isodri® Protective Systems

Less weight and faster drying means more comfort

When you're wearing SCBA and dragging a fully charged 1 3/4" hose line, the last thing you need is your gear sucking up water and adding more weight to what you're already lugging around. Because isodri® Protective Systems sheds water, you're working lighter and more comfortably.

And, how many times have you had to work in wet and clammy turnout gear because it hadn't dried from an earlier run? Fire fighters wearing gear with isodri® Protective Systems report their gear has been dry and comfortable in less than 30 minutes.

How isodri® Works

isodri® is more than just an outer shell that resists water penetration and absorption. It is a complete system of components (outer shell, moisture barrier, thermal barrier and wristlets) that works together to reduce the water in your turnout gear and the dangers that water presents.

Outer shell is treated with Teflon® F-PPE to reduce moisture intake from outside sources such as hose water and rain.

CROSSTECH® black, CROSSTECH® 3-Layer or Gore RT7100™ moisture barrier allows body heat, in the form of vapor, to escape, but keeps liquid out.

Thermal barrier is treated with Teflon® F to shed moisture generated by the body and maintain high thermal performance. Apertured layer of E-89™ (AraFlo®) promotes air permeability to allow vapor released by the body to be more easily transported away from the skin.

Face cloth wicks perspiration away from the body. Filament face cloth enhances lubricity and comfort.

ISO 9001
Registered Firm

File No. A4310

Turnout Outer Shells

Outer Shell Criteria

The outer shell probably has the most demanding role in the total configuration of a turnout. It has two critical functions: to resist ignition from direct flame impingement and to protect the internal layers from rips, tears, slashes, abrasion, etc. Some outer shell materials can have modest impact on TPP tests or can resist water absorption better than others. However, the real test of an outer shell material is its ability to maintain its protective qualities under high thermal loads and its ability to stand up to the rough-and-tumble life on the fireground.

Outer Shell Descriptions

PBI® Matrix

60%/40% Kevlar®/PBI® fabric blend with a matrix of 600 denier filament Kevlar® cables inserted for improved tear and abrasion resistance. Delivers outstanding thermal protective performance and water repellency. Includes Teflon® F/PPE durable water resistant finish from DuPont (developed just for firefighting PPE by Safety Components). Available in natural and black, PBI® Matrix is 7.25 oz/yd² in weight and can be used in isodri® and non-isodri® systems.

Fusion™

A balanced blend of producer-dyed Kevlar® and producer-dyed Nomex® in a rugged 7 oz/yd² ripstop. Woven from 2-ply yarns. Producer dyeing delivers better color performance and consistency, but also reduces stress on the fabric from finishing. Includes Teflon® F/PPE durable water resistant finish from DuPont (developed just for firefighting PPE by Safety Components).

Armor™

A 7.0 oz/yd² twill weave for increased abrasion resistance. It's a blend of 75% Kevlar® (50% filament/50% spun yarns) and 25% Nomex® for increased strength. Available only in natural color and includes Teflon® F/PPE durable water resistant finish from DuPont (developed just for firefighting PPE by Safety Components).

Advance Ultra™

7.5 oz/yd² plain weave with pronounced "ripstop" for added strength. Available only in natural gold color. Higher than average price, but not the most expensive outer shell on the market. Its blend of 60% Kevlar®, 20% Nomex® and 20% PBO® provides outstanding structural integrity and resistance to abrasion and high heat. Super Shelltite™ finish delivers good water resistance.

Advance®

Available in several colors in a 7.0 oz/yd² plain weave with pronounced "ripstop" for added strength. Colors can change significantly due to heat and light exposure. A medium-priced outer shell with good thermal insulation properties at a sensible weight. With 60% Kevlar®/40% Nomex® content and Super Shelltite™ finish, Advance® has good structural integrity, resistance to high heat and good water resistance.

