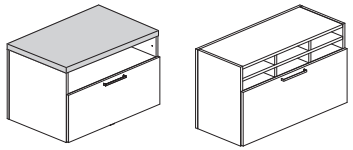
Connections

Use component tops to span multiple low storage units for a cleaner aesthetic.

15"H open bookcase features three holes spaced 3 3/16" apart and accepts either three straight or organizer shelves, specified separately.



22"H open bookcase features a fixed shelf. There are two holes spaced 3 3/16" apart above the fixed shelf to accept either two straight or organizer shelves. There are 3 holes below the fixed shelf to accept either three straight shelves or organizer shelves, specified separately.



22"H open/lateral file unit accepts either two straight or organizer shelves in open area. If using as a pedestal cushion or component top with an open/lateral, shelves cannot be used in the top position.

Planning Factors

Component tops in either softened or knife rim are required for the box/lateral file units. Knife rim component tops extend ¼" beyond the drawer fronts.

If using low height storage in conjunction with end panels for support, 1 3/16" component tops are required to span the low storage. 5" or 11" end panels are then placed atop the storage and properly align to undersurface height.

If using low height storage as freestanding units, component tops are required for the box/lateral unit but not required on other units.

Low storage cushion, specified separately, is the same thickness as the component tops (1 3/16") for visual alignment. In depth, the pedestal cushion aligns with the drawer fronts on the low height storage.

Open areas in the low storage accept either straight or organizer shelves. Organizer shelves should be installed with the organizer leg pointed downward. To add color contrast to units, specify shelves in different finish or material than the low storage unit.

33"H highback organizers can be used above freestanding, fixed-height low storage with component tops to divide space and provide additional storage.

If using low storage in a freestanding application without component tops or with a high-back organizer, pedestal ganging bracket (KACGB1) is recommended.

Overhead Storage

Overview	➤See page 36
Statement of Line	20
Pricing	101
Finishes & Materials	135

Details

Overhead storage cabinets are 16"D and with wood or laminate chassis.

Sliding-door overhead cabinets are 16"H and available in widths from 30"–72". They feature one non-locking, solid or writable glass door that can slide from side to side. One side of the unit will be open at all times; center panel divides the space.

Hinged-door overhead cabinets are available in 30", 36", 48", 60", 66", and 72" widths. These 19"H units offer solid, opaque glass, or writable gass doors.

Finished inset top, finished bottom, and apron rail conceal lighting.

2 door

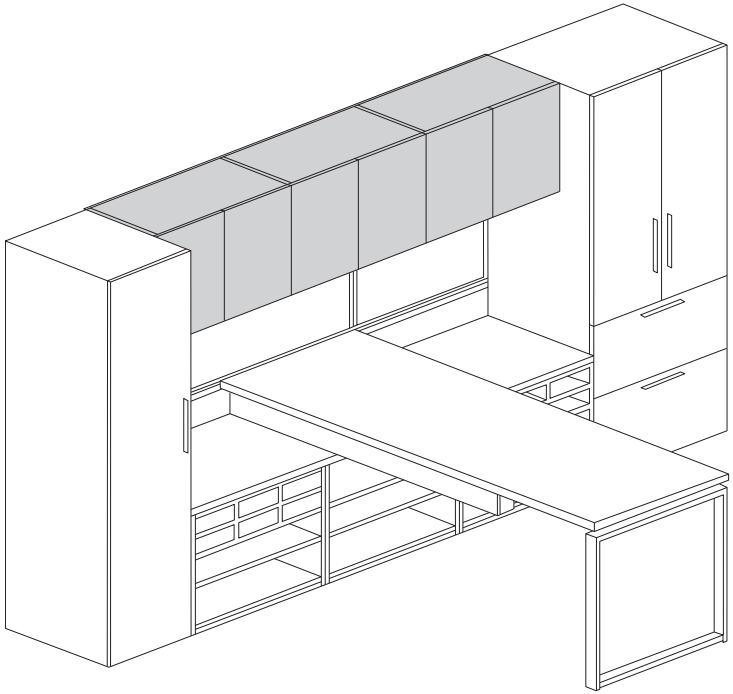
3 door

4 door

Hinged-Door Configurations:

- 30"W and 36"W overhead storage cabinets have 2 doors.
- 48"W overhead storage cabinets have 3 doors.
- 60"–72"W overhead storage cabinets have 4 doors.

Note: A support panel divides the interior into separate sections as indicated above.



Wood hinged four-door models feature one set of doors with matching grain pattern; laminate models feature two sets of two-doors that match.

Back panels are inset between the end panels on both wall-mount and Traxx-mount models for a neat appearance.

Connections

Overhead storage cabinets can be Traxx or wall mounted. 30"W overheads must be supported by at least two solid attachment points on a wall. 36"W must be supported by at least three solid attachment points on a wall. 48", 60", 66", and 72"W overheads must be supported by at least four solid attachment points on a wall.

Wall-mount models include attachment brackets and rail.

Traxx-mount models include an attachment bracket. Traxx and tiles must be specified separately.

Related Products

Interior shelves, specified separately, are available for wall-mount sliding door overheads to enhance organization.
➤See page 102.

Glass Pattern/Door Frame Finish:

- Opaque Frost glass (11) with Silver Frost frame (510); available on hinged-door models only
- Ice Gloss Writable Glass (202G) with Silver Satin frame (511)

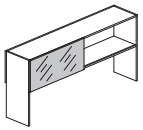
Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.

Highback Organizers

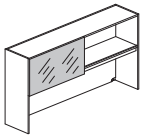
Overview	➤See page 36
Statement of Line	20
Pricing	103
Finishes & Materials	135

Details

Sliding-door highback organizers feature a wood or laminate chassis and one non-locking, solid or writable glass door that can slide from side to side. One side of the unit will be open at all times; center panel divides the space.

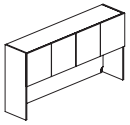


33"H sliding-door models are available in 60", 66", or 72" widths. Back is finished and the area below the cabinet is open for use in open plan applications.



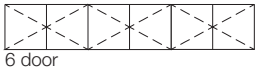
38"H sliding-door models are available in 60", 66", 72", 90", and 96" widths. Back is unfinished and is for use in private office applications. Back panel features three black plastic grommets with cover (one at top center and one in each lower corner).

Grain direction on laminate backs 60"W or wider runs horizontally.



Hinged-door highback organizers are available in widths ranging from 60"–108"; they are 38"H (nominal). Back is unfinished for use in private office applications. These units are offered with solid, opaque glass, or writable gass doors.

4 door



6 door

Hinged-Door Configurations:

- 60"–72"W overhead storage and highback organizers have 4 doors.
- 90"–108"W highback organizers have six doors.

Note: A support panel divides the interior into separate sections as indicated above.

Wood hinged four-door models feature one set of doors with matching grain pattern; laminate models feature two sets of two-doors that match.

Finished, inset top and apron rail conceals lighting.

Back panels on overhead storage cabinets are inset between the end panels on both wall-mount and Traxx-mount models for a neat appearance.

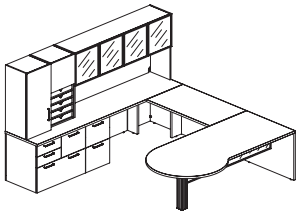
Connections

33"H highback organizers can be used above freestanding, fixed-height low storage with component worksurfaces to divide space and provide additional storage.
➤See dimensions and illustrations at right.

If using low storage in a freestanding application without component tops or with a highback organizer, pedestal ganging bracket (KACGB1) is recommended.

Highback organizers require proper support, such as non-adjustable legs, end panels, or pedestals directly under the worksurface where the end panel of the highback rests.

Planning Factors

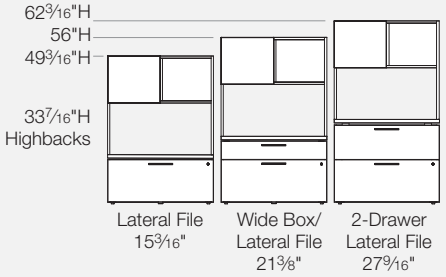


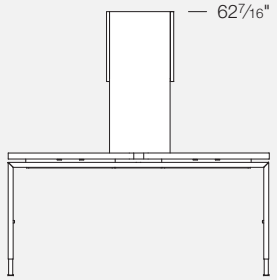
Highback organizers can be specified with set-on-surface storage to create a variety of configurations.

Related Products

38"H highback organizers accept slat tiles or tackboards, specified separately.

Dimensions:





Glass Pattern/Door Frame Finish:

- Opaque Frost glass (11) with Silver Frost frame (510); available on hinged-door models only
- Ice Gloss Writable Glass (202G) with Silver Satin frame (511)

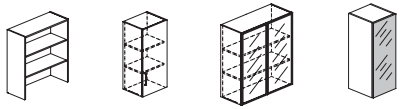
Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.

Set-on-Surface Storage

Product Information

Overview	➤See page 36
Statement of Line	21
Pricing	107
Finishes & Materials	135

Details



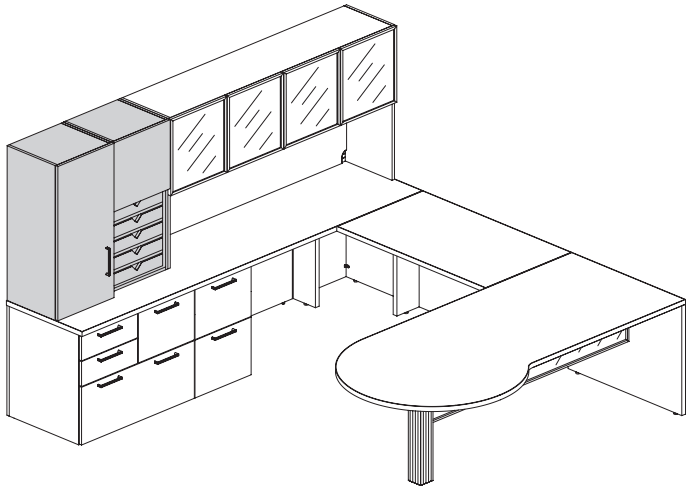
Set-on-surface bookcases are for use on top of worksurfaces. Chassis is 16"D and available in wood or laminate. Single-door, double-door, and open bookcase models feature two ¾"-thick shelves; top shelf is adjustable.

Set-on-surface organizers can be used in conjunction with set-on-surface bookcases, highback organizers, and overheads.

Doors are available in solid, opaque glass, and writable glass options. Glass doors are non-locking.

Connections

Ganging adjacent units is recommended. Ganging bolts are included.



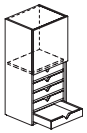
Planning Factors

Set-on-surface models align with highback organizers for a clean aesthetic.

Nominal widths of 15", 18", 30", and 36" can be used together to create a workwall. Bookcases and organizers can be used together.

IMPORTANT: Set-on-surface storage is not intended for freestanding applications.

Related Products



Project trays, specified separately, are available for use in 18"W set-on-surface organizer models; they will accommodate up to five project trays.
➤See page 109.

Glass Pattern/Door Frame Finish:

- Opaque Frost glass (11) with Silver Frost frame (510); available on hinged-door models only
- Ice Gloss Writable Glass (202G) with Silver Satin frame (511)

Note: Expo or Expo2 dry-erase markers are recommended for use on writable glass doors. Other low-odor dry-erase markers are not recommended, as they may leave undesirable results when erased.

Vertical Storage

Product Information

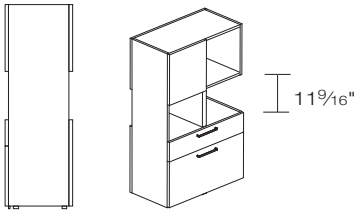
16"D

Overview	➤See page 36
Statement of Line	22
Pricing	110
Finishes & Materials	135

Details

16"D vertical storage is available in space divider and bookcase/lateral file models. Both are offered in laminate or wood.

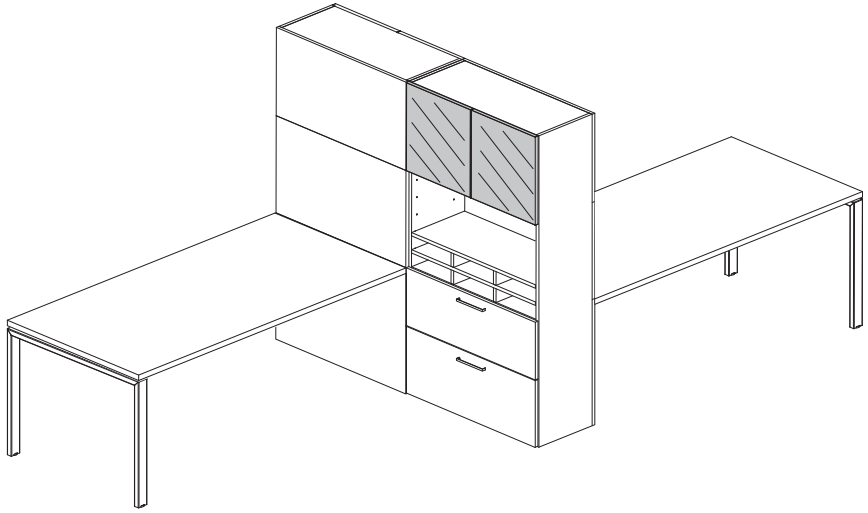
➤See applicable price list for additional information on options.

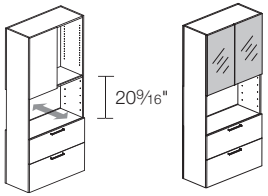


Space divider vertical storage units provide storage as well as side-to-side privacy. These units can be positioned so that the overhead section spans above the worksurface while the box/lateral file spans below the surface; open area is 11 9/16". Units are 16"D x 29 15/16"W and 48 7/8"H and available in left or right orientation. Units feature a two piece, non-matched back panel set for the upper and lower sections.

Each space divider unit consists of:

- Bottom section with a wide box/lateral file with lock in bottom drawer; anti-tip device is standard in bottom drawer.
- Middle section with cubby area on one side and open area on the other.
- Top section with hinged door on one side and cubby area on the other.





Bookcase with two-drawer lateral files are available in nominal heights of 50", 67" and 80"H in wood or laminate. Lock in top drawer position. These units can be used to divide space in open plan areas. Units feature finished backs with finished inset top. Full back units for the 67" and 80"H units feature three-piece matched back panel set. Partial back units have open center sections and feature two-piece non-matched back panel sets.

All bookcase vertical storage models accept straight or organizer shelves in 20 9/16"H center area, specified separately. 50"H units feature bookcase area with five holes spaced 3¼" apart. 67" and 80"H units feature center section with five holes spaced 3¼" apart.

Top section with center divider is available with one sliding door (non-locking) or two hinged doors in wood, laminate or writable glass. Hinged doors feature pulls in vertical position with locking or non-locking doors. Top section has 7 holes on 67"H model or 17 holes on the 80" model, spaced 1¼" apart to accept straight interior shelves for additional organization.

Connections

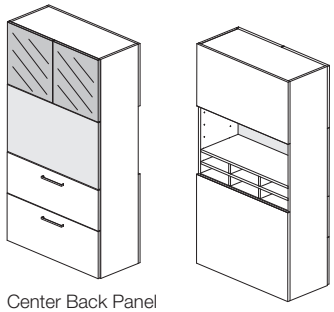
IMPORTANT: **All units must be ganged** with provided ganging bolt and are not intended for use as a single, freestanding unit.

Starter brackets, specified separately, can be attached to back of unit. Starter brackets connect to undersurface support rails to support surfaces, displacing the need for a support leg on that side. Storage unit will be defaced.

➤See the Priority Price List for starter bracket planning information.

Planning Factors

Units are designed so that the middle sections align with worksurface heights; see illustration at left.



Center Back Panel
Installed on Opposite Side

Specify back panels separately in a different material or finish to add a band of color to the center section to create a non-monochromatic aesthetic. Center back panels on full-back models can be removed in the field and replaced with another in a different material or finish, or moved to the front of the unit, exposing the center section to the opposite side.

Vertical Storage

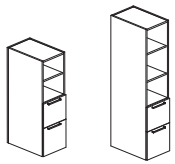
Product Information

24" and 30"D

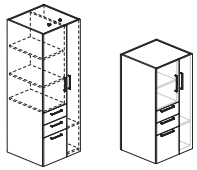
Overview	➤See page 36
Statement of Line	22
Pricing	117
Finishes & Materials	135

Details

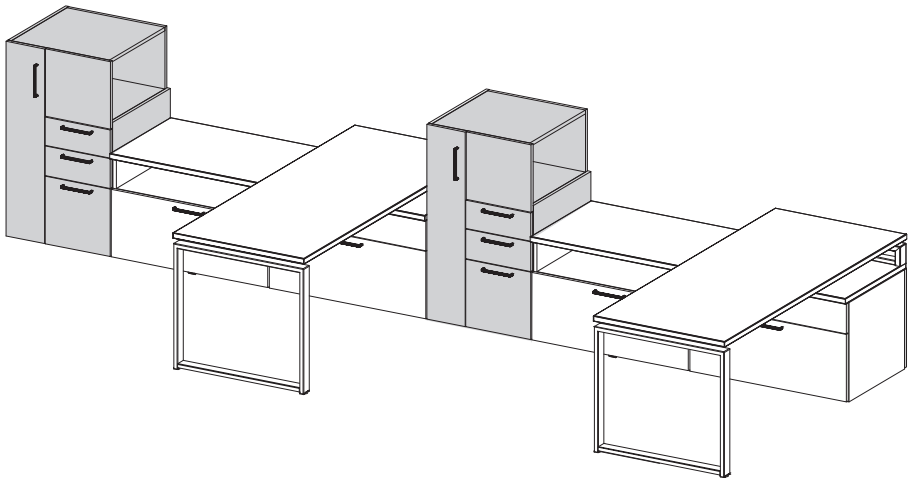
24" and 30"D vertical storage is available in a variety of shelf, door, drawer, and wardrobe configurations.

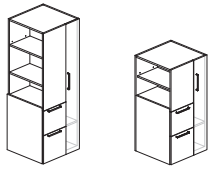


Open bookcase with letter-width file drawers have finished inset top and are 23½"D and 14 15/16"W. Three height options: nominal 42" and 50"H units have finished backs and one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf.

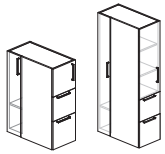


Front access vertical storage towers with finished inset top are available in left or right configurations and in nominal heights 42", 50", and 67". Nominal 42" and 50" H units have finished backs for use in open plan. Select from either box/box/file or file/file letter width drawer options with lock. Shelf storage above drawers include and one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf. Wardrobe area in applicable models includes removable coat rod and one fixed shelf 12" above bottom panel; interior width is 7⅞"W. Door pulls are in vertical application and feature optional locking.

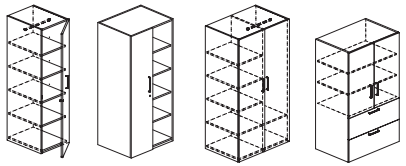




Side-access bookcase vertical storage towers with finished inset top are available in left or right configurations and in nominal heights 42", 50", and 67". Nominal 42" and 50"H units have finished backs for use in open plan. Select from either box/box/file or file/file letter width drawer options with lock. Shelf storage above drawers includes one adjustable shelf; nominal 67"H unit has unfinished back and one fixed and one adjustable shelf. Wardrobe area includes removable coat rod and one fixed shelf 12" above bottom panel; interior width is 7⅞"W. Door pulls are in vertical application and feature optional locking.



Side-access wardrobe units are 29 11/16"D and are intended for end-of-run applications with wardrobe sections facing outward in left or right configurations. Available in nominal heights of 42", 50", and 67" with finished inset tops. 42" and 50" units have finished backs for use in open plan; 67" units have unfinished backs. Units are 15"W with either letter width box/box/file or file/file configurations with optional lock. Front-access single-door storage area has one adjustable shelf on 50"H units; and one fixed and one adjustable shelf in 67" units. Wardrobe area is 7⅞"W; 42" wardrobe has one coat hook while the 50" and 67" units contain removable coat rod and fixed shelf 12" above bottom panel.



Single- and double-door units are 68"H nominal heights feature combinations of shelf storage. Single-door units are 18" or 30"W nominal with left or right hinged doors with shelf or wardrobe storage. Double-door units offer combinations of shelves and lateral file or shelves and wardrobe. Locking is optional.

Connections

Starter brackets, specified separately, can be attached to back of unit. Starter brackets connect to undersurface support rails to support surfaces, displacing the need for a support leg on that side. Storage unit will be defaced.

➤See the Priority Price List for starter bracket planning information.

Planning Factors

Units are designed to complement Progressive and Classic applications.

When using storage in place of support legs, be aware of starter bracket location. In Progressive applications, bracket is mounted ¾" higher than in Classic applications.

Shelving Units and Bookcases

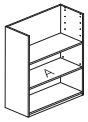
Product Information

Overview	➤See page 36
Statement of Line	23
Pricing	123
Finishes & Materials	135

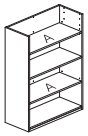
Details

Freestanding shelving units are available in 42" or 50"H with finished backs. Shelves are ¾" thick. These units align with other vertical units and can be used to divide space as well as provide storage. Top section accepts straight and organizer shelves or can remain open for binder storage.

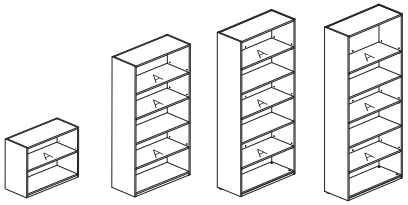
Freestanding bookcases are available with arc front or straight front in laminate or wood. These units have finished inset tops and unfinished backs. Shelves are ¾" thick. Both straight and arc front models are 35⅞" wide and feature 11⅞" shelf openings when shelves are in center position unless otherwise noted.



42"H shelving unit accepts up to four organizer shelves and one straight shelf. Straight shelf must always be used in top position. One adjustable shelf can be positioned up or down 1¼"; shelves are ¾" thick. 11⅞" shelf openings when shelves are in center position (excluding top section). Accommodates five straight shelves or four organizer shelves, and/or component top.

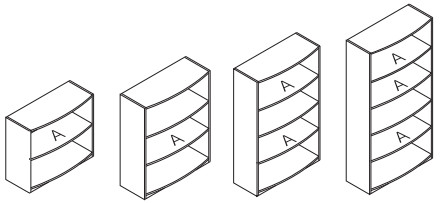


50"H unit accepts up to two organizer shelves and one straight shelf. Straight shelf must always be used in top position. Two adjustable shelves can be positioned up or down 1¼"; shelves are ¾" thick. 11⅞" shelf openings when shelves are in center position (excluding top section). Top area holds two organizer shelves or three straight shelves, and/or component top.



Straight front units are 15³⁄₁₆"D and feature adjustable shelves as noted below that can be positioned up or down 1¼".

- Two-shelf unit features one adjustable shelf and is 27⁹⁄₁₆"H.
- Five shelf unit features three adjustable shelves and is 66⅞"H. Top opening is 13⅜".
- Six-shelf unit is available in two heights: 79³⁄₁₆" or 84". Both units offer three adjustable shelves. 79"H unit has 13⅜" opening in top position while the 84" model has a 17¹⁵⁄₁₆" top opening. 84" ships with a tip-resistant kit and must be attached to a wall.



Arc-front bookcases feature shelves that extend 3" beyond the 15¹³⁄₁₆" end panels.

- Two shelf unit is 27⅝"H with one adjustable shelf.
- Three shelf unit is 40¼"H with one adjustable shelf.
- Four shelf unit is 35⅞"H with two adjustable shelves.
- Five shelf unit is 52⅞"H with three adjustable shelves.

Table Tops & Bases

Product Information

Overview	➤See page 36
Statement of Line	24
Pricing	126
Finishes & Materials	135

Details

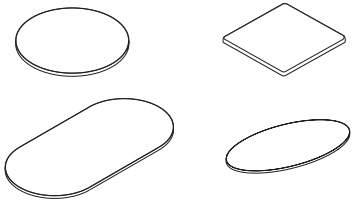


Table tops are available in wood, high-pressure laminate (HPL) with wood rim, and HPL with a PVC rim, or thermally fused laminate (TFL) with a PVC rim. Select from round, square, racetrack, and ellipse shapes.

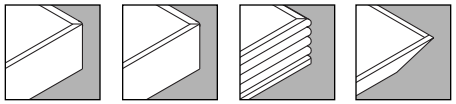
Table tops are 1 3/16" thick, 3-ply, balanced construction. Rims are ⅛" thick.



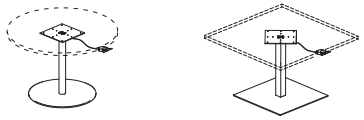
P Softened PVC rim | **F** Softened wood rim | **M** Reed wood rim | **S** Knife wood rim

Laminate models are available with a softened PVC (P) rim profile.

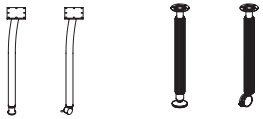
Wood and laminate/wood rim models are available with a softened (F), reed (M), or knife (S) rim profile.

Base requirements differ based on the table top shape and size.
➤See page 46 for base requirements.

Cylinder base is available in wood or laminate. For use with round, square, and racetrack tops. Specify two for racetrack tops.

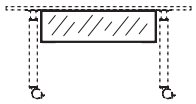


Round and square bases are available in fixed and adjustable-height (gas lift) models. Height-adjustable models are standard with a release paddle for field installation on the underside of the top. Adjustment range is 16" from 26"–42"H. Accepts round 36" or 42" 1 3/16" table tops only; neither base accepts casters.



Column legs are specified singly and are available in static model with glide or mobile model with locking caster. They are available in a paint finishes or chrome. These can be used to support table tops or as support at the end of a worksurface.

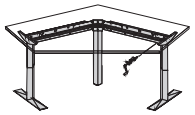
Adjustable-height column legs feature a fluted surface and are available in cinder, platinum metallic, or silver frost metallic finish. Static model or mobile model with locking caster are available; both models may be set to heights ranging from 25¾"–34⅝" (without top) to allow the table to nest under other worksurfaces or tables. Mobile models are not applicable to 36" round top. Standard model includes set of four legs.



Modesty panels are available to attach to the underside of 36" x 72" racetrack or 40" x 72" elliptical table tops. They feature a metal frame with silver frost finish and an opaque frost glass insert.

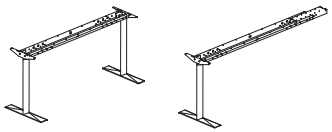
Select contemporary table bases, available as part the Kimball Office contemporary tables offering, are available for use Priority table tops:
- 24"-diameter cylinder base (CBS2724CYL)
- 16" soft-square (CBS1627SSW)
- 16" square (CBS1627SQW)
- 24" square (CBS2427SQW)

➤See the Tables Price List to specify.



Fixed-height T-leg and post-leg style bases, similar to Progressive height-adjustable bases, but with no height adjustability, are available. Fixed-height T-leg bases are applicable to rectangular worksurfaces or racetrack table tops. Fixed-height 90° and 120° bases (shown above) are applicable to 90° and 120° worksurfaces, respectively. These bases ship ready to assemble. Plastic leveling inserts located at the bottom of the feet provides 1" of adjustment. Aluminum foot on T-legs can be specified in polished (upcharge applies) or in a contrasting color from the column. The maximum kneespace clearance is 20 9/16".

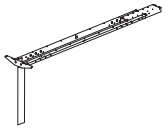
➤See the pricing pages for the size of base required based on the table top size.



Fixed-height T-leg bases, for use with 24", 30", and 36"D worksurfaces, consist of one or two T-legs with feet and a set of undersurface support rails that run underneath the center of the worksurface. Return mounting bracket is included with the return model. Specify two flat brackets separately for return applications.

Maximum load*: 400 lbs. BIFMA/670 lbs. UL
Max. load L-config*: 775 lbs. BIFMA/1300 lbs. UL

*Maximum load for tables with casters is 120 lbs.; applies to all table base types.



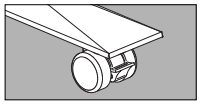
Fixed-height extension post-leg bases consist of one or post-leg and a set of undersurface support rails that run underneath the center of the worksurface. They are intended for use as a return base. Depending on the depth of the main worksurface and the depth of the extension worksurface, the post will be inset approximately 12"–15" fro the end of the extension worksurface. Return mounting bracket is included. Specify two flat brackets separately for return applications.

Maximum load*: 400 lbs. BIFMA/670 lbs. UL
Max. load L-config*: 775 lbs. BIFMA/1300 lbs. UL

*Maximum load for tables with casters is 120 lbs.; applies to all table base types.

T-leg casters for field installation may be specified separately for tables up to 36"D x 96"W.

➤See the Priority Price List.



Field installed caster kits for T-leg bases are available.
Note: Casters are not directly applicable to a 3-leg 90° or 120° base with center post. To create a mobile 3-leg table, order two caster kits, a return foot kit model 53KFKTR for the post leg, and hardware bag #2417313 (service parts) for screw to attach the foot and casters.

Standard Includes

- Worksurface
- Rim on four sides

How to Specify

❶ Model
❷ Worksurface material:
LL = TFL with P rim
L = HPL with P rim
LW = HPL with F or M rim
W = Wood with F or M rim
1LW = HPL with S rim
1W = Wood with S rim
③ Rim profile:
P = Softened PVC (LL or L)
F = Softened wood (LW or W)
M = Reed wood (LW or W)
S = Knife wood (1LW or 1W)
④ Worksurface grommet/cutout option:
X = No grommet or cutout
➤See page 58 for designators.
⑤ Worksurface finish price group (omit for LL):
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑥ Worksurface finish designator
⑦ Rim finish price group (omit for LL, L, W, and 1W models):
STD = Group 1
STD2 = Group 2 (+20%)
⑧ Rim finish designator (omit for W and 1W models)

Standard Includes

- Worksurface
- Rim on three sides
- Wire manager on back side

How to Specify

❶ Model
❷ Worksurface material:
LL = TFL with P rim
L = HPL with P rim
LW = HPL with F or M rim
W = Wood with F or M rim
1LW = HPL with S rim
1W = Wood with S rim
❸ Rim option:
3 = Wire manager
④ Rim profile:
P = Softened PVC (LL or L)
F = Softened wood (LW or W)
M = Reed wood (LW or W)
S = Knife wood (1LW or 1W)
⑤ Worksurface grommet/cutout option:
X = No grommet or cutout
➤See page 58 for designators.
⑥ Worksurface finish price group (omit for LL models):
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑦ Worksurface finish designator
⑧ Rim finish price group (omit for LL, L, W, and 1W models):
STD = Group 1
STD2 = Group 2 (+20%)
⑨ Rim finish designator (omit for W and 1W models)
⑩ Wire manager finish designator

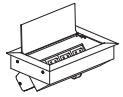
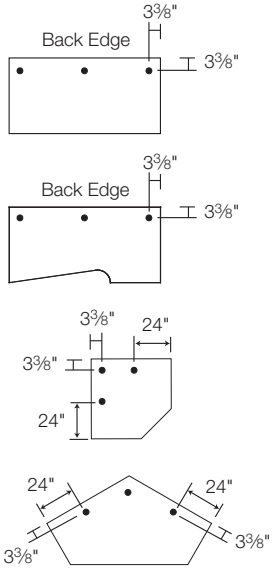
Related Products

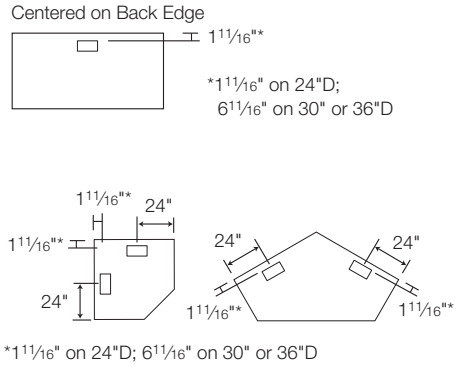
G19 metal grommets for field installation are also available. Note the location of support legs to ensure they do not interfere with grommet locations.
➤See the Perks Price List.



G20 cut-out is designed to accept 8 5/16" x 5 5/16" power/data center (model 99KPDCAM), specified separately.
➤See the Perks Price List.



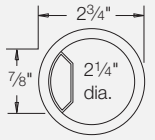
G1 or G19 Grommets



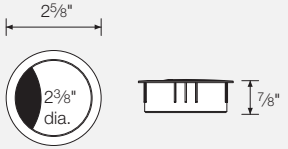
**1 11/16" on 24"D; 6 11/16" on 30" or 36"D*

G20 Cut-Outs

Standard Includes/Available Finishes



G1 plastic grommet is a two-piece unit with snap-in lid. Lid cutout slides open to route cables or can be closed when not in use. Available finish:
MB Matte Black



G19 metal grommet is a two-piece unit with black brush access. Available powdercoat finishes:
405 Designer White
487 Brushed Nickel
490 Polished Chrome
501 Platinum Metallic
514 Carbon Metallic
544 Silver Pearl

How to Specify

① Insert the location *and* finish designator into model number sequence as indicated on the corresponding pricing page.

Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.
For example:
G1LMB = G1 grommet, left, matte black
G19R501 = G19 grommet, right, platinum metallic

IMPORTANT: Only the grommet locations shown in the matrix with a designator and price are available. Arc-end, wedge, oval, and U-shaped worksurfaces do not offer factory-installed grommet options.

Modesty panel grommet option

Standard Includes

- Fixed modesty panel (ships unattached; assembly required)
- Front-to-back grain direction on worksurface

How to Specify

❶ Model
❷ Worksurface/modesty panel materials:
LL = TFL/TFL
L = HPL/TFL
LW = HPL/wood
W = Wood/wood
③ Rim profile:
P = Softened PVC (LL or L)
F = Softened wood (LW or W)
M = Reed wood (LW or W)
S = Knife wood (LW or W)
④ Modesty panel option:
X = Fixed modesty panel
H = Hinged modesty panel (+$50)
⑤ Worksurface grommet option:
X = No grommet
➤See page 77 for designators.
⑥ Modesty panel grommet option:
X = No grommet
MG1MB = Center top (+$55); matte black
⑦ Worksurface finish price group (omit for LL):
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)
⑧ Worksurface finish designator
⑨ Chassis finish designator (omit for LW and W models)
⑩ Rim finish price group (omit for LL, L, and W models):
STD = Group 1
STD2 = Group 2 (+20%)
⑪ Rim finish designator (omit for W models)

Modesty panel grommet option on kneespace model

Standard Includes

- Two file/file letter-width pedestals
- Two hinged doors and one adjustable shelf in center section of storage credenza
- Fixed modesty panel on kneespace credenza (ships unattached; assembly required)
- Finished back

How to Specify

❶ Model
❷ Worksurface/chassis materials:
LL = TFL/TFL **L** = HPL/TFL
LW = HPL/wood **W** = Wood/wood
❸ Pedestal option:
2 = File/file
④ Rim profile:
P = Softened PVC (LL or L)
F = Softened wood (LW or W)
M = Reed wood (LW or W)
S = Knife wood (LW or W)
⑤ Pull option:
➤See page 37 for designators.
⑥ Lock option:
X = Non-locking
KS = Key specific (+$36 per lock); specify lock core(s) separately
KRB = Key random, black core (+$58 per lock)
KRS = Key random, silver core (+$58 per lock)
⑦ Modesty panel option:
X = Fixed modesty panel
H = Hinged modesty panel (+$50)
⑧ Worksurface grommet option:
➤See page 77 for designators.
X = No grommet
⑨ Modesty panel grommet option (omit for storage credenza):
X = No grommet
MG1MB = Center top (+$55); matte black

Undersurface Storage
➤See pages 78–79.

Support Panels
➤See page 85.

Hinged Modesty Panels
➤See page 82.

Standard Includes

- Worksurface (grain direction runs lengthwise)
- User's edge: knife rim profile (overhangs user side by 1¼")
- Side edges:
  - Flat (no rim profile) on "main" worksurfaces
  - Flat (no rim profile) on the pedestal side (exposed side edge) and reverse knife rim on abutting side on "extension" worksurfaces
  - Reverse knife rim on both sides on "filler" worksurfaces
- Back edge: flat (no rim profile)
- Attachment hardware

How to Specify

❶ Model
❷ Pedestal location (include for "extension" worksurface only):
R = Right (shown at left)
L = Left
❸ Worksurface material:
LW = HPL with S rim
W = Wood with S rim
④ Rim profile:
S = Knife wood
⑤ Worksurface grommet option:
➤See page 77 for designators
X = No grommet
⑥ Worksurface finish price group (omit for LL models):
STD = Group 1
STD2 = Group 2 (+20%)
FSCW = FSC-certified group 1 wood (+3%)

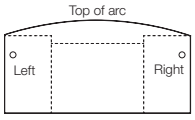
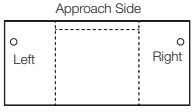
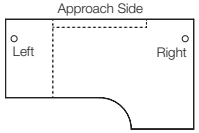
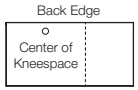
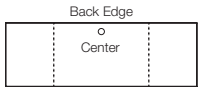
Worksurface grommets are located 3⅜" from the side edge. Location relative to the approach or back edge is 13½" on arc worksurfaces (to top of arc), 7½" on all rectangular and extended desk worksurfaces, and 3⅜" for all other surface shapes.

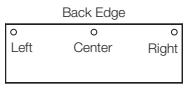


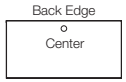


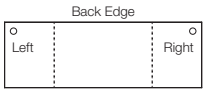


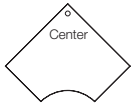




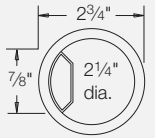




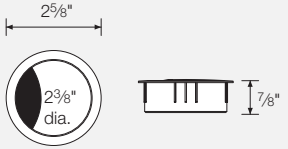




Standard Includes/Available Finishes



G1 plastic grommet is a two-piece unit with snap-in lid. Lid cutout slides open to route cables or can be closed when not in use. Available finish:
MB Matte Black



G19 metal grommet is a two-piece unit with black brush access. Available powdercoat finishes:
405 Designer White
487 Brushed Nickel
490 Polished Chrome
501 Platinum Metallic
514 Carbon Metallic
544 Silver Pearl

How to Specify

① Insert the location *and* finish designator into model number sequence as indicated on the corresponding pricing page.

Note: Specify grommet location and finish together in one step without a space between the location and the finish designators.
For example:
G1LMB = G1 grommet, left, matte black
G19R501 = G19 grommet, right, platinum metallic

IMPORTANT: Only the grommet locations shown in the matrix with a designator and price are available. Note: P-shaped and U-shaped worksurfaces do not offer factory-installed grommet options.

Samples:

Samples of Kimball Office wood finishes and paints are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur in color and texture. Kimball Office carefully selects all materials used in every product, ensuring a commercially acceptable color and finish.

Swatch cards and memo samples of Kimball Office fabrics are available upon request. There may be slight differences between samples and actual yardage as a result of variations in dye lots.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

Kimball Office offers a diverse collection of surface materials. Please see descriptions below to ensure that you are choosing the materials that best support your requirements.

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The Fabric Collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Generations Collection:

The Generations Collection is comprised of tried and true materials that have been in the Kimball Office offering for many years. This collection is designed to support long-standing customers and to help transition you to the current offering. ➤Visit kimballoffice.com to see the Generations Collection.

IMPORTANT: Materials in this collection should not be used to set standard color palettes for new installations.

Materials in this offering can be ordered using the standard process, however, extended lead times and minimum order quantities may apply. For best results, pre-planning orders with your Customer Service Representative is recommended.

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Warranty:

Fabrics and leathers are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).
➤See page 163 for complete warranty information.

Special Wood Finishes

Standard Finishes on Alternate Wood Species

Wood Finishes ➤See page 137
Laminate 141
Paint 143
Fabrics 147

Standard finish colors on alternate wood species are available.

