SmartLifts for Split Shipments

Effective November 2014

Rotary Lift offers the option to split SL orders so that the high pressure inground assembly portion of the lift can be shipped ahead of the rest of the lift. To do this, you should order one high pressure inground kit and one finish kit from the lists below. There is a \$100 list price fee for this option. High pressure inground kits include everything needed to install the inground portion of the lift. Finish kits include the superstructure, power unit and parts box.

***NOTE:** Because of the environment of the typical wash bay application for the Rotary Parallelogram Lift, the entire lift is subjected to harsh cleaning chemicals, road chemicals coming off of the vehicles and constant contact with water and moisture. Even though we take extra precautions to assure that the surfaces of the lifts and listed components of the Wash Bay Kit Option are properly prepared, primed and finished, we do not have any control over the environment and we can only guarantee the surface to be free from rust and other corrosion for a period of one year from the date of installation. Any expressed or implied warranty to the contrary, is excluded and is not covered. In all cases, the standard Rotary Limited Warranty applies. **Washbay lifts are not available for Extended Warranty.**