Nomex® IIIA

Available in 7.5 oz/yd² plain weave construction in a variety of colors, as well as undyed natural (off-white). Colors can change due to heat and light exposure. A moderately-priced workhorse fabric with excellent resistance to rips, tears and abrasion. Nomex® IIIA has lower thermal stability under extreme temperatures than many other outer shells because it contains a lower percentage of Kevlar®, the "muscle fiber" in most turnout gear.

Thermal Enhancement System

Semper Dri™ Thermal Enhancement

Semper Dri™ employs 9" of a special Teflon®-treated thermal lining material at the lower half of the legs to reduce absorption so the pants stay drier and lighter. In comparative field tests, garments using the Semper Dri™ system were noticeably lighter in weight after structural firefighting activities and training exercises involving high volumes of water. Semper Dri™ material is also standard in the waterwells of coat sleeves and in the shoulder/yoke area of coat liners.

RETAIL PRICE LIST

Effective January 1, 2012
Price subject to change without prior notice

Turnout Liner Systems

Traditional Liner System

Moisture barrier and thermal liner sewn together.

Separable Liner System

Thermal liner and moisture barrier attach to each other with a combination of zippers and hook and loop. Makes inspection, cleaning, repair and/or replacement easier. Available exclusively on LION Janesville® custom turnout coat and pants models.

Vented Moisture Barrier

Features a circumferential opening at the torso mid-section with two-inch overlap and bartack reinforcements. The vented moisture barrier increases heat loss performance while maintaining thermal and moisture protection. Available exclusively on LION Janesville® custom turnout coat models.

Liner Descriptions

1st Digit - Thermal Liner Code 2nd Digit - Moisture Barrier Code

C6

Glide™ face cloth quilted to 1.5 oz. AraFlo® Dri. 7.0 oz. CROSSTECH® 3-Layer. Nomex® IIIA woven pajama check substrate and a woven liner laminated to a PTFE membrane. 3.0 oz. Nomex® IIIA Chambray Dri face cloth.

C7

Glide™ face cloth quilted to 1.5 oz. AraFlo® Dri. 5.0 oz. CROSSTECH® black. Nomex® IIIA woven pajama check substrate laminated to a PTFE membrane. 3.0 oz. Nomex® IIIA Chambray Dri face cloth.

G7

Face cloth of 50% Nomex®, 30% Lensing FR® and 20% filament Kevlar® quilted to 2.3 oz./yd² of Lensing FR® and aramid and 1.5 oz./yd² AraFlo® Dri. 5.0 oz CROSSTECH® black. Nomex® IIIA woven pajama check substrate laminated to a PTFE membrane. Available only with PBI® Matrix and Armor™ outer shells.

K6

Glide™ face cloth quilted to 2.3 oz. E-89™ Dri and 1.5 oz. AraFlo® Dri. 7.0 oz. CROSSTECH® 3-Layer. Nomex® IIIA woven pajama check substrate and a woven liner laminated to a PTFE membrane.

K7

Glide™ face cloth quilted to 2.3 oz. E-89™ Dri and 1.5 oz. AraFlo® Dri. 5.0 oz CROSSTECH® black. Nomex® IIIA woven pajama check substrate laminated to a PTFE membrane.

K9

Glide™ face cloth quilted to 2.3 oz. E-89™ Dri and 1.5 oz. AraFlo® Dri. 4.6 oz. Gore RT7100™ non-woven aramid laminated to a PTFE membrane.

X7

Glide™ face cloth quilted to 2.3 oz. E-89™ Dri. 5.0 oz. CROSSTECH® black. Nomex® IIIA woven pajama check substrate laminated to a PTFE membrane. 3.0 oz. Nomex® IIIA Chambray Dri face cloth quilted to 1.5 oz. AraFlo® Dri.

D7

Nomex® IIIA Chambray face cloth quilted to 3.75 oz. virgin aramid/para-aramid batt. 5.0 oz. CROSSTECH® black. Nomex® IIIA woven pajama check substrate laminated to a PTFE membrane.

