✦ Ideal for high traffic areas, aluminum frame consoles withstand in excess of 1,000 lbs. Aluminum frames eliminate exposed edges and protect laminate work surfaces.

✦ A Hamilton Sorter exclusive, the pin cam locking system safely secures sort module at any position on the console. The system easily readjusts toward the front or back to accommodate the reach of varying personnel.

✦ All module and riser edges are sealed with impact-resistant PVC for durability; there are no exposed edges on our casegoods.

✦ Wheels are standard options for Hamilton Sorter's Masterseries and are available on all aluminum framed consoles.

Terms and Definitions

The following glossary defines some of the basic components used in designing a MailCenter. Detailed dimensions and model numbers are indicated in the various sections of this price book.

MASTERseries

SORT MODULES One to six-sections wide, 18" to 48" high, with or without built-in risers. Support sorting shelves in 1" vertical increments. Sort Modules lock to the aluminum console frame and are available with closed back on the Hamilton Sorter Priority Program. Available with open backs and optional plexi-glass display boards and doors on standard lead-time.

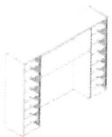
FREESTANDING SORT MODULES A stand-alone version of our sort modules. Three and four sections wide, 48" to 76" high. Available in full height or with optional bottom storage space on the Hamilton Sorter Priority Program. Available with optional doors and sliding reference shelf on standard lead-time.

SORTING SHELVES Available in three basic sizes, shelves come with full-width label channels with clear plastic covers. Shelves are available in clear, black, brown, & grey. Plastic shelves support up to 35 lbs., optional laminate shelves support up to 50 lbs., available on standard lead-time.

Standard: $10\frac{3}{4}$" x $11\frac{3}{4}$" for letter-size documents, literature and forms.

Legal: $10\frac{3}{4}$" x $15\frac{3}{4}$" for legal documents and spreadsheets.

Oversize: $12\frac{3}{4}$" x $15\frac{3}{4}$" for full-size overnight envelopes, computer printouts and newspapers.



READER STATION Reader Stations are sort modules with an opening to accommodate a computer monitor. Opening and binder shelf can be positioned left, right or center.

BULK SORT UNITS Units provide higher shelf clearances for sorting of larger packages. Available in desktop and freestanding units, with flat or angled shelves. Will accommodate a variety of tubs for bulk sorting large quantities of mail.

CONSOLES Used alone or to support sort modules. Available with optional half and full-depth shelves and sliding doors. Widths range from 24" to 84", depths between 24" and 36" and heights of 30" and 36". Ergonomically designed with clear, anodized-aluminum frame.

DUMP RIMS Securely lock to the aluminum console frame to contain mail dumped on the worksurface for sorting. Can be used on individual or ganged consoles.

INTERMEDIATE SHELVES Can be placed inside consoles with full-depth shelves or sliding doors for additional storage space. Can easily be removed and re-inserted. Are available in half and full-depths in sizes to fit all standard-size consoles.

PLATFORMS Provide additional worksurface and clearance for machines. Lock into aluminum console frame for security. Available with optional aluminum extrusion for additional support and keyboard mounting.

Executive Series

CONSOLES Executive Consoles are light-use tables with no aluminum extrusions and are not intended for general mail center use. Available in a basic style, with a full shelf and a full shelf with doors. Consoles with half legs and corner Consoles can be combined to form a larger desking unit.

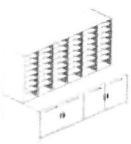
COUNTER CONSOLES Counter Consoles feature a standard console combined with a 16" wide counter surface. Often used in reception areas, Counter Consoles are available in widths ranging from 48" to 72".

CREDENZAS Credenzas feature hinged doors, handles, a recessed 3" kickplate, and interior adjustable shelving. They are also available with or without predrilled mail slots. (See Executive Mail Station for Credenza with slots.)

OVERHEAD UNITS Storing items overhead can dramatically increase available worksurface. Overhead units are available with hinged or retractable doors or even no doors at all. Optional accessories include fabric-covered tackboards and undersurface task lights.