Applicability of special finish colors depends on the wood species to which they are applied. Priority is available in:

- Cherry (price group 1)
- Maple (price group 1)
- Walnut (price group 1)
- Sapele (price group 2)

Note: Priority is also standard in Zebrawood, Canyon Oak, Monterey Oak, or Tuscan Walnut veneers; however, special finishes are not available on these veneers.

If one of our standard finishes is not appropriate, Kimball Office also has a library of previously developed special finishes, which may be an acceptable match for your application. A custom finish can also be developed to meet specific needs.
➤See next page for previously developed and custom finishes.

Upcharges:

A **10%** upcharge per line item (model) for special wood finishes applies. Upcharge is calculated on the base price, before other option upcharges are added.

Special Finish Designators:

	Wood Species		
Color	*Cherry*	*Maple*	*Walnut*
Amber	Standard/MC	MA00174KOG	WA02905KOG
Espresso	×	×	Standard/ES
Mocha	Standard/MH	×	WA02920KOG

× = Not feasible on wood species

Note: We have not yet developed special finish designators for standard finishes on alternate wood species for other wood finishes.

How to Specify

① Model:
Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② Finish type:
For the “Finish type” step, insert a special code (in place of STD):
ZCHY1 = Special cherry finish
ZMAP1 = Special maple finish
ZWAL1 = Special walnut finish
ZSAP1 = Special sapele finish

③ Finish designator:
For the “Finish designator” step, insert the designator from the table at left.

Special Wood Finishes

Previously Developed and Custom Finishes

Wood Finishes	➤See page 137
Laminate	141
Paint	143
Fabrics	147

Previously developed and custom finishes are available for special requirements. Kimball Office has an extensive library of previously developed special finishes which may be an acceptable match for your application. If not, a custom finish can be developed to meet specific needs.

Samples of previously developed special finishes are available from Customer Service upon request.

Applicability of special finish colors depends on the wood species to which they are applied. Priority is available in:

- Cherry (price group 1)
- Maple (price group 1)
- Walnut (price group 1)
- Sapele (price group 2)

Note: Priority is also standard in Zebrawood, Canyon Oak, Monterey Oak, or Tuscan Walnut veneers; however, special finishes are not available on these veneers.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a finish color.

Approval Process:

① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the $300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.

② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. Custom finishes will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.

③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

Upcharges:

A one-time fee of **$300** (net) will be billed for the development of each new custom finish. This fee covers all Kimball Office product lines on which the finish may be used. Models receiving a special finish will also be assessed an upcharge.

A **10%** upcharge per line item (model number) for special wood finish is calculated on the Grade 1 upholstery price, then added to the price for the selected fabric grade, to arrive at the list price.

How to Specify

① Model:
Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.

② Finish type:
For the “Finish type” step, insert a special code (in place of STD):
ZCHY1 = Special cherry finish
ZMAP1 = Special maple finish
ZWAL1 = Special walnut finish
ZSAP1 = Special sapele finish

③ Finish designator:
For the “Finish designator” step, insert the designator provided to you by customer service.

Wood Finish Characteristics

Application Guidelines

Including Care and Maintenance Tips

Wood Finishes	➤See page 137
Laminate	141
Paint	143
Fabrics	147

Kimball Office's experience in wood finishing extends from past generations of craftsmen to present day state-of-the-art technology.

Our Pura® finish is a proprietary, water-based, ultra-violet (UV) wood finish that has virtually no volatile organic compounds (VOCs). It uses less energy than our conventional finishing process and meets or exceeds BIFMA Furniture Emission Standards (FES) and U.S. Green Building Council LEED requirements for indoor air quality. Pura is exceptionally clear and durable and allows the beauty of our wood to shine through. The durability, depth, clarity, and beauty of Pura meets the high expectations customers have of Kimball Office finishes.

Finish fill and sheen level for the top surfaces is appropriate for the design and wood species. If different specifications are required, contact Customer Service.

All wood products are very susceptible to darkening from age and exposure to UV rays (sunlight and other sources), especially cherry and maple. Although a special UV inhibitor is added to finishes, care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change of the wood.

Grain characteristics of cherry veneer such as gum streaks and gum pockets occur naturally and add to the authentic look and feel of natural veneer. These are inherent to this veneer and should not be considered defects.

Brighton maple is a clear finish for those who appreciate the inherent beauty of wood. Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

Fine scratches from everyday use may be more visible on furniture with dark finishes. Darker finishes absorb more light, while fine scratches reflect the light. Therefore, scratches can be more emphasized due to this contrast. The use of a desk pad is recommended to keep scratching to a minimum.

To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth following direction of the grain.
- Dry with a separate cloth if needed.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.

Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminate surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

Customer Specified Laminate

Application Guidelines

GSA Non-Contract

Wood Finishes	➤See page 137
Laminate	141
Paint	143
Fabrics	147

Customer specified laminate (CSL) is available on Priority HPL surfaces. CSL is not available for TFL surfaces.
➤Contact Customer Service to initiate approval.

Kimball Office reserves the right to decline a customer specified laminate which may not be suitable for application.

Kimball Office assumes no responsibility for the durability, consistent coloration or any other performance characteristic of a customer specified laminate.

Metal, embossed, specialty, and supplier discontinued laminates must be custom quoted.
➤Contact By Design at 800.482.1616 extension 6002.

Kimball Office orders and procures all customer specified laminates.

Laminate sheen level must not exceed 60° for maximum durability of worksurfaces.

Lead times may vary for certain laminates. Minimum order quantities may apply.

Upcharges:

A **20%** upcharge per line item (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

How to Specify

① Model:
Build the complete model specification (excluding the finish type and finish designator) by following the How to Specify on the appropriate pricing page for the product that is to receive the special finish.

② Finish type: For the “Finish type” step, insert a special finish code (in place of STD).
ZFMA1 = Formica
ZLMT1 = Lamin-Art
ZLTC1 = Lamitech
ZNEV1 = Nevamar
ZPTE1 = Pionite
ZWST1 = Wilsonart

③ Finish designator: For the “Finish designator” step, insert the laminate designator (color number) of the laminate to be applied to the product.

Cut Yardage 148
Seating Upholstery 151
Cleaning Codes 150

All Kimball Office fabrics meet, and in most cases exceed, the minimum requirements set up by ACT. For the purpose of uniformity in the industry, Kimball Office will be utilizing the ACT icons on swatchcards and related materials.

The Association for Contract Textiles (ACT) has developed voluntary performance guidelines to make fabric specification easier. The five symbols give architects, designers, and end-users a vast amount of performance information in a succinct visual way. Look for these symbols on ACT member company sampling to assure that the fabrics you specify perform up to contract standards and pass all applicable testing.

These categories describe a material's performance features as measured by specified methods under standard laboratory conditions. All tests referenced here are intended to represent the most current version of a test method. Note: Individual ACT member product information may represent a different version of a test method depending on the date the product was introduced to the market.

IMPORTANT: These tests represent minimum requirements which are subject to change without notice and may not reflect requirements or laws in all locations.

Flammability:

The measurement of a fabric's performance when it is exposed to specific sources of ignition.
Note: ACT guidelines specify different flammability tests dictated by the intended end use for the fabric.

Upholstery
California Technical Bulletin #117 Section E—Class 1 (Pass)

Wrapped Panels and Upholstered Walls
ASTM E 84 (Unadhered Mounting Method)—Class A or Class 1

Wet & Dry Crocking:

Transfer of dye from the surface of a dyed or printed fabric onto another surface by rubbing.

Upholstery
AATCC 8—
Dry Crocking, Grade 4 minimum
Wet Crocking, Grade 3 minimum

Wrapped Panels and Upholstered Walls
AATCC 8—
Dry Crocking, Grade 3 minimum
Wet Crocking, Grade 3 minimum

Colorfastness to Light:

A material's degree of resistance to the fading effect of light.

Upholstery
AATCC 16—Option 1 or 3
Grade 4 minimum at 40 hours

Wrapped Panels and Upholstered Walls
AATCC 16—Option 1 or 3
Grade 4 minimum at 40 hours

Physical Properties:

Pilling is the formation of fuzzy balls of fiber on the surface of a fabric that remain attached to the fabric. Breaking strength is the measurement of stress exerted to pull a fabric apart under tension. Seam slippage is the movement of yarns in a fabric that occurs when it is pulled apart at a seam.

Upholstery
Brush pill—ASTM D3511, Class 3 minimum or Martindale Tester ASTM D4970, Class 3 minimum

Breaking strength ASTM D5034 (Grab Test)—50 lbs. minimum in warp and weft

Seam slippage ASTM D4034—
25 lbs. minimum in warp and weft

Wrapped Panels and Upholstered Walls
Breaking strength ASTM D5034 (Grab Test)—35 lbs. minimum in warp and weft

Abrasion Resistance:

The surface wear of a fabric caused by rubbing and contact with another fabric.

General Contract Upholstery
ASTM D4157 (ACT approved #10 Cotton Duck)—15,000 double rubs Wyzenbeek method

ASTM D4966 (12 KPa pressure)—
20,000 cycles Martindale method

Heavy Duty Upholstery
ASTM D4157 (ACT approved #10 Cotton Duck)—30,000 double rubs Wyzenbeek method

ASTM D4966 (12 KPa pressure)—
40,000 cycles Martindale method

End use examples of heavy-duty installations where upholstery fabrics rated at 30,000 double rubs should be appropriate are single shift corporate, hotel rooms/suites, conference rooms and dining area usage.

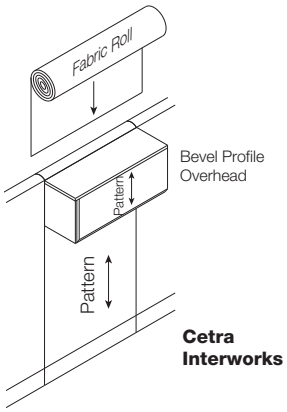
ACT acknowledges that there are extreme wear situations that may require higher levels of abrasion resistance. End use examples that may require higher than 30,000 double rubs include: 24 hour transportation terminals, 24 hour telemarketing, 24 hour healthcare emergency rooms, 24 hour casino gambling areas, and such public gathering places as theatres, stadiums, lecture halls and fast food restaurants.

It is strongly suggested that double rubs exceeding 100,000 are not meaningful in providing additional value in use. Higher abrasion resistance does not necessarily indicate a significant extension of the service life of the fabric.

The Wyzenbeek and Martindale tests are the two methods commonly used to predict wearability. Actual performance is determined by many factors such as fiber content, weaves, finishes, furniture design, maintenance, cleaning, and usage. Durability of an upholstery fabric is a complex interaction (combination) of a number of performance tests that, in addition to abrasion, includes seam slippage, pilling, tensile strength, and usage. There is no correlation between the Wyzenbeek and Martindale tests so it is not possible to estimate the number of cycles that would be achieved on one test if the results from the other test were known.

Wood Finishes	➤See page 137
Laminate	141
Paint	143
Fabrics	147

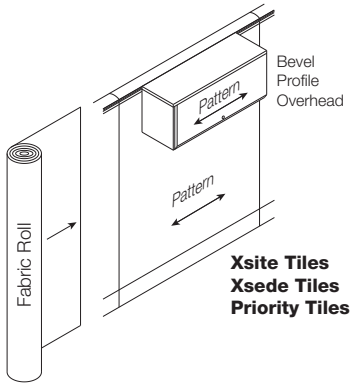
Standard Application:



Cetra
Interworks EQ

Directional fabrics are “cut up the roll” for standard application unless specified differently.

Railroad Application:



Xsite Tiles
Xsede Tiles
Priority Tiles

All fabrics will be applied in railroad (horizontal) fashion to Xsede, Priority, and Xsite tiles and larger-size tackboards. When viewing swatch cards or memo samples, turn 90° to get an accurate indication of how the fabric will appear.
➤See pricing pages for product application.

Railroad application of Kimball Office panel fabrics and COM requires a custom quote for all other products that do not have railroading listed as an option in the price list.
➤Please contact ***By Design.***

Terratex is a registered trademark of True Textiles, Inc. Each Terratex fabric must meet these four criteria:

- Made of 100% post-consumer and/or post-industrial fiber, or compostable materials
- Made using processes that reduce waste, emissions, energy, water usage, and toxic by-products
- Meets or exceeds the same quality standards of fabrics manufactured using virgin materials and conventional processes
- Made of a single fiber type, without backcoating, so that it too can be recycled or composted.

Green-e
100% of the electricity used to make these products is matched by Green-e certified renewable energy certificates.

Alliance Fabrics:

Kimball Office has formed partnerships with top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Lead times for alliance fabrics are based on supplier availability. Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply.
➤Contact Customer Service for availability before finalizing orders.

The information provided in this section is the most current information available at the time this price list was printed.

Application of Alliance Program upholstery will be as depicted on the swatch card unless otherwise instructed on the order.

For memo samples of Alliance fabrics, contact our alliance partners directly.

Terratex is a registered trademark of True Textiles, Inc. Each Terratex fabric must meet these four criteria:

- Made of 100% post-consumer and/or post-industrial fiber, or compostable materials
- Made using processes that reduce waste, emissions, energy, water usage, and toxic by-products
- Meets or exceeds the same quality standards of fabrics manufactured using virgin materials and conventional processes
- Made of a single fiber type, without backcoating, so that it too can be recycled or composted.

Green-e

100% of the electricity used to make these products is matched by Green-e certified renewable energy certificates.

Leather Characteristics:

Different coverings and seating constructions will respond better than others to specific seating applications. Certain leathers are more prone to relaxing over time and may demonstrate characteristics such as wrinkling or puddling. This does not indicate that the covering or application is deficient, but is considered a normal, inherent characteristic.

Some Kimball Office leathers and faux leathers may relax over time creating a loosely upholstered appearance.

Leather is a natural product. Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristic of leather.

Kimball Office will always ship a satisfactory commercial match. Because of industry dye-lot variation, colors may not match exactly.

Cleaning Leather:

Regular Cleaning

- Remove as much soil or staining as possible by carefully vacuuming or brushing.
- Dust with a dry or damp cloth.

Deep Cleaning

- Use mild non-detergent soap or cleaner. Wipe surface with a light circular motion. Repeat with clean water.
- Do not soak leather.
- Air dry.

Note: Never use furniture polishes, oils, solvents, varnishes, abrasive cleaners, ammonia, wax, or saddle soaps on leather.

Alliance Program Fabrics

Overview

For Use on Cushion-Top Pedestals and Low Storage Cushions

Carded Patterns ➤See page 157

Kimball Office has formed partnerships with the top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

Patterns from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics are available in a variety of design aesthetics and price points to meet all of your fabric needs. Carded fabrics are listed in this price list. ➤See Surface Materials at www.kimballoffice.com for a wide variety of additional graded-in fabrics from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Application of Alliance Program fabrics will be as depicted on the website or memo sample unless otherwise instructed on the order.

Directional fabrics, such as stripes, patterns, and plaids, may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return.

Fabric that requires non-stock special treatments such as flame proofing, anti-microbial treatment, electrical conductive backing, water repellent, stain repellent, or acrylic backing are not part of this program. Such orders should be specified as a COM.

Alliance graded pricing includes the cost of the material. Repeat is also accounted for and no additional upcharge is required.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

IMPORTANT: The information provided in this section of the price list is the most current information available at the time this price list was published. Contact Customer Service before finalizing any orders to check availability.

Lead Time:

Lead times for alliance fabrics are based on supplier availability.
Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply. Contact Customer Service for availability before finalizing orders.

TB133:

Contact Customer Service about TB133 requirements.
Note: Many of these fabrics may pass additional flammability tests. Please inquire about compliance with specific regulations.

Program Overview	➤See page 136
Cut Yardage	148
Seating Upholstery	151
Cleaning Codes	150

Customer's Own Material (COM) Policy:

While Kimball Office inspects fabrics for mill imperfections, some are difficult to recognize. Kimball Office is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring, appearance, or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Customers are responsible for ordering COM/COL and expediting delivery of the material, sent prepaid, to Kimball Office.

IMPORTANT: Kimball Office reserves the right to decline a fabric that may not be suitable for application to product.

COM Application Testing:

Application testing on product for non-preapproved fabrics is required.
➤Contact your Customer Service Team for the appropriate forms to initiate application testing.

The application test will render your fabric either:
- Approved
- Not recommended
- Restricted

A "not recommended" result is usually due to questionable construction of the material or pattern that is difficult to align. You will be required to sign a waiver to use any "not recommended" COM.

U.L. Listing/Flammability:

COM must be U.L. listed for use on tiles for benching stanchions before Kimball Office accepts and enters an order which will have COM fabrics. All COM testing and processing costs are the responsibility of the customer. A minimum of 2 yards of production run yardage is required for U.L. testing and flammability testing. Approval of a COM fabric may result in extended lead times. For cost estimates, yardage requirements and project lead times, consult your Customer Service Team.

Customer is responsible for fabric meeting the appropriate Cal. TB133.

Customer's Own Leather (COL)

Customer's Own Leather (COL) is available for use on pedestal and low storage cushions.

Leather is a natural product and variations in texture is a pleasing quality belong exclusively to high grade, full top-grain leathers.

Yardage/Sq. Footage Requirements:

➤See the product's pricing pages for COM yardage and COL square footage requirements.

Shipment of COM/COL:

After the fabric has passed the approval process described, Kimball Office will enter the product order and send an acknowledgement of the tentative ship date. A notification will be sent giving the date the COM must be received. If it is not received by the specified date, your ship date will be reassigned.

For Priority tackboards:
Kimball Office
COM Department
Dock 11
1620 Cherry Street
Jasper, IN 47549

For Priority tiles for benching stanchions:
Kimball Office
COM Department—Kimball Office
1881 West Seltice Way
Post Falls, ID 83854

For Priority mobile pedestal cushion and low storage cushions:
Kimball Office
COM Department
340 East 11th Avenue
Jasper, IN 47549-1001

IMPORTANT: Tag all materials with the Kimball Office dealer name and the purchase order number.

Production of Order:

When COM production yardage is received, COM is cut for the order and inspected for flaws. If flaws are found, you will be notified of the additional fabric required.

A return tag (e.g. COD shipment, UPS call tag) is required from the specifier within 45 days of the acknowledged ship date or all excess COM yardage will be discarded.

Preapproved COM:

➤Contact your Customer Service Team to obtain information on preapproved COMs.

Repeat Fabrics:

It is Kimball Office standard process to match repeat fabrics on fabric covered Overhead and Highback Organizer doors.

Repeat fabrics will be matched in what Kimball Office deems the best possible application of the pattern.

Additional COM yardage is required for repeat fabrics.

Repeat	*Additional Yardage required per Overhead Door*
0–6"	None
6"–12"	0.166 yards
12"–18"	0.500 yards
18"–24"	0.666 yards
24" or more	1.000 yard

Note: If the customer requires that the repeat fabric be applied in a random fashion, Kimball Office requires written notification in advance of order processing to that effect.
➤Contact your Customer Service Team to obtain necessary waiver.

Checklist:

When ordering COM for Kimball Office products, please make sure you have done the following:
- Supplied vendor name, fabric name, color name and number.
- Supplied arrival date of COM to Kimball Office.
- Received application testing approval before sending purchase order (or signed waiver if not approved for application).
- Received U.L. listing before sending purchase order.

Operating Load Capacities	164
Filing Capabilities	165

Locking storage units can be specified as:
- Key random with a black lock core and hinged key (KRB);
- Key random with a silver (matte nickel) lock core and round-head key (KRS); or
- Key specific (KS)

Black lock cores and hinged keys are identical to the ones used with other casegoods and systems products.

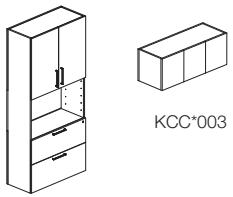
Silver lock cores and round keys are matte nickel. These lock cores and keys are identical to the ones used with Definition, Fluent and Hum. Minds at Work. series.

Key Random:

When key random option is selected, key numbers will be assigned arbitrarily at the factory with key numbers ranging from KCCB001 to KCCB300 (black) or KCCG001 to KCCG100 (silver).

Randomly numbered lock core(s) will ship standard along with your order for field installation. *Exception: Randomly numbered lock cores on Kwik Office models are shipped installed.*

KCC*001 KCC*002 KCC*001



KCC*001

KCC*003

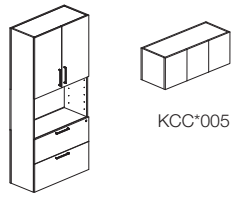
With random keying, different furniture units may or may not have the same key number. If you must have all locks keyed differently or all locks keyed the same, choose the key specific option.

Key Specific:

When key specific option is selected, the storage unit will be pre-drilled to accept a lock core; however, no lock cores will be shipped standard with the unit. If lock cores are standard on the unit, the price of the unit is reduced by the price of the lock core or cores.

You must specify lock core(s) separately for key specific option; specify any key number from KCCB001 to KCCB300 (black) or KCCG001 to KCCG100 (silver).

KCC*005 KCC*005 KCC*005



KCC*005

KCC*005

To key all the furniture units in a workstation or department alike, choose the key specific option and order the quantity of locks needed for your installation.

Installing Locks:

Standard key that ships with the lock core can be used for the initial installation of the lock core in the field.

Changing Locks:

IMPORTANT: A change key, specified separately, is required to remove lock cores in the field.

Change key model KCCB1CK allows removal of keys within these ranges:
KCCB001–KCCB300
KCCG001–KCCG100

Master Keys:

Master key model KC2GMK will unlock any lock within these key ranges:
KCCB001–KCCB300
KCCG001–KCCG100

Model/Key Range *Price*

Black Lock Cores & Hinged Key

KCCB001 to KCCB300 $22

Silver (Matte Nickel) Lock Cores & Round Key

KCCG001 to KCCG100 $22

Change Key

KCCB1CK $6

Master Key

KC2GMK $12

How to Specify

❶ Specify exact key number for lock cores or model number for change or master key

Operating Load Capacities

Locking Information	➤See page 160
Terms & Conditions	161
Product Warranty	163
Filing Capabilities	165

Component	*Operating Load Capacity (Functional Loads)*	*Example*
Desks and worksurfaces <45"W	200 lbs. over 12" diameter area, concentrated loading	
Desks and worksurfaces 45"W–72"W	200 lbs. over 12" diameter area, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 72"W = 288 lbs.
Desks and worksurfaces >72"W	Two 200 lb. loads over two 12" diameter areas, concentrated loading 1.5 lbs. per inch of perimeter, distributive loading	24"D x 84"W = 324 lbs.
Transaction counter, shelf, or secondary surface <16"D	.017 lb. per cubic inch above surface (not to exceed 12"H), distributive loading	12"D x 60"W = 147 lbs. t.w.
Extendible elements (pedestal drawer, shelves, etc.)	.017 lb. per cubic inch of drawer interior filing space, distributive loading *Note: File drawers are to support hanging files only; they are not intended for bottom loading.*	24"D x 15"W x 12"H = 73 lbs.
Center/pencil drawers	5 lbs., distributive loading	
Freestanding storage or bookcase top <38"H	200 lbs. concentrated loading .26 lb. per square inch of surface area, distributive loading	24"D x 36"W = 225 lbs.
Freestanding storage or bookcase top 38"H–72"H	.26 lb. per square inch of surface area, distributive loading	24"D x 36"W = 225 lbs.
Freestanding storage or bookcase top >72"H	.09 lb. per square inch of surface area, distributive loading	24"D x 36"W = 78 lbs.
Storage or bookcase bottom	.017 lb. per cubic inch above surface, distributive loading (not more than 18" in height)	24"D x 36"W x 18"H = 264 lbs.
Storage or hutch bottom <60"H	.20 lb. per square inch of surface area, distributive loading	
Storage or hutch bottom >60"H	.09 lb. per square inch of surface area, distributive loading	

Square inches should be calculated using this formula: Surface depth x surface width of available storage

Cubic inches should be calculated using this formula: Surface length x surface depth x height of available storage above the surface (limited to 18 inches above the surface)

The table at left lists the operating load capacities of various Kimball Office components. All components meet or exceed the ANSI/BIFMA Functional and Proof Loading requirements X5.5 (2008 Desk and Table Products Tests) and X5.9 (2004 Storage Units Tests). The Operating Load Capacities listed represent the BIFMA functional loads which are equivalent to loads that can be expected in normal use of the component.

	24"	36"	15"	32⅜"	9"	Legal, letter, and EDP	Legal and letter
Center Drawers	22"	18"	17"	14½"	1½"	—	—
	22"	30"	17"	26⅜"	1½"	—	—
	22"	36"	17"	32⅜"	1½"	—	—

**For built-up units, such as desks, returns, and credenzas, please reference the applicable pricing page for width (letter or legal) of the pedestal.*

Filing Reference:

- Legal size paper is 8½" x 14".
- Letter size paper is 8½" x 11".
- EDP size paper is 8½" x 14⅞".

IMPORTANT: For all pedestals where legal front-to-back filing is standard, letter front-to-back filing is possible by specifying universal file bars separately.

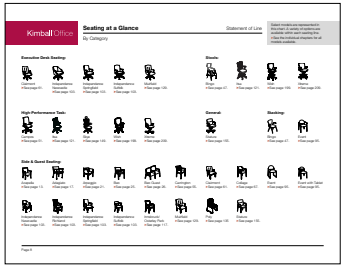
How to Use this Price List

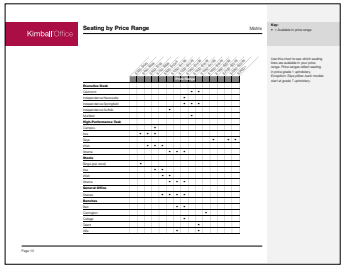
Kwik Office Program ➤See page 4
How to Specify Our Products 3
Sustainability 5

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

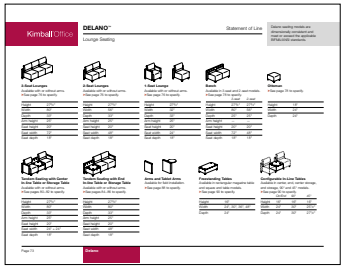
We suggest that you become familiar with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.



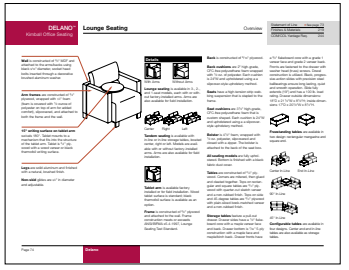
Seating at a Glance matrices provide a quick reference of Kimball Office Seating and Kimball Office | Interstuhl Seating by category.



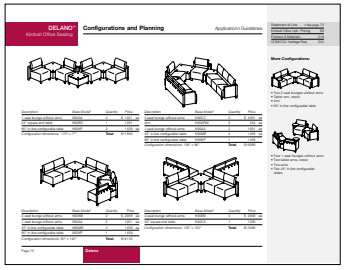
Seating by Price Range provides a quick reference to help you find the right chair for your application.



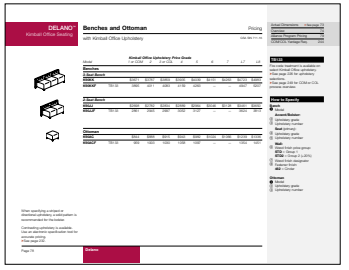
Statement of Line provides a snapshot of the entire product line. We've included an illustration and page cross references to the applicable pricing and how to specify pages.



Overviews offer a quick look at the distinguishing features of the product line.



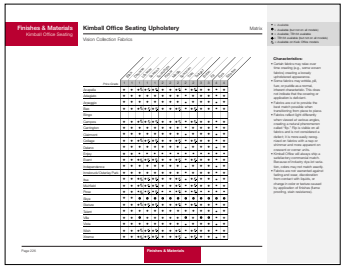
Product Information and Application Guidelines pages provide detailed information about the product, connections that can be made with other models, and planning factors.



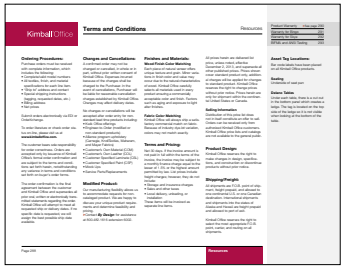
Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.

icon indicates models that are available for quick shipment.
➤See the Kwik Office Price List.

(FSC) icon indicates models available with the FSC option (3% upcharge) at standard leadtime to meet FSC certification.



Look in the Finishes and Materials section to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product.



Use the Resources in the back of the price list. This repository of useful information includes Terms and Conditions, Warranty, Operating Load Capacities. You'll also find a model number index with references to the appropriate pricing page.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

Only Underwriters' Laboratory (U.L.) or Canadian Standards Association (C.S.A.) listed electrical components are used in electrical devices and are so labeled.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

c UL us LISTED

How to Specify Our Products

Kwik Office Program ➤See page 4
How to Use this Price List 2
Sustainability 5

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ❶, ❷, or ❸) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

How to Specify Our Products 3

Kwik Office casegoods are available to ship within five business days upon receipt of a credit-approved order.

Specific models and options from the following lines are available:

- Acapella
- Alumma
- Beo
- Bingo
- Campos
- Collage
- Event
- Fit
- Hero. Just for You.
- Itsa
- Muirfield
- Poly
- Pose
- Stature
- Wish

Model Numbers:

Models and finishes that are available on Kwik Office have been marked with a K icon in this price list.

Kwik Office model numbers are different from standard model numbers. Base model numbers for Kwik Office products include all options and finish designators.

The K icon on standard lead-time pricing pages indicates availability; it does not provide the correct model numbers and option designators for specifying. You must use the complete model numbers listed i the Kwik Office Price List.

Include only Kwik Office models on your order. Any orders containing non-Kwik Office products will be treated as such and entered at standard lead times. Indicate clearly at the top of your order “Kwik Office.”

Changes and Cancellations:

No changes or cancellations will be accepted after order entry for Kwik Office products.

Order Size:

The Kwik Office program has a limited weekly volume capacity, with orders being entered on a first come, first served basis. Contact Customer Service for availability.

Kwik Office Program ➤See page 4

How to Specify Our Products 3

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤Find more specific details regarding the environmental aspects of our product offerings at: **www.kimballoffice.com**

ANSI/BIFMA level™
100% of the products manufactured by Kimball Office are level® certified. We offer the most sustainable portfolio in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet and exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

ecoScorecard℠
Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:
- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification
Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:
- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:
- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:
- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

SCScertified™ INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality
One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

Design for the Environment (DfE) is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.
➤For environmental data, visit our website at www.kimballoffice.com.

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

The mark of responsible forestry

FSC-Certified Wood
Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood at a 3% upcharge. Applicable models show FSCW as a finish price group designator option. Standard lead times apply to FSC orders.

ANEW

Asset Network for Education Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

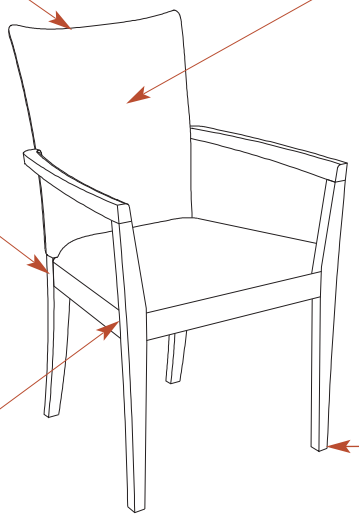
Overview

Statement of Line	➤See page 15
Kimball Office Uph. Pricing	17
COM/COL Yardage Req.	309
Finishes & Materials	289

Frame is constructed of kiln-dried maple hardwoods.

Corners are reinforced with wood corner blocks and lag bolts. Metal brackets are also used on armless models to provide additional support.

Joints are double doweled and securely glued to ensure maximum strength.



Back and seat are fully upholstered. Cushions are high resiliency, CFC-free polyurethane foam.

Nylon glides are 7⁄8" in diameter and dome shaped.

Details

High Back | Mid-Back | Wood Top Rail

Three different Acapella models are available; each has its own distinct design and is available with or without arms.

Seat suspension on high back and mid-back models is constructed of 1⁄2"-thick, 9-ply, molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges.

Seat suspension on wood top rail model is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

Seat cushion, applied to the flexible webbing suspension, is 1 3⁄8" thick on high back models, 1 5⁄8" thick on mid-back models, and 1 1⁄2" thick on wood top rail models.

Seat upholstery on high back and mid-back models is wrapped over the seat cushion and secured to the seat suspension with upholstery staples. The entire seat assembly is fitted into the frame with wood screws inserted into the wood corner blocks.

Seat upholstery on wood top rail model is wrapped over the seat cushion and secured to the side, front, and back rails with upholstery staples.

Back on high back and mid-back models is constructed of heavy webbing secured to the frame with staples. 1"-thick foam is applied to the webbing. Upholstery is wrapped over the foam and secured with upholstery staples.

Back on wood top rail model is constructed using 3⁄16"-thick, 3-ply, contour molded plywood. Press fit fasteners attach the back to the frame. Upholstery is wrapped over 1"-thick foam and secured with upholstery staples.

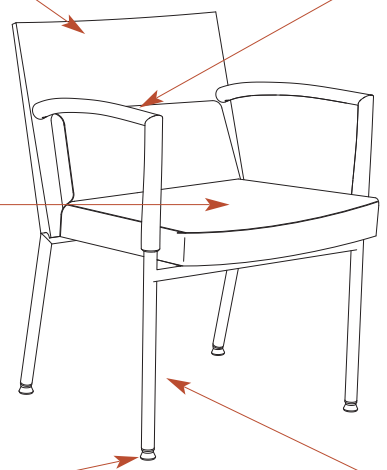
Overview

Statement of Line ➤See page 19
Kimball Office Uph. Pricing 21
COM/COL Yardage Req. 309
Finishes & Materials 289

Back features a doweled, solid-beech inner frame. 3-ply custom-contoured beech veneer is applied to the front and back surfaces. Back is bolted to a 1/4" steel bracket welded to the frame.

Seat tilts back and the back is slightly reclined so the user can assume a natural, relaxed posture.



Arms are solid beech and connected at miter with a 90° steel dowel. A black decorative bolt attaches the arms to the back. The front of the arms are inserted into the metal leg frame and fastened with a wood screw.

Black nylon glides are 1 1/8" in diameter and swivel for maximum stability on all floors.

Legs are 1" diameter, 15-gauge tubular steel. They are welded to 1"-diameter steel cross members. 1 3/8" x 1/4" flat steel stretchers, running front to back, join front and back cross members.

Details

Wood Back

Half-Height Cushion

Full-Height Cushion

Three back styles are available—wood back, half-height back cushion, and full-height back cushion.

Seat suspension is constructed of 19/32"-molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a suspension.

Seat cushion is 2"-thick, high resiliency, CFC-free molded polyurethane foam. Cushion is attached to the steel stretchers with wood screws.

Seat upholstery features a wrap-around upholstery method and 2 1/2" boxing with top stitching.

Back cushion, on applicable models, is constructed of 3/4"-thick foam applied to a 3/16" hardboard panel. Cushion upholstery with 1" boxing is wrapped over the foam and secured with upholstery staples. Half-height cushion attaches with press-fit fasteners. Full-height cushion attaches with keyhole slot at the top of the cushion and press-fit fasteners at the bottom of the cushion.

Contrasting upholstery is available on half-height and full-height back cushion models. Use an electronic specification tool for accurate pricing.

Conference and Side Chairs

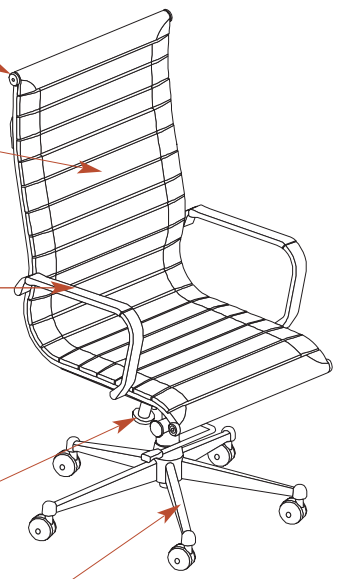
Frame features a chrome finish.

Back and seat consist of faux leather over top 10mm foam.

Arms are covered with faux leather.

Knee-tilt control is standard.

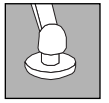
Five-star base with chrome finish features casters on high-back and mid-back conference models and glides on side chairs.



Details

Alumma seating is available in high-back and mid-back swivel conference models, as well as a mid-back side chair featuring fixed glides.

Back and seat are available in white or black faux leather. Contrasting faux leather is not available.



Side chair features glides on a five-star base for stationary, non-mobile conference seating.

Alumma seating meets all applicable BIFMA and ANSI requirements

TB117 requirements are met by Alumma seating.

TB133 models are not available.

Ships knocked down:
- Back, arms, seat, and controls
- Cylinder
- Base, casters or glides

Adjustability Features

	High Back	*Mid-back*	*Fixed*
Knee tilt	•	•	•
Swivel	•	•	•
Pneu. height	•	•	•

• standard

Knee tilt control provides minimal rise of the front seat edge when reclining, allowing the user's feet to remain firmly on the floor. Back may be locked in a full upright position by pushing in pneumatic height adjustment lever. Recommended for users weighing 253 lbs. or less.

Pneumatic height adjustment allows user to raise or lower the seat height with a control lever while seated. Upward movement of lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

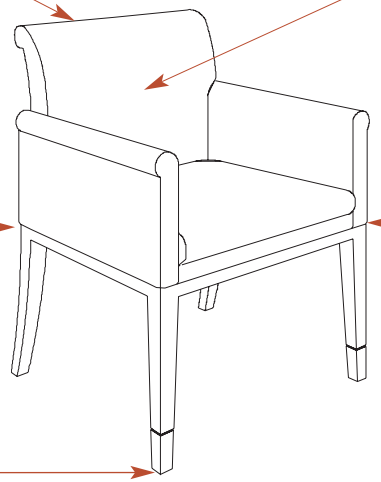
Frame is constructed of kiln-dried maple hardwoods.

Back and seat are fully upholstered. Cushions are high-resiliency, CFC-free polyurethane foam.



Corners are reinforced with wood corner blocks and tie screws.

Joints are double doweled and securely glued to ensure maximum strength.

Nylon glides are 7⁄8" in diameter.

Details

Rolled Back

Pillow Back

Two different Arpeggio models are available; each has its own distinct design.

Seat suspension is constructed of 3⁄4" thick molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a suspension.

Seat cushion, applied to the flexible webbing suspension, is 2" thick.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples. The entire seat assembly is fitted into the frame with wood screws inserted into the wood corner blocks.

Back is constructed using 9⁄16"-thick, 9-ply molded plywood. Machine screws and T-nuts attach the back to the frame. Upholstery is wrapped over 3"-thick sculpted foam and secured with upholstery staples.

Back of pillow back model is topped with 1 1⁄4 ounces of low melt conjugate fiber wrap for added comfort.

Outer back is constructed with 3⁄16" thick 3-ply molded plywood and 1⁄4" thick foam. Outer back is attached with press fit fasteners.

Contrasting piping is available in any Kimball Office fabric or leather.

Contrasting back is available on pillow back model with Kimball Office upholstery, COM, COL, or Alliance Program upholstery. Use an electronic specification tool for accurate pricing.

COM/COL Yardage Req. 309

Steam-bent frame is constructed of kiln-dried European beech to support the body's curves.

Joints are securely fastened with mortise and tenon joinery or double-doweled construction to ensure long-term use.

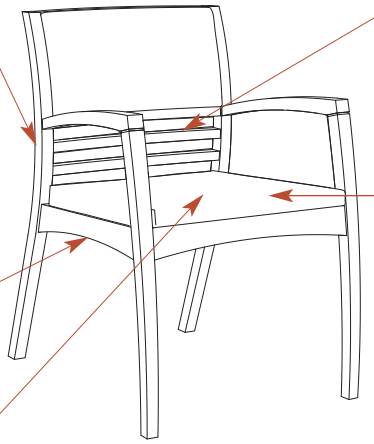
Seat rails are reinforced with wood corner blocks and cleats attached with glue and wood screws.

Seat suspension is constructed of 9/32" thick molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a secure suspension.

Seat assembly is attached with wood screws to wood cleats on the frame.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples.

