Creating a cleaner, safer world

Since 1870, Tennant Company has been creating a cleaner, safer world. We are committed to improving the quality of our indoor environments, while reducing the impact of cleaning on the outdoors.

Product Safety Certifications and Approvals

Carpet and Rug Institute (CRI) – Green Label Certified

To qualify for Green Label, vacuums and sweepers must go through stringent testing that measures soil removal, dust containment, and carpet appearance.

Carpet and Rug Institute (CRI) – Seal of Approval

To qualify for seal of approval, extractors must undergo stringent testing that measures soil removal, water removal, and texture retention.

National Floor Safety Institute – NFSI Certified

NFSI certification ensures a product has passed a 2-phase testing process, proving the floor product helps to reduce potential for slip-and-fall accidents.

Green Seal – GS-37 Certified Detergents

Green Seal evaluates and certifies cleaning products based on criteria such as the toxicity of the product, skin and eye irritation, skin sensitization, combustibility, toxicity to aquatic life, and packaging.

Registered by NSF International

NSF International is an independent, not-for-profit organization which registers compounds, such as cleaning agents, used in and around food establishments. NSF Registration ensures that formulation and labels on these products meet appropriate food safety regulations.

U.S. Green Building Council (USGBC) – LEED

USGBC created LEED (Leadership in Energy and Environmental Design®) to recognize U.S. standards for high-performance and sustainable building environments. The USGBC recognizes products that can contribute to LEED and LEED-EB (existing building) points. 

Underwriters Laboratories (UL)

Underwriters Laboratories is a United States nationally recognized testing laboratory.

ETL Testing Laboratories

ETL Testing Laboratories is a United States nationally recognized testing laboratory.

Tennant Company Cleaning Technologies

Your facility requires safe and effective cleaning technologies to get the results you and your staff demand. Tennant Company offers a full line of safe, supportive and innovative cleaning solutions.

ec-H2O™ – Release the Power of Water

ec-H2O™ electrically converts water to perform like a powerful detergent. This chemical-free technology removes the environmental and human health issues associated with daily cleaners; all while eliminating costly chemical purchases. The result is a superior clean, healthier environment, increased employee safety and reduced operations costs.

FaST – The Safe Scrubbing Alternative®

FaST is the best way to meet the highest cleaning standards using 70% less solution. That's because FaST foam cleans so well it not only captures existing soil, it also removes old, slippery detergent residues. The result is a cleaner, higher-traction floor.

FaST does not require measuring or mixing and cleans up to 1,000,000 square feet per FaST-PAK®. FaST detergent is available in 3 formulas: FaST 365 (Neutral pH Daily Cleaner), FaST 665 (Neutral pH Heavy Duty Cleaner), FaST 965 (Heavy Duty Degreaser Cleaner).

READYSPACE®

Carpets cleaned with ReadySpace are dry and ready for use in less than 30 minutes. Turn your just-cleaned carpet spaces around quicker, keep rooms open for traffic longer, and clean high-traffic areas more often with ReadySpace technology.

Using up to 80% less water to clean and leaving up to 90% less water in the carpet, ReadySpace helps reduce mold and bacteria growth and leaves cleaner, healthier spaces.

UPRIGHT VACUUMS

Achieve your high cleaning standards with the durable, lightweight, and worry-free operation of Tennant upright vacuums. Innovative designs improve operator comfort and maximize productivity for reliable performance you can trust.

SCRUBBERS

Maintain a clean, safe and productive environment with our industry-leading scrubbers. Look for machines featuring ec-H2O™ or FaST® technologies. Ec-H2O electrically converts plain tap water into a powerful cleaning solution for chemical performance with earth-friendly results. FaST is the safe scrubbing alternative, removing old, slippery detergent residue, FaST increases floor traction by 21 percent.

Applications

- Administrative Offices
- Barracks and Dormitories
- Classrooms and Auditoriums
- Colleges and Universities
- Command Centers/Post Exchanges
- Commissaries
- Convenience Stores
- Hangars
- Officer/NCO/Enlisted Men's Clubs
- Hospitals/Healthcare Facilities
- Maintenance Contractors
- Fleet Maintenance Facilities (Motor Pools)
- Manufacturing Facilities
- Office Buildings
- Parking Garages
- Post Offices
- Grocery
- Recreation and Fitness Centers
- Restaurants
- Retail Outlets
- Schools
- Shopping Malls
- Warehouses and Storerooms

Model 5700 Walk Behind Auto Scrubbers

Available with 28" (700mm), 32" (800mm) or 36" (900mm) cleaning paths and either disk or cylindrical scrub heads. The 28" and 32" scrub heads come standard with FaST® Foam Action Scrubbing Technology (except the EE versions). The 28", 32" and 36" scrub heads can also be equipped with ec-H2O™ Cleaning Technology (except the EE versions). All units feature polyethylene 30 gallon solution / 40 gallon recovery tanks, heavy duty cast aluminum scrub heads and squeegee assemblies, linatex squeegee blades, parabolic squeegee design, sealed transaxle, no-tools pad/brush and squeegee blade change, adjustable height operators console, pneumatic non-marking black tires, auto vac fan, water and brush stop/start with propel, hour meter, battery level indicator and fully variable down pressure. Comes in standard or XP versions. XP version includes one-button scrubbing and auto squeegee lift. Heavy-Duty (HD) version includes 1 HP brush motors, 335AH batteries and 30 amp charger. EE version for hazardous environment use. Complete package includes pad drivers or brushes, 6 batteries (235AH, 6 volt) and 20 amp charger. FaST® version includes one FaST-PAK® 365 or 665 cleaning cartridge.

SWEEPING BRUSHES

Tennant sweeping brushes are built to last. Manufactured with premium, heavy-duty raw materials and a unique spline drive system, these brushes last longer and ensure superior performance by efficiently transferring power from hub to brush.

Full-Fill – Designed with a dense pattern for trapping sand, dust and other fine debris

Sand Wedge – A high-density brush with a zigzagged pattern that creates “wedges” of space to effectively pick-up fine debris.

Full-Fill Tube Broom – Heavy-gauge polypropylene fill material provides superior sweeping performance on uneven or irregular surfaces.

Window Brush – A patented brush with open “windows” to trap light litter.

6/8 Double Row – Bristles pick up fine debris while the spacing between the rows effectively traps bulkier litter.

Patrol Brush – Wider spaced rows effectively pick-up bulky litter during high-speed sweeping.

Side Brushes – Round, flared design reaches into corners or along edges, pushing debris in front of the sweeper for pick up by the main broom.

SCRUBBING BRUSHES

Long-life disk and cylindrical brushes feature plastic backings to protect against warping and splitting. Drain holes help flush water and grit from high-wear spots to protect the machine’s drive plug and ensure optimum spin rates.

Cylindrical Scrub Brush

Disc Scrub Brush

Cylindrical and Disk – Full-fill bristle patterns are trimmed to an optimal length for excellent floor surface coverage, and appropriate bristle stiffness delivers effective scrubbing performance.