D9

Nomex® IIIA Chambray face cloth quilted to 3.75 oz. virgin aramid/para-aramid batt. Gore RT7100™ PTFE laminated to 3.0 oz. non-woven aramid.

J7

Glide™ face cloth quilted to 3.75 oz. virgin aramid/para-aramid batt. 5.0 oz. CROSSTECH® black. Nomex® IIIA woven pajama check substrate laminated to a PTFE membrane.

J9

Glide™ face cloth quilted to 3.75 oz. virgin aramid/para-aramid batt. Gore RT7100™ PTFE laminated to 3.0 oz. non-woven aramid.

The most technically advanced turnouts available

LION Janesville® and cutting-edge safety are synonymous. For decades, LION Janesville® has led the fight against fire fighter stress by incorporating innovative design features and materials to deliver the most natural, least restrictive movement possible in Personal Protective Equipment.

Standard features on most custom LION Janesville® turnouts

- Extra layer of Semper Dri™ thermal protection added to yoke and shoulders of liner to help guard against compression from SCBA. Semper Dri™ is also placed at the wrists of the coat and lower legs of the pants to reduce water absorption and keep working weight low.
- Ever-Dry™ Reach System reduces vulnerability to water, steam and flame. When you reach, full protection stays on your wrist.
- 42-stitch bartacks at all stress points for added durability.
- Leather reinforcements on cuffs, knees, shoulders and elbows for thermal protection and added wear life.
- Knees with water-resistant Lite-N-Dri™ FR closed-cell cushioning in shell and liner. Won't bind or pull when you're crawling, climbing, bending or kneeling.
- Three-inch contoured comfort collar.
- LION Fire Fighter Recovery Harness™ (Drag Rescue Device or "DRD").
- Liner Inspection System — Opening allows for complete liner inspection of coat and pants liners without opening seams.
- LION Ventilated Trim standard on all garments regardless of trim pattern.

Options

- Choice of outer shell fabric, thermal liner and moisture barrier.
- Separable Liner System.
- Vented Moisture Barrier.
- Choice of coat and fly closure systems.
- Full selection of pockets and other custom options on coat and pants.
- Shoulders, elbows, knees and coat and pants cuffs reinforced with extra layer of outer shell fabric or polymer-coated aramid in place of standard leather. Shoulders, elbows and knees are also available with extra padding.
- Men's and women's sizes.
- Choose from a variety of NFPA-approved trim patterns.
- LION Lumbar Support System provides adjustable support for the back when integrated into LION Janesville® Super Pants™ or V-Force® Pants.
- LION Integrated Rescue Harness™, LION Escape Belt and Personal Resue Systems.
- Contoured throat tab.

Online warranty registration

Taking advantage of warranty protection has never been easier! You can now register your LION Janesville® purchases quickly and easily over the internet at <http://www.lionprotects.com/turnouts-care-and-use>. The short online form also gives you the opportunity to give valuable feedback about the quality of our products and service.

We solicited feedback via warranty registration cards long before our certification to ISO 9001 required us to do so. While the warranty registration cards fulfilled our ISO requirement, you had to fill out the card by hand and mail it back to us. We believe that you will find online registration more convenient.

Look for the warranty registration information that is printed on every LION Janesville® turnout User Instruction, Safety and Training Guide. It reminds you to register your new turnouts and where to find our warranty registration page.

Your feedback helps us to deliver LION Janesville® turnouts that are the best in comfort, safety and durability.

EM1 American Flag

EM5 American Flag

To be in compliance with proper flag etiquette, it is appropriate to wear an American flag patch on the left or right sleeve. When worn on the left sleeve, the union would appear toward the front and the stripes would run horizontally toward the back (EM1). When worn on the right sleeve, it is considered proper to reverse the design so that the union is at the observer's right to suggest that the flag is flying in the breeze as the wearer moves forward (EM5).

