Pricing Framework

Section 1

Requirements and Recommendations

EA recommends at least one complete EA Tablet System Bundle for each polling location, regardless of the number of precincts and/or precinct parts covered by that polling location. Most counties prefer to allocate two or more units to each separate polling location. EA generally recommends one unit for every 750 registered voters, although the units are capable of processing both far more and far fewer voters individually.

EA is offering 3 types of bundles. The first is the EA Tablet System Bundle which includes all of the required components for one complete, fully operational e-pollbook unit that satisfies Ohio State requirements. The second option includes a magnetic stripe reader built into the printer. The magnetic stripe reader allows the poll worker to not only scan using the camera on the tablet but to swipe the driver license to look up voters. The third solution is the "Cut the Cord" solution. The "Cut the Cord" solution includes the magnetic stripe reader, an external battery for the tablet, and an extra printer battery with charger. This will allow the County to deploy the EA Tablet System without worrying about doing site surveys at every polling location or providing extension cords for power. The "Cut the Cord" bundle will give you enough battery life to last well past a 13 hour Election Day.

Unlike Apple products, each individual EA Tablet System Bundle includes failsafe disaster recovery and backup via Micro SD memory card. This allows a County to deploy only one unit to less populated polling places instead of two saving the County money. The SD card also allows for easier installation of software and data. No internet access or networking required.

EA Tablet System Subscription Pricing is a 5 year recurring software subscription fee that covers various software updates, enhancements, web hosting, the management piece (Synergy), the data conversion (EA Data Converter), helpdesk support, and WebEx training, manuals and poll worker training documents. EA does not charge per voter, per election or per conversion fees.