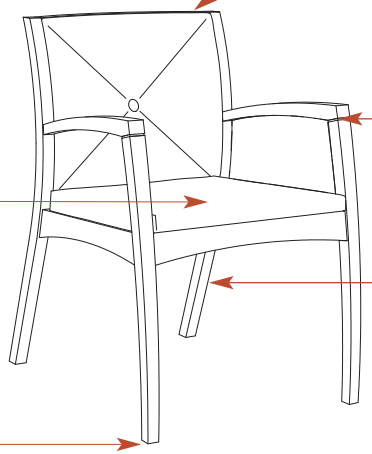
Nylon glides are 7/8" in diameter.



Horizontal back slats on applicable models are individually shaped for optimal comfort. Slats are secured using mortise and tenon joinery.

Seat cushions are made of 1¼" thin-profile, high-resiliency, CFC-free foam for maximum comfort and durability.

Curved top rail is visible. It separates the front and back upholstery panels and adds to Beo's aesthetics.



Decorative reveal detail at the arm/leg joint. Reveal is 2mm deep by 4mm wide.

Wall-saver back legs flare slightly so they contact the baseboard first, saving the wall's finish and protecting the chair back.

Details

Half Back

¾ Back

Ladder-back

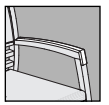
Vertical Insert Back

Full Back

Button Back

Six different back styles are available for Beo side seating.

Upholstered back on applicable models is constructed of two panels that are sandwiched together. Each panel features a contoured 3-ply cross-banded plywood inner panel. Inner panels are covered with high-resiliency, CFC-free foam (1/2" on the front and 1/4" on the back). Upholstery is wrapped around the inner panels and secured with upholstery staples. Both front and back upholstery panels are securely attached to the top wood rail and cleats with Christmas-tree fasteners.

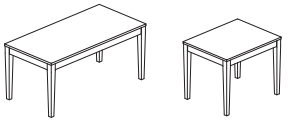


Black polyurethane arm caps are available as an option on Beo side chairs.

Contrasting upholstery on backs and seats is available on Beo side chairs. If different price grades are selected, use an electronic specification tool for accurate pricing.
➤See page 302.

Contrasting button upholstery is available on the button-back model.
Note: Contrasting button must be specified in Kimball Office fabric of leather.

Related Products



Freestanding Beo occasional tables are available in magazine and end models. Tables cannot be ganged to Beo side chairs.

Ganging tables are not applicable for side seating models.

Accent pillows are available.

Overview

Pricing	➤See page 40
Alliance Program Pricing	41
COM/COL Yardage Req.	309
Finishes & Materials	289

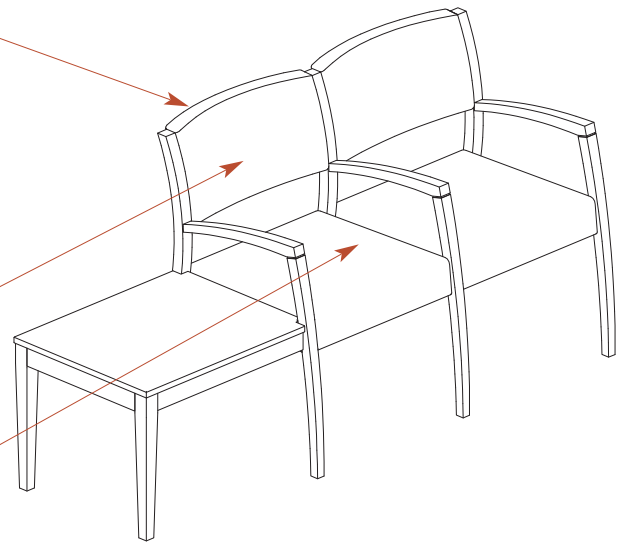
Frame is constructed of kiln-dried European beech. While similar to Beo side chairs, guest seating models are designed to accept add-on kits and ganging tables.

Joints are securely fastened with mortise and tenon joinery or double-doweled construction to ensure long-term use.

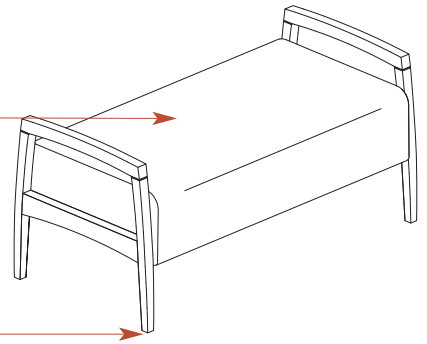
Backs feature a high-tension, sheet webbing suspension that is stapled to the frame, over which upholstery is placed.

Seats feature a high-tension, strip webbing suspension that is stapled to the frame. Seat upholstery features a wrap-around upholstery method and is stapled into place.

Wall-saver back legs flare slightly so they contact the baseboard first, saving the wall's finish and protecting the chair back.



Cushions are made of of high grade, high resiliency, CFC-free, laminated polyurethane foam. Seat cushions are 1" thick. Back cushions are ½" thick.

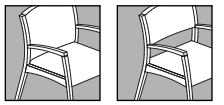


Nylon glides are ⅞" in diameter.

Details

Fully Assembled | Starter Kit | Add-On Kit

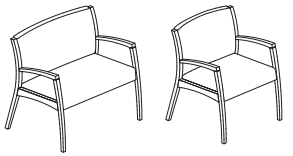
Guest seating is available as fully assembled one-, two, and three-seat runs; ready-to-assemble one-seat starter and one-seat add-on models are available to create seating runs of any length.



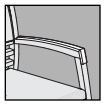
Full Back | Half Back

All guest and bariatric models are available with a fully upholstered back or half upholstered back.

Bench is available to provide accessible seating from both sides. It is intended for freestanding use only.



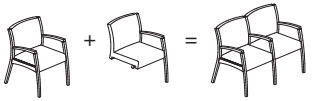
Bariatric chairs fit specialized requirements in a variety of settings. Full-size models are 36"W with a more robust frame that supports up to 500 pounds. Mid-size models are 25¼". They can be ganged to tables.



Black polyurethane arm caps are available on Beo guest one-seat, tandem, and bariatric models. They are not available on benches.

Contrasting upholstery on backs and seats is available on Beo guest chairs.
➤See page 302.

Connections



To build a tandem guest seating run, specify one starter kit and any number of add-on kits. Knocked down units include upholstered seat, upholstered back, and hardware. Starter kits include two arms, one left and one right; add-on kits include one center arm. Arms included with the starter kit will be used at the far left and right ends of the seating run. *Note: One starter kit and one add-on kit will create an identical model to the fully assembled tandem two-seat model.*

Related Products

Ganging tables attach to guest models at the end of seating runs, in-line between seats, or at a corner in a 90° configuration. Ganging tables do not attach to bench, lounge or side seating models.

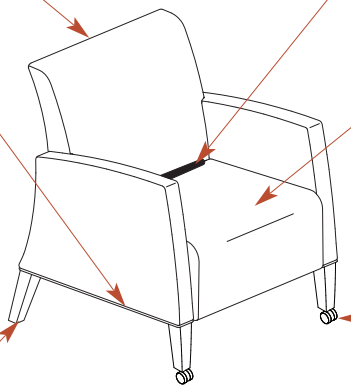
Alliance Program Pricing	50
COM/COL Yardage Req.	309
Finishes & Materials	289

Frame is constructed of ¾" plywood, utilizing lap-joint construction that is glued and screwed.

Legs and base rails are kiln-dried European beech. Legs and rail joints are double doweled, securely glued, and reinforced with corner blocks that are glued and screwed to the base rails. The base frame is attached to the seat frame with wood screws through the rails.

Wall-saver back legs flare slightly so they contact the baseboard first, saving the wall's finish and protecting the chair back.



Clean-out option makes cleaning of seat easier by allowing dirt to exit the chair to the floor where it can be swept up.

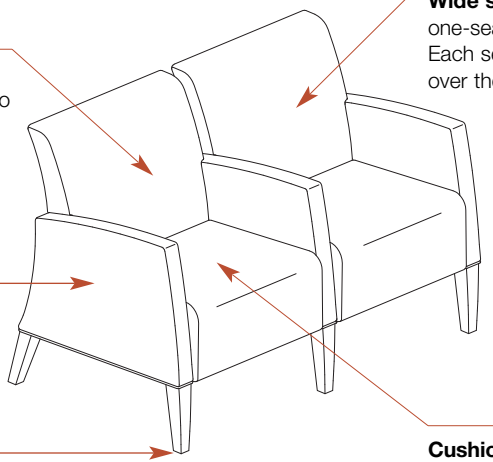
Seats feature a high-tension, strip webbing suspension that is stapled to the frame. Seat upholstery features a wrap-around upholstery method and is stapled into place.

Mobile option, available on one-seaters, provides casters on the front legs and a black handle on the back.

Backs feature a high-tension, sheet webbing suspension that is stapled to the frame, over which upholstery is placed.

Armrest tops and outside panels have ½" thick, high-grade polyurethane foam.

Non-skid, adjustable glides are ¾" in diameter.



Wide seat models are available in one-seat and tandem two-seat styles. Each seat width is increased by 3" over the standard model.

Cushions are made of high grade, high resiliency, CFC-free, laminated polyurethane foam. Seat and back cushions are 3" thick.

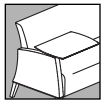
Pricing ➤See page 46
Alliance Program Pricing 50
COM/COL Yardage Req. 310
Finishes & Materials 289



Tablet arms are available. Tablet arms may be specified for the right, left, or center arm (one per model), and are available with a 3D laminate, phenolic-core laminate, or wood surface.
Note: Arm location is defined from the user's perspective when seated in the chair.

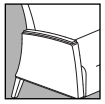
Center tablet option on tandem three-seater provides one tablet and two grommets, one in each of the center arms.

If more than one tablet arm is desired on a particular model, specify a tablet grommet, and order a tablet model separately.
➤See page 51.



Arm caps are applicable to arms without a tablet. Tablet and arm cap materials on the same lounge model will always match: wood arm caps match wood tablets; polyurethane arm caps match 3D laminate or laminate tablets.

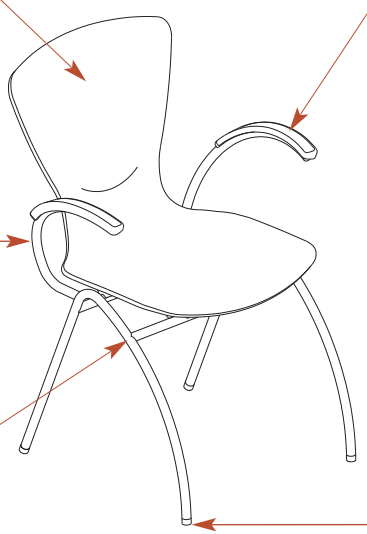
Stacking Side Chairs and Stools

Statement of Line ➤See page 53
Finishes & Materials 289

Shell is beech wood that has been custom molded and contoured for comfort and support.

Arm supports, legs, and cross members are 25⁄32" x 3⁄32" hot rolled, welded, chrome plated, tubular steel.

Joints are welded.



Arm caps are 1 5⁄8" thick solid bentwood, finished to match the shell. Two countersunk wood screws attach each arm cap to the arm supports.

Black plastic glides fit like a cap over the ends of the tubular steel frame.

Details

With arms

Without arms

Bingo side chairs are available with arms and without arms.

Bingo stools are available with without arms.

Shell is constructed of 7⁄16"-thick, 8-ply, molded plywood that is cross banded for strength. Shell is attached to the frame with four countersunk wood screws threaded into two wood cleats that are glued to the shell.

Side chairs and stools are each stackable up to four high.

Rubber stack bumpers and tube closures are standard.

Side chairs are shipped four per carton when applicable.

Stools are shipped two per carton.
IMPORTANT: Stools are ordered in sets of 2.

Connections

Side chairs may be ganged with ganging devices that snap onto the legs. Armless models or alternating armless and armchair models may be connected.
Note: Two armchair models cannot be ganged side by side.

Black ganging devices, ordered separately, are sold in packages of 5 pairs. One pair is required to gang two chairs. Two pairs will gang three chairs.

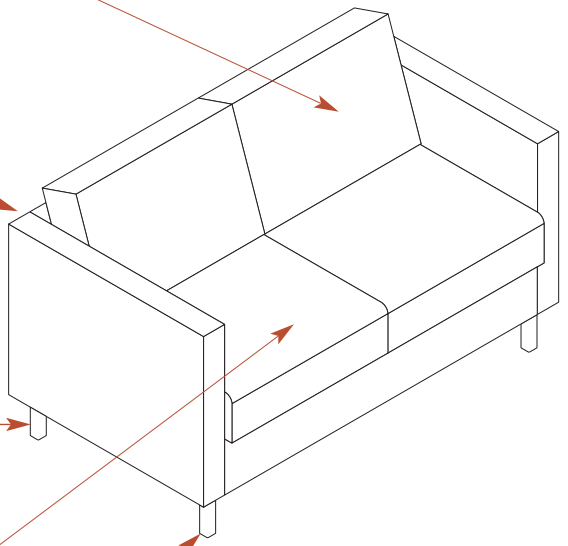
Lounge Seating

Statement of Line ➤See page 57
Finishes & Materials 289
COM/COL Yardage Req. 310

Back cushion contains 4¾"-thick high-density, high-resiliency, CFC-free, laminated polyurethane foam. Select standard cushion or sewn-tufted cushion.

Frame is constructed of ¾" plywood, utilizing lap joint construction that is glued and screwed.



6"H legs are platinum metallic powder-coated steel and available in either square or round profile.

Attached seat cushion is 6"-thick thick and made of high-grade, high-resiliency, CFC-free, laminated polyurethane.

Non-skid, nylon glides are ⅞" in diameter.

Details

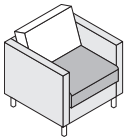
Boyd is offered in one-, two-, and three-seat lounge models. Models meet or exceed the applicable BIFMA/ANSI standards.

Leg and rail joints are double doweled, securely glued, and reinforced with corner blocks that are then glued and screwed to the base rails. The base frame is attached to the seat frame with wood screws through the rails.

Back cushions consist of high-density, high-resiliency foam over a non-stretch woven suspension that is stapled to the frame.

Seat is designed for comfort, giving you a residential feel. Wrinkles in the seat cushion are adherent to the design and should be expected.

Arms feature a sewn slipcover over top ½"-thick, high-grade polyurethane foam.



Contrasting fabric may be specified on the outer frame (back, arms, front kick-rail), back cushion, and seat cushion.

Note: Chairs are shipped with the column set at a mid-point between the lowest and highest positions

Desk Chairs

Overview

Pricing	➤See page 65
Alliance Program Pricing	66
COM/COL Yardage Req.	311
Finishes & Materials	289

Mesh-back models incorporate a mesh design perfectly proportioned to give ergonomically correct, flexible support in all upright or reclined positions. Available in three colors. The mesh is pulled over a structural, black metal tubular frame.

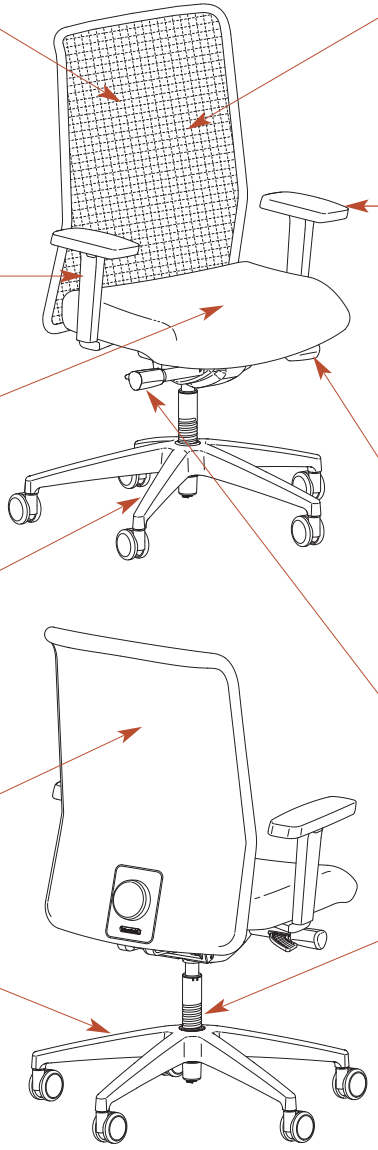
Arm structure consists of a steel upright covered in black nylon.

Seat cushions are 2 1/8" thick—1 3/4" CFC- and CHC-free molded foam, over a seven-layer molded plywood shell.

Black, dual-wheel casters on desk chairs are 65mm in diameter. Specify hard casters (802) for use on carpet (standard) or soft casters (801) for use on hard floors (upcharge applies).

Upholstered-back models feature a nine-layer molded plywood shell surrounded by molded, CFC- and CHC-free foam and upholstery.

Standard five-star base is 30% glass-filled nylon, textured, black plastic. Cast aluminum base with a polished finish is available as an option (upcharge applies).



Back features a three-position lock with release mechanism.

T-shaped arm rests are standard with 2D adjustability. User can adjust the arm vertically within a 4 1/4" range (11 positions) and horizontally within a 2 1/2" range. Arm caps are black polyurethane.

Seat slider is available as an option to adjust the seat depth for comfort. Seat depth is adjusted by grasping the left lever below the seat, pulling upward, and sliding forward or rearward; locks within a 2" range.

Synchro mechanism provides fully synchronized seat-to-back movement. Allows user to lock the chair in multiple positions within the range of movement using a single lever.

Seat height adjusts from 15 7/8"–23" via a patented twist/threaded column adjustment feature and pneumatic (gas) cylinder.

Details

Two back styles are available:
- Mesh back
- Upholstered back

Optional adjustable lumbar support on mesh-back chairs utilizes air-pressure technology integrated into the mesh back.

Optional adjustable lumbar support on upholstered-back chairs features a molded polyurethane lumbar pad that can be manually adjusted by turning a small knob.

Chair is shipped knocked down in four parts and can be assembled without tools.
➤See assembly instructions at www.kimballoffice.com

Campos desk chairs are user rated up to 275 lbs.

Campos is warranted for three-shift (24/7) service.

Adjustability Features

Synchro-tilt	•
Pneumatic height	•
Swivel	•
Lumbar	○
Seat slider	○
Anti-kick back	•
Tilt tension	•
Back tilt lock	•
2-D arms	•
4-D arms	○

• = standard ○ = option

Anti-kick back feature controls forward movement of the back rest when the lock is disengaged.

Tilt tension control adjusts the amount of resistance the user feels when leaning back.

4-D arm option enables the user to make front-to-back adjustment within a 2" range (6 positions), side-to-side adjustment (5 positions), and pivots inward and outward 10° with two stops.

COM/COL Yardage Req.	311

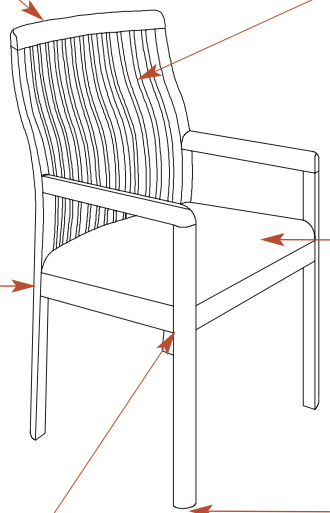
Frame is constructed of kiln-dried maple hardwoods.

Joints are double doweled and securely glued to ensure maximum strength.

Corners are reinforced with wood corner blocks and tie screws.



Slats on slat back models are individually shaped and hand set using mortise and tenon joints to prevent twisting.

Cushions are high-resiliency, CFC-free polyurethane foam.

Nylon glides are ⅞" in diameter.

Details

Slat Back

Upholstered Back

Two different back styles are available on Carrington side chairs; each is available as a high back or mid-back. Two-seat bench is available with slat back.

Seat suspension is constructed of molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a suspension.

Seat cushion, applied to the flexible webbing suspension, is 3¾" thick on high back and mid-back chairs and 4" thick on two-seat bench.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples. The entire seat assembly is fitted into the frame with wood screws inserted into the wood corner blocks.

Back on upholstered back model is constructed using molded plywood that is secured to the frame with wood dowels and screws.1⅝" thick foam is applied to the plywood panel on the inside back of high-back models (foam is 1¼" on mid-back models); ⅜" thick foam is applied to the outside back. Upholstery is wrapped over the foam and secured with upholstery staples.

Arms on upholstered back chairs have upholstered wood inserts shaped to fit the inner arm of the chair frame. ¼" thick foam covers both sides of the 1½" thick panels. Arm inserts are held in place with wood dowels and screws.

Overview

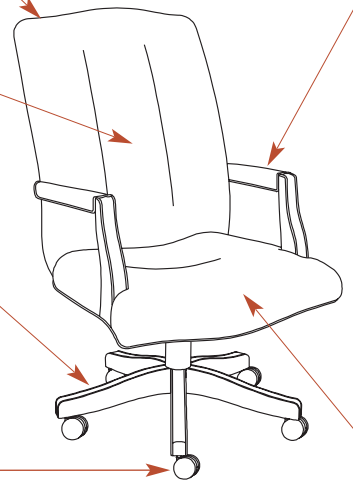
Statement of Line	➤See page 73
Kimball Office Uph. Pricing	75
Finishes & Materials	289
COM/COL Yardage Req.	311

Outer back is upholstered.

Cushions are CFC-free, contoured polyurethane foam.

5-prong base on desk chairs has a rigid, steel understructure. Maple hardwood base caps have a sloped profile.

Black, hard dual-wheel casters for use on carpeted floors are standard.



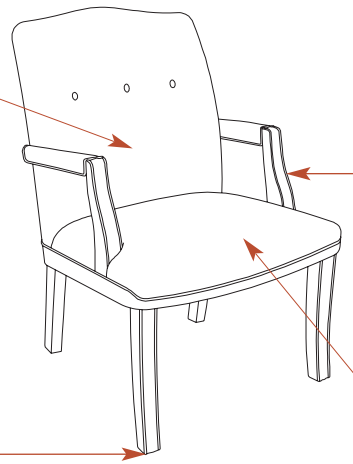
Open arms are upholstered separately and attached to the frame with metal brackets, T-nuts, and ¼"-diameter machine screws.

Enclosed arms on desk chairs are constructed with wood interior members. Arms are attached to the frame with metal brackets, T-nuts, and ¼"-diameter machine screws.

Waterfall front edge slopes forward to reduce pressure and increase a in the user's legs.

Back on side chairs is constructed of webbing that is stretched and stapled to the chair frame. A 2" thick cushion, plus an additional inch of foam in the lumbar area, is applied to the flexible webbing suspension.

Nickel-plated glides on side chairs are ⅞" in diameter.



Front of arms are maple hardwoods with detailing to match the wood base caps.

Seat cushion on side chair is 3¼" thick and is applied to the flexible webbing suspension.

Details

Two different upholstery details are available on Clairmont; both are available high back or mid-back models.

Two different arm styles are available on Clairmont desk chairs: enclosed arm and open arm.

Shell on desk chairs is single-shell construction fabricated with 9-ply molded plywood.

Frame on side chairs is kiln-dried maple hardwoods. Joints of back legs are double doweled and securely glued. Front legs use mortise and tenon joinery. For added strength, wood corner blocks and screws are used in conjunction with tie screws to reinforce frame corners.

Seat suspension on side chairs is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

Cushions on desk chairs are 3" thick on the seat and inside back and ¼" thick on the outside back.

Upholstery is wrapped over cushions and secured with upholstery staples.

Controls are attached to the frame with T-nuts and machine screws.

Soft, black, dual-wheel casters are available as an option and should be specified for use on hard floors; upcharge applies.

Antique English hooded ball casters for use on hard floors are available as an option; upcharge applies.

Adjustability Features

	High Back	*Mid-back*
Knee tilt and upright back lock	•	•
Tilt tension	•	•
Swivel	•	•
Pneu. height	•	•

• standard

Knee tilt control provides minimal rise of the front seat edge when reclining, allowing the user's feet to remain firmly on the floor. Back may be locked in a full upright position by pushing in pneumatic height adjustment lever. Recommended for users weighing 225 lbs. or less.

Tilt tension control adjusts the amount of resistance the user feels when leaning back.

Pneumatic height adjustment allows user to raise or lower the seat height with a control lever while seated. Upward movement of lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

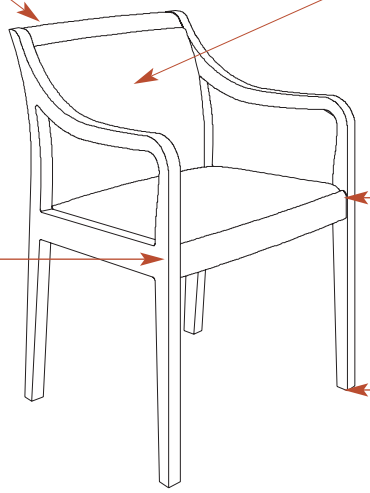
Finishes & Materials	289
COM/COL Yardage Req.	311

Frame is constructed of kiln-dried maple hardwoods.

Joints are double doweled and securely glued to ensure maximum strength.



Cushions are high-resiliency, CFC-free polyurethane foam.

Corners are reinforced with wood corner blocks and tie screws on all models.

Nylon glides are ⅞" in diameter.

Details

Four different arm shapes are available on Collage side chairs: arched, sloped, rolled, and angular. Each has its own distinct design. Armless side chair is also available.

Wood Top Rail

Fully Upholstered

Top rail styles include fully upholstered and wood.

Back shapes include square, arched, and slat back.
➤See Statement of Line or pricing pages for arm and back combinations.

Two-seat bench is available with arched arms and fully upholstered back.

Bariatric bench is available with arched arms and fully upholstered back; rated to hold up to 500 lbs.

Seat suspension is constructed of ½"-thick, 5-ply molded plywood that is machined to form an open perimeter. Unidirectional webbing is machine stretched across the open perimeter and stapled to the edges to form a suspension.

Seat cushion is applied to the flexible webbing suspension. Foam is 1¾" thick on chairs and 2½" thick on two-seat bench.

Seat upholstery is wrapped over cushion and secured to the seat suspension with upholstery staples. The entire seat assembly is attached to wood cleats on the chair frame with wood screws. Piping trims the front edge of the seat.

Back on fully upholstered models is constructed of 1"-thick foam applied to ⅜"-thick, 5-ply contoured plywood. Back is attached to the frame with press fit fasteners.

Back on wood top rail models is constructed of 1"-thick foam applied to ⅜"-thick, 5-ply contoured plywood. Back is attached to the frame with T-nuts, machine screws, and metal brackets.

Back on slat back chair is constructed of ¼"-thick, 5-ply molded plywood slats that are machined to shape and glued individually into slots in the frame.

Back upholstery is wrapped in place and secured with upholstery staples.

Outer back panel is constructed of ⅜"-thick foam applied to 3/16"-thick, 3-ply contoured plywood. Press fit fasteners attach outer back panel to the inner back.

Lounge Seating

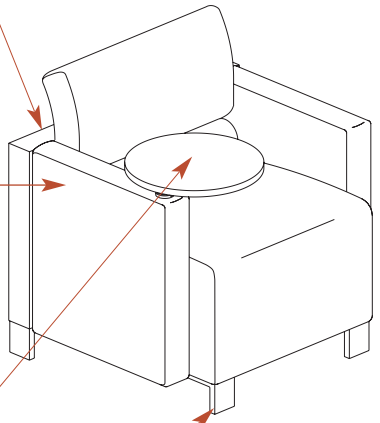
Overview

Statement of Line ➤See page 85
Finishes & Materials 289
COM/COL Yardage Req. 311

Wall is constructed of ¾" MDF and attached to the arms/backs using black 5⁄16" diameter, socket head bolts inserted through a decorative brushed aluminum washer.

Arm frames are constructed of ¾" plywood, wrapped with ¼" foam (foam is covered with ½ ounce of polyester on top of arm for added comfort), slipcovered, and attached to both the frame and the wall.

15" writing surface on tablet arm swivels 180°. Tablet mounts to a mechanism that fits into the structure of the tablet arm. Tablet is ¾" plywood with a wood veneer or black 3D laminate writing surface.



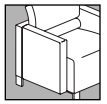
Legs are solid aluminum and finished with a natural, brushed finish.

Non-skid glides are ¾" in diameter and adjustable.

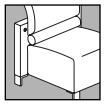
Related Products

Accent pillows are available.
➤See page 13.

Details



With Arms



Without Arms

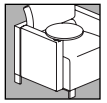
Lounge seating is available in 3-, 2-, and 1-seat models, each with or without factory-installed arms. Arms are also available for field installation.

Center

Right

Left

Tandem seating is available with in-line or in-line storage tables, located center, right or left. Models are available with or without factory-installed arms. Arms are also available for field installation.



Tablet arm is available factory installed or for field installation. Wood tablet surface is standard; black 3D laminate surface is available as an option.

Frame is constructed of ¾" plywood and attached to the wall. Frame construction meets or exceeds ANSI/BIFMA x5.4-1997, Lounge Seating Test Standard.

Back is constructed of 9⁄16" plywood.

Back cushions are 2" high-grade, CFC-free polyurethane foam wrapped with ½ oz. of polyester. Each cushion is 24"W and upholstered using a slip-cover-style upholstery method.

Seats have a high-tension strip webbing suspension that is stapled to the frame.

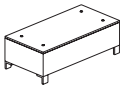
Seat cushions are 3½" high-grade, CFC-free polyurethane foam that is custom shaped. Each cushion is 24"W and upholstered using a slipcover-style upholstery method.

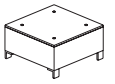
Bolster is 4½" foam, wrapped with ½ oz. polyester, slipcovered and closed with a zipper. The bolster is attached to the back of the seat box.

All seating models are fully upholstered. Bottom is finished with a black fabric dust cover.

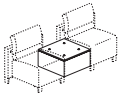
Tables are constructed of ¾" plywood. Corners are mitered, then glued and cleated together. Tops on rectangular and square tables are ¾" plywood with quarter-cut sketch veneer and a non-rubbed finish. Tops on side and 45-degree tables are ¾" plywood with plain-sliced book-matched veneer and a non-rubbed finish.

Storage tables feature a pull-out drawer. Drawer sides have a ½" flakeboard core with a maple veneer face and back. Drawer bottom is 7⁄32" 5-ply construction with a maple face and maple/birch back. Drawer fronts have a ¾" flakeboard core with a grade 1 veneer face and grade 2 veneer back. Fronts are fastened to the drawer with washer head (truss) screws. Dowel construction is utilized. Black, progressive-action slides with precision steel ballbearings ensure long lasting, quiet and smooth operation. Slide fully extends (19") and has a 100 lb. load rating. Drawer outside dimensions: 18"D x 21½"W x 8½"H; inside dimensions 17"D x 20½"W x 8¼"H.

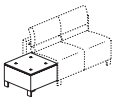




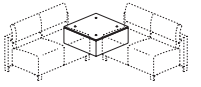
Freestanding tables are available in two design: rectangular magazine and square end.



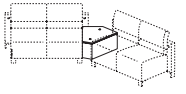
Center In-Line



End In-Line



90° In-Line



45° In-Line

Configurable tables are available in four designs. Center and end in-line tables are also available as storage tables.

Lounge Seating

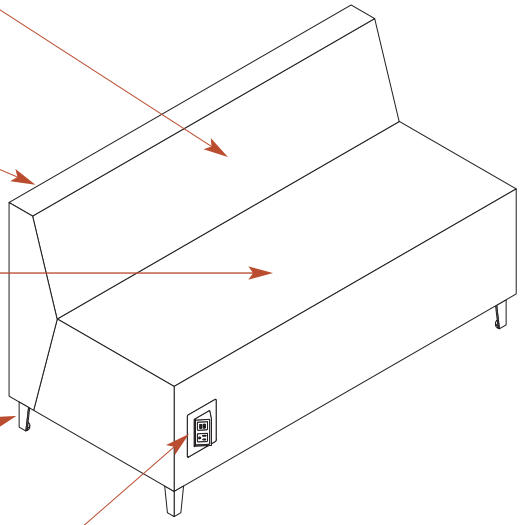
Statement of Line ➤See page 103
Finishes & Materials 289
COM/COL Yardage Req. 312

Back cushion contains high-density, high-resiliency, CFC-free, laminated polyurethane foam. Foam is 2¼" thick on angled-back models and 3½" thick on rounded-back models.

Frame is constructed of ¾" plywood, utilizing lap joint construction that is glued and screwed.

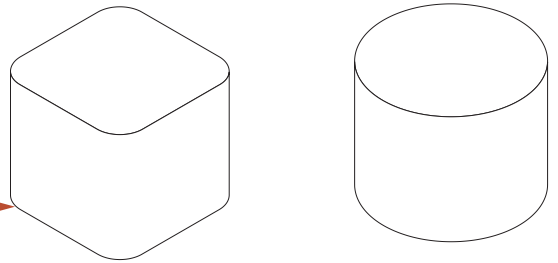
Seat cushion is 3½" thick and made of high-grade, high-resiliency, CFC-free, laminated polyurethane.



4" Legs are aluminum and available in a polished or powder-coated platinum metallic finish.

Non-skid, clear nylon glides enable 2½" of leg height adjustment

Platinum metallic power/USB grommet, featuring one power, two USB outlets, and 6"L cord, are available on lounges and modular ottomans in left, right (as seated; shown), or both kick rail positions.



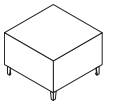
Non-skid, ¾" soft glides are standard on ancillary ottomans; 37mm caster options are available for mobility.

Details

Dwell is offered in 24", 30", 36", and 51"W lounge models, which meet or exceed the applicable BIFMA Heavy Duty Lounge and ANSI standards. Lounge models are available with an angled back or rounded back.

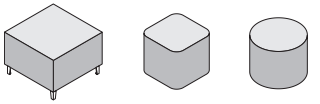
Leg and rail joints are securely glued and reinforced with screws. The base frame is attached to the seat frame with bolts.

Back cushions consist of high-density, high-resiliency foam over a non-stretch woven suspension that is stapled to the frame.

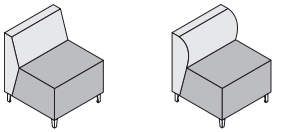


24"W modular ottoman has the same depth as lounge units and can be ganged to lounge units to create a variety of configurations.

20"W ancillary ottomans, shown at left, are available in square or round models. Standard with glides or with optional casters, ancillary ottomans facilitate impromptu meetings and open collaboration.

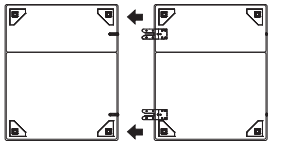


Contrasting fabric on the top and sides may be specified on modular and ancillary ottomans.



Contrasting fabric on the back and seat may be specified on lounge units. When specifying a striped or directional textile, a solid pattern is recommended for the back cushion due to alignment constraints.

Connections



Lounges and modular ottomans may be ganged together. Two ganging brackets (K60GB) are required to join two units together. Pre-drilled holes in the base accept the ganging bracket or its small mating piece. Once brackets are installed, units slide together for a secure connection. To disconnect, lift up and pull outward on the unit with the mating pieces.

Power cannot be daisychained for power/USB grommets.

Related Products

Accent pillows are available.

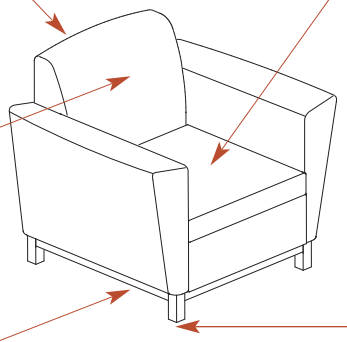
Lounge Seating

Overview

Statement of Line ➤See page 109
Finishes & Materials 289
COM/COL Yardage Req. 312

Frame is constructed of ¾" plywood, utilizing lap-joint construction that is glued and screwed.

Back cushions contain 4" high-density, high-resiliency, CFC-free, laminated polyurethane foam.



Legs and base rails are maple and available in a variety of finishes.

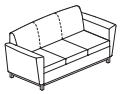
Seat cushions are 5" thick, removable, reversible, and replaceable. Seat cushions are made of high-grade, high-resiliency, CFC-free, laminated polyurethane.

Non-skid, nylon glides are ⅞" in diameter.

Details

One-seat

Two-seat



Three-seat

Enjoy is offered in one-, two-, and three-seat lounge models. Models meet or exceed the applicable BIFMA/ANSI standards and meets Kimball Heavy Duty testing requirements as follows:

One-seat model (K431A)	350 lbs.
Two-seat model (K432A)	700 lbs.
Three-seat model (K433A)	1050 lbs.

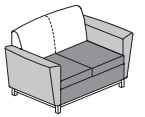
Two- and three-seat lounge models also exceed Bariatric testing requirements.

Legs and rail joints are double doweled, securely glued, and reinforced with corner blocks that are the glued and screwed to the base rails. The base frame is attached to the seat frame with wood screws through the rails.

Backs feature a high-tension, strip webbing suspension that is stapled to the frame, over which upholstery is placed.

Arms and outside panels have 1¼"-thick, high-grade polyurethane foam on the inner and top of the arm and ¼"-thick, high-grade polyurethane foam on the outer arm. Upholstery has ¼" sewn-in foam with slipcover, stapled into place.

Seats feature high-tension strip webbing that is stapled to the frame. Seat cushions are upholstered using a slipcover method that is finished with double-needle stitch detailing.



Contrasting fabric may be specified on the back, base/seat, and arms. Use electronic specification tool for accurate pricing if specifying fabrics in different price grades.

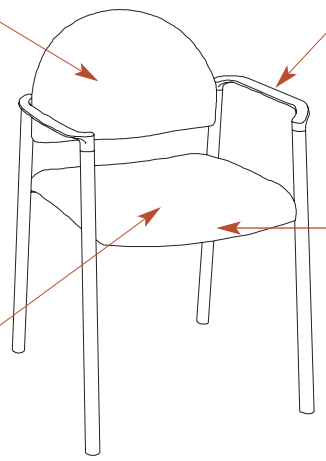
Overview

Statement of Line	➤See page 113
Alliance Program Pricing	119
Finishes & Materials	289
COM/COL Yardage Req.	313

Back and seat are fully upholstered. Seat is tilted back, and the back is slightly reclined to allow the user to assume a more natural, relaxed posture.

Back upholstery, including ¾"-thick foam for the inside back and ¼" thick foam for the outside back, is applied to the back as a slipcover and secured with upholstery staples.

Seat upholstery is wrapped over the seat cushion and secured to the seat suspension with upholstery staples.

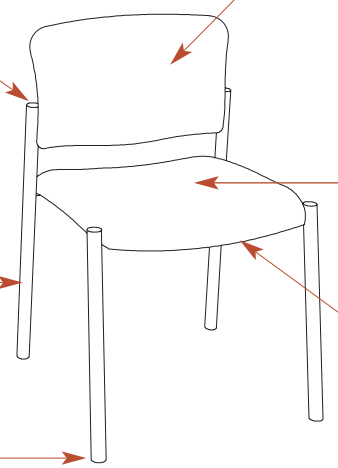


Arm caps are injection molded nylon and attached to the frame with a pressure fit. They are color matched to the frame; 501 Platinum metallic finish receives black armcaps.

Waterfall front edge slopes forward to reduce pressure and increase circulation in the user's legs.

Backs are secured to the frame with 4 countersunk flat-head screws, 11-gauge steel plates, and T-nuts. Round back models are constructed using an injection molded polypropylene panel. Flair back models are constructed using ⅜"-thick, 7-ply, molded plywood.

End caps are fitted into the frames of armless models; they are plastic on Cinder (black) frames and metal (color coordinated to the frame) on platinum metallic frames.



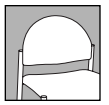
Cushions are high resilience, CFC-free polyurethane foam. Seat cushion is 1¼" thick.

Legs are angled for stability and available in textured powdercoat finish or smooth platinum metallic paint.