MISCELLANEOUS OPTIONS AND HARDWARE

BELT LOOPS

Item #	Description	Fusion, Advance, and Nomex	PBI Matrix Natural, PBI Matrix Black, Advance Ultra and Armor
BL002	Five self-fabric belt loops, each made using two separate 1" x 3" straps that close with 1" x 2" hook and loop. Three loops bartacked even at waist and two at crotch (For Gemtor or similiar harness).	\$41	\$41
BL007	Three belt loops, 4" wide by 3.5" high, 2-layer self fabric, double stitched to pants shell, bartacked all four corners. Std. on PVFM and PVFF pants model.	\$35	\$38
BL008	Five belt loops, .5" wide by 4.5" high, self fabric	\$29	\$29
BL021	Nine self-fabric belt loops, each made using two separate 1" x 3" straps that close with 1" x 2" hook and loop. Seven loops bartacked even at waist and two at crotch (for Gemtor or similiar harness).	\$58	\$58
BL028	1" x 6" self material strap with 1 piece of 1" x 2" hook set to one end and 1 piece of loop set to other end. The strap is set to shell angled between the pocket and welt using three bartacks. (This strap is to guide the PRS tether from the pocket to the harness or belt anchor point).	\$6	\$6
BL032	Three self-fabric belt loops, each made using two separate 1" x 3" straps. One strap has a piece of 1" x 2" hook and one non-logo female snap, the other strap has a piece of 1" x 2" loop and one male snap. (The belt loops are used to hold the removable Class II harness in place).	\$21	\$21
BL033	Four self-fabric belt loops, each made with two separate 1" x 3" straps. One strap has a piece of 1" x 2" hook and one non-logo female snap, the other strap has a piece of 1" x 2" loop and one male snap. Two straps are bartacked at the inside back waist and two straps are bartacked at the inside front waist. (The belt loops are used to hold the removable Class II harness in place).	\$25	\$25

EM1 American Flag

EM5 American Flag

To be in compliance with proper flag etiquette, it is appropriate to wear an American flag patch on the left or right sleeve. When worn on the left sleeve, the union would appear toward the front and the stripes would run horizontally toward the back (EM1). When worn on the right sleeve, it is considered proper to reverse the design so that the union is at the observer's right to suggest that the flag is flying in the breeze as the wearer moves forward (EM5).

MISCELLANEOUS OPTIONS AND HARDWARE

Item #	Description	Fusion, Advance, and Nomex	PBI Matrix Natural, PBI Matrix Black, Advance Ultra and Armor

Men require four measurements to be properly fitted for LION turnout gear. Women require five.

Chest size (available only in even sizes) — 1

- Have the wearer take a deep breath and fill the lungs before measuring.
- Measure over clothing around the fullest part of the chest with the arms at rest.
- Make sure tape measure is pulled taut around circumference of chest.
- Round up to closest even size.

Sleeve length* (graded to chest size) — 2

- Our standard sleeve lengths fit the majority of body types according to their chest sizes.
- Otherwise, have the wearer hold arm straight down at side.
- Measure from the base of the back of the neck, over the shoulder and down the arm to the top knuckle of the little finger where it joins the hand.

Waist (available only in even sizes) — 3

- Waist is measured above pant waist or belt, directly over navel, snug.
- Note belly measurement separately if necessary. (3a)

Inseam (see chart) — 4

- Turnout inseams should be shorter than the wearer’s “street length” to prevent damage to cuffs and stress at seat seams.
- Measure from the crotch down the inside of the leg to bottom of anklebone.
- Round down to nearest standard inseam length.

Women’s, athletic or special sizing

- Please alert us to any women’s, athletic or special sizing so we can use female patterns or make pattern adjustments.
- Remember to specify coat, sleeve and inseam lengths for women.
- Include a hip measurement (5) to ensure proper fit. Measure around the fullest part of the hip area (usually 7" to 8" below the waist).
- If thigh measurement is needed, measure fullest circumference of thigh.

Other suggestions

- Use a sizing set whenever possible.
- Request a demonstration from your dealer.

