Hand-Held Radar

Stalker II MDR Moving/Stationary Directional Radar

Stalker II MDR is a *Ka-band Direction Sensing* radar that can be used in *hand-held* or *dash-mounted* mode. The light-weight, rugged metal housing is *waterproof*. The Stalker II MDR is currently used in patrol cars, on motorcycles, snowmobiles, bicycles and in watercraft patrol.

Moving Mode

The Stalker II MDR can be mounted on the dash of most vehicles using the Universal Dashmount Bracket. A motorcycle mount is available. A wireless Remote Control is provided for easy operation. A CAN/VSS cable, plugged into the vehicle's OBD-II port, provides power and also senses vehicle speed. With the CAN/VSS cable installed the radar will *automatically switch* between moving and stationary modes. Using *Direction Selection*, officers can choose vehicle targets in Opposite or Same-Direction of travel. Using *Faster* mode, the radar will display both the Strongest target and the Faster target speeds.

Stationary Mode

In Stationary mode an officer can use *Direction Sensing* to track vehicle targets in *Opposite, Same* or *Both* (approaching and same) directions of travel. *Directional Arrows* confirm the identified target's direction of travel. The Stalker II SDR also features *Faster* mode which allows an officer to track *Stronger* signal targets and *Faster* signal targets simultaneously.

Package #803-0002-00 Components

Stalker II MDR Radar
Wireless Infrared Remote Control
Two (2) Li-ion Rechargeable Battery Handles
Battery Handle Charging Stand and Wall Charger
Two (2) Tuning Forks

Hand-Held Radar

Stalker II MDR Moving/Stationary Directional Radar with Rear Antenna

Stalker II MDR is a *Ka-band Direction Sensing* radar that can be used in *hand-held* or *dash-mounted* mode. The light-weight, rugged metal housing is *waterproof*. The Stalker II MDR is currently used in patrol cars, on motorcycles, snowmobiles, bicycles and in watercraft patrol. This unit is equipped with a *Rear Port Connection* on the radar and a *waterproof* Ka-band antenna, antenna cable and antenna mounting bracket. This unit can be used in patrol cars or on motorcycles.

Moving Mode

The Stalker II MDR can be mounted on the dash of most vehicles using the Universal Dashmount Bracket. A motorcycle mount is available. A wireless Remote Control is provided for easy operation. A CAN/VSS cable, plugged into the vehicle's OBD-II port, provides power and also senses vehicle speed. With the CAN/VSS cable installed the radar will *automatically switch* between moving and stationary modes. Using *Direction Selection*, officers can choose vehicle targets in Opposite or Same-Direction of travel. Using *Faster* mode, the radar will display both the Strongest target and the Faster target speeds.

Stationary Mode

In Stationary mode an officer can use *Direction Sensing* to track vehicle targets in *Opposite*, *Same* or *Both* (approaching and same) directions of travel. *Directional Arrows* confirm the identified target's direction of travel. The Stalker II SDR also features *Faster* mode which allows an officer to track *Stronger* signal targets and *Faster* signal targets simultaneously.

Stalker LIDAR-XS

Stalker LIDAR-XS is an outstanding speed enforcement tool especially in a high-density traffic environment. It can also be used to quickly provide accurate distance measurements for mapping.

1. Three (3) Operational Modes

- **Single Shot:** Quickly acquire a single target's speed and range in high traffic volume;
- **Continuous Tracking with Audio Confirmation:** Continuously track a single target with visual speed and range readings with a Doppler-like audio tone for confirmation;
- **Time and Distance:** Use the internal stopwatch and computer to convert T/D to speed output

2. Illuminated Heads-Up-Display (HUD)

- Provides target reticule together with speed and range (distance) readings

3. Fast Target Identification and Great Range

- Acquires most targets in under 4/10 sec. and reaches out to approximately 2,500 ft.