Seat pan is contoured, blow-molded polyethylene. Channels within the seat pan fit over the cross members. Seat pan is attached to the seat frame with four machine screws and T-nuts.

Black nylon ball glides are standard on static 4-leg models. Hard casters are standard on mobile models.

Details

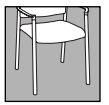


Round

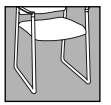
Flair

Two open back shapes are available on all Event models:
- Round (shown at left, top)
- Flair (shown at left, bottom)

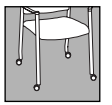
Three arm styles are available: with arms, without arms, and with tablet arm (4-leg non-mobile models only). Tablet arm, ½" x 12¼" x 22¼", is hinged for easy access. It has a black phenolic core with radius edge and black laminate top and bottom surfaces. Mounted on the right.



4-Leg



Sled Base



Mobile

Three unique leg frames are available 4-leg, sled base, and mobile. Frames are ⅞" diameter, 14-gauge tubular steel. Cross members are ¾" diameter, 14-gauge steel. Leg frames are joined to the cross members with metal inert gas (MIG) welds.

4-leg models and mobile models without arms stack up to 6 chairs high; mobile models with arms stack up to 4 chairs high.

Sled base, 4-leg with tablet arm, and bariatric models are non-stacking.

Bariatric 4-leg with arms is available to accommodate up to 500 lbs.

Contrasting upholstery on backs and seats is available on Event side chairs. If different price grades are selected, use an electronic specification tool for accurate pricing.
➤See page 302.

Flat glides are available on 4-leg models for use on textured, soft, or wood surfaces. Glide has a silver-plated top with white nylon pad. Upcharge applies.

Soft casters for use on hard floors are available on mobile models. Upcharge applies.
Note: Sled base should not be used on hard floors for stability reasons and to prevent surface damage.

Chairs are shipped three to a carton when applicable.

Related Products

Ganging devices, ordered separately in sets of 5 pairs, are available to gang like models. The 2½" x 5¾" polypropylene devices snap onto chair legs. One pair is required to gang two chairs.

Transport dolly is available to move up to six 4-leg chairs at a time. Dolly has a tubular steel frame, green powdercoat finish, and 8" semi-pneumatic ball-bearing wheels. Removable handle allows for storage.

SUFFOLK™ Desk and Side Chairs

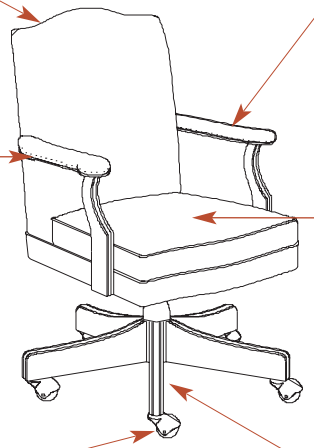
Overview

Statement of Line ➤See page 125
Finishes & Materials 289
COM/COL Yardage Req. 312

Frame is kiln-dried hackberry.

Brass trim nails, standard on all models, are individually driven head to head around the bottom edge of the upholstered arm caps.

Antique English hooded ball casters are standard on desk chair with casters.



Arm caps are upholstered.

Cushions are high-resiliency, CFC-free polyurethane foam.

5-prong base has a rigid steel understructure and hardwood caps with radius ends.

Details

Mid-Back Desk Chair

Mid-Back Side Chair

Open Back Side Chair

Three models are available: mid-back desk, mid-back side, and a complementary open-back side chair.

Joints are double doweled and securely glued to ensure maximum strength. Tie screws are added for strength. Seat is reinforced with corner blocks and four screws.

Side-to-side rails on desk chair provide strength and a secure place to mount the swivel tilt mechanism.

Seat suspension is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

3" thick seat cushion is applied to the flexible webbing suspension.

1½" thick back cushion is bonded to the hardwood back panel.

Upholstery is wrapped over the cushions and secured with upholstery staples.

Swivel tilt mechanism on desk chair is attached with T-nuts and machine screws.

Nickel-plated glides on side chairs are ⅞" in diameter.

Adjustability Features

Desk Chair	
Swivel tilt	•
Pneumatic height	•

• = standard

Swivel tilt control allows reclining while keeping the back-to-seat angle constant. It features a heavy-duty adjustable torsion spring.

Pneumatic height adjustment allows user to raise or lower the seat height with a control lever while seated. Up or down movement of lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

SPRINGFIELD™ Desk and Side Chairs

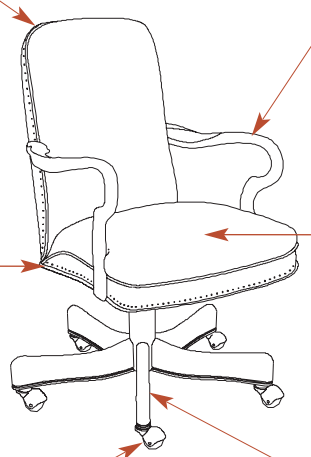
Overview

Statement of Line ➤See page 125
Finishes & Materials 289
COM/COL Yardage Req. 313

Frame is kiln-dried maple hardwoods.

Brass trim nails, if selected, are individually driven head to head around the bottom edge of seat and around back.

Antique English hooded ball casters are standard on desk chairs.



Arms are maple hardwoods.

Cushions are high-resiliency, CFC-free polyurethane foam.

5-prong base has a rigid steel understructure and curved hardwood caps.

Details

Desk chair (plain upholstery)

Side chair

Desk chair (button-tufted upholstery)

Side chair

Button tufting features hand-pleated diamond tufts on seat and inside back. Metal-prong button unit is pulled through the cover and foam, then inserted through a paperboard washer and a self-locking steel spring retainer and clinched.

Springfield desk chairs are suitable for pull-up use in conference settings.

Joints are double doweled and securely glued to ensure maximum strength. Tie screws are added for strength. Seat is reinforced with corner blocks secured with four screws.

Side-to-side rails on desk chair provide strength and a secure place to mount the swivel tilt mechanism.

Seat suspension is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

Seat cushion is dual density foam applied to the flexible webbing suspension.

Back suspension is constructed of four weaves of heavy webbing secured to the frame with staples. A lighter weight webbing is then applied over the four-weave strips. Foam is applied to the suspension.

Upholstery is wrapped over the cushions and secured with upholstery staples.

Swivel tilt mechanism on desk chair is attached with T-nuts and machine screws.

Nickel-plated glides on side chairs are 7/8" in diameter.

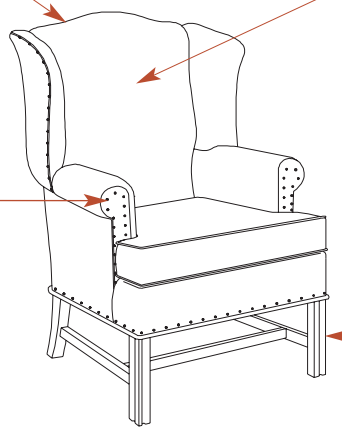
HILLSBOROUGH™ Lounge Seating

Overview

Statement of Line ➤See page 125
Finishes & Materials 289
COM/COL Yardage Req. 313

Frame is kiln-dried maple hardwoods.

Brass trim nails are individually driven head to head around the bottom edge of seat and on the front of rolled arm.



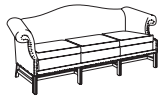
Cushions are high-resiliency, CFC-free polyurethane foam.

Legs are reinforced with stretchers and rails for added durability.

Details

Side Chair

2-Seat Lounge



3-Seat Lounge

Joints are double doweled and securely glued to ensure maximum strength. Tie screws are added for strength. Seat is reinforced with support rails and corner blocks secured with four screws for extreme rigidity and strength.

Seat suspension is constructed with pre-assembled high carbon, high tensile, hand drawn drop-in coil spring units, covered with a high-quality woven webbing. A ¼" insulator pad is applied over the seat suspension. Denim material is upholstered over the pad.

Removable seat cushions have 4¼" of bonded foam on side chair, 4" of bonded foam on 2-seat and 3-seat lounge.

Back suspension is constructed of five 11" gauge sinuous springs that are suspended from the frame by metal clips. Springs are tied together with a strong steel-resistant wrapping.

Back cushion is 3" thick and is supported with a layer of high-quality woven webbing covering the back suspension. Rails are padded with foam for additional cushioning.

Upholstery is wrapped over the cushions and secured with upholstery staples.

Nickel-plated glides are ⅞" in diameter.

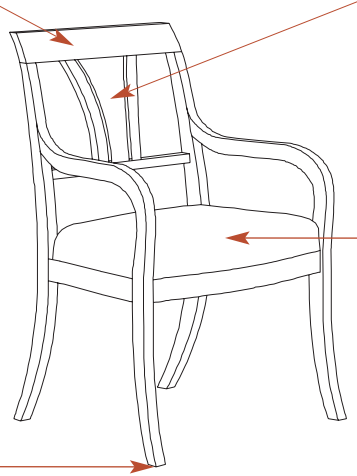
Statement of Line ➤See page 139
Finishes & Materials 289
COM/COL Yardage Req. 313

Frame is kiln-dried maple hardwoods.



Detailing on veneered, eyes, and scroll splat back has a contrasting Ebony finish. All three splats on triple splat back model have an Ebony finish.

Cushions are high-resiliency, CFC-free polyurethane foam.

Plastic glides are 5⁄8" in diameter.

Details

Uph. Back

Veneered Splat Back

Eyes Splat Back

Three different arched arm models are available: upholstered back, veneered splat back, and eyes splat back.

Uph. Back

Triple Splat Back

Scroll Splat Back

Three different scrolled arm models are available: upholstered back, triple splat back, and scroll splat back.

Joints are double doweled and securely glued to ensure maximum strength. Wood corner blocks, wood screws, and glue reinforce adjacent seat rails.

Seat rails are faced with vertical, straight-cut veneer for grain uniformity throughout the entire chair.

Seat suspension is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

Back on upholstered back models has a contoured interior frame of 5⁄8" thick dimensioned plywood, covered with a solid webbing. 1" thick foam is applied to the webbing. Frame is attached to the chair with steel pins and wood screws.

Top rail on scrolled arm models is white ash burl veneer.

Center splat on veneered splat back model utilizes white ash burl veneer.

Upholstery is wrapped over the cushion, secured with upholstery staples, and finished with upholstery gimp.

COM/COL Yardage Req. 313

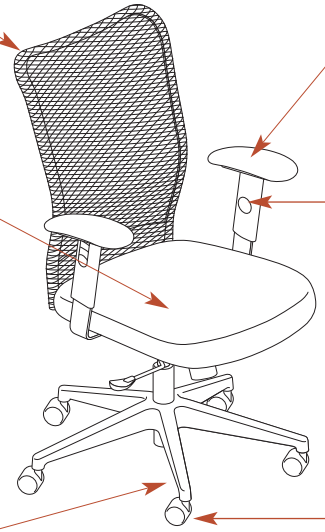
Mesh back, available in seven colors, is 84% texturized polyester and 16% elastin. The mesh is pulled over a metal frame and stapled into a plastic insert at the bottom.

Seat cushions feature a seamless, pull-over style upholstery. 1.0 models have 2½" of molded, CFC-free, urethane foam applied over a recycled plastic seat shell. 2.0 models (shown) have 1" slab foam with a ½" foam overlay topper and a ½" foam bottom (to give contour to seat) applied over a plywood seat shell.



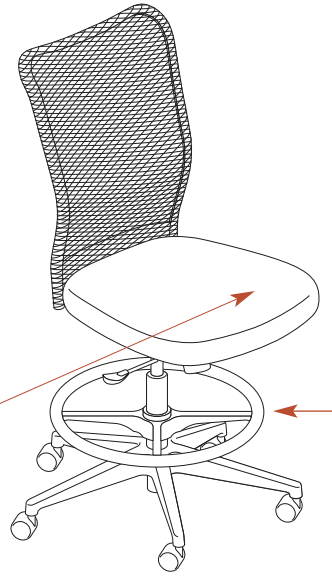
Arm caps are soft, self-skinning polyurethane foam molded over a steel core for strength.

Arms are height adjustable within a 2½" range by the push of a button. 1.0 models (shown) lock into one of 7 positions. 2.0 models lock into one of 5 positions.

Height- and width-adjustable arms on 1.0 models also have a width adjustable range of 4¼".

5-prong base on 1.0 and 2.0 task chairs is constructed of extremely rigid, glass-filled nylon. Black surface is textured for scuff resistance.

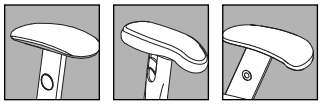
Black, hard dual-wheel casters are standard. Soft dual-wheel casters are available as an option on 1.0 and 2.0 task chairs and stools; upcharge applies.



Contoured "sit spot" and waterfall front edge provides optimal seated support and prevents undue pressure in the lower thigh/knee area.

Footring is standard on stools.

Details



Itsa 1.0 | 1.0 with TB133 | Itsa 2.0

Itsa 1.0 | Itsa 2.0

Seat cushion and armrest design on 1.0 models make it ideal for users of all sizes. Seat cushion and armrest design on 2.0 models, along with a lower seat height range, make it is ideal for users of smaller stature.

Itsa 1.0 task 300 base is constructed of aluminum with a black, powdercoat finish. Task 300 chairs are rated to seat individuals weighing up to 300 lbs.

Seat slider option is available on all models to adjust the seat depth, providing additional comfort for users with long legs. Seat depth is adjusted via a single lever and locks in one of 6 positions within a 2½" range. Upcharge applies.

TB133 is available. 1.0 models with TB133 will feature a different armcap profile than the standard model.
➤See above.

Itsa seating is warranted for three-shift (24/7) service.
➤See Product Warranty, page 352.

Knee-tilt control provides minimal rise of the front seat edge when reclining, allowing the user's feet to remain firmly on the floor. Back may be locked in a full upright position by pushing in pneumatic height adjustment lever.

Synchro-tilt control provides fully synchronized seat-to-back movement, plus:
• Free-float movement allows user to lock the chair in one of multiple positions within the range of movement using a single lever.
• Anti-kickback clutch controls forward movement of backrest when the lock is disengaged.
• Reclining tension adjustment is user friendly and accommodates a wide range of weights via a single lever on the left side of the chair (as seated).

Pneumatic height adjustment allows user to raise or lower the seat while seated. Upward movement of control lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

Desk and Side Chairs

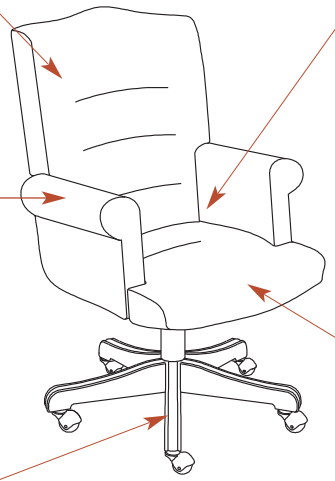
Statement of Line ➤See page 151
Finishes & Materials 289
COM/COL Yardage Req. 312

Outer back has ¼" foam and is fully upholstered.

Arms have rigid, molded-urethane inserts, wrapped with ½"-thick foam (1" thick on arm tops), and secured to the seat and back with metal L-brackets, T-nuts, and machine screws.

5-prong base on desk chairs has a rigid, steel understructure. Maple hardwood radius-end base caps (B75) with Antique English hooded-ball casters are standard.



Cushions are 2¼"-thick, high-resiliency, CFC-free polyurethane foam.

Waterfall front edge slopes forward to reduce pressure and increase circulation in the user's legs.

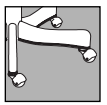
Details

Horizontal Stitching

Vertical Stitching

Button Detailing

Three different upholstery details are available on both high-back or mid-back models: vertical stitching, horizontal stitching, or button detailing.



Curved base caps (B31) with Antique English hooded-ball casters are available on desk chairs; upcharge applies.

Shell on desk chair is a one-piece, 9-ply molded plywood panel.

Frame on side chairs is kiln-dried maple hardwoods. Joints on back legs are double doweled and glued. Front legs use mortise and tenon joinery. Wood corner blocks, screws, and tie screws reinforce frame corners.

Seat suspension on side chair is constructed of unidirectional webbing that is machine stretched across the frame and stapled to the side rails. Seat cushion is 3½" thick.

Back suspension on side chair is constructed of vertical and horizontal webbing stapled to the back frame.

Upholstery is wrapped over cushions and secured with staples.

Nickel-plated glides on side chairs are ⅞" in diameter.

Controls on desk chairs are attached to the frame with T-nuts and machine screws.

Adjustability Features

Knee tilt and upright back lock	•
Tilt tension	•
Swivel	•
Pneu. height	•

• = standard

Knee tilt control provides minimal rise of the front seat edge when reclining, allowing the user's feet to remain firmly on the floor. Back may be locked in a full upright position by pushing in pneumatic height adjustment lever. Recommended for users weighing 225 lbs. or less.

Tilt tension control adjusts the amount of resistance the user feels when leaning back.

Pneumatic height adjustment allows user to raise or lower the seat height with a control lever while seated.

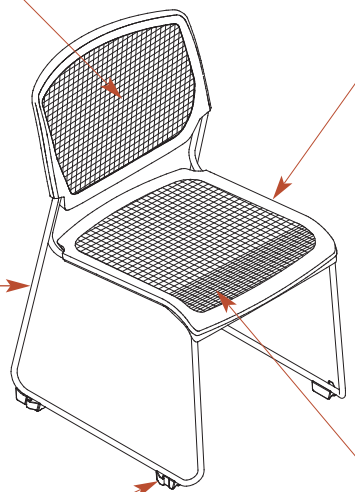
Pricing 159
Finishes & Materials 289

100% polyester mesh back and seat is available in five colors:
- Big Sky
- Black Tie
- Crimson
- Tangerine
- Kiwi



Back and seat frame is black plastic.

Legs have a polished chrome finish.

Mesh on the front of the seat features a tighter weave for additional support.

Black plastic glides are standard and can be used to gang adjacent chairs.

Details

Compact stacking sled-base design enables chairs to be stacked up to 30 high on a dolly or up to 10 high on the floor.

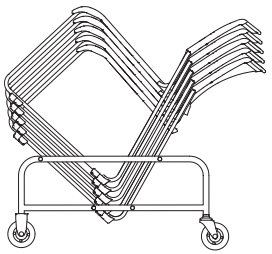
TB133 approved as standard. There are no separate models or pricing.

Chairs are available singly or in sets of four chairs. Sets of four are available under one model number; all chairs in the set will have the same mesh color.

Chairs are shipped four to a carton when applicable.

Poly chairs accommodate up to 253 lbs.

Related Products



Transport dolly is available to move up to 30 chairs. Dolly has a tubular steel frame, gray powdercoat finish, and four 8" semi-pneumatic ball-bearing wheels. Poly chairs stacked 30 high on the dolly will have an overall height of 70" and overall width of 37".

Ganging devices are not required. The black plastic glides that are standard also serve as a ganging bracket.

Lounge Seating

Overview

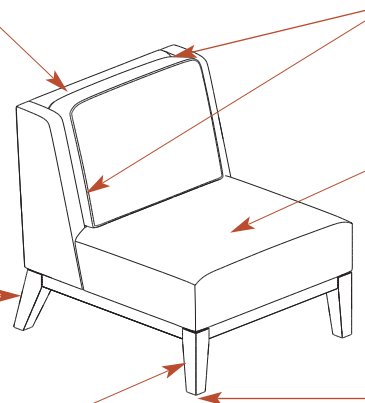
Statement of Line	➤See page 161
Configurations	164
Finishes & Materials	289
COM/COL Yardage Req.	314

Frame is constructed of ¾" plywood, utilizing lap joint construction that is glued and screwed. All upholstered models are standard in kiln-dried maple hardwoods.

Lounge units feature a wall-saver back leg.

Legs and rails of base frames are constructed using double dowel and glue constructions with corner blocks which are also glued and screwed to base rails. The base frame is then attached to the seat frame with wood screws through the corner blocks. Units over 48"L feature additional screws to provide extra support.

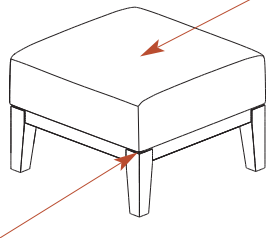
Rails and top of the legs are accented with a decorative reveal.



Piping is standard around the entire edge of both the front and back of the back cushion.

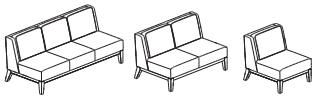
Cushions are high-resiliency, CFC-free, polyurethane foam. Seat cushions, specifically, are 5"-thick, high-grade, laminated polyurethane foam that is custom shaped.

Non-skid glides are ¾" in diameter and adjustable.

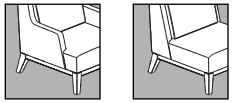


Ottoman and bench frame are constructed of 5½"-thick, high-grade polyurethane foam applied to a ¾" plywood frame using lap joint construction that is glued and screwed. A sewn slipcover is applied over the foam and attached with upholstery staples. Benches feature a sewn seam in the center. Legs and rails of base frames are constructed using double dowel and glue construction with corner blocks, which are also glued and screwed to the base rails. The rails feature a ¼" set back when attached to the legs. Tops of the legs are accented with ¼" decorative reveal. The base frame is then attached to the seat frame with wood screws through the corner blocks.

Details



Three-Seat Two-Seat One-Seat



With Arms Without Arms

Lounge seating is available in three-, two-, and one-seat models, each with or without arms.

Seats have a high-tension strip webbing suspension that is stapled to the frame. Seat upholstery features a wrap-around upholstery method and is stapled into place.

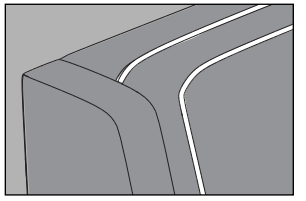
Back features a non-stretch woven suspension that is stapled to the frame, over which upholstery is placed.

Back cushions are 5½"-thick, high-grade polyurethane foam wrapped with ¾ oz. bonded polyester, which is slipcovered and closed with a zipper.

Armrest tops and outside panels are ½"-thick, high-grade polyurethane foam. The interior arm used 1"-thick, high-grade polyurethane foam. Upholstery is a sewn slipcover that is stapled into place.

Pose lounge, ottomans, and benches meet or exceed the applicable BIFMA/ANSI standards and meet Kimball Heavy Duty testing requirements of 350 lbs.

Contrasting upholstery may be selected for the back cushion; use electronic specification tool for accurate pricing.
Note: Seat and outer back/frame upholstery will be the same.



Contrasting piping may be specified in Kimball Office fabric or leather.
Note: Piping appears on the back cushion only and not on the seat cushion or the outer back/frame.

All models are fully upholstered. Bottom is finished with a black, fabric dust cover prior to the wood frame being attached.

Related Products

Accent pillows are available.

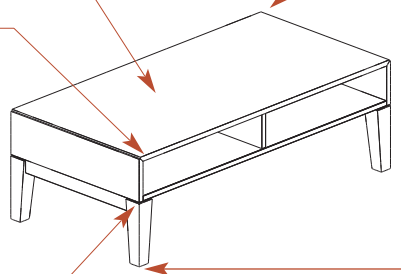
Freestanding Tables

Statement of Line	➤See page 161
Configurations	164
Finishes & Materials	289
COM/COL Yardage Req.	314

Tops feature a ¼" x ¼" reveal and are ¾" veneered plywood.

Corners are mitered utilizing double biscuit joinery which is glued and cleated together.



Corners are mitered utilizing double biscuit joinery which is glued and cleated together.

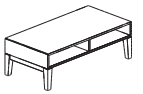
¾" non-skid, adjustable glides are standard on all Pose tables.

Legs and rails of base frames are constructed using double dowel and glue constructions with corner blocks which are also glued and screwed to base rails. Tops of the legs and rails feature a ¼" decorative reveal. The base frame is then attached to the table frame with wood screws through cleats.

Details

Freestanding tables are available in three designs.

End and corner tables are constructed of ¾" veneered plywood. Tops are attached to the table frame with metal brackets and screws.



Magazine table tops feature mitered corners with ¼" x ¼" reveal are ¾" veneered plywood utilizing biscuit joinery that is glued and cleated together. End panels are ¾" veneered plywood; attachment of bottom shelf utilizes joints which are securely fastened with screws, dowels, and concealed fasteners to ensure maximum strength. The center divider is constructed of ¾" veneered plywood that is attached to the bottom panel with glue and screws. The side rails feature a ¼" setback of 5¾" and are attached to the underside of the bottom shelf with screws through the corner blocks.

Metal ganging brackets are spaced evenly over the wood base frame of the adjoining models and tightened. All models are capable of ganging, dependent upon user preference and needs.

Height	35"
Width	24¼"
Depth	25¾"
Arm height	27"
Seat height	18½"
Seat width	20¼"
Seat depth	18"
Kneespace	20½"

Desk and Side Chairs

Overview

Statement of Line ➤See page 171
Finishes & Materials 289
COM/COL Yardage Req. 314

Outer back is fully upholstered.

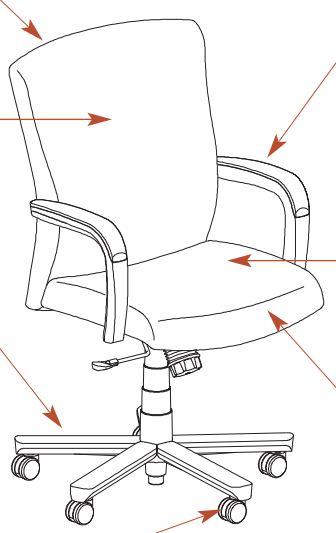
Back cushion is high resiliency, CFC-free, polyurethane foam.

Hardwood base caps are kiln-dried maple supported by a rigid steel substructure.

Black, glass-filled nylon base is textured for scuff resistance.

Hard, black, dual-wheel casters for use on carpeted floors are standard.

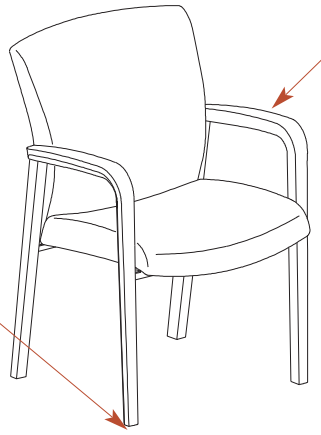
Soft dual-wheel casters are available and should be specified for use on hard floors. Casters are black. Upcharge applies.



Arms on desk chairs are offered in kiln-dried maple with black urethane caps on models with wood bases, or soft urethane insert-molded over a steel core on models with a black nylon base.

Seat cushion is CFC-free molded urethane foam.

Waterfall front edge slopes forward to reduce pressure and increase circulation for the user's legs.



Hardwood-frame side chairs are kiln-dried maple. Joints are double doweled and glued to ensure maximum strength. Frame assembly is mounted in holes bored into the leg and secured with steel brackets and wood screws.

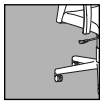
Metal-frame side chairs use 1⅛" diameter, 13 gauge steel tubing and feature a black, textured powdercoat. Frame components are welded together using a precision weld fixture to ensure accuracy and rigidity. Arms have black urethane caps.

Glides on wood frame side chair are dome-shaped plastic and ⅞" in diameter.

Glides on metal frame side chair are nylon ball inserts and 1⅛" in diameter.

Details

Wood base and arms



Black base and arms

Two arm/base styles are available on desk chairs: wood or black urethane. Shroud and controls are black.

Accent/header is available on all Stature desk and side chairs. Contrasting upholstery is an option.

Contoured back shell is blow-molded polyethylene.

Seat rails on side chairs are ¾" diameter (outside), 14-gauge tubular steel.

Back is upholstered using a slipcover-style upholstery technique.

Seat pan is contoured, blow-molded polyethylene. Channels within the seat pan fit over the metal seat rails on side chair frame and the control mechanism of desk chair.

Seat is upholstered using a pull-around upholstery technique.

Cushions are 2" thick on the seat and 1½" thick on the back.

Arms of desk chairs are attached to the seat with a steel support bracket and ¼" diameter machine screws.

Adjustability Features

	Desk Chair
Knee tilt and upright back lock	•
Tilt tension	•
Swivel	•
Pneu. height	•

• = standard

Knee-tilt control provides minimal rise of the front edge of the seat when reclining. Back may be locked in a full upright position by pushing pneumatic height adjustment lever inward. Recommended for users weighing 225 lbs. or less.

Tilt tension control adjusts the amount of resistance the user feels when leaning back.

Pneumatic height adjustment allows user to raise or lower the seat height with a control lever while seated. Upward movement of lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

Note: Tailstock bracket allows the back upright to fasten directly to the control mechanism for added support and rigidity. Back upright mounting plate is 10-gauge metal.

COM/COL Yardage Req. 314

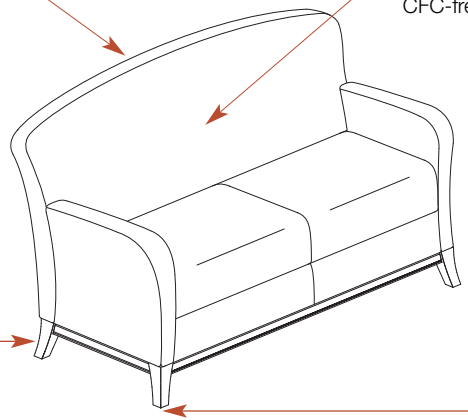
Frame is constructed of ¾" plywood, utilizing lap joint construction that is glued and screwed. All upholstered models are standard in kiln-dried maple hardwoods.

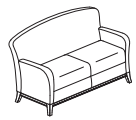
Cushions are high-grade resiliency, CFC-free polyurethane foam.



Legs are flared and accented with a decorative base rail.

Non-skid glides are ¾" in diameter and adjustable.

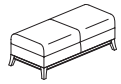
Details



2½-Seat

1-Seat

Lounge seating is available in two-and-half-seat and one-seat models with arms.



Bench is 53"W.

Ottoman is 25"W.

Wood base on all models is available in all Kimball Office standard wood finishes.

Back and seats feature high-tension, strip-webbing suspensions that are stapled to the frame.

Back cushions are 1½"-thick, high-grade, laminated polyurethane foam. Back upholstery features ¼" sewn-in foam and uses a slipcover upholstery method that is stapled into place.

Seat cushions are 6"-thick high-grade laminated polyurethane foam that is custom shaped. Seat upholstery uses a wrap-around upholstery method that is stapled into place.

All models are fully upholstered. Bottom is finished with a black fabric dust cover.

Armrest tops and outside panels are constructed with ¼"-thick, high-grade polyurethane foam. Upholstery features an additional ¼" sewn-in foam and uses a slipcover upholstery method that is stapled into place.

Legs and rails of base frames are constructed using double dowel and glue constructions with corner blocks that are also glued and screwed to the base rails. The base frame is attached to the seat frame with wood screws through the rails. Two-and-a-half seat and bench models have additional screws to provide extra support.

Talent lounge seating and bench meet or exceed the applicable BIFMA/ANSI standards and meet Kimball Heavy Duty testing requirements of 350 lbs.

Related Products

Accent pillows are available.

Lounge Seating

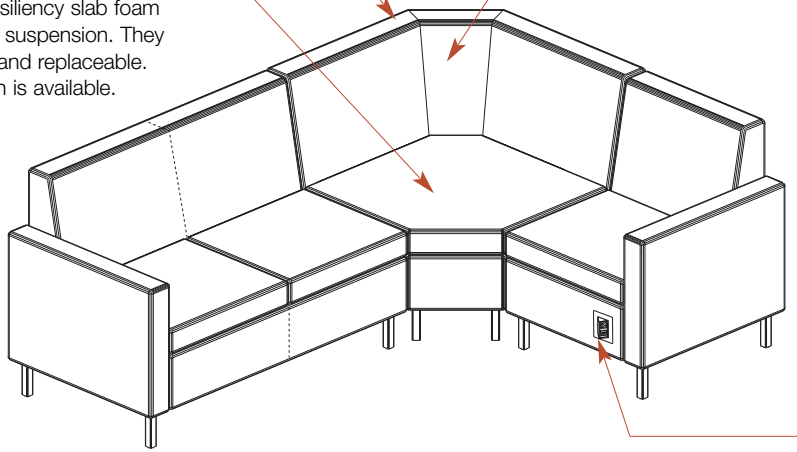
Overview

Actual Dimensions ➤See page 191
Finishes & Materials 289

Frame is constructed of ¾" plywood, using a lap-joint construction method. The frame is glued and screwed together.

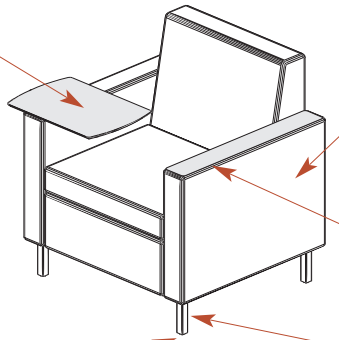
Seat cushions contain 3½" high-density, high-resiliency slab foam over a webbed suspension. They are removable and replaceable. Soft seat option is available.

Back cushions contain 2½" high-density, high-resiliency foam over a non-stretch woven suspension that is stapled to the frame.



Power/USB grommets are available in left (shown), right, or left and right kick rail on all lounge models.

Wood or laminate tablet arms are available on models with 4" arms. Tablet arms may be specified for the right (shown), left, or both left and right arms. Models with 4" arms on both sides may be specified with a tablet arm on one side and an armcap on the other.
Note: Location is defined from the user's perspective when seated in the chair.



Arm tops and outside panels feature ¾"-thick, high-grade polyurethane foam.

Wood or laminate arm caps are available for 4"-arm models.

Square legs are steel with a platinum powdercoat finish. They are attached with wood screws through the frame's corner blocks.

Non-skid, adjustable glides are 2" in diameter.

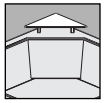
Details

All Villa lounge models are fully upholstered. Bottoms are finished with a black fabric dust cover. Legs are attached after upholstery is applied.

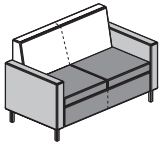
Villa seat and back cushions are upholstered using a slipcover method and finished with single and double French seams.

Arms feature a sewn slipcover with French seams that is stapled into place.

Soft seat cushion option is available on all Villa models, except youth lounge. Provides 10 lb. Visco foam layer atop HR45 foam to provide comfort and support. Certain upholsteries might wrinkle over time with soft seat option.

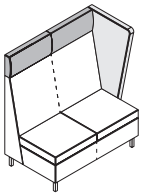


Wood or laminate floating top is available on Villa plateau corner.



Contrasting fabric may be specified on the back, base/seat, arms, and headrest (privacy-back models).

Mobile one-seat lounge features 5" arms on both sides and includes cupholders in both arms, non-handed tablet arm, front casters, and black handle.



Privacy-back seating is available in armless 24"W one-seat, 30"W one-seat, armless two-seat models, with or without Shade, and 90° corner models. Luan material is added to the back for flexibility, support, and overall comfort. Leather is not available on backs of privacy-back models, but may be selected for the headrest and seat.

Tables are available with HPL laminate or wood top; round tables are also available with a white matte glass top. Legs are the same as those featured on lounge seating models; square steel with a platinum powdercoat finish. All tables, except round models can gang to any lounge unit. Grommets are available.
➤See page 187.

Related Products

Accent pillows are available.

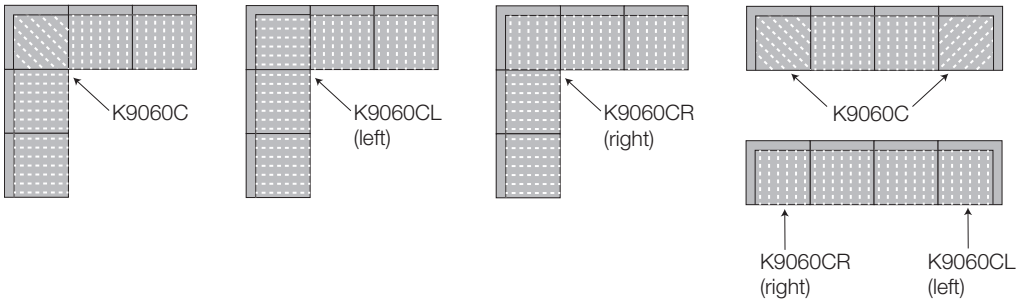
Fabric Application Diagrams (by model):



Ganging devices
➤See page 217.

Certain upholsteries might wrinkle over time with soft seat option.

Use an electronic specification tool for accurate pricing when specifying contrasting fabrics.

IMPORTANT: Fabrics reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all fabrics and is not considered a defect; it is more easily recognized on fabrics with a nap or shimmer and more apparent on crescent or corner units.

Overview ➤See page 185
Finishes & Materials 289

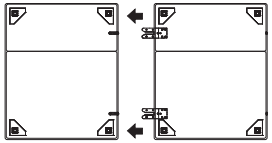
Model	*Price*
Two-Piece Ganging Device	
K60GB	$33

How to Specify

❶ Model



Two ganging brackets are required to join two units together; specify two K60GB models to gang two units together. Pre-drilled holes in the base accept the ganging bracket or its small mating piece. Once brackets are installed, units slide together for a secure connection. To disconnect, lift up and pull outward on the unit with the mating pieces.

➤Assembly instructions and video available at: www.kimballoffice.com

Notes

Vista seating models are dimensionally consistent and meet or exceed the applicable BIFMA/ANSI standards.

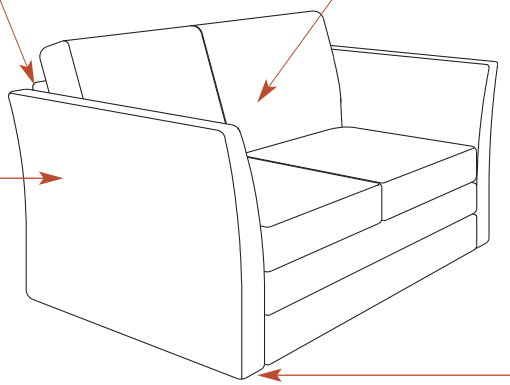
Lounge Seating

Overview

Statement of Line ➤See page 219
Finishes & Materials 289
COM/COL Yardage Req. 317

Frame is constructed of 7/8" plywood.

Cushions are high-resiliency, CFC-free polyurethane foam.

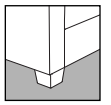


All models are fully upholstered. Bottom is finished with a black fabric dust cover.

Non-skid glides are 1¾" in diameter and adjustable.

Details

Vista is available in three-, two-, and one-seat models and with or without piping.



Models with legs are available on all sizes. Wood finishes are standard.

Seats have a high resiliency sheet webbing suspension that is stapled to the frame. Frame construction meets or exceeds GSA Heavy Duty Testing requirements.

Seat cushions are removable and feature 7" of dual-density, custom-shaped foam. Each cushion is 22"W, slipcovered, and closed with zippers.

Back features a non-stretch woven suspension that is stapled to the frame.

Back cushions are attached and feature 5½" of dual-density, custom-shaped foam.

Armrest frames are wrapped with ½" high-density foam, slipcovered, and attached to units with three 7/16" carriage bolts per arm.

Legs, on applicable models, are kiln-dried select hardwoods and are attached using three wood screws. Each leg contains a non-skid adjustable glide.

Contrasting upholstery is available on models without piping. Back and seat upholstery applies to the cushions; arms and frame upholstery applies to remainder of the lounge model.

Contrasting piping may be specified on applicable models in Kimball Office fabric or leather.

Related Products

Accent pillows are available.