STORAGE UNITS Lateral files are available in two, three, and four drawer units while pedestals offer two and three drawer configurations. Pedestals are available in two heights, one of which permits undertable placement. Lateral files and pedestals all feature gang locks and anti-tip mechanisms.

BOOKCASES Executive Series Bookcases feature extra-deep adjustable shelves to facilitate binder storage. Two widths and five heights combine to accommodate a variety of storage needs.



EXECUTIVE MAIL STATIONS Provide a central location for mail-drop off and collection on each floor or within each department. Not intended for heavy mail-room use. Executive console doors feature optional mail slots for outgoing mail drop-off. Laminated trim offers an executive look for front office environments.

Notes

1. To calculate the sorting inches per column, take the total height of the unit, subtract any riser, subtract 2″ for the top and bottom of the unit. Example: S5-30E6; 36 (total height) - 6 (riser) - 2 (top & bottom) = 28 sorting inches per column X 5 columns = 140 total sorting inches.

2. Shelf supports are adjustable on 1″ increments.

3. Modules with sorting heights of 18″, 24″ and 30″ include five shelves per column, providing a total of six mail slots per column. Modules with sorting heights of 36″, 42″ and 48″ include seven shelves per column, providing a total of eight mail slots per column. Example: An S5-30 has five shelves for each of the five columns for a total of 25 shelves. Six slots for each of the five columns equal a total of 30 mail slots.

4. If a module has a riser, use the sorting height only to calculate the number of shelves included. Example:S5-30E6 has a total height of 36″ but a sorting height of only 30″. Five shelves are included with this module.

5. Additional shelves may be ordered if more slots are required. Shelves may also be deleted if fewer slots are required.

6. Inside Column Dimensions (between shelf supports)

Size	Inside Width	Inside Depth
Standard	10 1/8″	12″
Legal	10 1/8″	16″
Oversize	12 1/8″	16″

7. Modules with 6″ risers that are 54″ or more in width have a center riser leg. All modules with 12″ or 18″ risers feature a 2″ front fascia on the riser. (Clearance = riser height - 2″). All modules with 12″ or 18″ open risers have a 2″ fascia on the riser front and back. Open-back modules with no riser have a 2″ fascia across the upper rear. Open-back modules must have closed-back risers and modules with open-back risers must be closed back. These features help maintain stability of the unit.

8. If module is to be mounted in the center of the table, order a CX console (centered modesty, pg. 39) for additional support.

9. Module width and depth cannot be modified. Reduction in the height of the overall module or riser requires an upcharge.

10. When using a 3″ riser you can retain the overall height of the module, by adding 3″ to the sorting height. For example, an S5-42E6 would become an S5-45E3. Add a $90 modification charge to the price of the original module.

11. Modules with 3″ risers are closed in the front and back of the riser and fasten to the console with a locking cam accessed from outside of the module.

12. All modules are shipped fully assembled. When getting freight quotes, specify Class 100. If dimensions are required, add 3″ to each dimension for packing materials.

Accessories Notes

1. Shelf supports and shelves are available in four colors: clear, black, brown, and grey. Laminated wood shelves should be ordered in laminates with matching edge banding.

2. Shelves have full-width index channels on both the front and rear. The channel is encased with a clear plastic index cover.

3. Color-coded index strips are included with each module, one sheet (18 index strips) per column. If you want a specific color, you must request that color. If no specific color request is made, you will receive assorted colors.

4. Index strips are available in the following colors:

Green	Light Green
Magenta	Electric Yellow
Canary	Blue
Orange	White
Gold	Electric Pink

5. Indexing templates are available, at no charge, via our web site at www.hamiltonsorter.com under the Resources section. Contact Customer Service for more information.

6. These special shelves are also available:
   Laminated wood shelves for additional weight capacity
   Shelves with 3" vertical back for open-back modules
   Shelves with half-size adapters for doubled sort openings.

7. Plexiglass doors are available in clear and smoked acrylic. If you are ordering an open-back sort module, specify whether the doors are going on the front or back of the unit. All doors are hinged on the left side and feature key or butterfly locks.

