Total \$ 232,113.07 \$ 235,701.69 \$ 240,810.83
AWARD

Award: The contract will be awarded to the lowest responsive and responsible bidder by market basket total and catalog discount pricing. Market basket total will be determined by multiplying the unit cost by the estimated usage listed in the bid and then adding each of the totals together to arrive at a total for each market basket. A contractor maybe awarded to one or both market baskets with the corresponding catalog discount pricing.

Evaluation: Bids will be evaluated in accordance with Article I-17 of the "Instructions to Bidders". In addition, the state will: base the award by multiplying the estimated annual usage with the unit price offered for each line item and then summed by market basket to determine the low lot total for each market basket. Catalog discount will be a discounted rate by percentage that is to be given for all catalog items that are not listed in market baskets A and/or B. Offered discount will then be applied to the summed low lot total for each market basket to determine the lowest most responsive and responsible bidder. Failure to bid all quantities within a line item in a market basket may deem the response for that item not responsive and no further consideration for award will be given for that category. All quantities shall be bid to be considered for award.