Seating

Overview

High-Performance Task, Sit-to-Stand, and Stools

Statement of Line	➤See page 225
Adjustability Features	230
Typical Configurations	231
Finishes & Materials	289

High-performance task chairs, sit-to-stand seating, and stools are options-rich, making them customizable for any setting, user, or task; select from three performance mesh/upholstery combinations:

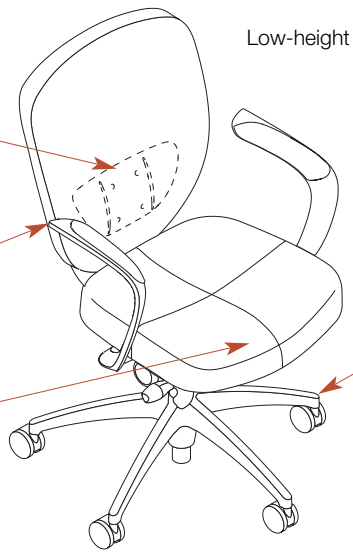
- Mesh-back with mesh-upholstered seat
- Mesh-back and upholstered seat
- Upholstered seat and back

Standard-height task

Arm caps are soft, black, self-skinning polyurethane foam, insert-molded over a steel core.

Arm supports on all height-adjustable arms are glass-filled nylon insert-molded over a steel core for superior support.

Low-height task



Lumbar support pad, standard on upholstered-back models, is made of polypropylene and moves 2½" for optimal comfort and support. Neoprene covers the foam in the lumbar area and facilitates movement of the lumbar pad.

Conference arms are available with or without armcaps.

Contoured seat cushions provide a waterfall front edge to enhance short- and long-term comfort.

Optional lumbar support on mesh-back models is made of high-performance polyurethane elastomer. Position of the lumbar support is adjusted by sliding it up and down on a track within a range of 2¾".

Seat cushion is 2⅛" thick and consists of 1¾" of CFC- and CHC-free molded foam over a seven-layer molded plywood shell. Select performance mesh-covered (shown) or upholstered seat cushions.

5-prong base plastic base is standard on standard-height task chairs and stools. Plastic base is constructed of rigid, glass-filled nylon, features a black textured surface for scuff resistance; aluminum base in platinum metallic or polished finish is available (upcharge applies).

65mm hard dual-wheeled casters (C40) are standard-height task chairs and stools; soft dual-wheeled casters (C41) for use on hard floors are available (upcharge applies).

5-prong base aluminum base is standard on low-height task and sit-to-stand models.

55mm hard dual-wheeled casters (C3) are standard on low-height task chairs and sit-to-stand seating; soft dual-wheeled casters (C4) for use on hard floors are available (upcharge applies).

Details

Six arm styles are available on Wish. ➤See page 230 for details.

Wishbone back is standard in plastic (injection-molded, glass-filled nylon) on all models; polished die-cast aluminum is also available as standard on mesh-back models.

Inner back panel on upholstered-back model is injection molded polypropylene, designed with a reinforcing pattern to ensure rigidity.

Inner seat panel is molded 9/16"-thick, 7-ply, single-shell construction with a waterfall front edge.

All Wish high-performance task, sit-to-stand, and stools meet 300 lb. weight and three-shift work requirements.

Metal footring is standard on sit-to-stand and stool models; 462 cinder.

Wish task chairs are warranted for three-shift, 24/7 service.

Arm Styles and Adjustability Features

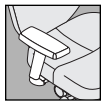
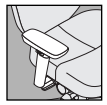
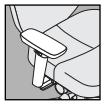
Armless



Height-Adjustable



Height- & Width Adj. 2D



Height- & Width Adj. 4D

Conference

Conference with Arm Pad

Six arm styles are available on Wish seating.

Height-adjustable arms adjust up and down via a push button to one of 9 positions.

Height- and width-adjustable arms adjust up and down via a push button to one of 11 positions and side to side via lever adjustment bracket.

4-D adjustable arm caps on height- and width-adjustable arms adjust in 6 directions: left and right (width), forward and backward (depth), and in and out (pivot).

Width adjustment	
– Number of positions	5
– Range	1"
Depth adjustment	
– Number of positions	5
– Range	1¾"
Pivot adjustment	
– Number of positions	5
– Pivot (each direction)	26°

Adjustability Features

	Standard Height	*Low Height*	*Sit-to-Stand*	*Stools*
Synchro-tilt control	•	•	•	•

Lumbar				
– Mesh back	○	○	○	○
– Upholstered back	•	•	•	•
Back tilt lock	•	•	•	•
Seat slider	○	○		

• = standard ○ = option

Synchro-tilt mechanism provides fully synchronized seat-to-back movement with a 2:1 ratio. For every 2 degrees the back moves, the seat angle changes 1 degree. Other features:

- Free-float movement allows user to lock the chair in multiple positions within the range of movement using a single lever.
- Anti-kickback clutch controls forward movement of backrest when the lock is disengaged.
- Reclining tension adjustment is user friendly and accommodates a wide range of weights via a single lever on the left side of the chair (as seated)
- Control is standard in cinder paint, but may be specified with a polished shroud to go with polished aluminum wishbone (upcharge applies)

Pneumatic height adjustment allows user to raise or lower the seat while seated. Upward movement of control lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

Lumbar support position is adjusted by sliding it up and down on a track within a range of 2¾".

** Arm height measurements for high performance task seating are made from upper seat surface to upper arm surface with a BIFMA sanctioned CMD.*

Task Chairs and Stools

Overview

Statement of Line ➤See page 269
Finishes & Materials 289
COM/COL Yardage Req. 314

Lumbar support pad, made of polypropylene, moves 2½" for optimal comfort and support. Neoprene covers the foam in the lumbar area and facilitates movement of the lumbar pad.

Height-adjustable arms adjust with a push button to one of 5 positions within a range of 2¼" and can be specified with fixed arm caps.

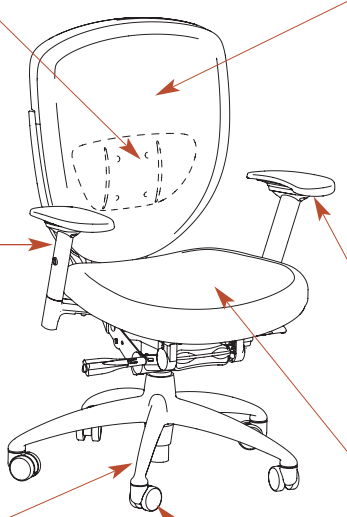
Arm supports are glass filed nylon, insert molded over a steel core for superior support.

5-prong base is constructed of rigid, glass-filled nylon. Black surface is textured for scuff resistance.

5-prong, 27" black aluminum base on Task 300 chairs was tested using 450 lbs. of force.

Seat slider option is available on task chairs to adjust the seat depth for comfort. Seat depth is adjusted via a single lever and locks in one of 6 positions within a 2" range. Upcharge applies. Seat slider is not available on stools.

Low seat-height option, compatible with the BIFMA recommended minimum of 15", is available. The seat height adjustment range is 3". Upcharge applies. Not available on Task 300.



Contoured CFC-free polyurethane foam provides comfort consistency and proper ergonomic support.

Back cushions have 1¾" CFC-free polyurethane foam to enhance comfort and reduce fatigue. Edges of foam used on seat and back are wrapped with ⅜" of higher density foam for cleaner edges and contours.

Arm caps are soft, black, self-skinning polyurethane foam, insert molded over a steel core for strength.

Seat cushions have 2" base foam, plus a ½" soft topper pad to enhance comfort and reduce fatigue. Base foam includes ½" filler centered on the bottom of the cushion for added support. Seat cushions feature a waterfall front edge.

Hard dual-wheel casters (C1) are standard.

Soft dual-wheel casters are available for use on hard floors. Casters are black. Upcharge applies. Not available on Task 300.

Foot ring on stools is height adjustable with a total range of 3½". Foot ring is black tubular steel.

Details

Fixed Conference

Task chairs are available with adjustable-height arms with fixed arms caps, conference arms, or without arms.

Stools are available with adjustable height arms and fixed arm caps or without arms.

Wishbone back frame is injection molded, glass-filled nylon. Frame is attached with 2 high-tensile M10-1.5 x 35mm Allen-head bolts with grade 8 heavy steel flat washers.

Inner back panel is injection molded polypropylene, designed with a reinforcing pattern to ensure rigidity.

Inner seat panel is molded 9⁄16"-thick, 9-ply (1⁄16" poplar per ply), single-shell construction with a waterfall front edge.

Seamed slipcover-style upholstery on the back and seat accommodates a wide variety of fabrics and leather.

Task 300 chairs are rated to seat individuals weighing up to 300 lbs.

Adjustability Features

Synchro-tilt	•
Swivel	•
Pneumatic height	•
Side tension	•
Lumbar	•
Seat slider	○
Back tilt lock	•
Arm height	○

• = standard ○ = option

Synchro-tilt mechanism provides fully synchronized seat-to-back movement with a 2:1 ratio. For every 2 degrees the back moves, the seat angle changes 1 degree. Other features:

- Free-float movement allows user to lock the chair in multiple positions within the range of movement using a single lever.
- Anti-kickback clutch controls forward movement of backrest when the lock is disengaged.
- Reclining tension adjustment is user friendly and accommodates a wide range of weights via a single lever on the left side of the chair (as seated).

Pneumatic height adjustment allows user to raise or lower the seat while seated. Upward movement of control lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

Desk Chairs and Stools

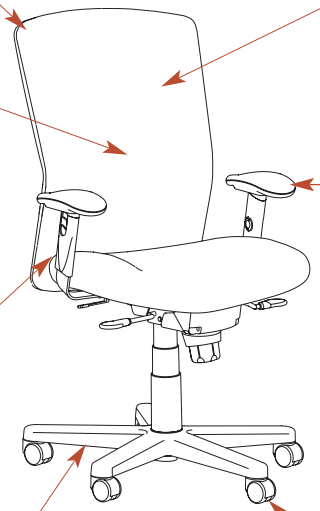
Overview

Statement of Line ➤See page 279
Finishes & Materials 289
COM/COL Yardage Req. 318

Outer back is fully upholstered.

Adjustable-height back, standard on all models, allows proper positioning of lumbar, helping prevent lower back fatigue and ensure comfort. Back adjusts through 6 positions over a 3¼" range.

Arms have a structural metal upright encased in an injection molded, glass-filled nylon shroud. Arms are secured to the chair with metal brackets and ¼" fasteners.



Black, glass-filled base, is available on high and mid-back chairs, is textured for scuff resistance.

Base on stool has a metal understructure and a two-piece polypropylene overlay and lower shroud.

Two densities of CFC-free urethane foam provide seat and back with consistent comfort and appropriate contours for superior ergonomic support.

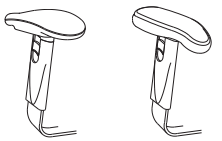
Adjustable arms adjust in width via a lever to one of 4 positions within a 3" range. Push button allows arm height to be adjusted and locked into one of 7 positions within a 2½" range.

Fully adjustable arms combine the standard height and width adjustments with the added benefit of a pivot adjustment. Pivot adjustment allows arm caps to rotate inward or outward to one of 3 different positions over a 30° range.

Black, dual-wheel casters for use on carpeted floors are standard.

Soft, black, dual-wheel casters are available as an option and should be specified for use on hard floors. Upcharge applies.

Details



Standard TB133 compliant

Arms caps on TB133 models have a different profile than those on standard models.

Outer shell is injection-molded polypropylene.

Inner shell is blow-molded polypropylene, designed with a deep ribbing pattern to ensure rigidity.

Seat cushions have 2¼" base foam, plus a ¼" soft topper pad to enhance comfort and reduce fatigue.

Back cushions have 2¾" contoured base foam to enhance comfort and reduce fatigue.

Seamed slipcover-style upholstery on both the back and seat accommodates a wide variety of fabrics and leather.

Seat slider models allow the user to set the depth of the seat to match their physical requirements. Seat depth is adjusted via a single lever and locks in one of 7 positions within a 1¾" range.

Adjustability Features

Synchro-tilt	•
Swivel	•
Pneumatic height	•

• = standard ○ = option

Synchro-tilt mechanism provides fully synchronized seat-to-back movement with a 2:1 ratio. For every 2 degrees the back moves, the seat angle changes 1 degree. Other features:

- Free-float movement allows user to lock the chair in multiple positions within the range of movement using a single lever.
- Anti-kickback clutch controls forward movement of backrest when the lock is disengaged.
- Reclining tension adjustment is user friendly and accommodates a wide range of weights via a single lever on the left side of the chair (as seated).

Seat height is adjusted pneumatically. Range varies with model and choice of options from 15¼"–20½" to 17½"–22¼".
➤See page 281.

Telescoping pneumatic cylinder (P3) is available on desk chairs for lower seat-height requirements. Upcharge applies.

Foot ring on stools is height adjustable in 1" increments with a total range of 4". Foot ring is tubular and wire steel.

Notes

Samples:

Samples of Kimball Office wood finishes and paints are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur in color and texture. Kimball Office carefully selects all materials used in every product, ensuring a commercially acceptable color and finish.

Swatch cards and memo samples of Kimball Office fabrics are available upon request. There may be slight differences between samples and actual yardage as a result of variations in dye lots.

To order samples:

- Visit the Partner web site at www.kimballoffice.com to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom
- For Alliance program fabrics, contact our Alliance partner directly.

Kimball Office offers a diverse collection of surface materials. Please see descriptions below to ensure that you are choosing the materials that best support your requirements.

Fabric Collection:

Our collection of fabrics offers a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

The classic patterns are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

The fabric collection was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

You will find that colors were developed to coordinate very well between the in-line and alliance offerings, as well as between the seating and panel fabric offerings.

The fabric collection will provide options for the discerning client for many years to come.

Wood Collection:

Our wood finishes offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, these finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the newer walnut or cherry finishes.

Kimball Office carefully selects veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Darker finishes can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

Two premium veneers—Sapele and Zebrawood—are part of the standard offering to provide options for high impact styles without having to quote custom veneers. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

Generations Collection:

The Generations Collection is comprised of tried and true materials that have been in the Kimball Office offering for many years. This collection is designed to support long-standing customers and to help transition you to the current offering.
➤Visit kimballoffice.com to see the Generations Collection.

IMPORTANT: Materials in this collection should not be used to set standard color palettes for new installations.

Materials in this offering can be ordered using the standard process, however, extended lead times and minimum order quantities may apply. For best results, pre-planning orders with your Customer Service Representative is recommended.

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Warranty:

Fabrics and leathers are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).
➤See page 352 for complete warranty information.

† Adagiato and Beo are constructed of beech wood. Brighton and Monterey wood finishes on Beech is complimentary to Brighton on maple and Monterey on oak, but are not a direct match. Brighton and Monterey wood finishes are not available on Beo guest seating or Beo tables due to a different drying process resulting in a different base color that these light finishes will not cover.

Note: Bingo is available in Amber, Ebony, Honey, and White. Bingo model numbers incorporate the finish designators. Event, Itsa, Wish, and Xtreme are non-wood series.

Key:
- • = Available
- Ⓚ = Available on Kwik Office models
- † = Exceptions apply (see below)

Price Group Designators:

STD = Group 1 (list price)
STD2 = Group 2 (20% upcharge)

Characteristics:

Each piece of natural wood offers unique texture and grain. Minor variations in finish color and value may occur due to the natural characteristics of wood. Kimball Office carefully selects all materials used in every product ensuring a commercially acceptable color and finish. Factors such as aging and exposure to light alter finishes.

Brighton (IM) is a clear finish. Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

All woods are susceptible to darkening from exposure to UV rays (sunlight and other sources), especially cherry and maple. Care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change.

The wood species on seating may vary from the wood species on the casegood or system. Different wood species offer unique texture and grain which provide more variation in finish color; however seating finishes are compatible with casegoods and systems finishes.
➤For Casegoods or Systems products, please see the appropriate price list for finish or paint designators and product application.

Wood Finishes

Matrix

Special Wood Finishes

Previously developed and custom finishes are available for special requirements. Kimball Office has an extensive library of previously developed special finishes which may be an acceptable match for your application. If not, a custom finish can be developed to meet specific needs.

Samples of previously developed special finishes are available from Customer Service upon request.

Applicability of special finish colors depends on the wood species to which they are applied. The matrix at right shows the types of woods used for each series.

IMPORTANT: Kimball Office reserves the right to decline the opportunity to match a finish color.

Approval Process:

① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the $300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.

② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. Custom finishes will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.

③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

Upcharges:

A one-time fee of $300 (net) will be billed for the development of each new custom finish. This fee covers all Kimball Office product lines on which the finish may be used. Models receiving a special finish will also be assessed an upcharge.

A 10% upcharge per line item (model number) for special wood finish is calculated on the Grade 1 upholstery price, then added to the price for the selected fabric grade, to arrive at the list price.

Example:
Collage model 4605 in grade 5 upholstery and special wood finish—

Grade 1 upholstery price	$ 952.00
	x .10
Upcharge for special finish	$ 92.20
Grade 5 upholstery price	+1085.00
List price	$1143.20

Wood Species by Series:

Note: Delano and Bingo are not available in special finishes. Special finishes are not available on Zebrawood. Independence Suffolk is constructed of hackberry.

Key:
• = standard wood species
○ = standard wood species on most models in series.

How to Specify

① Build the complete model specification by following the "How to Specify" on the appropriate pricing page for the product that is to receive the special finish.

② For the "finish price group" step, insert special finish code (in place of STD):
ZBECH1 = Special beech finish
ZCHY1 = Special cherry finish
ZMAP1 = Special maple finish
ZWAL1 = Special walnut finish
ZSAP1 = Special sapele finish
Note: Choose the special finish code based on the wood species used in the seating model.
➤See chart at left.

③ For the "Finish designator" step, insert the designator provided to you by Customer Service.

Laminate, Paint, and Non-Paint Finishes

Flip	•						•	
Event	• Ⓚ		$					
Itsa	• Ⓚ							
Poly							• Ⓚ	
Stature								• Ⓚ
Villa			•					
Wish	•		$					
Wish Classic	• Ⓚ		$ Ⓚ					
Xtreme								•

Note: Only series that are available in paint, non-paint finishes, and laminate are listed here.

Upcharges:

10% upcharge applies for metallic paint on Event. Upcharge is calculated on the Grade 1 upholstery price, then added to the price for the selected fabric grade, to arrive at the list price.

Example:

Event model 95-2D in grade 5 fabric and metallic paint—

Grade 1 uph. price	$323.00
	x .10
Upcharge for metallic	$ 31.30
Grade 5 fabric price	+408.00
List price	$427.30

Flat upcharge applies for metallic paint on Wish.

➤See individual pricing pages.

Characteristics:

- Metallic paint finishes may appear to have variations in color due to its reflective qualities.
- Woodgrain laminates are matched to wood finishes with consideration for the most common application—laminate surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

Wood Finishes ➤See page 291
Alliance Program Uphol. 303
COM & COL 306

All Kimball Office fabrics meet, and in most cases exceed, the minimum requirements set up by ACT. For the purpose of uniformity in the industry, Kimball Office will be utilizing the ACT icons on swatchcards and related materials.

The Association for Contract Textiles (ACT) has developed voluntary performance guidelines to make fabric specification easier. The five symbols give architects, designers, and end-users a vast amount of performance information in a succinct visual way. Look for these symbols on ACT member company sampling to assure that the fabrics you specify perform up to contract standards and pass all applicable testing.

These categories describe a material's performance features as measured by specified methods under standard laboratory conditions. All tests referenced here are intended to represent the most current version of a test method. Note: Individual ACT member product information may represent a different version of a test method depending on the date the product was introduced to the market.

IMPORTANT: These tests represent minimum requirements which are subject to change without notice and may not reflect requirements or laws in all locations.

Flammability:

The measurement of a fabric's performance when it is exposed to specific sources of ignition. Note: ACT guidelines specify different flammability tests dictated by the intended end use for the fabric.

Upholstery
California Technical Bulletin #117
Section E—Class 1 (Pass)

Wrapped Panels and Upholstered Walls
ASTM E 84 (Unadhered Mounting Method)—Class A or Class 1

Wet & Dry Crocking:

Transfer of dye from the surface of a dyed or printed fabric onto another surface by rubbing.

Upholstery
AATCC 8—
Dry Crocking, Grade 4 minimum
Wet Crocking, Grade 3 minimum

Wrapped Panels and Upholstered Walls
AATCC 8—
Dry Crocking, Grade 3 minimum
Wet Crocking, Grade 3 minimum

Colorfastness to Light:

A material's degree of resistance to the fading effect of light.

Upholstery
AATCC 16—Option 1 or 3
Grade 4 minimum at 40 hours

Wrapped Panels and Upholstered Walls
AATCC 16—Option 1 or 3
Grade 4 minimum at 40 hours

Physical Properties:

Pilling is the formation of fuzzy balls of fiber on the surface of a fabric that remain attached to the fabric. Breaking strength is the measurement of stress exerted to pull a fabric apart under tension. Seam slippage is the movement of yarns in a fabric that occurs when it is pulled apart at a seam.

Upholstery
Brush pill—ASTM D3511, Class 3 minimum or Martindale Tester ASTM D4970, Class 3 minimum

Breaking strength ASTM D5034 (Grab Test)—50 lbs. minimum in warp and weft

Seam slippage ASTM D4034—
25 lbs. minimum in warp and weft

Wrapped Panels and Upholstered Walls
Breaking strength ASTM D5034 (Grab Test)—35 lbs. minimum in warp and weft

Abrasion Resistance:

The surface wear of a fabric caused by rubbing and contact with another fabric.

General Contract Upholstery
ASTM D4157 (ACT approved #10 Cotton Duck)—15,000 double rubs Wyzenbeek method

ASTM D4966 (12 KPa pressure)—20,000 cycles Martindale method

Heavy Duty Upholstery
ASTM D4157 (ACT approved #10 Cotton Duck)—30,000 double rubs Wyzenbeek method

ASTM D4966 (12 KPa pressure)—40,000 cycles Martindale method

End use examples of heavy-duty installations where upholstery fabrics rated at 30,000 double rubs should be appropriate are single shift corporate, hotel rooms/suites, conference rooms and dining area usage.

ACT acknowledges that there are extreme wear situations that may require higher levels of abrasion resistance. End use examples that may require higher than 30,000 double rubs include: 24 hour transportation terminals, 24 hour telemarketing, 24 hour healthcare emergency rooms, 24 hour casino gambling areas, and such public gathering places as theatres, stadiums, lecture halls and fast food restaurants.

It is strongly suggested that double rubs exceeding 100,000 are not meaningful in providing additional value in use. Higher abrasion resistance does not necessarily indicate a significant extension of the service life of the fabric.

The Wyzenbeek and Martindale tests are the two methods commonly used to predict wear-ability. Actual performance is determined by many factors such as fiber content, weaves, finishes, furniture design, maintenance, cleaning, and usage. Durability of an upholstery fabric is a complex interaction (combination) of a number of performance tests that, in addition to abrasion, includes seam slippage, pilling, tensile strength, and usage.

There is no correlation between the Wyzenbeek and Martindale tests so it is not possible to estimate the number of cycles that would be achieved on one test if the results from the other test were known.

Kimball Office Seating Fabrics

Application Guidelines

Standard Regulation Testing

Key:
- • = Complies with standard
- ▲ = Test not conducted by supplier

Fire Codes & Flammability:

TB117
California Flammability Regulation #117 is a set of minimum allowable standards of flammability to which all upholstered furniture sold in the State of California must comply. It relates primarily to fabric coverings and resilient fillings. All shipments of Kimball Office upholstery comply with Regulation #117 and our invoices and law labels for such goods bear certification that our upholstered products comply.

UFAC
All Kimball Office seating is made in accordance with the Upholstered Furniture Action Council (UFAC) criteria to reduce chance of ignition by burning cigarettes.

TB133 Factor
TB133 factor is a full-scale fire test for furniture manufactured for public use in which an entire piece of furniture is tested as a unit. Kimball Office offers a wide variety of seating products that can be manufactured to meet TB133.

Double Upholstery Method
Kimball Office products are first upholstered with a fire barrier, the upholstery is then applied over the barrier. The addition of this barrier may slightly alter the comfort and/or aesthetics of the seating product.

Advisory
Purchaser must consult local fire and code official to determine the suitability of product being selected for any particular application.

Certain jurisdictions may require the use of additional fire retardants of composite flammability testing. Kimball Office assumes no responsibility for composite testing or for compliance with any particular code or other flammability standards different than as contained in applicable catalog information unless such requirements are specified in writing by purchaser to Kimball Office prior to confirmation of order. Cost of additional flammability treatments or testing needs of purchaser shall be borne by purchaser.

Wish Classic	✦	✦Ⓚ	✦	✦Ⓚ	✦Ⓚ	✦	✦	✦Ⓚ	✦Ⓚ	✦
Xtreme	✦	✦	✦	✦	✦	✦	✦	✦	✦	✦

Characteristics:

- Certain fabrics may relax over time (e.g., some woven fabrics) creating a loosely upholstered appearance.
- Some fabrics may wrinkle, pill, fuzz, or puddle as a normal, inherent characteristic. This does not indicate that the covering or application is deficient.
- Fabrics are cut to provide the best match possible when transitioning from piece to piece.
- Fabrics reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all fabrics and is not considered a defect; it is more easily recognized on fabrics with a nap or shimmer and more apparent on crescent or corner units.
- Kimball Office will always ship a satisfactory commercial match. Because of industry dye-lot variation, colors may not match exactly.
- Fabrics are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).

Terratex is a registered trademark of True Textiles, Inc. Each Terratex fabric must meet these four criteria:
- Made of 100% post-consumer and/or post-industrial fiber, or compostable materials
- Made using processes that reduce waste, emissions, energy, water usage, and toxic by-products
- Meets or exceeds the same quality standards of fabrics manufactured using virgin materials and conventional processes
- Made of a single fiber type, without backcoating, so that it too can be recycled or composted.

Green-e
100% of the electricity used to make these products is matched by Green-e certified renewable energy certificates.

Cleaning Fabrics:

Cleaning Code B
- Cleanable with diluted bleach solution

Cleaning Code D
- Dry clean only.

Cleaning Code L
- Use a clean cloth with warm water and mild soap as soon as possible.

Cleaning Code S
- Use only mild, pure water-free cleaning solvents.
- Cleaning by a professional furniture service is recommended.

Cleaning Code W
- Use water-based cleaning agents or foam.

Cleaning Code WS
- Use water-based cleaning agents or foam. Mild water-free solvents may also be used.
- Cleaning by a professional furniture service is recommended.

Fire Retardant Fabrics
- Solvent-based fabric cleaning or dry cleaning are recommended.
- Cleaning with water or water-based cleaners could result in salt ringing.
- Test proposed cleaning procedure on a small portion of fabric before cleaning entire piece.

Cleaning Leather:

Regular Cleaning
- Remove as much soil or staining as possible by carefully vacuuming or brushing.
- Dust with a dry or damp cloth.

Deep Cleaning
- Use mild non-detergent soap or cleaner. Wipe surface with a light circular motion. Repeat with clean water.
- Do not soak leather.
- Air dry.

Note: Never use furniture polishes, oils, solvents, varnishes, abrasive cleaners, ammonia, wax, or saddle soaps on leather.

Characteristics:

- Leather is a natural product. Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristic of leather.

Contrasting Upholstery and Piping Options

Overview ➤See page 290
Vision Collection Matrix 296
Faux Leather & Leather 297

Contrasting Upholstery:

Contrasting upholstery is defined by entire back and seat upholstery application. Contrasting upholstery is available on the following seating series:

- Adagiato (half- and full-height back cushion models)
- Beo
- Boyd (all models)
- Delano (lounge and tandem models)
- Enjoy (all models)
- Event (all models)
- Pose (lounge models)
- Villa (lounge, corner, and wedge models)
- Wish (upholstered-back models)
- Wish Classic (all models)
- Xtreme (all models)

Select any contrasting Kimball Office, Alliance Program, COM, or COL upholstery.

IMPORTANT: When specifying contrasting fabric, use an electronic specification tools for pricing. If one is not available, you may contact Customer Service.

Special Applications:

- Arpeggio pillow back models—Back upholstery applies to pillow back only. Remainder of the chair (seat, arms, outer shell) is contrasting.
- Delano back upholstery applies to back; bolster applies to pillow; seat and arms applies to remainder of chair. The bolster and seat/arms can both be contrasting.
- Vista (models without piping)—Back and seat upholstery applies to cushions. Remainder of the chair (arms and frame) is contrasting.
- Pose contrasting back upholstery applies to the cushion back only. Remainder of the chair (seat, arms, and outer shell) is contrasting.

Contrasting Button:

Contrasting button is available on the following seating series at no upcharge:

- Beo (button back model)

Kimball Office fabric or leather MUST be specified if you desire a contrasting upholstery on the button; Alliance program upholstery is not available for contrasting button.

Contrasting Piping:

Contrasting piping is available on the following Kimball Office seating at no upcharge:

- Arpeggio (all models)
- Pose (lounge models)
- Vista (models with piping)

Kimball Office fabric or leather MUST be specified; Alliance program upholstery is not available for contrasting piping.

How to Specify

① Follow the “How to Specify” steps on the appropriate pricing pages for the seating model, indicating the contrasting fabric, button, or piping information in the order outlined.

Alliance Program Fabrics

Program Overview

Overview	➤See page 290
Applicability Guidelines	304
TB133 Information	319
TB133 Inquiry Form	320

Kimball Office has formed partnerships with the top textile companies in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

Patterns from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics are available in a variety of design aesthetics and price points to meet all of your fabric needs. Carded fabrics are listed in this price list. ➤See Surface Materials at www.kimballoffice.com for a wide variety of additional graded-in fabrics from Arc Com, Carnegie, CF Stinson, KnollTextiles, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics.

IMPORTANT: Orders cannot be cancelled for alliance program fabrics.

Application of Alliance Program fabrics will be as depicted on the website or memo sample unless otherwise instructed on the order.

Directional fabrics, such as stripes, patterns, and plaids, may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return.

Fabric that requires non-stock special treatments such as flame proofing, anti-microbial treatment, electrical conductive backing, water repellent, stain repellent, or acrylic backing are not part of this program. Such orders should be specified as a COM.

Alliance graded pricing includes the cost of the material. Repeat is also accounted for and no additional upcharge is required.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

IMPORTANT: The information provided in this section of the price list is the most current information available at the time this price list was published. Contact Customer Service before finalizing any orders to check availability.

Lead Time:

Lead times for alliance fabrics are based on supplier availability. Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply. Contact Customer Service for availability before finalizing orders.

TB133:

Contact Customer Service about TB133 requirements.
Note: Many of these fabrics may pass additional flammability tests. Please inquire about compliance with specific regulations.

Samples:

For memo samples, contact our alliance partners directly.

How to Specify

① Follow the “How to Specify” steps listed on the alliance upholstery pricing page within each section.
② For the “upholstery grade” step, add the appropriate three-letter supplier prefix to the fabric grade:
ARC[grade] = Arc Com
CAR[grade] = Carnegie
CFS[grade] = CF Stinson
KNL[grade] = KnollTextiles
MHM[grade] = Maharam
MAF[grade] = Mayer Fabrics
MOM[grade] = Momentum
ULT[grade] = Ultrafabrics
③ For the “upholstery designator” use the designator for the pattern/color:

Example:

①	②	③	④
K46CC	**CARJ**	6136_10	STD

⑤

Kimball® Office

Alliance Program Fabric

Matrix

Applicability by Seating Line

Kimball Office has listed general applicability guidelines for each seating frame due to application constraints or aesthetic concerns in the matrix at right.

Appearance guidelines indicate characteristics that may be apparent when certain types of fabrics are applied; these are not restrictions, but are intended to educate customers on the potential appearance of their product. Guidelines 1 through 4 are explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

Restrictions indicate types of fabrics that cannot be used on the indicated seating line. Fabrics associated with guidelines 5 and 6 prevent us from upholstering them on the applicable chair series.
Note: Specific seating and fabric combinations that are not possible are noted for applicable graded-in Alliance fabrics on the following pages.

IMPORTANT: These guidelines do not constitute any responsibility nor any warranty on the part of Kimball Office as to appearance, behavior, or durability of a material.

	Appearance Guidelines				Restrictions

Key:
- • = Guideline or restriction applies to seating line.

Appearance Guidelines:

1 Thick or stiff textiles may result in gathers and puckers around corners, contours and certain seams.
2 Matched directional textiles, such as stripes, plaids, and patterns, may not align properly (e.g., decorative stitching, tufting, buttons, seams, seat-to-back match, etc.)
3 Textiles with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
4 Mohair, velvet, and chenille may be easily bruised or have the potential for crooked seams due to the heavy nap and flip.

Restrictions:

5 Textiles that are not approved for glue application cannot be used. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing, or glue bleeding through the fabric.
6 Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.

COM and COL

Process Overview

Applicability	➤See page 307
Additional Information	308
Yardage Requirements	309
TB133 on COM/COL	319

Kimball Office will upholster its products in fabric or leather supplied by the customer whenever possible.

IMPORTANT: Before placing an order utilizing COM or COL, please read all the information in this section. Orders for COM or COL are not subject to return.

Step ①

Review applicability guidelines and restrictions for the seating frame.
➤See page 307.

Step ②

Send a sample to Kimball Office for approval. Sample should be no smaller than 5" x 7" for fabric or 4" x 4" for leather. Include a list of model numbers on which you wish to use the COM. Reference “application approval” and send to:

Kimball Office
Attn: COM Administration
1600 Royal Street
Jasper, IN 47549

Kimball Office will advise of approval or disapproval. Approval signifies only that such fabric or leather can be applied to the products for which intended. Such approval does not constitute any responsibility nor any warranty on the part of Kimball Office as to appearance, behavior, or durability of the fabric or leather.

Step ③

Verify yardage requirements.
➤See page 309.

Step ④

Prepare and send your purchase order. Purchase order must include:

- Fabric vendor
- Pattern number and name
- Color number and name
- Application instructions (i.e., direction of pattern) for striped, plaid, patterned, or unusual fabrics and which face to use if fabric is reversible.
  Note: If you do not supply application instructions, Kimball Office will apply the fabric in what it determines to be the best manner, and cannot be held responsible after the upholstery is applied.

Kimball Office will send an acknowledgement of your order with a tentative order ship date and the date by which your COM or COL must be received. If your material is not received by the specified date, your ship date will be reassigned.

Step ⑤

After you receive order acknowledgement from Kimball Office, ship your material to:

Kimball Office
Attn: COM Department
340 East 11th Avenue
Jasper, IN 47549-1001

Please include:

- Dealer name and p.o. number
- Kimball Office seating model number
- Quantity of chairs
- Kimball Office acknowledgement number

Key:

- • = Guideline or restriction applies to seating line.

Appearance Guidelines:

1 Thick or stiff textiles may result in gathers and puckers around corners, contours and certain seams.

2 Matched directional textiles, such as stripes, plaids, and patterns, may not align properly (e.g., decorative stitching, tufting, buttons, seams, seat-to-back match, etc.)

3 Textiles with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.

4 Mohair, velvet, and chenille may be easily bruised or have the potential for crooked seams due to the heavy nap and flip.

Restrictions:

5 Textiles that are not approved for glue application cannot be used. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing, or glue bleeding through the fabric.

6 Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.

Overview	➤See page 306
Applicability	307
Yardage Requirements	309
TB133 on COM/COL	319

Fabric Characteristics:

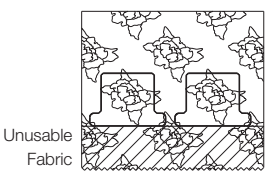
Kimball Office inspects fabrics for mill imperfections, but some are difficult to recognize. Kimball Office is solely responsible for seating workmanship and cannot assume responsibility or liability for the durability, tailoring appearance or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

Directional upholstery, such as stripes, patterns, and plaids may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return. If in doubt about an upholstery application, please contact Customer Service prior to placing the order.

Decorative Fabric Patterns:

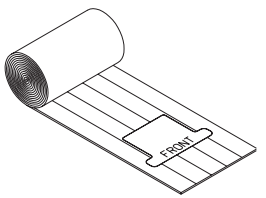
Yardage requirements are greatly affected by not only the size of repeats, but also by the print or pattern. Kimball Office cuts all seating patterns with aesthetic concerns in mind for high quality and consistency.
➤Refer to appropriate column in the COM yardage table on page 309.



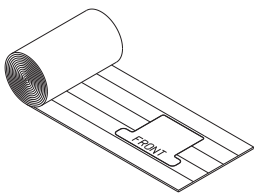
The illustration above depicts two seat cushions in the proper placement on a piece of decorative fabric. Please note the unusable fabric. It is not always appropriate to place a seat pattern at the edge of the fabric. Due to this circumstance, please include an additional one-half yard per order.
Note: If repeats are not to be matched, please contact Customer Service.

Directional Fabrics:

Some COM fabrics are considered directional that may not be considered directional by the fabric supplier due to the upholstering process used by Kimball Office.



"Up the Roll"



"Railroaded"

Application of COM fabrics—"up the roll" or "railroaded"—will be as depicted on the swatch card or website. If a different application is desired, the pattern must be custom quoted.
➤Please contact ***By Design***.

Customer's Own Leather:

Customer's own leather yardage (size) requirements for Kimball Office seating are based on an average hide size of 45–50 sq. feet. Consult Customer Service for requirements for other hide sizes.

The shape of a hide and the usable, clean square footage may make it necessary for us to request more leather after COL is received.

Calf hides must be at least 30 square feet of clean, usable, matching hides. When specifying calf hides, add 15% to COL requirements.
➤See page 309 for COL requirements.

Leather is a natural product and variation in texture is a pleasing quality belonging exclusively to high grade, full top grain leathers.

Flammability Compliance:

Kimball Office assumes no responsibility for the flame retardancy of any COM/COL. Customers are solely responsible for making sure that COM/COL complies with all applicable codes and regulations.

When COM/COL products must meet specific requirements, Kimball Office will require the customer to supply documentation that the material meets the code requirements.

Kimball strives to create upholstered products with no added fire retardant chemicals. Written confirmation is required from the fabric or leather manufacturer stating that the COM/COL provided does not contain any fire retardant chemicals. Without adequate confirmation from the manufacturer, Kimball Office will continue to apply these approved materials, but will consider the COM/COL as containing fire retardant chemicals, and will label as such.

COM/COL Storage:

Kimball Office will store excess COM/COL for 6 weeks after completion of order. Unallocated COM fabric will be stored for three months.

Kimball Office must be advised if COM is to be retained longer than three months for a future order or if it is to be returned.

Overview ➤See page 306
Applicability 307
Additional Information 308
TB133 on COM/COL 319

Kimball Office has analyzed each model to most accurately reflect the yardage requirements. The yardage requirement for each model is based on 54"W fabric and cutting the fabric up the roll.

For widths other than 54", increase the yardage requirement by the factors below:

Fabric width	*Increase yardage*
50"–53"	15%
48"–49"	30%
45"–47"	45%

Larger Orders:

When ordering 10 or more chairs in the same COM, yardage requirements may be reduced.
➤Contact Customer Service.

Railroad Application:

If COM fabric is to be "railroaded," contact Customer Service for yardage requirements.

Large Repeats:

For repeats larger than 18", we suggest a swatch with one full repeat be sent for yardage requirement assessment:
Kimball Office
Attn: COM Dept.
340 East 11th Avenue
Jasper, IN 47549-1001
Please note the model number and number of chairs.

How to Use this Table

① Locate the model number
② Select yardage from the appropriate column for non-directional or repeat. For fabrics with nap, use the 1"–4" repeat column.

TB133 Process

for COM, COL, and Alliance Program Upholstery

Overview	➤See page 290
Alliance Program	303
COM and COL	306
TB133 Inquiry Form	320

Kimball Office provides TB133 testing services for COM (Customers Own Material), COL (Customers Own Leather), and Alliance Program upholstery orders. We require that COM, COL, or Alliance Program upholstery first be evaluated for application approval, then for TB133 approval.

California Technical Bulletin No. 133—Flammability Test Procedure for Seating Furniture for Use in Public Occupancies—provides guidelines for a full-scale, composite burn test. To obtain TB133 certification, a specific model/upholstery combination must be subjected to and pass TB133 testing.

IMPORTANT: The CAL TB133 Seating Fabric Inquiry Form must be submitted prior to order entry for all seating with COM, COL, or Alliance Program upholstery specified to meet TB133.
➤See page 320.

