

**Exhibit I**

<b>Product Name</b>	<b>Description</b>	<b>Unit of Measure</b>	<b>State Price</b>
<b>Architect Sr.</b>	Establishes information requirements for enterprise-wide or large-scale information systems, databases, and/or networks. Designs architectures that include software, hardware, and communications solutions to support the total requirements, as well as provide for present and future cross-functional requirements and interfaces. Evaluates compatibility of information system development efforts with agency architectures and recommends appropriate adjustments. May provide consulting support and task direction to team members.	Hour	\$203.70
<b>Business / Systems Analyst II</b>	Senior staff professional with general knowledge of the domain area. Performs tasks requiring little independent judgment. Works at the task level with supervision and guidance from senior staff. Analyzes and evaluates moderately complex user requirements by coordinating with the user to define the problem, data availability, report requirements, and system design problems. Defines system objectives and prepares system design specifications. Analyzes alternative means of deriving input data to select the most accurate, feasible, and economical methods. Defines input and output file specifications including file organization. Defines controls, conversion procedures, and system implementation plans. May provide task direction to team members.	Hour	\$145.50
<b>Database Administrator III</b>	Designs, develops, and implements highly complex database applications. Analyzes and determines informational needs and elements, data relationships and attributes, proposed manipulation, data flow and storage requirements, and data output and reporting capabilities. Defines logical attributes and interrelationships, and designs data structures to accommodate database production, storage, maintenance, and accessibility. May provide task direction to team members.	Hour	\$194.00
<b>ERP / COTS / SME Consultant III</b>	Provides highly technical expertise and guidance in areas such as ERP, SCM and CRM. Has specialized training and expertise using products such as Oracle Financials, Siebel, SAP, PeopleSoft, and Avaya. Develops and applies advanced methods, theories, and research techniques in the investigation and solution of complex and difficult requirements and problems requiring the expert application of advanced knowledge. Provides technical consultation to other organizations. May provide task direction to team members.	Hour	\$218.25
<b>IT Consultant Sr.</b>	Provides senior-level analytical and program support, and is focused on providing high performance work. An IT Senior Consultant contributes to engagement work plan development and often leads less complex engagement tasks to completion within scope and budget. Serves as a senior-level analytical correspondent within engagement team. Assumes responsibility for contributing to work plan development, reaching engagement milestones, and may lead specific project tasks. Applies business modeling, process modeling, and business design techniques. Conducts analysis of appropriate consulting tools to satisfy program requirements, and creates project deliverables. Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager. This position performs analyses and makes diagnoses, as well as defines symptoms and problems, and develops conclusions.	Hour	\$203.70
<b>Program Manager</b>	Manages programs/projects. Responsible for overall direction, control and reporting of projects. Provides technical and management guidance to ensure all technical, schedule and cost objectives are achieved successfully. Responsible to provide client interface. Responsible to develop project documentation including budgets, project schedules and various planning and implementation documents. Responsible to manage project teams. Responsible to determine staffing needs and acquire qualified resources.	Hour	\$242.50

Product Name	Description	Unit of Measure	State Price
Programmer / Developer III	Develops application & system software using modeling, sequence analysis, structural analysis & time series analysis. Duties include development of information technology applications and systems software. Computing platforms include the agency scientific computing environment including, but not limited to, parallel processing systems, supercomputers, real time systems, and scientific workstations. Project areas will include, but are not limited to, modeling, sequence analysis, structural analysis, time series analysis, network, prototyping, simulation, and database interface and image processing.	Hour	\$184.30
Quality Assurance / Quality Engineer / Testing Technician Sr.	Performs highly complex tasks related to specialized inspection and testing of project output to ensure that quality standards are met. Develops and refines processes related to quality control and project failure identification and design standards verification. Reviews project development documentation to ensure specifications are designed to meet inspection and testing standards. Initiates corrective action for procedural, product, or process deficiencies. Provides feedback on inspection and test trends, returns, and vendor performance. May participate in and may lead audits. May provide task direction to team members.	Hour	\$116.40
Software / Systems Engineer Sr.	Develops and applies advanced methods, theories, and research techniques in the investigation and solution of complex and advanced software applications and problems. Plans, conducts, technically directs, and evaluates projects or major phases of significant projects, coordinating the efforts of engineers and technical support staff in the performance of assigned projects. Recommends corrections in technical applications and analysis. Evaluates vendor capabilities to provide required products or services. Provides technical consultation to other organizations. Excludes individuals whose responsibilities are primarily in applications programming.	Hour	\$155.20
Technical Writer / Editor Sr.	Researches, organizes, writes, edits, and produces data for a wide variety of highly complex technical publications. Recommends overall organization and layout, editorial standards, and publication methods. Coordinates publication with outside sources and vendors as needed. Develops department editing standards and styles. Checks document for spelling, grammar, and content problems. Interviews engineers and other technical personnel, as needed. May provide task direction to team members.	Hour	\$145.50