4. Powered by Rechargeable Lithium-Ion Battery Handles

- Allows Multiple Shift Usage
- Saves Money - No Need to Replace Costly Batteries

5. Inclement Weather and Obstruction Modes

- Excellent in Rain/Snow Helps in areas with trees, posts, etc.

6. Shoots Through Patrol Car Window Glass

Up to 2,500 ft. Range

Waterproof Housing

Small, Ruggedly Built

Weighs Only 2 lbs.

Use on Motorcycles or
in Patrol Cars

Dash-mounted Multi-piece Moving/Stationary Radar

Stalker DSR-2X Direction-Sensing Radar (Fast Lock)

The Safety Radar

Stalker DSR-2X is a *Ka-band* Direction Sensing dash-mounted radar. This unique speed enforcement tool features

- Two (2) fully functional Directional radars in one unit;
- Both *simultaneously active* antennas assist the radar in monitoring and tracking up to *4 targets*;
- A patented *Rear Traffic Alert* feature audibly and visually warns officers of potentially hazardous high speed vehicles approaching behind their patrol car as they blend into traffic;
- *Fast Lock* Remote Control allows officers to lock both “Faster” targets and “Stronger” targets;
- Only Stalker’s DSR antennas process return signals *digitally*. The signal that goes to the Counting Unit is a clean *digital signal* which helps to eliminate RFI interference. Digital antennas also improve a radar’s range;
- Stalker DSR-2X radar provides *Automatic Same-Direction, Direction Selection, Direction Sensing, True Doppler* audio and *Voice Verification* of locked target;
- *CAN/VSS Speedometer Interface & Power Cable* allows the radar to
 - A. automatically switch between Moving and Stationary modes;
 - B. assist in eliminating Shadowing and Combining;
 - C. assist in providing accurate Patrol Speed readings in inclement weather (rain, snow)

Motorcycle Multi-piece Moving/Stationary Radar

Stalker DSR *Generic Motorcycle* Direction-Sensing Radar (Fast Lock)

Stalker DSR is a *Ka-band* Direction Sensing radar. This unique speed enforcement tool features

- *Fast Lock* Remote Control allows officers to lock both “Faster” and “Stronger” targets;
- Only Stalker’s DSR antennas process return signals *digitally*. The signal that goes to the Counting Unit is a clean *digital signal* which helps to eliminate RFI interference. Digital antennas also improve a radar’s range;
- Stalker DSR radar provides *Automatic Same-Direction, Direction Selection, Direction Sensing*;
- *True Doppler* Audio Tones always correlate to the target’s speed regardless of patrol speed;
- *Voice Verification* of locked target by Antenna (front or rear), Radar mode (moving or stationary), and Target’s direction of travel (approaching or away);
- *VSS Speedometer Interface & Power Cable* allows the radar to
 - A. automatically switch between Moving and Stationary modes;
 - B. assist in eliminating Shadowing and Combining;
 - C. assist in providing accurate Patrol Speed readings in inclement weather (rain, snow)

Dash-mounted Multi-piece Moving/Stationary Radar

Stalker DUAL Radar (2 Antennas)

Stalker DUAL is a *Ka-band* non-directional dash-mounted radar. This outstanding speed enforcement tool features

- Wireless Remote Control can be easily converted to a wired remote by the department;
- *Track Through Lock* allows officers to track, lock and relock *Strongest* and *Faster* targets;
- Only Stalker's *waterproof* digital antennas send a clean *digital signal* to the Counting Unit which helps eliminate RFI interference and improves the radar's range;
- The Stalker DUAL radar offers *Automatic Same-Direction* and *Direction Selection* in Moving mode;
- *True Doppler Audio Tones* always correlate to the target's speed regardless of patrol speed;
- *CAN/VSS Speedometer Interface & Power Cable* allows the radar to
 - A. automatically switch between Moving and Stationary modes;
 - B. assist in eliminating Shadowing and Combining;
 - C. assist in providing accurate Patrol Speed readings in inclement weather (rain, snow);
- User friendly controls for LED display brightness, audio and sensitivity (range) levels.

