Application Architect I	Development Consultants Inc.	2017-Application Architect I	Application Architect I (04/06/2017 through 04/05/2018) Responsible for the design and development of new software products. Provides guidance and leadership to the development team on designing complex software systems. Acts as a high level technical expert and addresses issues relating to systems integration and compatibility. Works with project managers, developers, and end users to ensure application designs meet business requirements.	Hour	117.95
Application Architect I	Development Consultants Inc.	2018-Application Architect I	Application Architect I (04/06/2018 through 04/05/2019) Responsible for the design and development of new software products. Provides guidance and leadership to the development team on designing complex software systems. Acts as a high level technical expert and addresses issues relating to systems integration and compatibility. Works with project managers, developers, and end users to ensure application designs meet business requirements.	Hour	119.96
Application Architect I	Development Consultants Inc.	2019-Application Architect I	Application Architect I (04/06/2019 through 04/05/2020) Responsible for the design and development of new software products. Provides guidance and leadership to the development team on designing complex software systems. Acts as a high level technical expert and addresses issues relating to systems integration and compatibility. Works with project managers, developers, and end users to ensure application designs meet business requirements.	Hour	122.00
Application Architect I	Development Consultants Inc.	2020-Application Architect I	Application Architect I (04/06/2020 through 04/05/2021) Responsible for the design and development of new software products. Provides guidance and leadership to the development team on designing complex software systems. Acts as a high level technical expert and addresses issues relating to systems integration and compatibility. Works with project managers, developers, and end users to ensure application designs meet business requirements.	Hour	124.07
Application Architect I	Development Consultants Inc.	2021-Application Architect I	Application Architect I (04/06/2021 through 04/05/2022) Responsible for the design and development of new software products. Provides guidance and leadership to the development team on designing complex software systems. Acts as a high level technical expert and addresses issues relating to systems integration and compatibility. Works with project managers, developers, and end users to ensure application designs meet business requirements.	Hour	126.18
Application Architect II	Development Consultants Inc.	2017-Application Architect II	Application Architect II (04/06/2017 through 04/05/2018) Responsible for the design and development of new software products. Provides guidance and leadership to the development team on designing complex software systems. Acts as a high level technical expert and addresses issues relating to systems integration and compatibility. Works with project managers, developers, and end users to ensure application designs meet business requirements. Estimates size and schedule for software enhancements. Reviews existing programs and assists in making refinements, reducing operating time and improving current techniques. Responsible for program design, coding, testing, debugging and documentation. Instructs, directs, and checks the work of other task personnel. Responsible for quality assurance review and the evaluation of existing and new software products.	Hour	146.03
Application Architect II	Development Consultants Inc.	2018-Application Architect II	Application Architect II (04/06/2018 through 04/05/2019) Responsible for the design and development of new software products. Provides guidance and leadership to the development team on designing complex software systems. Acts as a high level technical expert and addresses issues relating to systems integration and compatibility. Works with project managers, developers, and end users to ensure application designs meet business requirements. Estimates size and schedule for software enhancements. Cloud Architect	Development Consultants Inc.	2017-Cloud Architect	Cloud Architect (04/06/2017 through 04/05/2018) Designs cloud infrastructure, virtual private cloud, virtual private network, relational database services, auto scaling, and compute resources to meet customers' requirements. Provides expertise in high availability, contingency planning, and automated provisioning. Responsible for cloud management and monitoring. Designs solutions for various deployment models (Private, Public, Community and Hybrid) and service models including Infrastructure as a Service (IaaS), Platform as a service (PaaS), Software as a Service (SaaS) and emerging cloud services to optimize the essential characteristics of cloud computing. Advices on storage and security solutions to securely store data in multi-tenancy environments. Collaborates with enterprise architecture team and other stakeholders to determine enterprise tools, technologies and processes. Establishes corporate cloud computing architecture policies and standards in compliance with appropriate security levels and governance in accordance with best practices prescribes by the National Institute of Standards and Technology (NIST), Federal Information Security Management Act (FISMA), Federal Information Processing Standard (FIPS), Office of Management and Budget (OMB) and Federal Risk and Authorization Management Program (FedRAMP). Responsible for delivering an end-to-end cloud architecture solution across all domains.	Hour	161.60

Cloud Engineer	Development Consultants Inc.	2017-Cloud Engineer	Cloud Engineer (04/06/2017 through 04/05/2018) Provides direction on designing cloud infrastructure capable of supporting a number of applications in the cloud with an emphasis on scalability, automation, performance and availability. Oversees the installation, provisioning, configuration, operation and maintenance of required hardware and software related to cloud computing infrastructure components. Provides guidance and sets standards on migrating internal and external organizational projects to a cloud computing environment including migration of existing data centers to a cloud computing environment. Provides expertise on cloud implementations and researches emerging trends and technologies related to cloud engineering. Implements prescribed solutions for various deployment models (Private, Public, Community and Hybrid) and delivery models including Infrastructure as a Service (IaaS), Platform as a service (PaaS), and Software as a Service (SaaS). Collaborates with security analysists, architects and engineers to define and implement the best solutions for the technical infrastructure layer in a cloud environment.	Hour	149.62
Cloud Engineer	Development Consultants Inc.	2018-Cloud Engineer	Cloud Engineer (04/06/2018 through 04/05/2019) Provides direction on designing cloud infrastructure capable of supporting a number of applications in the cloud with an emphasis on scalability, automation, performance and availability. Oversees the installation, provisioning, configuration, operation and maintenance of required hardware and software related to cloud computing infrastructure components. Continuous Integration Engineer I	Development Consultants Inc.	2018-Continuous Integration Engineer I	Continuous Integration Engineer I (04/06/2018 through 04/05/2019) Develops and documents configuration management processes and procedures to meet the scope and complexity of systems. Maintains the CM environment and performs change control and configuration audits consistent with industry standards. Controls the change process so that only approved and validated changes are incorporated and promoted from Dev to QA to Prod. Implements version control process for hardware and software systems. Provides guidance on the selection and use of configuration management tools to store, track, and manage configuration artifacts. Creates build scripts and promotes those scripts within the software build process. Ensures that the development, test and production environments are identical in configuration to avoid inconsistencies with in environments.	Hour	93.11