The Process:

① If specifying Alliance Program upholstery for TB133, contact Customer Service to receive a custom quote for your seating order.

② Complete the CAL TB133 Seating Fabric Inquiry Form and submit it to Customer Service.

③ Kimball Office will determine:
- If the fabric is similar in content to a previously approved fabric for the chair model;
- If additional testing is required because no similar test documentation was found for the model/upholstery combination; or
- If the combination will not meet TB133 requirements, based on previous testing.

④ If a burn test is required, pricing for the testing will be as follows:
- $1300 (list, including shipping) for testing services; plus the
- Chair price (test sample)

Note: COM price is invoiced at Kimball Office Upholstery price grade 1, plus the cost of the COM; COL is invoiced at price grade 3 plus the cost of the leather. All Alliance Program upholstery orders must be custom quoted.

⑤ If the model/upholstery combination passes testing, you will receive proof of TB133 certification, at which time you may place your seating order.

NOTE: California Technical Bulletin No. TB133 is a full scale burn test. Kimball Office will provide TB133 testing services for COM (Customer's Own Material), COL (Customer's Own Leather) or Alliance Partner pattern orders. TB133 Certification is based on actual testing. Approval can also be determined by similar, previously tested fabrics on similar chair models by experts familiar with TB133 testing. As there are a wide array of materials and chair models it is inconceivable to test all possible material and model combinations. All COM, COL and Alliance patterns must first be evaluated for application approval, then for TB133 approval.

COM APPROVAL INFORMATION

☐ Fabric is similar in content to a previously approved fabric for this chair model and will not require a full scale burn test. Letter of Assurance is available upon request.

☐ Additional testing will be required because no similar test documentation was found for this content/model. To proceed with TB133 testing, please submit a purchase order and yardage needed for a specific model. Certification Letter is available upon request.

☐ Based on previously tested models, this will not meet TB133 requirements.

Lounge

➤See page 327 to specify.

Height	38"
Width at top	29"
Width at bottom	38"
Depth	39½"

Headrest

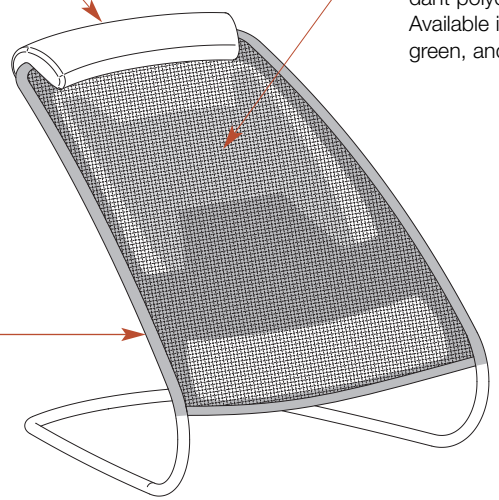
➤See page 327 to specify.

Height	4½"
Width	25¼"
Depth	7½"

Lounge Seating

Fabric-covered headrest, specified separately, is made of CFC- and CHC-free molded foam, covered in 69% Trevira CS (flame-retardant polyester) and 31% Lycra.

Frame is $1^{3}/_{16}$" tubular steel, powder-coated and painted to match mesh seat.



Seat is made of 3D fabric with open mesh structure and various fabric zones of 81% Trevira CS (flame-retardant polyester) and 19% Lycra. Available in four colors: black, red, green, and grey

Details

Lounge ships knocked down in two pieces.

Black felt glides are available on side chairs that will be used on hard floors. Upcharge applies.

User rated up to 285 lbs.

Cleaning

Cleaning Code WS

- Use water-based cleaning agents or foam. Mild water-free solvents may also be used.
- Cleaning by a professional furniture service is recommended.

Seat height	18³⁄₁₆"–22⁷⁄₁₆"

Note: Chairs are shipped with the column set at a mid-point between the lowest and highest positions.

Desk and Side Chairs

Overview

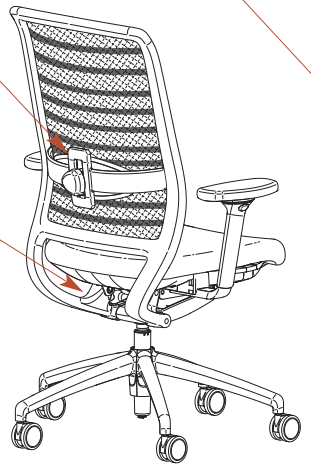
Statement of Line ➤See page 329
Finishes & Materials 341
COM/COL Process 346

Mesh-back models incorporate a ribbed design perfectly proportioned to give ergonomically correct, flexible support in all upright or reclined positions. Available in three colors. The mesh is secured to a structural, black plastic frame made of glass- filled polypropylene.

Seat height adjusts from 16 1/4" to 22 7/16" via a patented twist/threaded column adjustment feature and pneumatic (gas) cylinder.

Adjustable lumbar support for mesh-back desk chairs utilizes a molded polyurethane pad, allowing 2" height and 1" depth adjustments.

Autofit synchro mechanism with automatic weight regulation and fine adjustment is standard. 126° maximum opening angle between seat and back; can be locked in four positions.



T-shaped arm rests are standard with 2D adjustability. User can adjust the arm vertically within a 4" range (11 positions); technician can adjust the arm horizontally within a 1 3/4" range (unlimited positions). Arm caps are black polyurethane.

Seat cushions are 2 1/8" thick—1 3/4" CFC- and CHC-free molded foam, plus 3/8" Dacron top pad.

Fabric or leather upholstery is unglued, ensuring optimal air movement.

Five-star base is available in glass-filled nylon black plastic or cast aluminum in three finish options.

Black, dual-wheel casters on desk chairs are 65mm in diameter and available in hard and soft options. Specify hard casters (802) for chairs that will be used on carpeted floors. Specify soft casters (801) for chairs that will be used on hard floors.

Details

Upholstered-back models features a three-piece assembly—a visible, black plastic/polypropylene back with 3/4" CFC- and CHC-free molded foam covered in specified upholstery. The fabric back assembly is then secured to a structural frame made of glass-filled polypropylene.

Adjustable lumbar support for upholstered-back desk chairs utilizes air-pressure technology. Height is adjustable within a 2 1/2" range.

4-D arm option enables the user to make front-to-back adjustment within a 2" range (7 positions) and 360° pivot (10 positions). Includes the same adjustment features as 2-D arms, as well.

Side chairs feature a 7/8" tubular steel frame. Mesh-back construction is the same as desk chair. Seat cushions are 1 9/16" CFC- and CHC-free molded foam. Stackable up to 4 high.

Desk and side chairs are user rated up to 275 lbs.

Adjustability Features

Desk Chairs

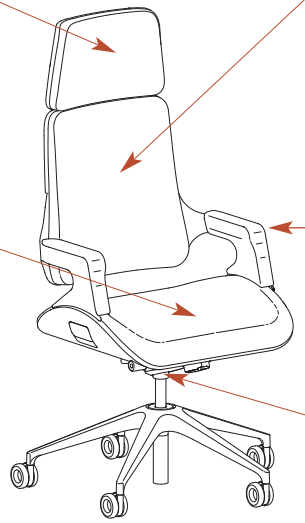
Overview

Statement of Line ➤See page 333
Finishes & Materials 341
COM/COL Process 346

Integrated headrest on high-back model is upholstered to match back and seat.

Seat cushions are 2 3/4" thick, 2 3/8" CFC- and CHC-free molded foam, plus 3/8" Dacron top pad applied over a 1/8"-thick ABS panel.

Fabric or leather upholstery is unglued, ensuring optimal air movement.



Back cushions are 2" thick, 1 5/8" CFC- and CHC-free molded foam, plus 3/8" cotton top pad applied over a 1/8"-thick ABS panel.

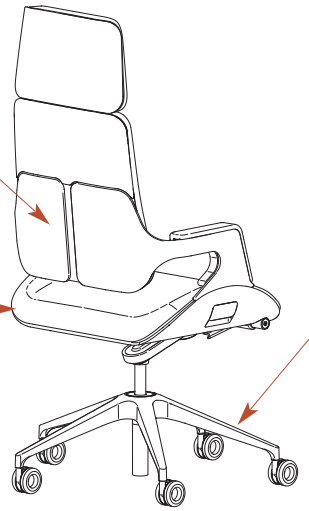
Arm rest cushions are 1 3/16"- thick, CFC- and CHC-free molded foam, applied over a 1/8"-thick ABS panel.

Fold-out crank on the underside of the seat allows the chair's function to be matched specifically to its user's body weight.

Patented synchronous mechanism on desk chairs combines the backward motion of the backrest with balanced inclination of the seat, providing optimum support for the body in any position. 116° maximum opening angle between seat and back, with infinitely lockable positions. Anti-kick back feature controls forward movement of the back rest when the lock is disengaged.

Contoured shell is die cast aluminum and available in white or brushed finish.

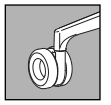
Seat height adjusts from 16 1/2"–20 13/16" via a pneumatic (gas) cylinder.



Five-star cast aluminum base is available in three finishes.

Casters feature a static discharge function and are hermetically sealed to keep bearings free of dirt and dust.

Details



Dual-wheel casters on desk chairs are 65mm in diameter and available in hard and soft options. Hard casters are light grey; soft casters are dark grey. Specify hard casters (804) for chairs that will be used on carpeted floors. Specify soft casters (803) for chairs that will be used on hard floors.

Desk chairs are user rated up to 275 lbs.

Adjustability Features

Synchro-tilt	•
Pneumatic height	•
Swivel	•
Tilt tension	•
Back tilt lock	•

• = standard ○ = option

Synchro-tilt control provides fully synchronized seat-to-back movement, plus:

- Free-float movement allows user to lock the chair in one of multiple positions within the range of movement using a single lever.
- Anti-kickback clutch controls forward movement of backrest when the lock is disengaged.
- Reclining tension adjustment is user friendly and accommodates a wide range of weights via a single lever on the left side of the chair (as seated).

Tilt tension control adjusts the amount of resistance the user feels when leaning back.

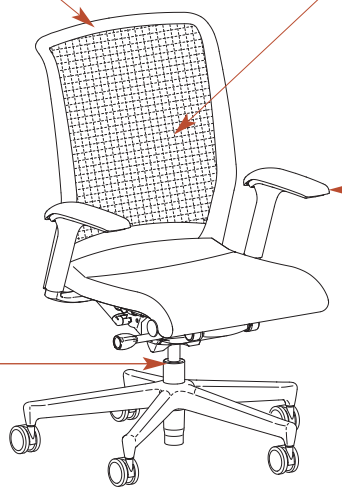
Overview

Statement of Line ➤See page 337
Finishes & Materials 341
COM/COL Process 346

Mesh-back, on applicable models, is available in two patterns. The mesh is stretched over a cast aluminum frame.

Seat height adjusts from 17½"–21⅞" via a pneumatic (gas) cylinder.



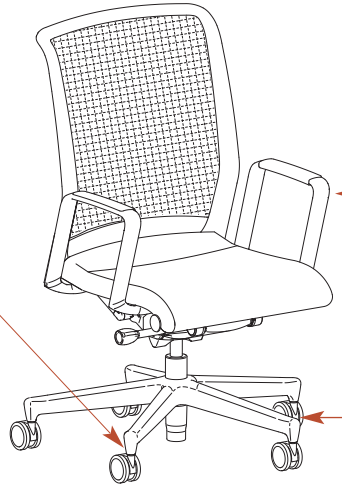
Seat cushions are 1¾"-thick—1⅜" CFC- and CHC-free molded foam, plus ⅜" Dacron top pad.

Fabric or leather upholstery is unglued, ensuring optimal air movement.

Adjustable arms are standard with 2D adjustability. User can adjust the arm vertically within a 3⅛" range (6 positions); technician can adjust the arm horizontally within a 1½" range (unlimited positions).

Arm caps on adjustable arm models are black plastic. Leather arm caps are available; upcharge applies.

Black, dual-wheel casters on desk chairs are 65mm in diameter and available in hard and soft options. Specify hard casters (800) for chairs that will be used on carpeted floors. Specify soft casters (801) for chairs that will be used on hard floors.



Loop arms models feature soft leather arm caps. Arm finish matches the finish specified for the frame/base.

Aluminum frame and base is available in three finishes.

Details

Two arm styles are available on Xantos desk chairs:
- Adjustable
- Loop

Optional, adjustable lumbar support for desk chairs utilizes air-pressure technology. Height is adjustable within a 2½" range.

Side chairs feature a ⅞" tubular steel cantilever-style frame; Back and seat constructions are consistent with mesh-back desk chairs. Stackable up to 4 high for models with plastic arm caps; 2 high for leather arm cap models.

Desk and side chairs are user rated up to 275 lbs.

Adjustability Features

Synchro-tilt	•
Pneumatic height	•
Swivel	•
Tilt tension	•
Lumbar	○
Seat depth	○
Back tilt lock	•
2-D arms on adjustable arm models	•

• = standard ○ = option

Active seat depth adjustment option provides user with more resting surface for their thighs; 1½" adjustment range.

Synchro-tilt mechanism provides synchronized seat-to-back movement with a 2:1 ratio, every 2 degrees the back moves the seat angle changes 1 degree. 126° maximum opening angle between seat and back.

Free-float movement allows user to lock the chair in multiple positions.

Anti-kickback feature controls forward movement of backrest when the lock is disengaged.

Reclining tension adjustment accommodates a wide range of weight.

Finishes & Materials

Samples:

Swatch cards and memo samples of Kimball Office fabrics are available upon request. There may be slight differences between samples and actual yardage as a result of variations in dye lots.

To order swatches:

- Visit our web site at **www.kimballoffice.com** to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom

Discontinuation Policy:

Kimball Office strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

Disclaimer:

Kimball Office will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

Characteristics:

- Certain fabrics may relax over time (e.g., some woven fabrics) creating a loosely upholstered appearance.
- Some fabrics may wrinkle, pill, fuzz, or puddle as a normal, inherent characteristic. This does not indicate that the covering or application is deficient.
- Fabrics are cut to provide the best match possible when transitioning from piece to piece.
- Fabrics reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all fabrics and is not considered a defect; it is more easily recognized on fabrics with a nap or shimmer and more apparent on crescent or corner units.
- Kimball Office will always ship a satisfactory commercial match. Because of industry dye-lot variation, colors may not match exactly.
- Fabrics are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).

Cleaning Codes:

Cleaning Code S
- Use only mild, pure water-free cleaning solvents.
- Cleaning by a professional furniture service is recommended.

Cleaning Code WS
- Use water-based cleaning agents or foam. Mild water-free solvents may also be used.
- Cleaning by a professional furniture service is recommended.

Cleaning Code W
- Use water-based cleaning agents or foam.

Cleaning Code D
- Dry clean only.

Key:
• = Complies with standard

Contrasting Upholstery:

Contrasting upholstery is defined by entire back and seat upholstery application. Contrasting upholstery is available on the following seating series:
• Hero. Just for You.
• Xantos

How to Specify

① Follow the How to Specify steps on the appropriate pricing pages for the seating model, indicating the contrasting fabric information in the order outlined.

Note: The best way to price a seating product with contrasting upholstery is by using an electronic specification tool. If one is not available, you may contact Customer Service.

Advisory:

Purchaser must consult local fire and code official to determine the suitability of product being selected for any particular application. Certain jurisdictions may require the use of additional fire retardants of composite flammability testing. Kimball Office assumes no responsibility for composite testing or for compliance with any particular code or other flammability standards different than as contained in applicable catalog information unless such requirements are specified in writing by purchaser to Kimball Office prior to confirmation of order. Cost of additional flammability treatments or testing needs of purchaser shall be borne by purchaser.

TB117:

California Flammability Regulation #117 is a set of minimum allowable standards of flammability to which all upholstered furniture sold in the State of California must comply. It relates primarily to fabric coverings and resilient fillings. All shipments of Kimball Office upholstery comply with Regulation #117 and our invoices and law labels for such goods bear certification that our upholstered products comply.

UFAC:

All Kimball Office seating is made in accordance with the Upholstered Furniture Action Council (UFAC) criteria to reduce chance of ignition by burning cigarettes.

TB133 Factor:

TB133 factor is a full-scale fire test for furniture manufactured for public use in which an entire piece of furniture is tested as a unit. Kimball Office offers a wide variety of seating products that can be manufactured to meet TB133

Standard Regulation Testing by Upholstery Pattern:

Pattern	*California TB117 (Section E)*	*UFAC Classification 1 or A*
Aquarius	•	•
Divina Melange	•	•
King	•	•
Lucia	•	•
Magic	•	•
Remix	•	•

Paints & Non-Paint ➤See page 342
Cleaning Codes 344
Contrasting Upholstery 345
Application Test Form 347

Kimball Office will upholster its products in materials supplied by the customer whenever possible. Before ordering COM/COL, please read all the information in this section.

Application Approval:

Kimball Office requires that a sample (2 yards of fabric or 22 sq. ft. of leather) be submitted along with a purchase order for testing and a COM/COL Application Test Form prior to an order being placed.
➤See page 347 for Test Request Form.

Kimball Office approval signifies only that such materials can be applied to the products for which it was tested. Such approval does not constitute any responsibility nor any warranty on the part of Kimball Office as to appearance, behavior, or durability of the material.

Fabric Characteristics:

Kimball Office inspects fabrics for mill imperfections, but some are difficult to recognize. Kimball Office is solely responsible for seating workmanship and cannot assume responsibility or liability for the durability, tailoring appearance or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Different fabrics and seating constructions will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

Directional upholstery, such as stripes, patterns, and plaids may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return. If in doubt about an upholstery application, please contact Customer Service prior to placing the order.

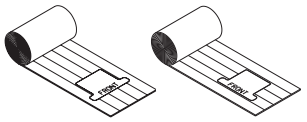
Kimball Office will apply the fabric as indicated on the Application Test Request Form, and cannot be held responsible after the upholstery is applied.

Decorative Patterns:

Yardage requirements are greatly affected by not only the size of repeats, but also by the print or pattern. Kimball Office cuts all seating patterns with aesthetic concerns in mind for high quality and consistency, unless directed otherwise on the Application Test Request Form

Directional Fabrics:

Some COM fabrics are considered directional that may not be considered directional by the fabric supplier due to the upholstering process used by Kimball Office.



Cut “Up the Roll” Railroaded

Application of COM fabrics—”up the roll” or “railroaded”—will be as depicted on the swatch card or website. If a different application is desired, the pattern must be custom quoted.
➤Please contact ***By Design***.

Flammability Compliance:

Kimball Office assumes no responsibility for the flame retardancy of any COM/COL. Customers are solely responsible for making sure that COM/COL complies with all applicable codes and regulations.

When COM/COL products must meet specific requirements, Kimball Office will require the customer to supply documentation that the material meets the code requirements.

Kimball strives to create upholstered products with no added fire retardant chemicals. Written confirmation is required from the fabric or leather manufacturer stating that the COM/COL provided does not contain any fire retardant chemicals. Without adequate confirmation from the manufacturer, Kimball Office will continue to apply these approved materials, but will consider the COM/COL as containing fire retardant chemicals, and will label as such.

Customer’s Own Leather:

Kimball Office is pleased to cooperate with COL selections whenever possible.

Leather is a natural product and variation in texture is a pleasing quality belonging exclusively to high grade, full top grain leathers.

Size requirements are based on usable sq, footage. The shape of a hide and the usable, clean footage may make it necessary for us to request more leather after COL is received.

Calf hides must be at least 30 square feet of clean, usable, matching hides. When specifying calf hides, add 15% to COL requirements.

Storage:

Kimball Office will not store excess COM/COL after completion of order.

How to Order

① Request application testing.
➤See form and specific instructions on page 347.
② You will receive notification of approval or disapproval via e-mail.
③ Submit your purchase order.
Note: Order will be acknowledged with a tentative ship date and notification of the date COM/COL must be received. If not received by that date, your ship date will be reassigned.
④ After order acknowledgement is received, ship fabric or leather “DDP” (delivered duty paid) to:
Interstuhl Büromöbel GmbH & Co. KG
Brühlstrasse 21
Wareneingang Textil—Rampe 1
D-72469 Messstetten–Tieringen
Germany
Attn: COM/COL Application Test Department

Include:
- Dealer name
- Purchase order number
- Kimball Office seating model number(s)
- Quantity of chairs
- Kimball Office acknowledgement number

IMPORTANT: Due to specific international shipping requirements, it is recommended that COM/COL be shipped directly from the mill.

How to Apply for Testing

① Complete an Application Test Request Form for each unique COM/COL pattern and color.

② Prepare Purchase Order for application testing, listing test model **INTAPPLTEST** (one for each application test requested). Each chair model and unique fabric combination is considered a separate test and will be billed at $50 net per test.

③ Ship:

- 2 yards of fabric or 22 square feet of leather for each chair model to be tested
- Application Test Request Form(s)
- Purchase Order

to:
Kimball Office
Attn: COM Administration
1600 Royal Street
Jasper, IN 47546

Note: Dealer is responsible for accuracy of information. If the chair model you desire changes after testing/approval, a new test must be completed.

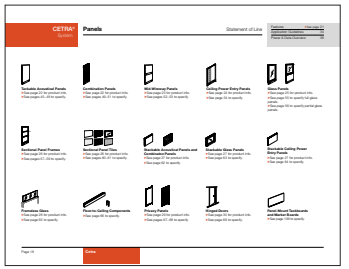
How to Use this Price List

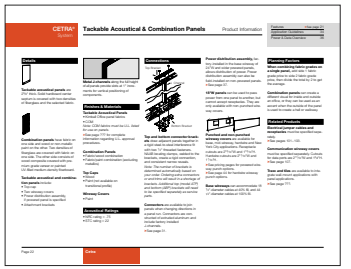
Product Positioning	➤See page 5
Product Integration	12
Sustainability	15
Finishes & Materials	575

Kimball Office has made every effort to make this price list accurate and complete with all of the information you need to specify our products.

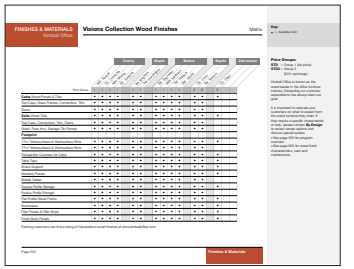
We suggest that you become familiar with the format of this price list. You'll find information about the product line, planning guidelines, pricing, and how to specify the product.



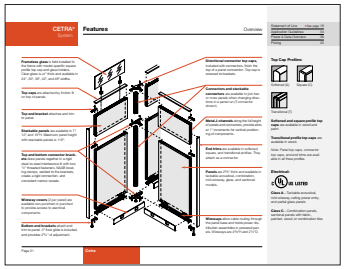
Statement of Line provides a snapshot of the entire product line. We've included an illustration and page cross references to the applicable pricing and how to specify pages.



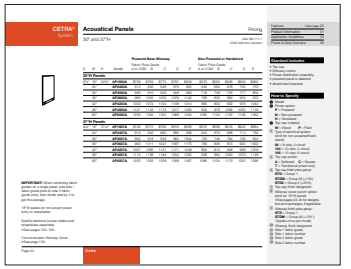
Product Information pages provide detailed information about the product, connections that can be made with other models, and planning factors, and applications guidelines.



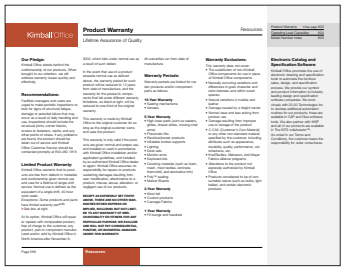
Look in the Finishes and Materials section to see what materials and finishes are available. Matrices for wood finishes, laminate, paint, fabrics, and other surface materials offer a quick reference by product.



Overviews offer a quick look at the distinguishing features of the product line.



Pricing pages list each model individually along with its list prices. How to Specify steps instruct you how to build a complete model that includes all of its options and materials.



Use the Resources in the back of the price list. This repository of useful information includes Terms and Conditions, Warranty, Operating Load Capacities. You'll also find a model number index with references to the appropriate pricing page.

Dimensions provided in this price list are nominal. Products are manufactured to meet standard industry tolerances.

Illustrations and specifications contained in this price list are based on the latest product information at time of publication. Kimball Office reserves the right to make changes at any time without notice.

Items listed herein are considered by Kimball Office as portable furniture and as such are subject to local fire, electrical, and building codes applicable to portable furniture.

Only Underwriters' Laboratory (U.L.) listed electrical components are used in electrical devices and are so labeled.

The customer is responsible for the proper application of products to the local codes under which installation must be made. Further specifications are available on request.

c UL US LISTED

Product Positioning	➤See page 5
Product Integration	12
Sustainability	15
Finishes & Materials	575

Complete specifications are built by following a set of steps. These "How to Specify" steps are located in the far right column of each pricing page and are specific to the models found on that page. These steps will guide you in the proper order to specify the base model, materials, finishes, options, etc.

Base model numbers may be comprised of two or more steps. For concise presentation, some models numbers have been truncated within the pricing table.

- The steps numbered using a solid circle with a white number inside (e.g., ❶, ❷, or ❸) make up of the base model number.
- Steps numbered using an outlined circle with black number inside (e.g., ④, ⑦, or ⑨) are required to complete the specification.

Kimball Office promotes the use of electronic drawing and specification tools to automate the furniture sales, design, and specification process. We provide our symbol and product information to industry leading design and specification software companies. We work closely with 20-20 Technologies Inc. to develop additional automation routines for our products; these are available in CAP and Giza software tools. We also partner with KISP and all of our products are available in The KITS *collaborator*™. As noted in our Terms and Conditions, the customer bears the responsibility for order correctness.

Features ➤See page 20
Product Information 21
Application Guidelines 34
Power & Data Overview 36

Standard Includes
- Top cap
- Wireway covers
- Power distribution assembly, if powered panel is selected
- Attachment brackets

How to Specify
❶ Model
❷ Power option:
P = Powered
N = Non-powered
H = Hardwired
❸ Top cap material:
W = Wood **P** = Paint
④ Type of electrical system (omit for non-powered/hard-wired):
84 = 8-wire, 4-circuit
104 = 10-wire, 4-circuit
106 = 10-wire, 6-circuit
⑤ Top cap profile:
A = Softened **C** = Square
T = Transitional (wood only)
⑥ Top cap finish price group:
STD = Group 1
STDM = Group M (+10%)
STD2 = Group 2 (+20%)
⑦ Top cap finish designator
⑧ Wireway cover punch option (omit for 18"W panel):
➤See pages 43–44 for designators and upcharges, if applicable.
⑨ Wireway finish price group:
STD = Group 1
STDM = Group M (+10%*)
*Applies once per model.
⑩ Wireway finish designator
⑪ Side 1 fabric grade
⑫ Side 1 fabric number
⑬ Side 2 fabric grade
⑭ Side 2 fabric number

Refer to the "standard includes" list to see what ships standard as part of the base model.

Follow these steps to build a complete model specification.

Options that incur an upcharge or decrease the base price are noted within the "How to Specify" steps.

Sample Specification:

The example below shows a complete model number for an **Cetra panel.**
➤See page 45 for the corresponding pricing table and How to Specify steps.

Finishes & Materials 575

Kwik Office systems are available to ship within ten (10) business days upon receipt of a credit-approved order.

Specific models and options from the following lines are available:
- Interworks EQ
- Traxx and Tiles
- Footprint
- Task Lights

The Kwik Office program is designed to provide the flexibility required to meet the immediate needs of our customers. Kwik Office offers a large selection of Kimball Office product in an extensive finish offering.

The Kwik Office Price List is the most complete reference for Systems, Casegoods, Tables, Metal Filing, and Seating products. Although we indicate which models are available, please use the Kwik Office Price List to specify.

Model Numbers:

Models and finishes that are available on Kwik Office have been marked with a K icon in this price list.

Kwik Office model numbers are different from standard model numbers. Base model numbers for Kwik Office products include all options and finish designators.

The K icon on standard lead-time pricing pages indicates availability; it does not provide the correct model numbers and option designators for specifying. You must use the complete model numbers listed in the Kwik Office Price List.

Include only Kwik Office models on your order. Any orders containing non-Kwik Office products will be treated as such and entered at standard lead times. Indicate clearly at the top of your order “Kwik Office.”

Changes and Cancellations:

No changes or cancellations will be accepted after order entry for Kwik Office products.

Order Size:

The Kwik Office program has a limited weekly volume capacity, with orders being entered on a first come, first served basis. Contact Customer Service for availability.

The information at right is provided to assist customers in gaining a general understanding of product compatibility.

Several additional resources are available to further explore specific compatibility issues including:

- Your Kimball Office Sales Person
- Kimball Office Divisional Specification Analysts
- Your Kimball Office Customer Service Team

Customers are encouraged to verify the application via specifying tips in the price list prior to placing an order to ensure the best results.

Cetra	Xsite	Interworks EQ
Overview		
Elegant and refined, Cetra offers a solid sense of permanence in the open plan. Cetra's mixture of materials and warm woods not only presents an elegant image, but also combines to make Cetra one of the strongest and most durable panel systems in the industry, increasing the value of our customer's investment. Particularly popular in financial and law offices as well as customer interface areas, Cetra is perfect for areas where making an impression counts.	A "frame and tile" system, Xsite is an innovative, next-generation approach to the open plan. Xsite's off-modular placement of components helps optimize space utilization. In addition, Xsite's aesthetic appeal—with eight-foot wide tiles, nearly seamless tile integration, and a wide range of options—makes it one of the most beautiful systems in the industry.	Easy to specify, quick to install and simple to reconfigure, Interworks EQ is perfect for creating straightforward, highly productive workspaces. Integral top cable lay-in lets you route all the data cables you need, with easy access for quick changes. Slim and clean, Interworks EQ works for you.
Ability to Change Appearance		
Use of sectional panels provides flexibility. Many appearances can be created with broad selection of panel types.	Key benefit. Total flexibility from one panel side to the other, including segmented on one side and monolithic on the other, allows for creating different appearances.	Use of sectional panels provides flexibility
Stacking as an option within application requirements. Hi-lo requires specific connectors.	Stacking as an option within application requirements.	Height changes between panels are simple. Stacking as an option with application requirements.
Panel Thickness		
2⅝" thickness provides solid appearance (electrical and cable routing in panel base or mid-wireway).	3¼" thickness provides substantial wall appearance (space inside panel is used for some inset tiles and for cabling capabilities).	2" thickness minimizes floor space (perimeter channels within panel provide vertical and horizontal routing of cables and electrical).

Interworks EQ 241

Cetra	Xsite	Interworks EQ
Materials/Finishes		
Full offering of Kimball Office paints and wood finishes	Full offering of Kimball Office paints and wood finishes.	Available in select colors.
Steel frame.	Steel frame.	Steel frame.
Trim		
Softened and square top caps in paint or wood. Transitional top caps in wood. Solid wood end trim available in paint or wood finishes. Radius and square vertical corners available in fabric, wood veneer, or paint on aluminum. Wood and painted top caps available at the same price.	Flat or curved profile top caps. Top caps can be specified to span frames up to 8'W for a seamless appearance. End trim is available in flat or curved profiles to match top cap profiles. Vertical trim has a flat profile.	Crowned profile top caps. Full-height end trim provides finished look for end of run. Finish channels for corners (fabric only).
Panel Heights		
8 standard heights (30", 37", 42", 50", 56", 61", 68", 80") and 19 optional heights using 7", 12" and 19" stackable panels in conjunction with the heights above. Floor-to-ceiling top channel provides light and sound seal, but panels do not attach to ceiling. Maximum ceiling height is 118".	7 heights (30", 42", 50", 55", 68", 80", 93"). 80" and 93" achieved by stacking.	7 heights (34", 42", 48", 54", 62", 66", 80").

Positioning of Worksurfaces, Storage and Accessories		
Attached on vertical channels at panel joints.	100% off-module placement of worksurfaces, storage, and accessories exactly where you need them.	Attached on vertical channels at panel joints.
Panel Runs		
28 feet or 7 panels for supported run of panels. The steel-to-steel panel connection allows for fewer wing panels and longer panel runs.	12’ for supported panel run. Welded frames allow for fewer wing panels and longer panel runs.	10 feet or 3 panels for supported run of panels. Wing walls and attachment to worksurfaces important for panel support. Panels come with carpet grippers to help prevent unsupported panels from moving.
Connection Method		
Top and bottom connector brackets bring panels together in a rigid steel-to-steel connection. Brackets are provided.	Welded frames connected by alignment bolts through frame verticals. All necessary hardware is supplied.	Continuous, flexible polypropylene hinge locks panels together through side rails along the full height of the panel. The same piece is used for all connections (2 come with each panel). Alignment clips slip into alignment slots to vertically align panels.

Directional Connectors and Corner Trim		
Directional connectors are structural and required for their specific application. Available in fabric, paint, and wood finishes. End trim is available in paint or wood finishes, and in 3 profiles. 90° available in radius or square profile.	Directional connectors are specific to their application. One piece construction of vertical trim pieces allow for consistent finish from top to bottom. Connectors and end trim are available in paint or wood finishes.	Finish channels are required at change-of-directions to provide proper alignment. Finish channels are fabric with top caps and wireway covers in select colors.
Connections made at 90° and 120° angles.	Connections made at 90° and 120° angles.	Connections made at any angle. *Note: Corner trim available for 90° and 120° angles.*
Wall Attachment		
Easily accomplished by using a “W” wall mount connector (adds 2¾" to dimension) or by using an “M” wall mount connector (adds ⅝"). Shimming may be required with “M” connector. Panel run is attached to the connector.	Adjustable wall channel available to compensate for out-of-plumb wall conditions. Panel run is attached to a wall-mount channel.	Accomplished by attaching panel wall mount to the wall. The panel run is attached using the flexible polymer hinge that connects panels together. Shimming may be required.
Panel-to-Traxx Attachment		
M connectors attach to the wall and are compatible with wall Traxx.	Use off-module frame to attach to Traxx. Panel run is attached using frame-to-frame alignment bolts. Specify tiles, Xsite Traxx, and top caps to span across off-module frame for a seamless appearance.	Traxx panel starter kit (¼") is attached to Traxx on wall. The panel run is attached using the flexible polymer hinge that connects panels together. Very clean connection and allows for future flexibility in placement.
68"H panel is compatible with wall-mounted Traxx and 37"H tiles. 80"H panel is compatible with wall-mounted Traxx and 49"H tiles.	68"H frame is compatible with wall-mounted Traxx and 37"H tiles. 80"H structure is compatible with wall-mounted Traxx and 49"H tiles.	66"H panel is compatible with wall-mounted Traxx and 36"H tiles. 80"H panel is compatible with wall-mounted Traxx and 49"H tiles.

Ease of Laying In Data and Communication Cables		
Cables are routed through base wireway of panel (next to shielded electrical) as standard. Base wireway can accommodate 18 ¼"-diameter cables at 40% fill. Mid-wireway panels allow electrical to be routed in mid-wireway channel and communication cables in the base wireway. Mid-wireway can accommodate 31 ¼"-diameter cables at 40% fill.	Top lay-in is standard below the frame top cap. Top channel can accommodate 36 ¼"-diameter cables at 40% fill. Cables can also be routed inside between the frame and the tiles (similar to building wall construction).	Top lay-in is standard in top of panel. Top channel can accommodate 22 ¼"-diameter cables at 40% fill. Frame of panel allows for vertical routing of individual cables to ports in the base wireway. Base wireway can also accommodate 8 ¼"-diameter cables at 40% fill.
Power and Communications Access for Users		
Power is standard in base wireway. Mid-wireway panels are also available.	Power standard in base wireway. Cabling may be located in base; however, the recommended location is at the top of the frame.	Power is standard in base wireway. Mid-wireway panels are also available.
High-Speed Cable Capability		
Mid-wireway panels provide pathway for electrical wiring to provide separation and allow for increased capacity in the base wireway for high-speed cables.	Top lay-in allowable bend radius and free space within the frame make Xsite very responsive to future high-speed cabling requirements through separation, capacity, and clearance.	Top lay-in and channel around the perimeter of the panel make Interworks EQ very responsive to future high-speed cable requirements through separation, capacity, and clearance.

At Kimball Office, we are proud of our environmental stewardship. We are committed to sustainable business practices and continuous improvement. It's part of our heritage to take initiative, to reduce waste, to conserve energy, to commit fully, and to lead by example. It's not enough to simply sustain. We strive to enhance our world.

Throughout our more than 40 years of documented environmental actions, we've made perpetual progress as a responsible steward of resources and an agent of sustainable change in our industry.

In the end, we're just beginning. Yes, the efforts we've made have the clear intention of minimizing our impacts on the planet in order to preserve a healthy world for future generations. Ultimately, the more we do in the area of sustainability, the more it helps you to achieve your environmental aims. Let us show you just how easy it is with Kimball Office.

➤Find more specific details regarding the environmental aspects of our product offerings at: **www.kimballoffice.com**

ANSI/BIFMA level™
100% of the products manufactured by Kimball Office are level® certified. We offer the most sustainable portfolio in the industry, which includes systems, casegoods, tables, and seating. Our product testing team evaluates all Kimball Office products, ensuring they meet and exceed ANSI/BIFMA Standards. Our team members regularly participate on BIFMA and USGBC committees to contribute to industry-wide standards.

ecoScorecard℠

Through this free online tool, you have quick, simple, 24/7 access to the environmental attributes of our products. By partnering with ecoScorecard, we are enabling speed and accuracy in the calculation of environmental credits, like LEED®, as well as saving you time and ultimately, money.
➤See how easy it is at kimballoffice.ecoscorecard.com.

ecoScorecard contains credit and other information for the following environmental rating systems:
- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

LEED® Certification
Kimball Office offers furniture solutions which may contribute toward achieving U.S. Green Building Council certification status in your facilities. The LEED® Green Building Rating System™ is the nationally accepted benchmark for design, construction, and operation of high performance green buildings. Kimball Office has sought and received LEED certification for several of its facilities across the country.

LEED-CI Gold:
- Jasper, IN showroom
- San Francisco, CA showroom

LEED-CI Silver:
- Atlanta, GA showroom
- Chicago, IL showroom

LEED-CI:
- Corporate Headquarters
- New York, NY showroom
- R&D Team Rooms

SCScertified™ INDOOR AIR QUALITY
Indoor Advantage | Furniture

Indoor Air Quality
One of the largest contributions office furniture can make to a building's LEED certification is indoor air quality via low-emitting products. For certification of our product lines, Kimball Office uses the Indoor Advantage program from Scientific Certification Systems (SCS). Several of our Indoor Advantage Gold products also meet the more stringent CAL 01350 requirements.

Design for the Environment (DfE) is our approach to product development to ensure the inherent sustainability of our new offerings. By considering a full continuum of environmental factors—including durable engineering, recycled and recyclable materials, indoor air quality, packaging, and beyond, we have greatly improved the life cycle performance of our furniture.
➤For environmental data, visit our website at www.kimballoffice.com.

Pura® is our proprietary wood finish that has virtually no volatile organic compounds (VOCs). Pura is a key part of our sustainability story, enabling a broader range of products to meet or exceed indoor air quality standards and help our customers achieve LEED credits.

FSC www.fsc.org FSC® C010590
The mark of responsible forestry

FSC-Certified Wood
Due to our roots in crafting fine wood furniture, we have a natural respect for responsible forestry. Several series in select finishes are available in FSC wood at a 3% upcharge. Applicable models show FSCW as a finish price group designator option. Standard lead times apply to FSC orders.

ANEW

Asset Network for Education Worldwide, Inc. (ANEW) is an easy, effective way to responsibly disposition surplus furniture, fixtures and equipment (FF&E). Through our partnership with this third-party foundation, you can repurpose FF&E to benefit those in need, while diverting materials from landfills. ANEW calls it "Doing what's right with what's left." We call it smart.

Pricing	45

Frameless glass is field installed fo the frame with model-specific square profile top cap and glass holders. Clear glass is ⅜" thick and available in 24", 30", 36", 42", and 48" widths.

Top caps are attached by friction fit on top of panels.