Speed and Message Trailers

Stalker SAM (Speed Awareness Monitor) Speed Trailer

The Stalker SAM trailer is a **Community-Friendly** tool to assist law enforcement in their efforts to raise public awareness that speeding vehicles are unsafe and present a hazard to the community's welfare.

- Highly visible amber LED's are visible up to 1,000 ft.;
- The Approach-Only Stalker *Speed Sensor* radar is factory-calibrated and accurate helping to eliminate false target readings. The *Speed Sensor* has an average range up to 1/2 mile;

The SAM trailer will operate for months without a battery recharge when using the Solar Panel

The optional *55 Watt Solar Panel* assists the 4D Deep-Cycle battery to power the display. The Solar Panel provides 1 day of operational use for every 2.5 hours of exposure to sunlight. Without the Solar Panel, a fully-charged battery will power the Display for 18 days @ 78° F.

- The SAM trailer is built and certified to NHTSA standards and ready to license if required.
- Optional Statistical Data Package is available for traffic studies
- 24 Month Factory Warranty is Standard for all components except Battery (12 months)

Radars Detector Detector (RDD)

Spectre Elite Radar Detector Detector

Federal law prohibits the use of radar detectors in all commercial vehicles. It also prohibits the use of radar detectors on all military installations. The Department of Homeland Security advises that terrorists or other hostile elements may use radar detectors to evade law enforcement. *Spectre ELITE* is a state-of-the-art enforcement tool for the detection of radar detectors. Adjustable range and audio volume allow officers to customize the ELITE's functionality to meet various applications.

Video Systems

Stalker VUE Officer-Worn Video/Camera/Recorder

The Stalker VUE Officer-Worn Video Camera/Recorder provides documented evidence without the cost and limitations of in-car video systems. The use of video is known to increase responder safety and reduce time in court while increasing the likelihood of successful prosecutions. In addition, taxpayer dollars are saved by reducing frivolous lawsuits.

Features include

- Tilting Camera Head
- Daylight and Lowlight Lens Modes
- Records up to 20 hours of Video
- IR Emitters for Low Light Recording
- Embedded High Sensitivity Microphone and Speaker
- Easy File Transfer
- User-Changeable Battery
- Easy Battery Charging
- Time-Date-ID Watermark
- 1 Year Full Parts & Labor Warranty
- Record Video/Audio, Record Still Images, Record Audio Only

Video Systems

In-Car Mobile Video System

The use of in-car video is known to increase responder safety and reduce time in court while increasing the likelihood of successful prosecutions. In addition, taxpayer dollars are saved by reducing frivolous lawsuits.

Features

No Bulky DVR

No DVR or other type vide recorder is needed. In fact, there is no dedicated system enclosure to take up space in the vehicle.

Lowest Cost of Ownership

Less hardware means lower cost of ownership. Plus, uploading video to Cloud storage eliminates the backoffice cost and headaches of file storage, archiving, and retrieval.

Streaming Video with GPS Overlay

The CopTrax in-car video streams video with GPS location information, accessible in real-time from any internet-connected computer.

Uses Patrol Vehicle Laptop

CopTrax is software running on the vehicle's laptop. The video/audio file is written to the computer's hard drive to be automatically uploaded in the background through its laptop's 3G or 4G cellular phone card connection or through its wireless network connection.

Command and Control Center

The CopTrax Command & Control Center is the gateway to live video feed from each patrol vehicle as well as CopTrax Mobile App-connected smartphones. Video evidence is either stored on the Cloud-based Windows Azure© system or on your own "on-premise" servers.

The Command & Control Center can be securely accessed from any Internet-connected computer...from Headquarters, from the patrol commander's residence, from the Chief's desk, from the shift supervisors's in-car laptop, etc.

CopTrax In-Car/Command Package