Enterprise Architect	Development Consultants Inc.	2017-Enterprise Architect	Enterprise Architect (04/06/2017 through 04/05/2018) Responsible for the long-term strategic planning of IT systems to improve functionality and efficiency. Provides guidance on integration and synchronization of disparate technologies to improve cost and increase productivity. Develops policies, standards and guidelines that direct the selection/development, implementation and use of technologies. Collaborates with other IT stakeholders to provide an architecture solution that is reliable, adaptable and scalable. Addresses risks associated with IT assets through the development, use and recommendation of appropriate standards and security policies. Analyses technology trends relating to security, infrastructure, and development, and provides technical vision. Collaborates with senior level technical staff to integrate project requirements while complying with industry's standard practices and SOA methodologies. Documents and presents SOA methodologies, other architectural principles and technical solutions to senior staff and IT stakeholders.	Hour	142.05

Performs a variety of tasks related to systems design, integration and implementation. Provides quality assurance review and the evaluation of new and existing software and hardware. Coordinates with senior management and technical personnel to ensure problem resolution and customer satisfaction.	Hour	120.00
Senior Systems Engineer I	Development Consultants Inc.	2018-Senior Systems Engineer I	Senior Systems Engineer I (04/06/2018 through 04/05/2019) Responsible for the design and implementation of new systems. Performs a variety of tasks related to systems design, integration and implementation. Provides quality assurance review and the evaluation of new and existing software and hardware. Coordinates with senior management and technical personnel to ensure problem resolution and customer satisfaction.	Hour	122.04
Senior Systems Engineer I	Development Consultants Inc.	2019-Senior Systems Engineer I	Senior Systems Engineer I (04/06/2019 through 04/05/2020) Responsible for the design and implementation of new systems. Performs a variety of tasks related to systems design, integration and implementation. Provides quality assurance review and the evaluation of new and existing software and hardware. Coordinates with senior management and technical personnel to ensure problem resolution and customer satisfaction.	Hour	124.11
Senior Systems Engineer I	Development Consultants Inc.	2020-Senior Systems Engineer I	Senior Systems Engineer I (04/06/2020 through 04/05/2021) Responsible for the design and implementation of new systems. Performs a variety of tasks related to systems design, integration and implementation. Provides quality assurance review and the evaluation of new and existing software and hardware. Coordinates with senior management and technical personnel to ensure problem resolution and customer satisfaction.	Hour	126.22
Senior Systems Engineer I	Development Consultants Inc.	2021-Senior Systems Engineer I	Senior Systems Engineer I (04/06/2021 through 04/05/2022) Responsible for the design and implementation of new systems. Performs a variety of tasks related to systems design, integration and implementation. Provides quality assurance review and the evaluation of new and existing software and hardware. Coordinates with senior management and technical personnel to ensure problem resolution and customer satisfaction.	Hour	128.37
Senior Systems Engineer II	Development Consultants Inc.	2017-Senior Systems Engineer II	Senior Systems Engineer II (04/06/2017 through 04/05/2018) Responsible for the design and implementation of new systems. Performs a variety of tasks related to systems design, integration and implementation. Provides quality assurance review and the evaluation of new and existing software and hardware. Coordinates with senior management and subordinate technical personnel to ensure problem resolution and customer satisfaction. Makes recommendations, if needed, for approval of major systems integration. Prepares milestone status reports and delivers presentations on the system concept to colleagues, subordinates, and end user representatives.	Hour	150.39
Senior Systems Engineer II	Development Consultants Inc.	2018-Senior Systems Engineer II	Senior Systems Engineer II (04/06/2018 through 04/05/2019) Responsible for the design and implementation of new systems. Performs a variety of tasks related to systems design, integration and implementation. Provides quality assurance review and the evaluation of new and existing software and hardware. Coordinates with senior management and subordinate technical personnel to ensure problem resolution and customer satisfaction. Makes recommendations, if needed, for approval of major systems integration. Prepares milestone status reports and delivers presentations on the system concept to colleagues, subordinates, and end user representatives.	Hour	152.95
Senior Systems Engineer II	Development Consultants Inc.	2019-Senior Systems Engineer II	Senior Systems Engineer II (04/06/2019 through 04/05/2020) Responsible for the design and implementation of new systems. Performs a variety of tasks related to systems design, integration and implementation. Provides quality assurance review and the evaluation of new and existing software and hardware. Coordinates with senior management and subordinate technical personnel to ensure problem resolution and customer satisfaction. Makes recommendations, if needed, for approval of major systems integration. Prepares milestone status reports and delivers presentations on the system concept to colleagues, subordinates, and end user representatives.	Hour	155.55
