Structured Back Broadloom- NSF140 - Recycled Content

Powerbond Cushion (Hybrid Resilient Sheet Flooring) products contain 7 to 32% overall recycled content and include a minimum of 7% post consumer recycled content. Powerbond Cushion products are certified NSF140 Gold by SCS Global Services. Ethos Cushion is the first and only commercial carpet made from polyvinyl butyral (PVB), a non-chlorinated, thermoplastic film recovered from car windshields and safety glass recycling. Total product recycled content ranges from 37% to 62% with a minimum of 37% post consumer content. Ethos is Certified as NSF140 Platinum by SCS Global Services. Ethos Cushion products are 100% recyclable in the company's closed-loop recycling program and are CRI Green Label Plus Certified.

STATE OF OHIO Recycling Program for Flooring

Tandus is pleased to provide the State of Ohio and its eligible customers with a recycling program for floor coverings. Tandus will provide the following:

- Recycling of PVC Backed Carpet Products at No Charge (Carpet Only – based on full trailer loads)
- Recycling of All Other Carpeting - \$1.25 - \$3.00 /square yard
- Take up, packing and shipment to Dalton, Georgia to be negotiated based upon a scope of work review with the customer and to be reviewed by the State of Ohio Procurement Services.

Recycling Program Description

Vinyl backed carpet is the only type of carpet that is currently being fully recycled back into carpet on a commercial scale. Tandus has an extensive, fully operational program to recycle old PVC backed carpet, including its competitors' vinyl products, back into new carpet, and to take back any other type of carpet for appropriate recycling. Tandus Flooring was the first to receive the prestigious Reclamation Facility certification from SCS. To-date the facility has recycled over 215 million pounds of carpet/waste.

Our PVC backed carpet recycling program uses 100% of the material returned, and recycles the entire carpet through an extruder to become the secondary backing of our new PVC backed carpet. In high performance carpets, the secondary backing is the single heaviest component of the carpet, and has the most influence over the overall performance of the carpet.

Tandus Flooring was the first manufacturer in the carpet industry to achieve a complete closed-loop program for all our products that was initiated in 1994. All carpet manufacturing waste has been eliminated through recycling. Our reclamation program enables us to include all post-consumer take-back carpet and pre-consumer manufacturing carpet waste into new recycled content floor coverings. To-date, Tandus Flooring has reclaimed and recycled over 215 million pounds of carpet and waste. Waste to landfill is now less than 0.1 ounce per square yard of manufactured goods. This commitment to and ongoing execution of a closed-loop system is the backbone of all the achievements of Tandus Flooring in leading our industry in environmental responsibility.

We offer a written guarantee that all PVC backed carpet returned to us will be fully recycled, and that none of it will be land filled or incinerated including so called "waste-to-energy" incineration of otherwise improperly disposed of.

Although no current capability exists to recycle other types of carpet fully back into itself, through relationships with other partners we can accept back any carpet type and have it recycled in the most economical and environmentally advantageous manner available. Because different carpet types have differing opportunities, we determine the best process on a case-by-case basis. We will provide our customers with a written description of what will be done with the non-PVC carpet we take back for recycling.

ANSI/NSF 140 Certifications — no other manufacturer has the depth and range of products that are certified at the ANSI/NSF-140 Platinum level, the flooring industry's ANSI-accredited, multi-attribute sustainable assessment for carpet standards. Tandus Flooring has certified ER3[®], Ethos[®] modular and Powerbond[®] products at the Platinum level. Powerbond[®] Cushion and Flex-Aire[®] Cushion Modular achieved ANSI/NSF 140 Gold.

Recycled Content –Tandus Flooring has been the only manufacturer to consistently certify the recycled content in its products for over 10 years. In fact, Tandus Flooring was the first manufacturer to introduce third-party certification to the carpet industry in 2000, thereby demonstrating its accountability to the environment.

Third Party Certifications

Product Line	Overall Recycled Content	Post Consumer Recycled Content	NSF-140 Rating	CRI Green Label Plus
Powerbond [®] ethos [®] Cushion	37 to 62%	Min 37%	Platinum	X
ethos [®] modular	26 to 52%	Min 20%	Platinum	X
ER3 [®] modular	45 to 67%	Min 20%	Platinum	X
Powerbond [®] Cushion	7 to 32%	Min 7%	Gold	X
FlexAire [®] Cushion modular	21 to 40%	Min 4%	Gold	X
Medfloor [®]	7 to 31%	Min 7%	-	X

Note: Product recycled content and NSF 140 has been certified by SCS Global Services. Product recycled content varies by style

FLOOR^{RE}

THE RECYCLING PROGRAM

Mining Building for Resources Instead of the Earth[®]

FLOORE

As one of the world's leading manufacturers of commercial floor coverings, we believe we have a responsibility to provide a better solution than disposing of old carpet in landfills or incinerators. Since the launch of FLOORE in 1994, Tandus Flooring has partnered with thousands of building owners to reclaim and recycle their old vinyl-back carpet. This old carpet is a valuable resource to us as it serves as the feedstock for our award-winning modular and Powerbond products. For our customers, it is an environmentally and fiscally sound alternative to adding to the more than five billion pounds of carpet that is disposed into landfills every year.

Tandus flooring has reclaimed and recycled more than 215 million pounds of carpet and waste. That's more than 240 million square feet of carpet that hasn't gone to landfills.

This amount equals 9 square miles of flooring or enough to cover almost half of the island of Manhattan.

GETTING STARTED

Contact your Tandus Flooring account executive to determine if your vinyl-back floor covering can be recycled. We may require a small sample to confirm. Please note, there is no charge if Tandus Flooring product is replacing the existing carpet.

Your Tandus Flooring account executive will send you a Material Reclamation Request Form. This form must be submitted and approved.

CARPET RECYCLING PROCESS

FREQUENTLY ASKED QUESTIONS

Is there a cost to recycle the carpet?

There is no charge to recycled approved PVC-backed carpet as long as Tandus Flooring products are being purchased to replace the reclaimed carpet.

What if the carpet was manufactured by another company?

No problem. Most vinyl-back (PVC) floor coverings – regardless of the manufacturer – are accepted*. In fact, most of the floor covering we reclaim and recycle – about 75 percent – was made by other manufacturers.

Will Tandus Flooring recycle broadloom carpet?

Broadloom carpet is incompatible with our recycling process. In some cases, Tandus Flooring can facilitate the reclamation of broadloom carpet by third parties.

Is there a minimum or maximum amount that can be reclaimed?

In most cases, Tandus Flooring requires a minimum of 3,500 square yards. That's about enough material to fill a standard 53-foot trailer and provides for return using minimal resources. If the reclaimed material is prepared and loaded to specifications, the trailer should be able to contain 3,800 to 4,000 square yards.

If you have less than 3,500 yards, speak with your Tandus Flooring account executive as we may have a local collection site in your area that can store and combine smaller amounts.

How should the reclaimed material be packaged?

Carpet tile should be stacked (minimum of 48" and maximum of 56") on a pallet and secured to pallet using stretch wrap or plastic banding. Reclaimed Powerbond or vinyl-backed roll goods should be sized to a maximum of 48" by 60" and stacked flat on a pallet.

Can Tandus Flooring provide documentation that the reclaimed carpet has been recycled?

Absolutely – Tandus Flooring will provide sworn certification that all reclaimed carpet returned to us is recycled into new floor coverings.

SCIENTIFIC CERTIFICATION SYSTEMS
SCS-RP-02412

Tandus Flooring's Center for Environmental Innovation is the first third party certified reclamation and recycling center in the floor covering industry.