8. When plexiglass doors are placed on the front of a closed-back sort module, they restrict placement of shelves on the three upper, two middle, and three lower shelf supports. Doors must be removed to reposition shelves in these supports.

9. Specify location of all clear-acrylic display boards. Do not specify display boards for corner sort modules in L- or U-shaped configurations when display boards are specified for adjacent modules.

10. Tasklights and tackboards can be installed in the riser area of sort modules. Please specify fabric for tackboards.

Notes

1. All consoles feature modesty panels located at the rear. The half shelf on CH consoles is also located at the rear.

2. All consoles 36″ deep and 36″ or wider have support bars mounted front-to-rear under the workstation.

3. Wheels can be added to fixed-height consoles with 9″ floor clearance only. When adding wheels, add 'W' to the end of the model number to keep overall console height standard. Wheels must be ordered separately (see pg. 47).

4. Use CX consoles where 48″ depth is required (see pg. 39).

5. Consoles 30″ or 36″ high with 9″ clearances only can be fitted with adjustable legs. Order by adding 'A' to the end of the model number. Console height will adjust on 1/2″ increments between 28″-32″ on 30″ high consoles and 34″-38″ on 36″ high consoles.

6. Adjustable consoles have a 12″ range, from 28″h to 40″h.

7. Crank handles and electrical switches are located on the right-hand side of the consoles.

8. All adjustable consoles feature a 3″ clearance.

9. Roller tables feature 22″w steel ball-bearing rollers mounted on 3″ centers and a styrene top.

10. All consoles are shipped knocked down. When getting freight quotes, specify Class 85. If dimensions are required, use 10″ for the height of the box and add 3″ to the width and depth of the console.

11. Modifications to the width, depth, height of the console and the position of the modesty panel can be made.

See page 60 for color codes.

Notes

1. Three-inch high platforms feature a closed front and closed back. They are fastened to the console with a locking cam accessed from outside the platform.

2. Platforms 6″ high and 54″ or wider, with no aluminum extrusion, feature a center support leg.

3. Platforms higher than 6″ are supported with a 2″ fascia across the front.

4. Platform width should equal the width of the console on which it will be used so that it can fasten to the console at both ends.

5. Platforms 12″ or higher may be ordered with front and back aluminum extrusions by adding 'M' to the end of the model number. Twelve inch platforms feature a 5″ back panel and the 18″ h platforms a 8″h back panel. Both have an open area between the back panel and the extrusion for cable management.

6. A keyboard tray may be mounted on the aluminum extrusion platform and positioned anywhere along the width of the extrusion. Keyboards cannot be mounted on platforms without extrusions. Keyboards must be ordered separately (See page 48 and 51).

7. Platforms without aluminum extrusions have full backs with a $1^{3}/_{16}$″ black, cable-management gasket located at the bottom of the back panel.

8. Platforms are shipped knocked down. When getting freight quotes specify Class 85. If dimensions are required, use 6″ for the height and add 3″ to the width and depth for packing materials.