General Instructions:

1. Use a calibrated tape measure.
2. Refer to most recent measurement specifications. These measurements apply to new garments before wash. Any washed garments are subject to up to 5% shrinkage in any directions, as allowable by NFPA Standard 1971.
3. Remove liner from shell.
4. Measure shell and liner separately.
5. Completely close the closure system.
6. Lay garment on flat surface.
7. Straighten garment to lay flat (fully extended).

Coat Measurements:

Take these measurements from the front side of the coat.

Chest

- a. Measure at underarm bellows seam.
- b. Multiply measurement by 2. This will equal the total chest measurement.

Cuff

- a. Measure straight across end of sleeve.
- b. Multiply measurement by 2. This will equal the total cuff measurement.

Take these measurements from the back side of the coat.

Sleeve

- a. Measure at center back at collar seam, across top shoulder, down outside sleeve, to cuff.
- b. For liner, measure to wristlet seam.

Coat Length

- a. Measure at center back at collar seam to bottom edge of coat.

Shoulder (not available for LION Janesville® Super Coat™)

- a. Measure 2" below neck, horizontally across shoulder below shoulder reinforcement.

Sweep

- a. Open coat shell and/or liner and lay flat. Measure at inside bottom hem of coat or liner from one edge to the other.

***Note:**

Sleeve on V-Force:

- a. Measure at the center back at collar seam, across top shoulder, down outside sleeve to end of extended cuff. Then deduct 1.5" to get the exact sleeve length.
- b. For liner, measure to wristlet seam.

Pants Measurements:

Take these measurements from the front side of the pants.

Front

Waist

- a. Measure straight across at waist of pants at top of fly.
- b. Multiply measurement by 2. This will equal the total waist measurement.

Thigh

- a. Measure at part of leg highest and closest to crotch.
- b. Multiply measurement by 2. This will equal the total thigh measurement.

Knee

- a. Measure straight across at center of knee.
- b. Multiply measurement by 2. This will equal the total knee measurement.

Seat

- a. Measure at widest part below fly.

Take these measurements from the back side of the pants.

Back

Rise

- a. Measure at center of waist to center of crotch.
 - For Traditional Pants, measure to center crotch seam.
 - For Super Pants, measure to center of banded crotch piece.

Inseam

- a. Separate pants legs. Measure from center of crotch to bottom of pants cuff.

Cuff

- a. Measure straight across at leg bottom.
- b. Multiply measurement by 2. This will equal the total cuff measurement.

Checking Your Clothing for Ensemble Compatibility and Proper Fit

WARNING

There are several different styles of protective coats and pants available from various manufacturers. You must make sure that you are wearing coats and pants that are compatible and have adequate overlap to assure adequate protection. Always follow the manufacturer's recommendations on compatible coat and pant models. Failure to match the proper styles of coat and pants could result in severe burns, cuts or abrasions to the lower back and torso area.

A Fire Fighter's Height Affects Overlap

In order to ensure proper overlap, fire fighters who are taller than 5' 8" **MUST ALWAYS** wear a coat that measures 32" or greater from the collar seam to the back hem. Wearing a coat without adequate overlap could result in serious injury. Special care should be given to long-bodied fire fighters of any size to ensure that overlap requirements are met.

Overlap

You must make sure that there is adequate overlap between the coat and the pants, including the outer shell, the thermal barrier and the moisture barrier before using the garment. You will need the assistance of a fellow fire fighter to check these key areas.

To check overlap, the following tests should be performed while wearing your gear **WITHOUT AN SCBA DEVICE**:

- A. NFPA 1500 Standard Position A (Fig. 4A). While standing, reach over head as high as possible with your hands together. There should be no less than two inches of overlap from the lower edge of the inner liner of the coat to the top of the pants.
- B. NFPA 1500 Position B (Fig. 4B): While standing with your hands together and reaching overhead as far as possible, bend forward, then to the left, then to the right and then backwards as much as possible. There should be no less than two inches of overlap from the lower edge of the inner liner of the coat to the top of the pants in any of these positions.
- C. Make sure the lower edge of your pants overlaps the top of your boots by four to six inches. Make sure your gloves and wristlets overlap each other by several inches, leaving no gaps where wrists might be exposed.