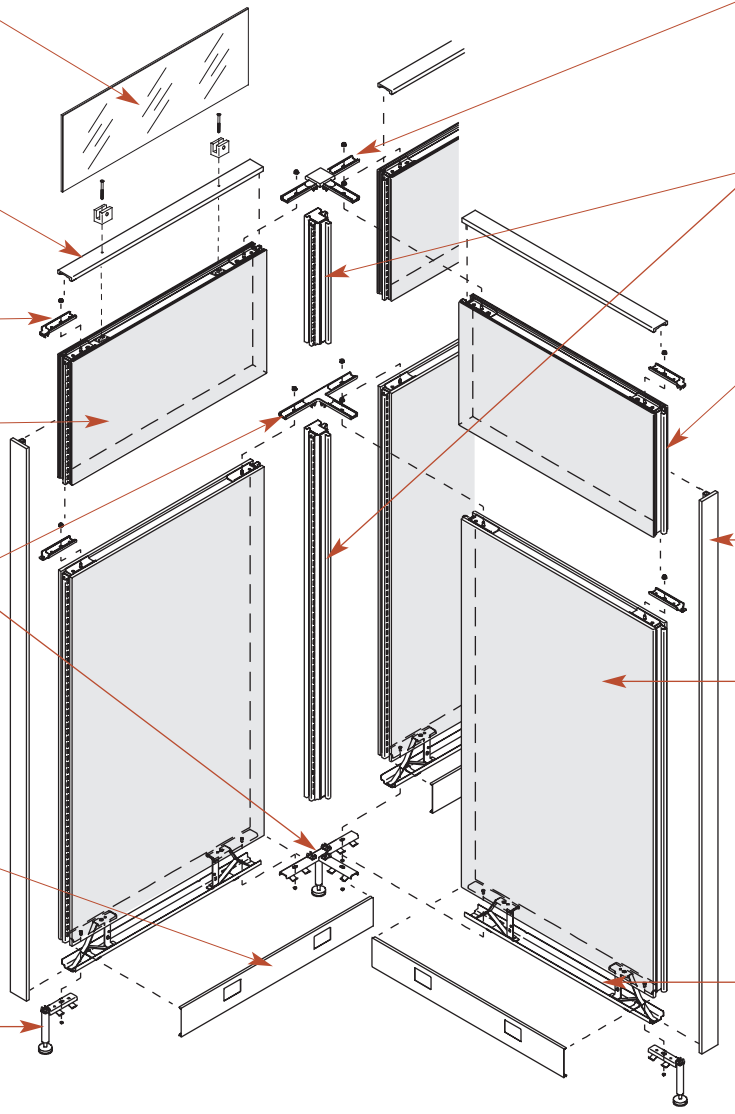
Top end bracket attaches end trim to panel.

Stackable panels are available in 7", 12", and 19"H. Maximum panel height with stackable panels is 118".

Top and bottom connector brackets draw panels together in a rigid steel-to-steel interference fit with two ¼" threaded fasteners. NAAB locating clamps, welded to the brackets, create a rigid connection, and consistent narrow reveals.

Wireway covers (2 per panel) are available non-punched or punched to provide access to electrical components.

Bottom end brackets attach end trim to panel. 3" floor glide is included, and provides 2¾" of adjustment.



Directional connector top caps, included with connectors, finish the top of a panel connection. Top cap is screwed to brackets.

Connectors and stackable connectors are available to join two or more panels when changing directions in a panel run (T-connector shown).

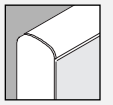
Metal J-channels along the full height of panels and connectors, provide slots at 1" increments for vertical positioning of components.

End trims are available in softened, square, and transitional profiles. They attach as a connector.

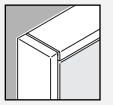
Panels are 2⅝" thick and available in tackable acoustical, combination, mid-wireway, glass, and sectional models.

Wireways allow cable routing through the panel base and holds power distribution assemblies in powered panels. Wireways are 4⅜"H and 2½"D.

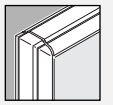
Top Cap Profiles:



Softened (A)



Square (C)



Transitional (T)

Softened and square profile top caps are available in wood and paint.

Transitional profile top caps are available in wood.

Note: Panel top caps, connector top caps, and end trims are available in all three profiles.

Electrical:

c UL US LISTED

Class A—Tackable acoustical, mid-wireway, ceiling power entry, and partial glass panels

Class C—Combination panels, sectional panels with fabric, painted, wood, or combination tiles

Tackable Acoustical & Combination Panels

Features	➤See page 21
Application Guidelines	34
Power & Data Overview	36

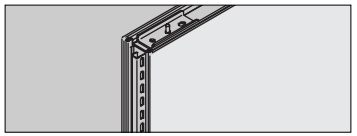
Details

Tackable acoustical panels are 2⅝" thick. Solid hardboard center septum is covered with two densities of fiberglass and the selected fabric.

Combination panels have fabric on one side and wood or non-metallic paint on the other. Two densities of fiberglass are covered with fabric on one side. The other side consists of wood composite covered with premium grade veneer or painted UV-filled medium-density fiberboard.

Tackable acoustical and combination panels include:

- Top cap
- Two wireway covers
- Power distribution assembly, if powered panel is specified
- Attachment brackets



Metal J-channels along the full height of all panels provide slots at 1" increments for vertical positioning of components.

Finishes & Materials

Tackable Acoustical Panels

- Kimball Office panel fabrics
- COM

Note: COM fabrics must be U.L. listed for use on panels.

➤See page 596 for complete information regarding U.L. approval procedures.

Combination Panels

- Fabric/wood combination
- Fabric/paint combination (excluding metallics)

Top Caps

- Wood
- Paint (not available on transitional profile)

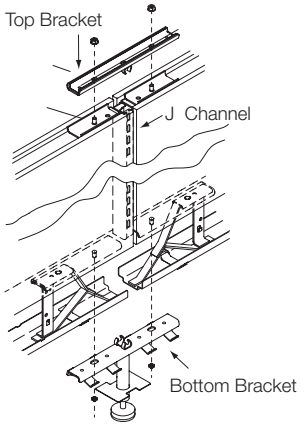
Wireway Covers

- Paint

Acoustical Ratings

- NRC rating = .75
- STC rating = 22

Connections



Top and bottom connector brackets draw adjacent panels together in a rigid steel-to-steel interference fit with two ¼" threaded fasteners. NAAB locating clamps, welded to the brackets, create a rigid connection, and consistent narrow reveals.

Note: The number of brackets is determined automatically based on your order. Ordering extra connectors or end trims will result in a shortage of brackets. Additional top (model ATP) and bottom (ABP) brackets will need to be specified separately as service parts.

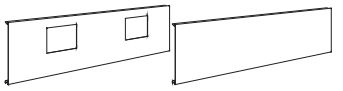
Connectors are available to join panels when changing directions in a panel run. Connectors are constructed of extruded aluminum and include factory installed J-channels.

➤See page 31.

Power distribution assembly, factory-installed in the base wireway of 24"W and wider powered panels, allows distribution of power. Power distribution assembly can also be field-installed on non-powered panels.

➤See page 37.

18"W panels can be used to pass power from one panel to another, but cannot accept receptacles. They are only available with non-punched wireway covers.



Punched and non-punched wireway covers are available for base, mid-wireway, hardwire and New York City applications. Receptacle cutouts are 2 15/16"W and 1 15/16"H. Hardwire cutouts are 2 11/16"W and 1 7/16"H.

➤See pricing pages for powered wireway punch options.
➤See page 44 for hardwire wireway punch options.

Base wireways can accommodate 18 ¼"-diameter cables at 40% fill, and 44 ¼"-diameter cables at 100% fill.

Planning Factors

When combining fabric grades on a single panel, add side 1 fabric grade price to side 2 fabric grade price, then divide the total by 2 to get the average.

Combination panels can create a different visual for inside and outside an office, or they can be used as an accent when the outside of the panel is used to create a hall or walkway.

Related Products

Electrical jumper cables and receptacles must be specified separately.

➤See pages 101–103.

Communication wireway covers must be specified separately. Cutouts for data ports are 2 11/16"W and 1⅜"H.

➤See page 107.

Traxx and tiles are available to integrate wall-mount applications with panel applications.

➤See page 333.

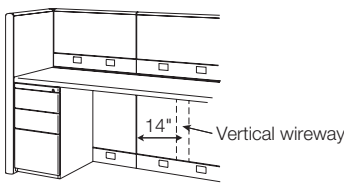
Mid-Wireway Panels

Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

Details

Mid-wireway panels are 2⅝" thick and provide electrical and communications access at worksurface height. Solid hardboard center septum is covered with two densities of fiberglass and fabric.

Mid-wireway models include:
- Top cap
- Four wireway covers
- Power distribution assembly for base wireway
- Attachment brackets



Vertical wireway channel in mid-wireway panels, located between cutouts in fiberglass and septum, extends from mid-height to base wireway. It is 2.6 sq. inches and located 14" from one edge of the panel.

Finishes & Materials

Mid-Wireway Panels
- Kimball Office panel fabrics
- COM

Note: COM fabrics must be U.L. listed for use on panels.
➤See page 596 for complete information regarding U.L. approval procedures.

Top Caps
- Wood
- Paint (not available on transitional profile)

Wireway Covers
- Paint

Connections

Top and bottom connector brackets draw adjacent panels together in a rigid steel-to-steel interference fit with two ¼" threaded fasteners. NAAB locating clamps, welded to the brackets, create a rigid connection, and consistent narrow reveals.
➤See page 22 for illustration.

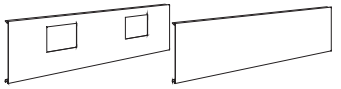
Connectors are available to join panels when changing directions in a panel run.
➤See page 31.

Power & Data

Electrical components used in mid-wireways are the same as those used for base wireways; specified separately.

Power distribution assembly, factory-installed in the base wireway of powered mid-wireway panels, allows distribution of power. Power distribution assembly can also be field-installed on non-powered panels.
➤See page 37.

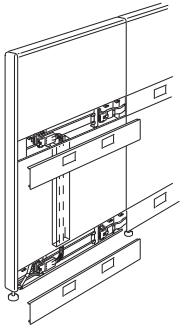
Mid-wireways can accommodate 31 ¼"-diameter cables at 40% fill, and 78 ¼"-diameter cables at 100% fill.



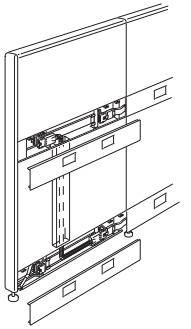
Punched and non-punched wireway covers are available for mid-wireway. Receptacle cutouts are $2^{15}/_{16}$"W and $1^{15}/_{16}$"H. Hardwire cutouts are $2^{11}/_{16}$"W and $1^{7}/_{16}$"H.
➤See pricing pages for punch options.
➤See page 44 for hardwire wireway punch options.

Planning Factors

Jumper cables, which pass power from base wireway to mid-wireway, will displace one receptacle at base and mid-height.



On 36"W or wider panels, jumper cables from mid-wireway to base must be installed on same side of panel at top and bottom.



On 24"W and 30"W panels, jumper cables can connect to AEDs at the same end, or at opposite ends.

Related Products

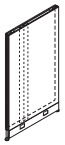
Electrical jumper cables and receptacles must be specified separately.
➤See pages 101–103.

Communication wireway covers must be specified separately. Cutouts for data ports are $2^{11}/_{16}$"W and $1^{3}/_{8}$"H.
➤See page 107.

Ceiling Power Entry Panels

Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

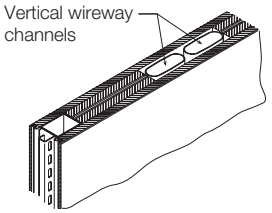
Details



Ceiling power entry panels are available for installations when building power will be accessed from the ceiling. ⅛" thick hardboard center septum is covered with two densities of fiberglass and the selected fabric.

Ceiling power entry panels include:
- Power pole
- Divided top cap
- Wireway covers
- Power distribution assembly
- Attachment brackets

Note: Ceiling power entry assembly must be specified separately.



Two full-height vertical channels route power and communications cabling to the base wireway. Channels are located inside the panel 12 inches from one edge. Each channel, or vertical wireway, is 2.6 sq. inches and is located between the fiberglass and septum.

Finishes & Materials

Ceiling Power Entry Panels
- Kimball Office panel fabrics
- COM

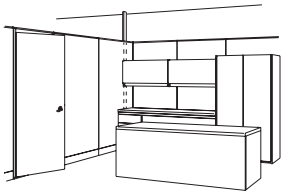
Note: COM fabrics must be U.L. listed for use on panels.

➤See page 596 for complete information regarding U.L. approval procedures.

Top Caps
- Wood
- Paint (not available on transitional profile)

Wireway Covers
- Paint

Connections



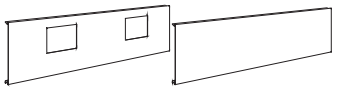
Extruded aluminum vertical power pole, standard with ceiling power entry panel, attaches to the top of the panel to extend the channel to ceiling height. Power pole is 5½"W, 1⅜"D, and 82"H. Any excess height telescopes into the ceiling or can be cut to size at the installation site.

Top and bottom connector brackets draw adjacent panels together in a rigid steel-to-steel interference fit with two ¼" threaded fasteners. NAAB locating clamps, welded to the brackets, create a rigid connection, and consistent narrow reveals.
➤See page 22 for illustration.

Connectors are available to join panels when changing directions in a panel run. Connectors are constructed of extruded aluminum and include factory installed J-channels.

Power & Data

Power distribution assembly, factory-installed in the base wireway allows distribution of power. Power distribution assembly can also be field-installed on non-powered panels.
➤See page 37.



Punched and non-punched wireway covers are available for base, hardwire and New York City applications. Receptacle cutouts are 2$^{15}/_{16}$"W and 1$^{15}/_{16}$"H. Hardwire cutouts are 2$^{11}/_{16}$"W and 1$^{7}/_{16}$"H.
➤See pricing pages for powered wireway punch options.
➤See page 44 for hardwire wireway punch options.

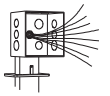
Base wireways can accommodate 18 ¼"-diameter cables at 40% fill, and 44 ¼"-diameter cables at 100% fill.

Each vertical channel can accommodate 20 ¼"-diameter cables at 40% fill.

Planning Factors

When combining fabric grades on a single panel, add side 1 fabric grade price to side 2 fabric grade price, then divide the total by 2 to get the average.

Related Products



Ceiling power entry assembly should be specified separately when power will be accessed from the ceiling to enable routing of power into ceiling power entry panel.
➤See page 38.

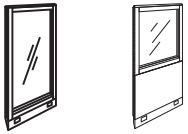
Electrical jumper cables and receptacles must be specified separately.
➤See pages 101–103.

Communication wireway covers must be specified separately. Cutouts for data ports are 2$^{11}/_{16}$"W and 1⅜"H.
➤See page 107.

Glass Panels

Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

Details



Full or partial glass panels are available. Partial glass panels have glass in the upper portion and fabric on the bottom.

Glass panel models include:
- Top cap
- Two wireway covers
- Power distribution assembly, if powered panel is specified
- Attachment brackets

Tempered glass is ¼" thick and secured with a concealed channel liner.

Frames are constructed of aluminum and are painted or covered with wood or fabric.

Finishes & Materials

Full Glass Panels
- Tempered glass: clear

Partial Glass Panels
- Tempered glass: clear
- Kimball Office panel fabrics or COM *Note: COM fabrics must be U.L. listed for use on panels.*

➤See page 596 for complete information regarding U.L. approval procedures.

Panel Frame
- Wood
- Paint
- Fabric

Top Caps
- Wood
- Paint (not available on transitional profile)

Wireway Covers
- Paint

Connections

Top and bottom connector brackets draw adjacent panels together in a rigid steel-to-steel interference fit with two ¼" threaded fasteners. NAAB locating clamps, welded to the brackets, create a rigid connection, and consistent narrow reveals.

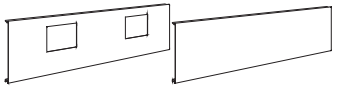
➤See page 22 for illustration.

Connectors are available to join panels when changing directions in a panel run. Connectors are constructed of extruded aluminum and include factory installed J-channels.

Power & Data

Power distribution assembly, factory-installed in the base wireway of 24"W and wider powered panels, allows distribution of power. Power distribution assembly can also be field-installed on non-powered panels.

➤See page 37.



Punched and non-punched wireway covers are available for base, mid-wireway, hardwire and New York City applications. Receptacle cutouts are $2^{15}/_{16}$"W and $1^{15}/_{16}$"H. Hardwire cutouts are $2^{11}/_{16}$"W and $1^{7}/_{16}$"H.

➤See pricing pages for powered wireway punch options.
➤See page 44 for hardwire wireway punch options.

Base wireways can accommodate 18 ¼"-diameter cables at 40% fill, and 44 ¼"-diameter cables at 100% fill.

Related Products

Electrical jumper cables and receptacles must be specified separately.

➤See pages 101–103.

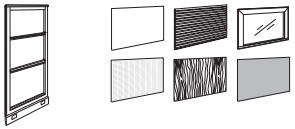
Communication wireway covers must be specified separately. Cutouts for data ports are $2^{11}/_{16}$"W and $1^{3}/_{8}$"H.

➤See page 107.

Sectional Panels and Tiles

Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

Details



Sectional panel frames and sectional tiles are specified separately. Sectional panels can be used in conjunction with monolithic panels.

Frames are constructed of black steel tubing. Frames are completely covered by sectional tiles. Frames models include:

- Top cap
- Two wireway covers
- Power distribution assembly, if powered panel is specified
- Attachment brackets

Metal J-channels along the full height of panel frame provide slots at 1" increments for vertical positioning of components.

Sectional tiles are available in fabric, slat, glass, ventilated, wood, or paint.
IMPORTANT: Sectional tiles in this section are for use on Cetra sectional panels only.

Two tiles are required for each section; one for each side of the panel.

Horizontal extruded aluminum channels on the frame hold tiles in place.

Fabric tiles are constructed of ½" thick wood composite covered with the selected fabric. Tiles are non-tackable and non-acoustical.

Slat tiles have 1" slats. Slat tiles are constructed of extruded anodized aluminum.

Glass tiles have an extruded aluminum frame. Top and side frame rails are 2¾"W; bottom frame rail is 1 1/16"W. Glass tiles cannot be used in 30"H panel frames. They are not visually compatible with glass stackable panels

Ventilated tiles have an extruded aluminum frame. Top, bottom and side frame rails are 2¾"W.

Wood tiles are constructed of ½" thick wood composite covered with premium veneer.

Painted tiles are ½" thick filled medium density fiberboard. They are not available in metallic paints.

Finishes & Materials

Sectional Panel Frames

- Metal: black only

Fabric Tiles

- Kimball Office panel fabrics or COM
  Note: COM fabrics must be U.L. listed for use on panels.

Slat, Ventilated, and Paint Tiles

- Paint
  Note: Metallic paint is excluded for Paint tiles, but is available on slat, and ventilated.

Glass Tiles

- Tempered glass: clear or frosted
- Tile frame: paint

Wood Tiles

- Wood finishes

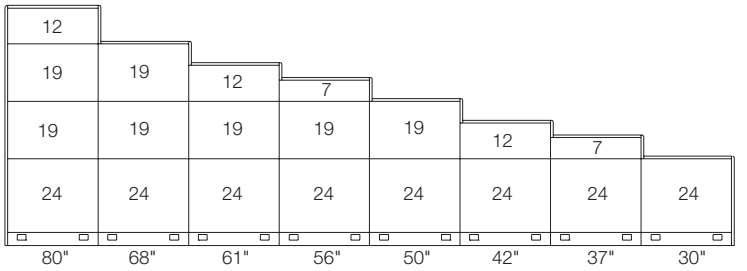
Top Caps

- Wood
- Paint (not available on transitional profile)

Wireway Covers

- Paint

Sectional Panel Tile Application Guidelines:



Connections

Top and bottom connector brackets draw adjacent panels together in a rigid steel-to-steel interference fit with two ¼" threaded fasteners.
➤See page 22 for illustration.

Connectors are available to join panels when changing directions in a panel run.
➤See page 31.

Power & Data

Power distribution assembly, factory-installed in the base wireway of 24"W and wider powered panels, allows distribution of power. Power distribution assembly can also be field-installed on non-powered panels.
➤See page 37.

18"W panels can be used to pass power from one panel to another, but cannot accept receptacles. They are only available with non-punched wireway covers.

Punched and non-punched wireway covers are available for base, hardwire, and New York City applications. Receptacle cutouts are 2 15/16"W and 1 15/16"H. Hardwire cutouts are 2 11/16"W and 1 7/16"H.

Base wireways can accommodate 18 ¼"-diameter cables at 40% fill, and 44 ¼"-diameter cables at 100% fill.

Related Products

Electrical jumper cables and receptacles must be specified separately.
➤See pages 101–103.

Stackable Panels

Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

Details

Stackable panels are available in fabric, combination, glass, and ceiling power entry. Stackable panels are for use with any standard Cetra panel to accommodate height changes up to full enclosure. Models include:

- Panel
- Attachment brackets

Note: Top cap from base panel will be used on stacking unit.

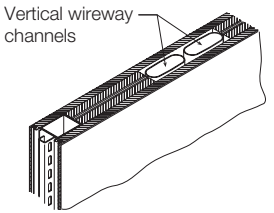
Heights available include 7", 12", and 19". Specify appropriate stackable panel to increase the height of workstation. Stackable panel heights coordinate with sectional tile heights for a consistent look when using both products in the same office setting.

Stackable fabric panels are constructed of a 1/8" thick hardboard septum covered with two densities of fiberglass and fabric (7"H panel has only one density of fiberglass per side).

Stackable combination panels are constructed of two densities of fiberglass covered with fabric on one side and wood composite covered with premium veneer or UV filled medium density fiberboard painted to specification on the other side.

Stackable glass panels are constructed of tubular aluminum frames. Tempered glass is available in clear and frosted. Glass is secured in the channel with a concealed channel liner. Stackable glass panels are not visually compatible with sectional glass tiles.

Stackable ceiling power entry panels are constructed with a 1/8" thick hardboard center septum covered with two densities of fiberglass and fabric.



Two full-height vertical channels in ceiling power entry model route power and data cabling to the base wireway.

Finishes & Materials

Stackable Acoustical Panels

- Kimball Office panel fabrics
- COM

Note: COM fabrics must be U.L. listed for use on panels.

➤See page 596 for complete information regarding U.L. approval procedures.

Stackable Combination Panels

- Fabric/wood combination
- Fabric/ paint combination (excluding metallics)

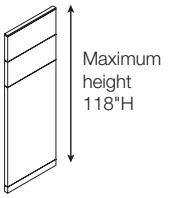
Stackable Glass Panels

- Glass: clear or frosted
- Frames: fabric, wood, or paint

Stackable Ceiling Power Entry Panels

- Kimball Office panel fabrics
- COM

Connections



A maximum of two panels can be stacked on to a standard panel. Maximum panel height with stackable panels is 118".

Floor-to-ceiling applications can be accommodated using the floor-to-ceiling top channel.
➤See page 35 for application guidelines.

Floor-to-ceiling top channels provide a light and sound seal, but do not attach to the ceiling. Channel is constructed of extruded PVC.

Stackable panels are loadbearing and will support overheads when used according to guidelines.
➤See page 34 for panel run rules.

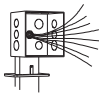
Planning Factors

➤See page 35 for additional application guidelines for stackable panels.

Stackable panels may be installed on any standard Cetra panel, new or existing, without disassembling the existing panel run.

Stackable panels must be the same width as the panel they will be stacked above.

Related Products



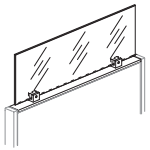
Ceiling power entry assembly
➤See page 38.

Floor-to-ceiling top channels
➤See page 66.

Frameless Glass

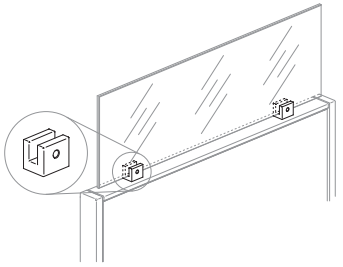
Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

Details

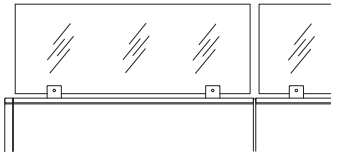


Frameless glass is clear, 3⁄8" tempered glass with flat polished edges. Model includes:

- Glass
- Two aluminum glass holders
- Two stainless steel set screws
- Four clear gaskets
- Square profile top cap
- Attachment bolts
- Two threaded plates
- Attachment screws



Two aluminum glass holders are standard with each piece of glass and are available in any paint color, independent of the top cap. The glass is centered between the glass holders and held in place with two clear gaskets per glass holder and a stainless steel set screw.



Glass sits 9⁄16" off the top cap when installed. Adjacent frameless glass models are designed to be offset from one another with a 1 1⁄8" gap.

When used in a hi-lo application, the top of the frameless glass will be flush with the top of the adjacent panel's top cap.

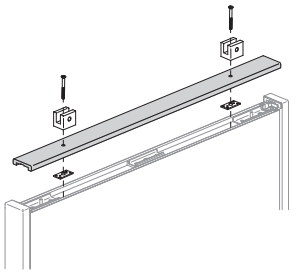
U.L. Listing 1286

Finishes & Materials

Frameless Glass

- Glass: clear
- Glass holders: paint
- Top cap: wood or paint

Connections



Square profile top cap, standard with frameless glass model, features pre-drilled holes, which allow the aluminum glass holders to be securely bolted to the panel frame in the field and facilitates correct placement.

Planning Factors

Frameless glass is not loadbearing. Hanging components or accessories on frameless glass is not recommended.

Frameless glass cannot be scribed in the field.

Cetra frameless glass cannot span more than one panel and must be the same width as the panel to which it is attached.

Cetra frameless glass models cannot be used on Xsite; likewise, Xsite frameless glass models cannot be used on Cetra panels.

Cetra frameless glass models cannot be attached to full glass, partial glass, or stackable glass panels, nor can they be used in a hi-lo-hi application.

Cetra frameless glass is not recommended on low panels adjacent to high-traffic areas.

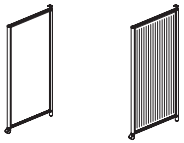
Overall Heights:

Panel Height	*Overall Height incl. Frameless Glass*
30"	42 1⁄4"
37"	49 1⁄4"
42"	54 1⁄4"
50"	61 1⁄4"
56"	68 1⁄4"
61"	73 1⁄4"
68"	80 1⁄4"
80"	92 1⁄4"

Privacy Panels

Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

Details



Privacy panels are available 36" or 42"W and in three designs: fabric on both sides, fabric/markerboard combination, or translucent.

Privacy panel models include:
- Top attachment bracket
- Base pivot bracket
- Caster

Fabric and fabric/markerboard combination privacy panels have an extruded aluminum frame. Interior is fiberglass over a honeycomb panel.

Translucent privacy panels feature a ribbed pattern to provide privacy, yet allow light to pass through. Frame is extruded aluminum.

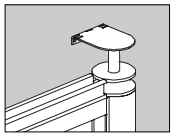
Single caster allows privacy panel to pivot open or closed.

Finishes & Materials

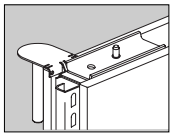
Privacy Panel Frame
- 462 Cinder paint
- 501 Platinum metallic paint

Privacy Panel Inserts
- Kimball Office panel fabric
- Markerboard: 488M Frosty White
- Translucent

Connections

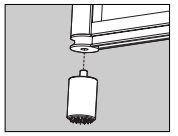


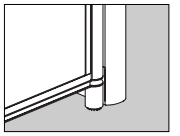
Top bracket



Top bracket shown on Cetra panel

Top attachment bracket is used to mount the privacy panel to any 68"H Cetra panel. Top bracket attaches under the top cap and can be easily relocated.



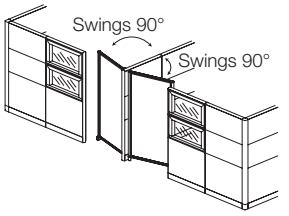


Base pivot bracket features a carpet gripper to hold bracket in place while allowing the privacy panel to swing.

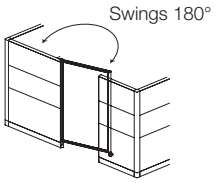
Privacy panels abut the opposite panel, but do not latch.

Non-handed and reversible, privacy panels can be mounted left or right, and can be flipped so the markerboard or different fabrics can be positioned inside or outside the workstation.

Planning Factors



When mounted to the perpendicular panel (on one or both sides) in an L or T configuration, panel swings 90°.

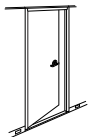


When mounting in a straight panel run, specify privacy panel to be wider than the opening to allow for proper clearance. Panel swings 180° to lay flat against the Cetra panel.

Hinged Doors

Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

Details

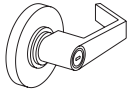


Hinged doors are available 36” or 42”W (nominal). All models include:
- Frame and threshold
- Top cap
- Full-length hinge
- Frame gasket
- Attachment brackets

Hinged doors are 1¾" thick and feature a honeycomb interior. Frame is extruded aluminum.

Full-length hinge is used for strength and durability.

Frame gasket protects the door when closing and quiets closure.



Locking lever is available and is suitable for ADA guidelines.

Door opening width for the 36"W door is 31¼"; for the 42"W door it is 37¼". Opening height is 76$^{13}/_{16}$". 42”W hinged doors or gates are recommended for ADA compliance. Doors are interchangeable with other 80"H panels.

Finishes & Materials

Door
- Wood finishes
- Paints (excluding metallics)

Door Frame
- Paint

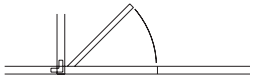
Top Caps
- Wood
- Paint (not available on transitional profile)

Connections

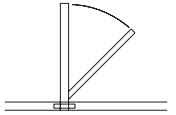
An adjustment to the bottom bracket of hinge doors and gates is required when installation is next to a directional connector. The correct bracket must be specified separately. *Note: The correct bracketry adjustment will be generated for drawings made using an electronic specification tool. If not using an electronic specification tool, then use the guidelines provided.*

Bottom Bracketry Adjustment Guidelines

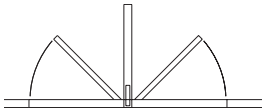
T Connections:



In this situation, substitute the bottom “T” bracket (ABT) with a bottom “L” bracket (ABL), specified separately.

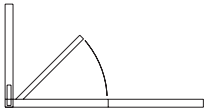


In this situation, substitute the bottom “T” bracket (ABT) with a bottom straight connector bracket (ABS), specified separately.



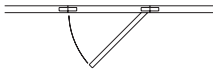
In this situation, substitute the bottom “T” bracket (ABT) with a bottom door end connector bracket (ABD). Also specify a door plate (ABDU) to support the T connector wireway cover.

L Connections:



In this situation, substitute the bottom “L” bracket (ABL) with a bottom door end bracket (ABD), specified separately.

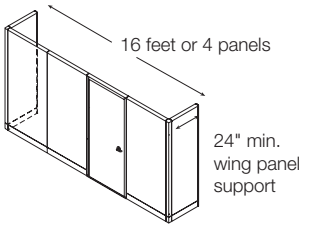
Straight Connections:



When door panel is located between two panels in a straight run, no adjustment is required.

Planning Factors

Hinged doors must not be placed more than one 36"W panel from a directional connector or a wall mount. Hinged doors cannot be placed next to Y or V connectors.



Maximum panel run when using doors is 16' or 4 panels. Panels must be supported on both ends.

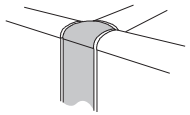
IMPORTANT: Hinged doors cannot be used in unsupported panel runs.

Specify a W connector (2¾" wall mount) when wall mounting a hinged door for greater adjustment to compensate for out-of-plumb walls.

Connectors

Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

Details



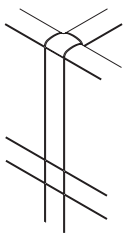
Connectors are available to join two or more panels when changing directions in a panel run.

Connector models include:
- Connector
- Top cap
- Wireway cover
- Connection bracketry

Connectors are constructed of extruded aluminum.

Metal J-channels along the full height of all connectors provide slots at 1" increments for vertical positioning of components.

Connector top caps are available in softened, square, and transitional profiles.



Mid-wireway connectors enable power and data to be passed from one panel to another at worksurface height when changing directions.

Stackable connectors are available for use with stackable panels.
➤See page 32.

Finishes & Materials

Connectors and Stackable Connectors
- Kimball Office panel fabrics
- COM
  Note: COM fabrics must be U.L. listed for use on panels.
➤See page 596 for complete information regarding U.L. approval procedures.
- Paint
- Wood
- Fabric/wood combination
- Fabric/paint combination

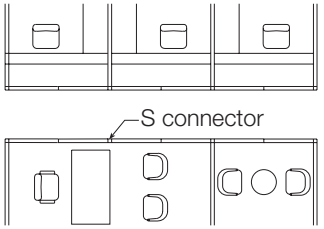
Connector Top Caps
- Wood
- Paint (not available on transitional profile)

Connector Wireway Covers
- Paint

Connections

Connectors can be used in the following configurations:
- L (2-way 90°)
- T (3-way 90°)
- X (4-way 90°)
- S (straight 180°)
- M or W (wall mount)
- V (2-way 135°)
- Y (3-way 120°/120°/120°)

➤See pricing pages for illustrations of each configuration.



S connectors (straight) are available to fill parallel panel runs where one panel run has a connector and the other does not. It is not required to join panels.

Y connectors are available for use in 120° applications. They cannot be used next to hinged doors.

Power & Data

Power and data can be routed through connectors.
➤See page 37 for mid-wireway jumper applications.
➤See page 42 for cable management information.

Planning Factors

Specify appropriate connectors for the combined height of standard and stackable panels. Base connector must always be the same height or taller than any adjacent standard panel.

Allow for connector thickness when space planning.
- Connectors are 2⅝" thick.
- M wall mount connectors are ⅝" thick.
- W wall mount connectors are 2¾" thick.

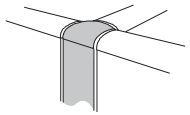
Thickness of the M wall mount connector corresponds to Traxx. M connectors have no adjustability for out-of-plumb walls; shimming may be required.

W wall mount connectors offer ⅝" lateral adjustment to compensate for out-of-plumb walls.

Stackable Connectors

Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

Details



Stackable connectors are available to join panels when changing directions in a panel run with stackable panels.

Stackable connector models include:
- Connector
- Connection bracketry

Note: Top caps are not included. Top cap from base connector will be used.

Connectors are constructed of extruded aluminum.

Metal J-channels along the full height of all connectors provide slots at 1" increments for vertical positioning of components.

Finishes & Materials

Stackable Connectors
- Kimball Office panel fabrics
- COM

Note: COM fabrics must be U.L. listed for use on panels.

➤See page 596 for complete information regarding U.L. approval procedures.

- Paint
- Wood
- Fabric/wood combination
- Fabric/paint combination

Connector Top Caps
- Wood
- Paint (not available on transitional profile)

Connections

Connectors can be used in the following configurations:
- L (2-way 90°)
- T (3-way 90°)
- X (4-way 90°)
- S (straight 180°)
- M or W (wall mount)

➤See pricing pages for illustrations of each configuration.

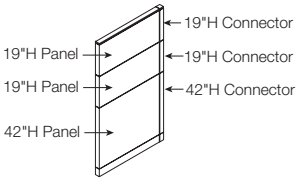
Note: Y configurations are not available in stackable models.

Planning Factors

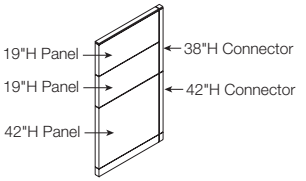
Allow for connector thickness when space planning.
- Connectors—2⅝" thick
- M connectors—⅝" thick
- W connectors—2¾" thick

Specify appropriate connectors for the combined height of standard and stackable panels. Base connector must always be the same height or taller than any adjacent standard panel.

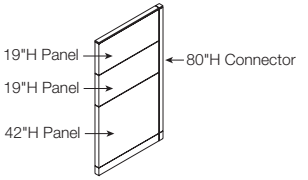
Stackable connectors can be specified in one of three ways:



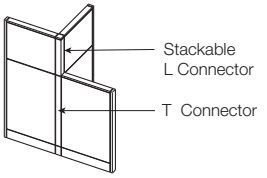
① Specify stackable connectors to equal each stackable panel height. Provides the most flexibility for reconfiguration.



② Specify one stackable connector equal to the height of both stackable panels. Enables the panel height to be lowered without taking down the station; however, it provides less flexibility during reconfiguration.



③ Specify a connector equal to the combined height of the base panel and stackable panels.
This option limits the ease of reconfiguration since the workstations will need to be completely disassembled to change panel heights.



When using square profile trim, different connectors may be used above a base connector.
Example: T connector may be used on the bottom with an L connector on the top. This creates a change of height at a connector, however, stackable panels must be used on both sides of the L connector for support.

When the stackable connector is the same as the base connector, the top cap is removed from the base connector and placed above.

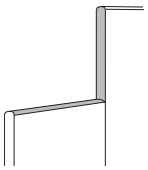
When an stackable connector is different than a lower connector, a new top cap bracket assembly for the upper connector needs to be specified.

➤See page 99.

Specify the same profile for both base and stackable connectors to ensure visual compatibility.

Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

Details



End trim is 1" thick and covers the vertical panel edge at the end of each panel run.

Hi-lo trim kits finish off the vertical end of panels when transitioning heights. Kit includes:
- Vertical end trim
- Bracket
- Top cap for the lower panel

Panel-to-panel or connector-to-panel hi-lo trim kits are available.

End trim and hi-lo trim kits are available in softened and square profiles (paint and wood) and in transitional profile (wood only).

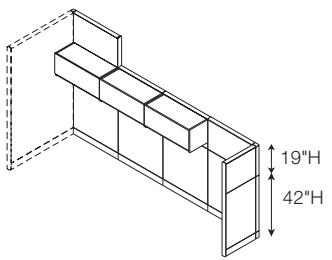
Finishes & Materials

End Trim
- Wood
- Paint (not available on transitional profile)

Hi-Lo Trim Kits
- Wood
- Paint (not available on transitional profile

Connections

Hi-lo trim kits cannot be used:
- Next to a connector (stackable or standard) when the connector is being used next to stackable panels.
- Next to a Y connector.
- Next to a floor-to-ceiling top channel.



Overheads cannot be hung in a row of stackable panels where a hi-lo trim kit is used. They may be hung in a row beneath the hi-lo application.

Planning Factors

Specify end trim and hi-lo trim kits for the combined height of panels and stackable panels.

Allow for end trim thickness of 1" when space planning.

To specify hi-lo trim kits, determine the following:
① Height of the drop
② Width of the lower panel
③ Top cap profile
Note: Hi-lo trim kits for stackable panels are determined the same as for standard panels.

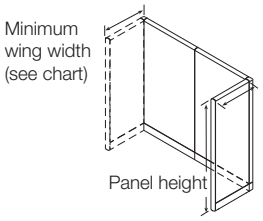
IMPORTANT: When you specify a hi-lo trim kit to be used with a directional connector, the appropriate connector top cap/bracket assemblies must be specified separately.
➤See page 100.

Due to the notching operation which must be done to the top cap of the lower panel in a hi-lo situation, a single lower panel may not be placed between two higher panels. To achieve the look of a single panel drop, specify two panels that equal the desired width (36" minimum).

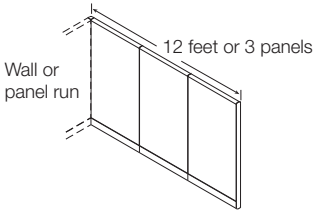
Hi-lo trim kits are not available in heights less than 5" due to the attachment method.