9. Modifications to the width, depth and height can be made.

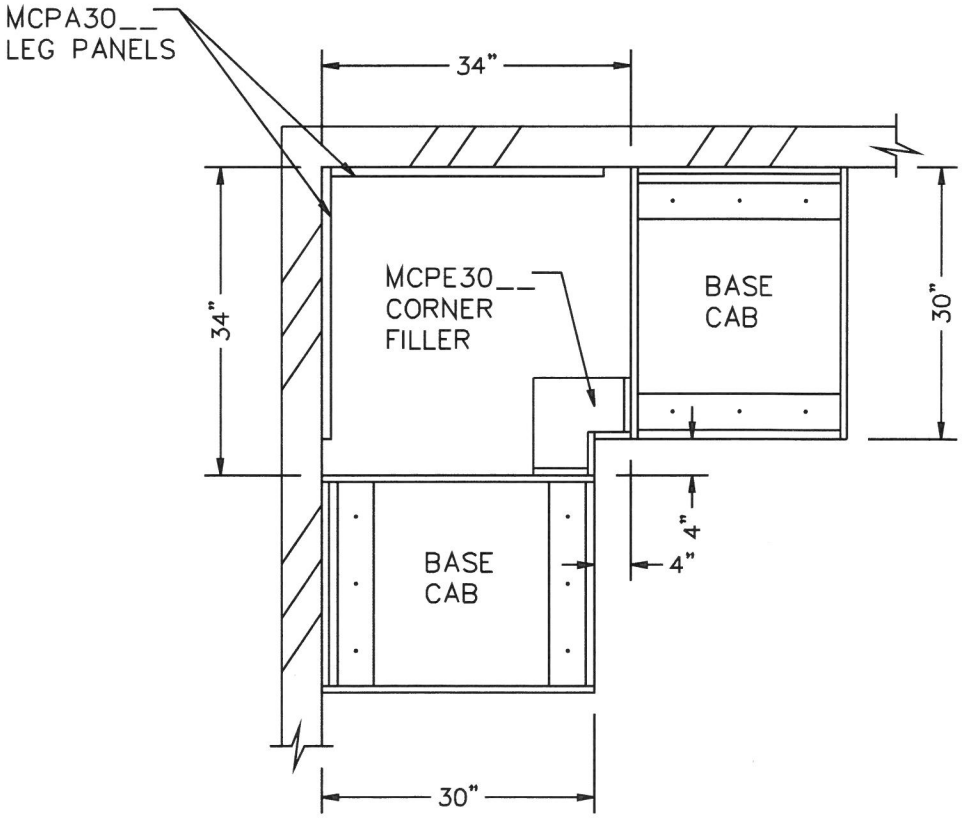
The counter top that extends into the dead corner space must be supported in the corners with (2) leg panels (MCPA24__). See page 49-50 to order.

BASE CABINET CORNER FILLER – 30" DEEP BASE CABINETS

To calculate the corner spacing for a 30" deep base cabinet subtract 34" from each corner wall. This allows you to use the base cabinet corner filler (MCPE30__). The counter top that extends into the dead corner space must be supported in the corners with (2) leg panels (MCPA30__). See page 49-50 to order.



How to Calculate Corners Using Wall Cabinet Corner Fillers

WALL CABINET CORNER FILLER – 13 3/4" DEEP WALL CABINETS

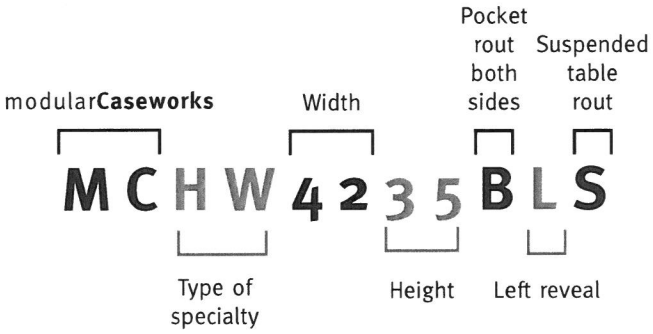
HEADWALLS



Headwalls laminate panels are designed to protect walls. They are hung on walls using a concealed bracket. Pocket routs and reveals may be added for ease of installation.

SUSPENDED TABLES

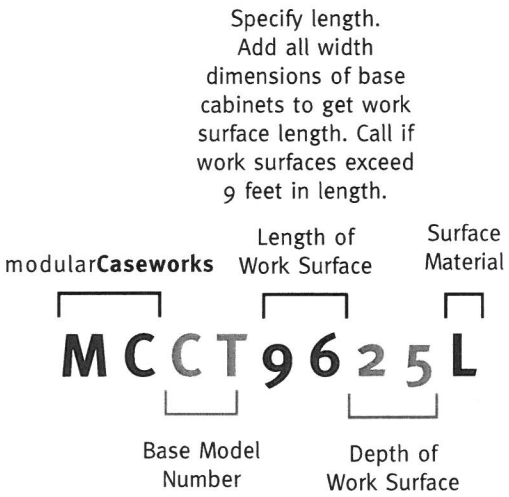
Work Surfaces

How to Specify Your Options



All work surfaces orders must be accompanied by a floor plan to ensure proper lengths and overhangs.