2012 LION Customer Policies — Warranty

WARRANTY

LION warrants that all its fire fighter and emergency responder products meet all applicable NFPA standards in the effect at the time of their manufacture and further warrants that such products are free from any defect in workmanship or any patent material defect.

Conditions of use are outside the control of LION. It is the responsibility of the user to inspect and maintain the product to assure it remains fit for its intended purpose. In order to maximize the useful life of these products and maintain the warranty, the products are to be used only by appropriately trained personnel following proper firefighting or emergency response techniques and in accordance with the products' warning, use, inspection, maintenance, care, storage and retirement instructions. Failure to do so will void the warranty.

EXCEPT AS SET FORTH ABOVE, LION MAKES NO OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR USE.

Under the above warranties, LION will repair or replace, at its option, any product which does not meet the above warranties. Such repair or replacement will be the purchaser's sole remedy and LION will not be responsible for any incidental, consequential or other damages based upon or arising in any way from breach of the warranties contained herein or the purchaser's use of such product.

These warranty obligations apply only to any product, part or component which is returned to LION or a LION Authorized Clean and Repair Center with prior authorization and proof of purchase, and which LION agrees to be defective as covered by this warranty.

The word "product" includes the product itself and any parts or labor furnished by LION with the sales, delivery or servicing of the product.

DEFECTS IN WORKMANSHIP AND MATERIALS: Defects in workmanship and materials means poorly manufactured seams, stitching or components (for example, loose or broken seams; zippers or snaps that fall off or do not function properly); and fabrics which have such flaws as holes, uneven spots, weak areas, pilling or other flaws caused by irregularities in their manufacture.

See User Instruction, Safety and Training Guide for exceptions to warranty and information on Useful Life.

Customized fit ... optimum comfort

LION Paul Conway Helmets™ are engineered from a fire fighter's perspective. We combine the time-honored traditions of the fire service with the latest technical advancements in materials, design and manufacturing. The result is a helmet that's light and comfortable, but provides optimum heat and impact resistance.

We believe America's bravest deserve the best. That's what you get with a LION Paul Conway helmet. From the traditional-style American Classic™ and Heritage™, to the sleek modern-style Legacy 5™, to the Liberator™ rescue helmet, we pay attention to all the design and manufacturing details that are essential in delivering the performance you want and deserve. As a result, every LION Paul Conway helmet model offers optimum comfort, fit and safety.

Online warranty registration

Taking advantage of warranty protection has never been easier! You can now register your LION Paul Conway Helmets™ purchases quickly and easily over the internet at <http://www.lionprotects.com/paul-conway-helmets-care-and-use>. The short online form also gives you the opportunity to give valuable feedback about the quality of our products and service.

We solicited feedback via warranty registration cards long before our certification to ISO 9001 required us to do so. While the warranty registration cards fulfilled our ISO requirement, you had to fill out the card by hand and mail it back to us. We believe that you will find online registration more convenient.

Look for the warranty registration information that is printed on every LION Paul Conway fire helmet User Instruction, Safety and Training Guide. It reminds you to register your new helmet and where to find our warranty registration page.

Your feedback helps us to deliver LION Paul Conway Helmets™ that are the best in comfort, safety and durability.

2012 LION Customer Policies — Warranty

WARRANTY

LION warrants that all its fire fighter and emergency responder products meet all applicable NFPA standards in the effect at the time of their manufacture and further warrants that such products are free from any defect in workmanship or any patent material defect.

Conditions of use are outside the control of LION. It is the responsibility of the user to inspect and maintain the product to assure it remains fit for its intended purpose. In order to maximize the useful life of these products and maintain the warranty, the products are to be used only by appropriately trained personnel following proper firefighting or emergency response techniques and in accordance with the products' warning, use, inspection, maintenance, care, storage and retirement instructions. Failure to do so will void the warranty.

