Structured Back Broadloom

Tandus' **Powerbond Cushion** (thicker cushion) and **Condensed Cushion** (more compact cushion used in areas where rollability is needed) are Tandus' standard Powerbond backings. Both are 100% recyclable, and both meet CRI Green Label Plus requirements. ER3 Powerbond contains 39-52% Recycled Content with 10% Post Consumer content and is NSF140 Standard Certified, Gold Level, and is California Gold Certified by SCS. Ethos is the first and only commercial carpet made from polyvinyl butyral (PVB), a non-chlorinated, thermoplastic film recovered from car windshields and safety glass recycling. Total product recycled content ranges from 36% to 52% with a minimum of 10% post consumer content. Certified as Platinum/NSF140 Standard and California Platinum by SCS. All C&A products are 100% recyclable in the company's closed-loop recycling program and are CRI Green Label Plus Certified. These products are also known as VCTT - Hybrid Resilient Sheet Flooring.

Specify "Peel & Stick" or "No Peel & Stick" installation when ordering.

STATE OF OHIO Recycling Program for Flooring

Tandus is pleased to provide the State of Ohio and its eligible customers with a recycling program for floor coverings. Tandus will provide the following:

- Recycling of PVC Backed Carpet Products at No Charge (Carpet Only - with purchase of new Tandus carpet products)
- Recycling of All Other Carpeting - \$.81/yard
- Take up, packing and shipment to Dalton, Georgia to be negotiated based upon a scope of work review with the customer and to be reviewed by the State of Ohio Procurement Services.

Recycling Program Description

PVC backed carpet is the only type of carpet that is currently being fully recycled back into carpet on a commercial scale. Tandus has an extensive, fully operational program to recycle old PVC backed carpet back into new carpet, and to take back any other type of carpet for appropriate recycling.

Although there are other carpet types with prototype technologies being developed which have theoretical capability of being recycled back into carpet, based for example on a future hoped for steam of material being returned, at this time, PVC backed carpet is the only type of carpet for which a current active large scale program exists to recycle 100% of the recovered carpet back into new carpet.

Our PVC backed carpet recycling program uses 100% of the material returned, and recycles the entire carpet through an extruder to become the secondary backing of our new PVC backed carpet. In high performance carpets, the secondary backing is the single heaviest component of the carpet, and has the most influence over the overall performance of the carpet. Our recycled content carpets, therefore, have a minimum of 31% overall recycled content, and perform at least as well or better than comparable virgin products at no additional cost. This 31% minimum level of recycled content is certified to be in all of our tile products all the time and is available in our roll products. We recycle our own products as well as competitors PVC backed products. We offer a written guarantee that all PVC backed carpet returned to us will be fully recycled, and that none of it will be land filled or incinerated including so called "waste-to-energy" incineration of otherwise improperly disposed of.

Although no current capability exists to recycle any other carpet type fully back into itself, through relationships with other partners we can accept back any carpet type and have it recycled in the most economical and environmentally advantageous manner available. Because different carpet types have differing opportunities, we determine the best process on a case-by-case basis. We will provide our customers with a written description of what will be done with the non-PVC carpet we take back for recycling.

INFINITY INITIATIVE CLOSED –LOOP RECYCLING PROCESS

It is estimated that five billion pounds of carpet is sent to U.S. landfills each year. According to industry statistics, the amount of “end-of-life” carpet entering the waste stream is increasing. Since its C&A brand began the Infinity Initiative, its closed-loop recycling program, Tandus has diverted more than 150 million pounds of reclaimed vinyl and vinyl backed carpet from landfills and incinerators to be used for 100 percent recycled-content backing for its floor coverings. Rather than use virgin raw materials, the company buys back old vinyl-backed floor coverings, regardless of original manufacturer. C&A’s sustainable warranty guarantees that it will be recycled in its entirety.

1. Reclamation

Flooring installers remove end-of-lifecycle vinyl-backed carpet tile from a building. Old carpet will be sent to C&A Floorcoverings’ recycling facility in Dalton, GA., for processing into new carpet.

2. Reclamation

End-of-lifecycle vinyl-backed carpet tile is loaded onto a truck for transport to C&A Floorcoverings’ recycling facility in Dalton, GA., for processing into new carpet.

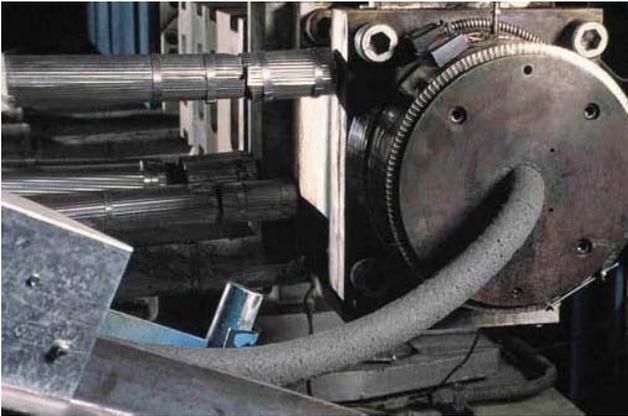

3. Grinder

Reclaimed vinyl-backed carpet is transported to C&A’s recycling facility, where it is chopped into slices as the first step in C&A Floorcoverings’ closed-loop program for recycling old carpet back into new carpet.

4. Pelletizer

These small pieces are then processed into fine pellets. A state of the art computer controlled system uniformly blends the pelletized material by weight.

5. Extruder and Extruder to Calender

This blend is then extruded into a continuous pliable three-inch rope. A conveyor belt transports the material to the calender.

6. Calender Line

Hardened steel cylinders continuously form the pliable material into a recycled composite sheet of ER3®, our 100% recycled content carpet backing.

7. ER3 Backing Inventory

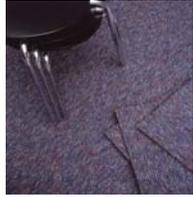

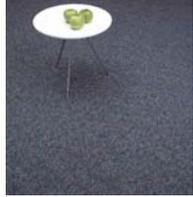

ER3®, C&A's 100% recycled content carpet backing, is standard on C&A's six-foot broadloom and modular tile floorcoverings.

Unlike vinyl-back products that we recycle, there is similar technological system in place for recycling broadloom products and other backing types. However, Tandus does have the ability to manage and partner with others to recycle these products.

****NOTE:** Captions 5-7 also apply to C&A's ethos backing, which is received in flake form ready for extrusion.