Construction

Work surfaces are constructed of 1 1/16" thick high-pressure laminate (HPL) with industrial grade 40-50 lb. sub-strate backed with a .027 phenolic backer. When available, work surfaces are edged with 2mm impact resistant PVC edgebanding. Work surfaces are attached by wood screws (supplied) through the nailer strips on the top of the base cabinets.

The model numbers on page 36 and 37 represent the standard HIgh Pressure Laminate surface. For special surfaces, add the corresponding letter to the end of the model number and calculate the appropriate cost (square foot of surface x cost per square foot). Other surfaces are available at the following cost per square foot:

Add to Model #	Surface	Cost Per Square Foot
C	Chemical Resistant	$ 38
M	Marmoleum (bacterial resistant laminate)	32
H	High Ware (5 x the abrasion/scuff resistant laminate)	24
P	Phenolic Resin	95
E	Epoxy	$ 98
S	Solid Surfacing	From $97 to $182 per square foot depending upon color and manufacturer. Integrated sinks available from $577 to $650.
T	Stainless Steel	Call for Pricing

*Call for availability and costs of other work surfaces.

Pricing Formula

$$\frac{\text{Width in Inches x Depth in Inches}}{144} \times \text{Cost Per Square Foot} = \text{Price}$$

Pricing Example

$$\frac{96 \times 25}{144} \times 26 = \$433$$

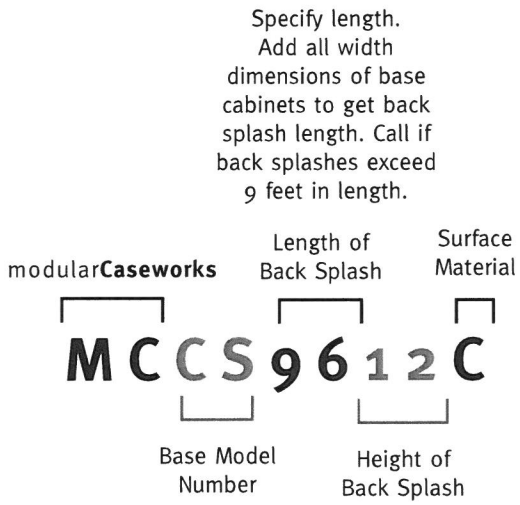
Back Splash

How to Specify Your Options



All back splash orders must be accompanied by a floor plan to ensure proper lengths and overhangs.

Construction

Back splashes are used to protect walls and to hide gaps caused by bowed or unsquare walls. They are constructed of $1^{1}/_{16}$" thick high-pressure laminate (HPL) with industrial grade 40-50 lb. sub-strate backed with a .027 phenolic backer. When available, back splashes are edged with 1.5mm impact resistant PVC edgebanding. Back splashes are attached by installation crew. Suggested means of attaching are contractor grade adhesive like liquid nail (supplied by installer).

The model numbers on pages 39 and 40 represent the standard HIgh Pressure Laminate surface. For special surfaces, add the corresponding letter to the end of the model number and calculate the appropriate cost (square foot of surface x cost per square foot). Other surfaces are available at the following cost per square foot:

Add to Model #	Surface	Cost Per Square Foot
C	Chemical Resistant	$ 38
M	Marmoleum (bacterial resistant laminate)	32
H	High Ware (5 x the abrasion/scuff resistant laminate)	24
P	Phenolic Resin	95
E	Epoxy	$ 98
S	Solid Surfacing	From $97 to $182 per square foot depending upon color and manufacturer. Integrated sinks available from $577 to $650.
T	Stainless Steel	Call for Pricing

*Call for availability and costs of other work surfaces.

Pricing Formula

$$\frac{\text{Width in Inches} \times \text{Depth in Inches}}{144} \times \text{Cost per Square Foot} = \text{Price}$$

Pricing Example

$$\frac{96 \times 12}{144} \times 26 = \$208$$