EXCEPT AS SET FORTH ABOVE, LION MAKES NO OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR USE.

Under the above warranties, LION will repair or replace, at its option, any product which does not meet the above warranties. Such repair or replacement will be the purchaser's sole remedy and LION will not be responsible for any incidental, consequential or other damages based upon or arising in any way from breach of the warranties contained herein or the purchaser's use of such product.

These warranty obligations apply only to any product, part or component which is returned to LION or a LION Authorized Clean and Repair Center with prior authorization and proof of purchase, and which LION agrees to be defective as covered by this warranty.

The word "product" includes the product itself and any parts or labor furnished by LION with the sales, delivery or servicing of the product.

DEFECTS IN WORKMANSHIP AND MATERIALS: Defects in workmanship and materials means poorly manufactured seams, stitching or components (for example, loose or broken seams; zippers or snaps that fall off or do not function properly); and fabrics which have such flaws as holes, uneven spots, weak areas, pilling or other flaws caused by irregularities in their manufacture.

See User Instruction, Safety and Training Guide for exceptions to warranty and information on Useful Life.

LION TECHNICAL FOOTWEAR™ SIZING INFORMATION

LION Technical FootWear™ boots are made to fit like a shoe – if you are not certain of your size, see your LION Dealer for proper fitting.

Marshall and Commander

Width interpretation is typically: AAA-B = Narrow, C-E = Medium, and EE+ = Wide

Men's Sizes – 5 - 15 (by half sizes)
 Widths – narrow, medium, and wide

Women's Sizes – 5 - 10 (by half sizes)
 Widths – narrow, medium, and wide

*Custom sizes available. For larger sizes, please call for a quote

ONLINE WARRANTY REGISTRATION

Taking advantage of warranty protection has never been easier! You can now register your LION Technical FootWear™ purchases quickly and easily over the Internet at <http://www.lionprotects.com/technical-footwear-care-and-use>. The short online form also gives you the opportunity to give valuable feedback about the quality of our products and service.

We solicited feedback via warranty registration cards long before our certification to ISO 9001 required us to do so. While the warranty registration cards fulfilled our ISO requirement, you had to fill out the card by hand and mail it back to us. We believe that you will find online registration more convenient.

2012 LION Customer Warranty

WARRANTY

LION warrants that all its fire fighter and emergency responder products meet all applicable NFPA standards in the effect at the time of their manufacture and further warrants that such products are free from any defect in workmanship or any patent material defect.

Conditions of use are outside the control of LION. It is the responsibility of the user to inspect and maintain the product to assure it remains fit for their intended purpose. In order to maximize the useful life of these products and maintain the warranty, the products are to be used only by appropriately trained personnel following proper fire fighting or emergency response techniques and in accordance with the products' warning, use, inspection, maintenance, care, storage and retirement instructions. Failure to do so will void the warranty.

EXCEPT AS SET FORTH ABOVE, LION MAKES NO OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR USE.

Under the above warranties, LION will repair or replace, at its option, any product which does not meet the above warranties. Such repair or replacement will be the purchaser's sole remedy and LION will not be responsible for any incidental, consequential, or other damages based up on or arising in any way from breach of the warranties contained herein or the purchaser's use of such product.

These warranty obligations apply only to any product, part, or component which is returned to LION or a LION Authorized Clean and Repair Center with prior authorization and proof of purchase, and which LION agrees to be defective as covered by this warranty.

The word "product" includes the product itself and any parts or labor furnished by LION with the sales, delivery or servicing of the product.

DEFECTS IN WORKMANSHIP AND MATERIALS: Defects in workmanship and materials means poorly manufactured items: including seams, stitching or components (for example, loose or broken seams; zippers or snaps that fall off or do not function properly); and fabrics which have such flaws as holes, uneven spots, weak areas, pilling, or other flaws caused by irregularities in their manufacture.

See User Instruction, Safety and Training Guide for exceptions to warranty and information on Useful Life.