Guidelines for Panel Runs

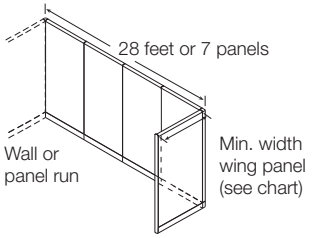
Features ➤See page 21
Power & Data Overview 36



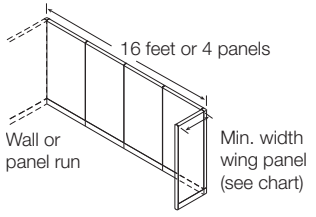
Minimum wing widths apply to a freestanding "C" station that does not have support from a panel run or a wall connector at either end. Panels can be any height; however wing panels must be the same height as the panel run. The width of the wing wall increases according to height.
➤See chart for minimum wing width.



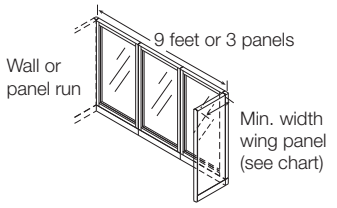
Maximum panel run for unsupported panels (those not attached to a wall, wing panel, or floor support on BOTH ends) is 3 panels with a maximum run of 12'.
➤See chart for minimum wing width.



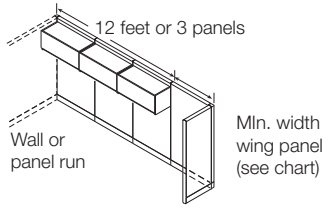
Maximum panel run for supported panels (those supported with a wall or panel run on one end and a **same-height wing panel** on the other) is 7 panels with a maximum run of 28'. The width of the wing wall increases according to height.
➤See chart for minimum wing width.



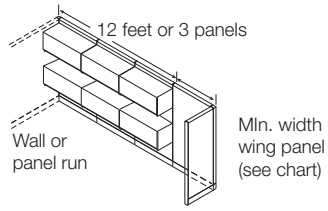
Maximum panel run supported panels (those supported with a wall or panel run on one end and a **wing panel that is shorter than the spine** on the other) is 4 panels with a maximum run of 16'.



Maximum panel run for supported glass panels (those supported with a wall or panel run on one end and a minimum width wing panel on the other) is 3 panels with a maximum run of 9'.
➤See chart for minimum wing width if wing panel will be used for support on both ends of the run.
Note: Frameless glass cannot be attached to glass panels.



Overhead cabinets may be hung on the inside of the panel system on a maximum of three panels no greater than 12 feet. When cabinets are hung on both sides of this type of panel run, so as to counter balance the load, the length may be increased to four panels or 16 feet. For proper support, a wing panel or wall mount must be adjacent to both ends of any run of overheads.
Note: Overhead must be ganged to assure maximum rigidity.



Overhead cabinets may be stacked as long as the 12' and 16' (counter balanced) guidelines in the previous paragraph are followed. There may be a maximum of two rows of overheads unless stacking on one panel between two wing panels. Allow a minimum of 7" between overheads for proper clearance of flipper doors.

Frameless glass does not affect application guidelines, except where noted.

Definitions:

Unsupported panel runs: Runs not attached on BOTH ends to a wall, panel run, or floor support.

Floor support: Undersurface storage units, support panels, or column legs

Balanced back-to-back: Runs having similar components mounted to opposite sides of the run so as to counter-balance the load.

Minimum Wing Panel Widths:

Minimum wing panel widths increase according to the height of the panel run to eliminate the possibility of tipping or injury under standard loading and usage.

Spine Run	*Minimum Wing Width*
30", 37", 42", or 50"H	24"
56", 61", or 68"H	30"
80"H	42"
Combination panels	48"

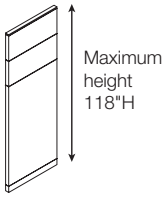
IMPORTANT: Wing panel height is not required to be the same height as the panel run, except in free-standing "C" applications, 80"H supported runs, and runs containing combination panels.

Guidelines for Stackable Panels

Features ➤See page 21
Application Guidelines 34
Power & Data Overview 36

Stackable panels may be installed on any standard Cetra panel, new or existing, without disassembling the existing panel run.

Stackable panels must be the same width as the panel they will be stacked above.

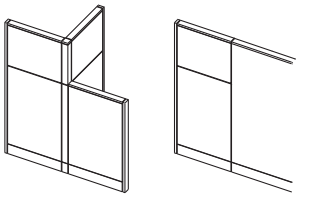


Only two stackable panels may be stacked above a standard panel to a maximum height of 118".

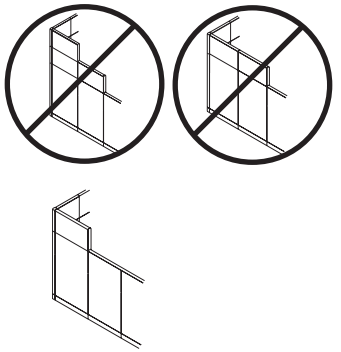
Frameless glass can be used on all stackable panel models, except glass stackables. Maximum height with glass is 130¼"

Panel run rules are the same for stackable panels as for standard Cetra panels.
➤See page 34.

Stackable panel runs must have a wing panel that is equal to the combined height of the base panel plus the stackable panels, on at least one end for support.



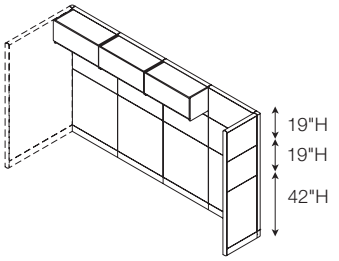
For proper support, stackable panels must either turn a corner or be connected to a monolithic panel that is equal to the height of the base panel plus the stackable panels.



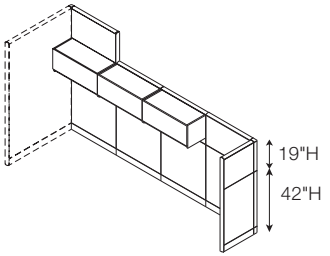
When using stackable panels to create a "step down or cityscape" effect, you can only extend out one panel width from the connector.

End trim height must match the combined height of the base and stackable panels.

Stackable panels are load-bearing and will support overheads when used according to guidelines.
➤See page 34 for maximum panel run rules.



Overheads can not be hung above 80" high.

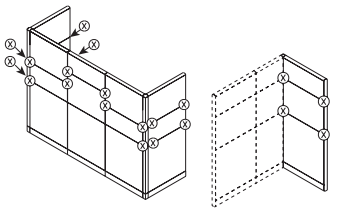


Overheads can not be hung in a row of stackable panels where a hi-lo trim kit is used. They may be hung in a row beneath the hi-lo application.

Overheads cannot be hung on a stackable wing wall.

ATET Bracketry Guidelines:

Note: Certain applications require that additional hook brackets (model ATET) be specified separately. One bracket is standard with stackable panel.



Need 16 ATET
Will receive 10
Specify 6 addt'l

Need 4 ATET
Will receive 2
Specify 2 addt'l

When stackable panel heights are staggered, you will need 1 additional ATET bracket per panel to connect the lower stackable panel to the MIDDLE of the adjacent panel. The standard panel-to-panel bracket is used at the top connection.

When stackable panels are used between an end trim and a connector, you will need one additional ATET bracket per stackable panel to connect the bottom of each panel to the end trim on one side and the connector on the other side. The standard connector brackets are used at the top connections.
➤See page 98 to specify ATET brackets.

Floor-to-Ceiling Applications:

Floor-to-ceiling top channel is available in 12' lengths and may be field scribed to desired length. Channel provides sound and light seal for space between top of panel and ceiling. Top channel provides 2" of adjustability.
Note: Hi-lo trim and end trim cannot be used next to top channels.

To create a completely enclosed office:

① Determine your ceiling height.
② Determine the combination of standard and stackable panels that will come closest to, but below ceiling height. (Maximum of two stacking panels above a standard panel.) For varied ceiling heights use lowest point from floor to ceiling.
③ Order floor-to-ceiling top channel based on lineal feet requirement.
④ Field scribe floor-to-ceiling top channel on site for required length and to fit around square connectors.
⑤ A minimum clearance of 1½" is required to install floor-to-ceiling top channel.

Power and Data

Features ➤See page 21
Standard 8-Wire System 40
Enhanced 10-Wire System 41

Cetra panels offer a standard 8-wire system and an enhanced 10-wire system for increased capacity requirements.

Standard and enhanced electrical components are keyed differently to prevent mixing of components.

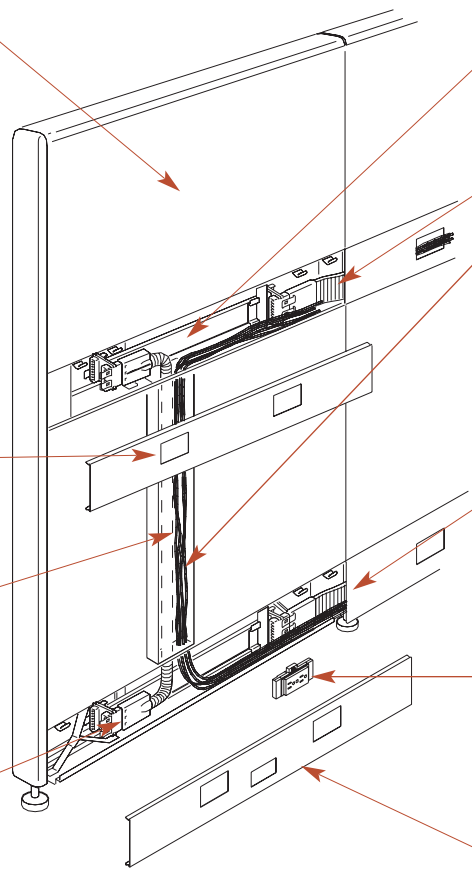
Components used to power the mid-wireway are the same as those used in the base wireway.

Building-to-panel electrical connections can be accomplished whether power is sourced in the wall, floor, or ceiling.

Duplex opening in wireway cover provides access to duplex receptacles. Openings are located 9" from the panel reveal.

Communication cables may be routed through channel in mid-wireway panels to base wireway. For standard panels, route communication cables in the base.

Power distribution assembly carries power to receptacles. They are factory installed on powered panels; they can be field installed on non-powered panels.



Power distribution assembly in mid-wireway requires field installation and must be specified separately.

Electrical jumper cables are used to pass power from panel to panel, from base to mid-wireway, and through directional connectors at the mid-wireway or base wireway. Models are specified based on the panel configuration.
➤See page 101 or 103 for details.

Wireway is 4½"H x 2½"D.

Receptacles are inserted into the power distribution assembly and secured with screws. Up to 4 duplex receptacles may be specified for each base wireway panel. Up to 8 duplex receptacles may be specified for each mid-wireway panel.

Communication wireway cover has an additional window for communication ports.
➤See page 42 for cable management application guidelines.

Wireway Cover Options:

➤See page 43 for powered and non-powered wireway cover punch options.
➤See page 44 for hardwire wireway cover punch options.
➤See page 107 for communication wireway covers.

Punch Dimensions:

Receptacle cutouts—
$2\frac{15}{16}$"W x $1\frac{15}{16}$"H

Hardwire cutouts—
$2\frac{11}{16}$"W x $1\frac{7}{16}$"H

Data port cutouts—
$2\frac{11}{16}$"W x $1\frac{3}{8}$"H

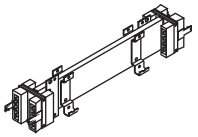
Power Distribution

Product Information

Assemblies, Jumpers, and Receptacles

Features	➤See page 21
Power & Data Overview	36
Standard 8-Wire System	40
Enhanced 10-Wire System	41

Details



Powered panels feature factory-installed electrical distribution assemblies in the base wireway. Power distribution assembly can also be field-installed on non-powered panels.

Mid-wireway powered panels feature factory-installed power distribution assembly in the base. Specify power distribution assembly for mid-wireway separately for field installation.

Power distribution assemblies and receptacles used to power the mid-wireway are the same as those used in the base wireway.

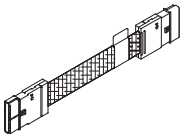
Two wiring configurations are possible utilizing the same components.
➤See pages 40–41 for planning and installation guidelines.

Duplex receptacles are rated at 15 amps and maybe installed back-to-back in base and mid-wireways.

Up to four duplex receptacles (two per side) can be installed in each base wireway.

Up to eight duplex receptacles (four per side) may be specified for each mid-wireway panel.

Connections



Jumper cables are used to pass power from panel to panel and from base to mid-wireway.

18"W panels and 6"W starter panels have no electrical access; however, 18"W panels can pass power to adjacent panels. Both are available with non-punched wireway covers only.

When an 18"W panel is used in a T configuration, one AEJ2 and one AEJ5 jumper must be used to route power through mid-wireway connectors.
➤See illustrations at right.

Planning Factors

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

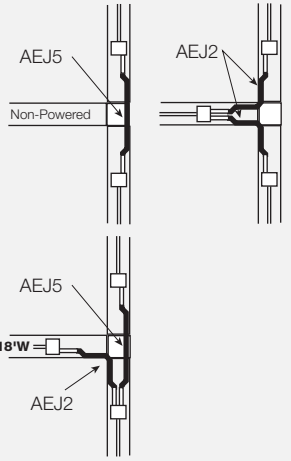
Hardwire electrical components for use in the base wireway are available for areas where local codes do not accept modular electrical plug-in components.
➤See page 39.

New York City electrical applications require a special power entry. Panels should be specified as non-powered and electrical distribution assemblies should be specified separately.
➤See page 39.

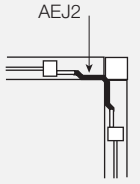
Mid-Wireway Jumpers:

To pass power through mid-wireway connectors, specific jumper models are required.

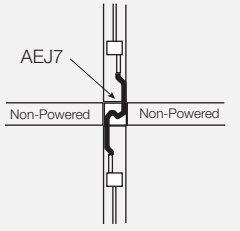
T Configurations



L Configurations



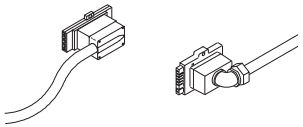
X Configurations



Power Entries

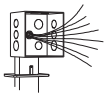
Features ➤See page 21
Power & Data Overview 36
Standard 8-Wire System 40
Enhanced 10-Wire System 41

Details



For 8-wire system For 10-wire system

Floor power entry is available to bring power to the panel run from the floor or wall.



Ceiling power entry assembly is available to bring power to the panel run from the ceiling. It is used in conjunction with ceiling power entry panels.

Ceiling power entry assembly models include:
- Junction box
- 12’ jumper cable
- Hardware

Planning Factors

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Access to ceiling power source is regulated by National Code to a maximum of 12 ft. conduit.

18"W panels and 6"W starter panels have no electrical access. 18”W panels can be used to pass power from one panel to another, but cannot accept receptacles or power entries.

Power entries will take up the space of one receptacle location on the power distribution assembly.

Related Products

Hardwire electrical components are available for areas where local codes do not accept modular electrical plug-in components.
➤See page 39.

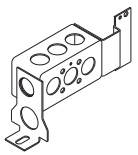
New York City electrical applications require a New York City power assembly for the panel where power entry is made.
➤See page 39.

Hardwire and New York City Components

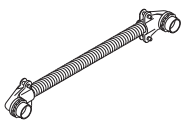
Features ➤See page 21
Power & Data Overview 36
Standard 8-Wire System 40
Enhanced 10-Wire System 41

Details

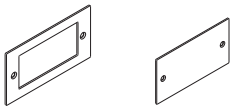
Hardwire panel option and components should be specified to accommodate hardwire applications.



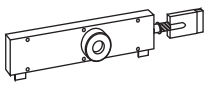
Junction box, specified separately, is required for each panel that will receive field-installed hardwired electrical.



Branching conduit is used between boxes and for panel-to-panel connections. Conduit must be listed, ½" trade-size Greenfield.



Cover plates are available in black only. Blank junction box cover plate is required to cover junction box or power entry boxes. Cover plates from other sources will not fit properly.



New York City electrical applications require a special power entry. Panels should be specified as non-powered; power distribution assemblies should be specified separately.

Connections

Installations must be completed by a qualified electrician or an electrical engineer familiar with the National Electrical Code and the appropriate local codes.

Planning Factors

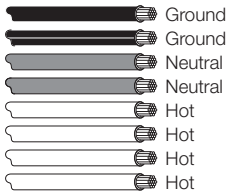
IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

18"W panels are not available with the hardwire option.

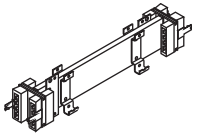
Circuit Configurations

Standard 8-Wire Electrical System

Features ➤See page 21
Power & Data Overview 36
Enhanced 10-Wire System 41



Cetra 8-wire, 4-circuit system supports work environments having light- to medium-intensity computerized equipment needs. The 8-wire systems include two 12-gauge ground wires, two 10-gauge neutral wires, and four 12-gauge hot wires.



Powered panels feature factory-installed electrical distribution assemblies in the base wireway. Power distribution assemblies can be field-installed on non-powered panels.
➤See page 37.

Two wiring configurations are possible—3 and 1 or 2 and 2—utilizing the same components.
➤See wiring configurations at right.

Building-to-panel electrical connections can be accomplished from power sources in the wall, floor, or ceiling.
➤See page 38.

Duplex receptacles used for both types of configurations are the same. This simplifies specifications and allows a faster understanding of the system.
➤See page 37.

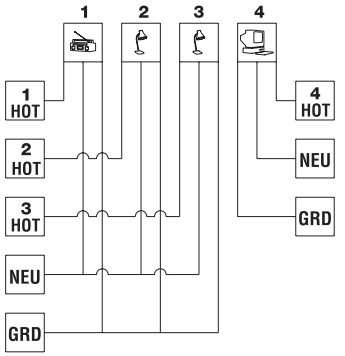
Components used in base wireway applications are also used in mid-wireway applications.

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.

All components are shipped with hardware necessary for installation.

3 and 1 (8-wire):

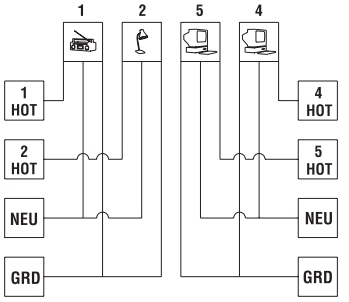


- Three utility circuits share a neutral and common ground.
- One circuit with a DEDICATED hot, neutral and ground.
- Utilize Cetra receptacles #1, 2, 3 for utility and #4 for the DEDICATED ground circuit.

Circuits 1, 2, and 3 can be used for general electrical needs. Customarily, one or more of the circuits is reserved for lighting or other everyday uses, which allows control by central or master switching.

Circuit 4 consists of three separate conductors (hot, neutral, and ground) and meets the BIFMA/ANSI definition for a dedicated circuit.

2 and 2 (8-wire):



- Two DESIGNATED utility circuits and two DESIGNATED computer circuits.
- Utilize Cetra receptacles #1 and #2 for the designated utility circuits and receptacles #4 and #5 for the designated computer circuits.

Note: Receptacle #3 cannot be used in the 2 and 2 configuration. If receptacle #3 is used, possible cross feed or interference from utility circuits one and two can be introduced to computer circuits.

Circuits 1 and 2 provide a pair of designated circuits for general electrical needs, as described for the 3 & 1.

Circuits 4 and 5 provide a pair of designated circuits for computer applications.

Approval/Compliance:

Cetra's electrical system is UL approved, complies with the National Electrical Code (NEC), and is certified for electrical safety to Canadian Standards Association (CSA) standard C22.1 No. 203.
Note: Any field modification of the electrical components voids the UL listing.

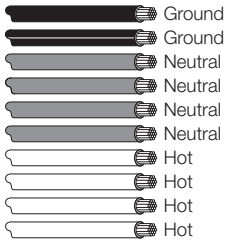
Electrical Service:

Cetra's 8-wire electrical system is rated for 20-amp service. To support the usage, 15-amp convenience receptacles can be placed anywhere along the leg of the electrical connection. In the event that an appliance, such as a larger printer/copier/plotter needs to have a 20-amp receptacle, it is recommended to use a dedicated circuit with a 15/20-amp simplex receptacle. Using 15-amp convenience receptacles will aid in ensuring that no one leg of the system can pull too much current, which could potentially cause the system to trip out and loose power across the entire system.
➤Contact By Design for details on 20-amp simplex receptacles

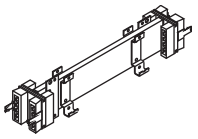
Circuit Configurations

Enhanced 10-Wire Electrical System

Features ➤See page 21
Power & Data Overview 36
Standard 8-Wire System 40



The 10-wire configuration supports work environments having heavy intensity, advanced computerized equipment requirements. 10-wire systems include two 12 gauge ground wires, four 12 gauge neutral wires, and four 12 gauge hot wires.
➤See electrical service info at left.



Powered panels feature factory-installed electrical distribution assemblies in the base wireway. Power distribution assemblies can be field-installed on non-powered panels.
➤See page 37.

Two wiring configurations are possible—3 and 3 or 2 and 2—utilizing the same components.
➤See wiring configurations at right.

Building-to-panel electrical connections can be accomplished from power sources in the wall, floor, or ceiling.
➤See page 38.

Duplex receptacles used for both types of configurations are the same. This simplifies specifications and allows a faster understanding of the system.
➤See page 37.

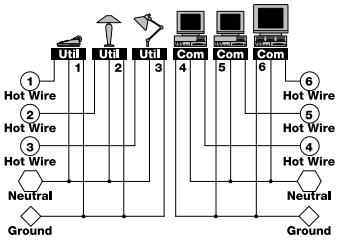
Components used in base wireway applications are also used in mid-wireway applications.

IMPORTANT: Planning actual power supplies and branch circuits must be performed by qualified electricians or electrical engineers familiar with the National Electrical Code and the appropriate local codes. The information provided herein is intended to assist specifiers.

Installations should be in accordance with the NEC. Local codes may vary. Consult a qualified electrical contractor or engineer for proper installation of electrical equipment.

All components are shipped with hardware necessary for installation.

3 and 3 (10-wire):

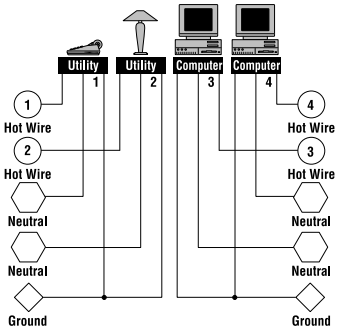


- Three DESIGNATED utility circuits and Three DESIGNATED computer circuits.
- Specify Cetra receptacles #1, #2, and #3 for the designated utility circuits and receptacles #4, #5, and #6 for the designated computer circuits.

Circuits 1, 2, and 3 share a common increased size neutral and ground wire, providing three designated circuits for lighting and other general/utility equipment. Use Kimball Office receptacles AER16, AER26, AER36.

Circuits 4, 5, and 6 share a common increased size neutral and ground wire, providing three designated circuits for computer applications. Use Kimball Office receptacles AER46, AER56, and AER66.

2 and 2 (10-wire):



- Two DESIGNATED utility circuits and two DESIGNATED computer circuits.
- Specify Cetra receptacles #1 and #2 for the designated utility circuits and receptacles #3 and #4 for the designated computer circuits.

Circuits 1 and 2 provide a pair of designated circuits for general electrical needs.

Circuits 3 and 4 provide a pair of designated circuits for computer applications.
Note: The additional two neutral wires featured in the 10-wire system configuration provide an enhanced level of power for installations having higher intensity computer equipment levels.

Approval/Compliance:

Cetra's electrical system is UL approved, complies with the National Electrical Code (NEC), and is certified for electrical safety to Canadian Standards Association (CSA) standard C22.1 No. 203.
Note: Any field modification of the electrical components voids the UL listing.

Electrical Service:

Cetra's enhanced 10-wire electrical system is rated for 20-amp service. To support the usage, 15-amp convenience receptacles can be placed anywhere along the leg of the electrical connection.

Features	➤See page 21
Power & Data Overview	36
Standard 8-Wire System	40
Enhanced 10-Wire System	41

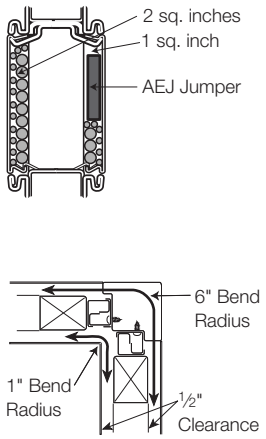
Communication and data cables can be routed through base and mid-wireways.

Communication wireway covers for 30"W or wider panels are available. They are pre-punched to accept data access ports. Only one data opening per wireway cover is available.
➤See page 107.

The opening is left of center to allow proper clearance. This enables ports to be installed in both sides of the Cetra panel. Opening is 1⅜"H x 2¹¹⁄₁₆"W. Only one opening per wireway cover is available.

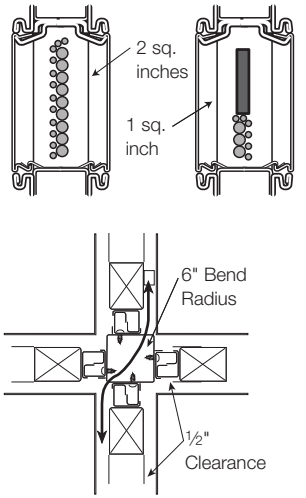
When purchasing ports commercially, verify that the depth of port and size of cover are applicable for proper fit. Data ports can be purchased through the port manufacturer or their distribution network.

L, S, and T Connectors:



Cable capacity when using communication cables is 2 sq. in. **per side** (18 ¼"-diameter cables at 40% fill) for L, S, and T connectors. One sq. in. **per side** of cable capacity (9¼"-diameter cables at 40% fill) is available when combining electrical and communication cabling.

X Connectors:



Due to flow of cable pathway when using “X” connectors (as shown in the illustration above), cable capacity for X connectors is 2 square inches **per connector** when using communication cables only or 1 sq. inch **per connector** when combining electrical and communication cabling.

Related Products

Vertical cable managers are available separately to conceal task light cords.
➤See page 108 to specify.

	48"		**AP4819VS**	577	613	639	677	733

Standard Includes

- Panel
- Attachment brackets

How to Specify

❶ Model
② Side 1 fabric grade
③ Side 1 fabric number
④ Side 2 fabric grade
⑤ Side 2 fabric number

A maximum of two stackable panels may be added to a standard panel. Combined panel height may not exceed 118".

When combining fabric grades on a single panel, add side 1 fabric grade price to side 2 fabric grade price, then divide total by 2 to get the average.

When specifying different fabrics, keep side 1 fabric consistent with the side 1 fabric for the standard ceiling power entry panel.

Features

Overview

Statement of Line ➤See page 112
Application Guidelines 130
Power & Data Overview 146
Electrical Guidelines 152

Welded frames are the backbone of the Xsite system. They provide structural rigidity to the system.

Xsite panels are 3¼" thick.

Ceiling power/data pole allows power and data to be dropped down from above to clusters in open areas that are away from walls and where power/data is not accessible within the floor.

Overhead support brackets used with Xsite Traxx allow for off-module placement of Kimball Office Footprint overhead storage units.

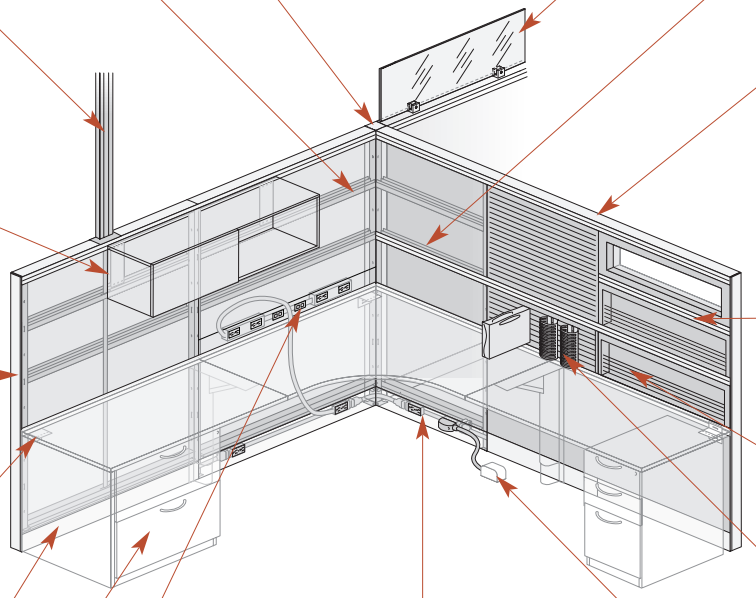
End trims are screwed to frames for a secure fit, and provide a clean aesthetic at the end of panel runs.

Edge support brackets used with Xsite Traxx allow for adjustable support of all Kimball Office worksurfaces.

Base wireway covers provide access to power and data and are included with base wireway frames.

Kimball Office Footprint worksurfaces and storage integrate with the Xsite system.

Connectors and hi-lo trim are available to accommodate change of direction and change of the height.



Technology tile provides access to power and data at 2nd, 3rd, 4th or 5th segments.

Base power harnesses and jumpers distribute power through the base.

Frameless glass adds height to the panel for separation but keeps the look open.

Mid-frame supports provide support for tiles and components and are required wherever Traxx are used.

Top caps are specified separately and can span multiple frames. They are available up to 8 feet long for a seamless appearance.

Top channel provides top lay-in capability.

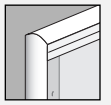
Xsite Traxx allows tile to be independent from frame for monolithic or segmented look.

Storage tiles maximize space by using interior of structure.

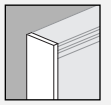
Accessories are available for mounting on Xsite Traxx, and slat tiles or within storage tile. You may also select from work tools and Traxx presentation tools.

Base power entry allows power to enter at the floor, wall, or column. Power can then be distributed to the base and/or jumped up to the power/data or technology tile.

Trim Profiles:

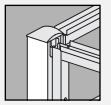


Curved



Flat

Applies to end trim, hi-lo end trim, and top caps.



Flat

Applies to connectors and frameless glass top caps.

Top caps and trim are available in wood finishes or paint.

Electrical:

c UL US LISTED

Class A—Tackable acoustical tiles. *Note: COM must comply with U.L. Standard 1286*

Class B—Laminate tiles

Class C—Wood and painted tiles

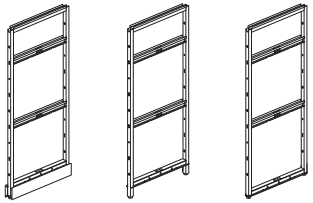
Details



Base Wireway | Open Base | To-the-Floor

Frames are available in 18", 24", 30", 36", 42" and 48" widths and in 2-high (29 1/2"), 3-high (42 1/8"), 3.5–high (49 1/32"), 4-high (54 23/32"), and 5-high (67 5/16") heights. All frames include:

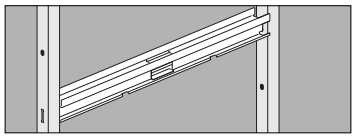
- Mid-frame supports
  - –At the 2-high and 4-high positions on 5-high frames
  - –At the 2-high position on 3-high, 3.5-high, and 4-high frames
- Glides
- Attachment hardware

Steel frames are painted black on base-wireway and to-the-floor frames and available in a variety of paint colors on open-base frames.

Base-wireway frames are available in powered and non-powered models and feature a painted base-wireway cover. Powered models include a power harness.

Open-base frames do not have a base wireway or cover and are open and finished at the bottom. Legs are painted.

To-the-floor frames allow tiles to go all the way to the floor. There is no base wireway.

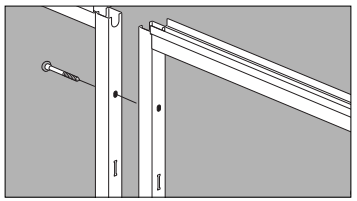


Mid-frame supports are standard at the 2-high position to provide support for worksurfaces. On 5-high frames, mid-frame supports are also standard at the 4-high position to provide support for overhead storage.

Finishes & Materials

- Vertical frame: 16 gauge cold-rolled steel, black
- Horizontal frame: 14 gauge cold-rolled steel, black

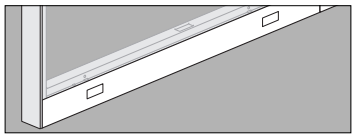
Connections



Frames are attached with bolts that provide consistent alignment from frame-to-frame as well as strength and rigidity to the panel run.

Specially sized, to-the-floor tiles must be specified for the lowest segment on to-the-floor frames to accommodate the extra height. Standard tiles can be used to complete the panel. 5-high to-the-floor frames must be specified with a minimum of two segments. Due to fabric width constraints, a 5-high to-the-floor tile is not available.

Power & Data



Wireway covers for base-wireway frames are available punched or non-punched.

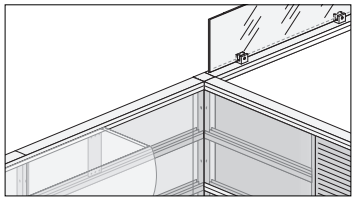
Deep top channel in frames allows for generous top lay-in cabling capacity.

Cutouts for routing cables vertically are provided in the frame's top channel, bottom channel, and mid-frame supports.

Data cabling can also be routed between tiles and frames.

Connectors have two openings below worksurface height (2-high) to allow cable routing behind tiles at connectors.

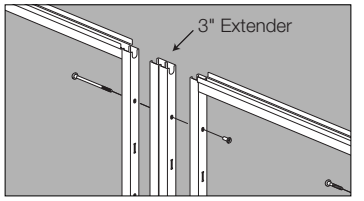
Planning Factors



Mid-frame supports are required wherever Xsite Traxx are used to support tiles. If planning segmented panels, additional mid-frame supports, specified separately, may be required. The mid-frame supports provided at the 2-high and 4-high positions can be relocated if tiles, worksurfaces, and overheads are not mounted at those locations; or if they interrupt the placement of glass, pass-thru, or performance tiles.

Relocation of the mid-frame support on 3.5-high and 4-high frames, or the specification of an additional mid-frame support, will be required when overheads will be mounted to the inside top of the frame to correspond with the bottom of the overhead. Relocation of the mid-frame support is not necessary for center-mounted overheads.

Related Products



3" extenders attach to frames for planning in 3" increments. They consist of two 1 1/2" frame verticals attached together. They are available for use in straight panel runs (in-line), next to a connector, or at the end of a panel run; specify the appropriate designator for the application type. Specify 3" extender to be the same height as the frame or connector to which it will attach. They are not applicable to runs of to-the-floor or open-base frames.

➤See page 174.

Note: Top caps, Traxx, and tiles must all span across the frame and the 3" extender. All models are available in additional 3" increment sizes not shown in the price list. Use electronic specification tools to specify.

Glass, storage, fold down, power/data and pass-thru tiles cannot span across the 3" extender.

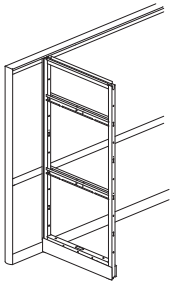
Xsite Traxx and tiles complete the panel frame.

➤See page 137.

Off-Module Frames

Features	➤See page 116
Application Guidelines	130
Power & Data Overview	146
Electrical Guidelines	152

Details



Off-module frames—available in base-wireway, open-base, and to-the-floor models—are used to start a new panel run perpendicular to the existing run without using a connector. They can also be used to start a run from wall-mounted Traxx.

Off-module frames are available in 18"W, 24"W, and 30"W. All frames include:

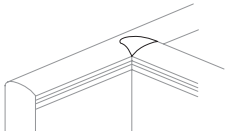
- Mid-frame supports
  - –At the 2-high and 4-high positions on 5-high frames
  - –At the 2-high position on 3-high, 3.5-high, and 4-high frames
- Glides
- Attachment hardware|
- Top cap splice

Steel frames are painted black on base-wireway and to-the-floor frames and available in a variety of paint colors on open-base frames.

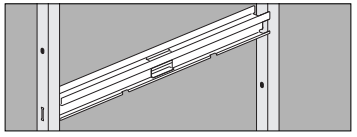
Base-wireway frames are available in powered and non-powered models and feature a painted base-wireway cover. Powered models include a power harness.

Open-base frames do not have a base wireway or cover and are open and finished at the bottom. Legs are painted.

To-the-floor frames allow tiles to go all the way to the floor. There is no base wireway.



Top cap splice, shipped standard with the off-module frame, transitions the top cap at the connection point.

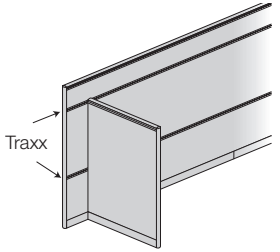


Mid-frame supports are standard at the 2-high position to provide support for worksurfaces. On 5-high frames, mid-frame supports are also standard at the 4-high position to provide support for overhead storage.

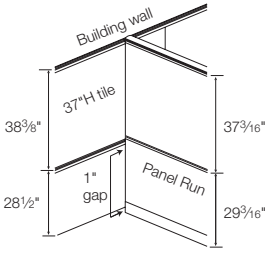
Finishes & Materials

- Vertical frame: 16 gauge cold-rolled steel, black
- Horizontal frame: 14 gauge cold-rolled steel, black

Connections



A minimum of two Xsite Traxx are required to attach an off-module frame to a spine run. One attachment point must be at the uppermost point possible of the off-module connector. The other can vary depending on the location of Traxx on the spine run.



Dimensions are from centerline of Traxx.

Standard wall-mounted Traxx, when installed at proper heights for use with 37"H tiles, will integrate with Xsite Traxx in 5-high applications. Component heights will match if mounting guidelines are followed.

To ensure worksurfaces will be at the same height, use Traxx worksurface brackets for wall-mounted Traxx and Xsite worksurface brackets for Xsite Traxx. Overhead brackets are the same for standard and Xsite Traxx.

A 1" gap (approx.) will occur between the wall and the off-module frame below the bottom wall-mounted Traxx.

Power & Data

Power and data cannot be routed from the spine run into the off-module run.

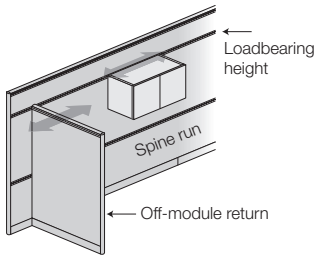
Planning Factors

Return runs started with an off-module frame can provide support for spine runs.

Full-width tiles positioned on the spine run behind the off-module frame allow the off-module run to be easily reconfigured.

Hi-lo return wall can be created using an off-module frame.

In non-loadbearing conditions, the off-module frame may be equal to or less than the height of the spine run.



Loadbearing conditions require the off-module frame run to be equal to the loadbearing height of the spine run.

Mid-frame supports are required wherever Xsite Traxx are used to support tiles. If planning segmented panels, additional mid-frame supports, specified separately, may be required.

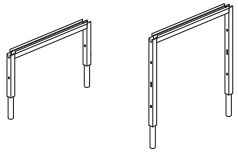
Related Products

Adjustable wall-mount channel may be specified separately to fill the gap below the lowest wall-mounted Traxx if the off-module frame will be exposed.
➤See page 127.

Stacking Frames

Features	➤See page 116
Application Guidelines	130
Power & Data Overview	146
Electrical Guidelines	152

Details



Stacking frames may be added to 2-high, 3-high, 4-high, or 5-high base frames to increase the height of the panel.
IMPORTANT: 3.5-high base frames cannot accept stacking frames.

Stacking frames are available in 1-high and 2-high segments. They include:

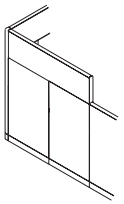
- Welded frame
- Attachment hardware

Finishes & Materials

- Vertical frame: 16 gauge cold-rolled steel, black
- Horizontal frame: 14 gauge cold-rolled steel, black

Connections

One 1-high or 2-high stacking frame may be added on top of a base frame (except 3.5-high) up to a max. of 93¼" including the top cap.



48"W stacking segment can span across two 24"W base structures.
