

## **ADDENDUM #3**

ISSUED March 16, 2016

**RFP Number: DRC-16-1053**  
**Date Issued: January 25, 2015**

**Reason for Addendum:** Issued to correct page A-46. Delete from Note: ... "aluminum cans only. No bottles." Insert, "bottles."

Additionally, to clarify Attachment H, pages 1 and 2, under the category of "Confections", there is a statement that reads, "Representative sampling, comparable items shall be priced/cost the same as the sampling." The intention of this statement is that a Bidder who is awarded a contract must provide items in the vending machine which are comparable in price/cost per ounce as the particular confection (i.e., Snickers bar) bid. For example, if the Snickers bar at 2.07 ounces is bid at \$1.00 then actual vends must be similarly priced such as a Mars bar at 2.07 ounces must be priced at \$1.00 and can't be placed in the vending machine for sale at more than a dollar (i.e., \$1.25). Simply stated, the "cost per ounce" of actual confection vends whether it be potato chips, candy bars, popcorn or cupcakes must be the same as the "cost per ounce" of that particular, bided confection item. The underlying purpose for this statement is to prevent vendors from "low ball" or "loss leader" bid pricing of one (1) to four (4) confection items to win the bid and be awarded the contract and then increase the pricing of comparable confection items for actual vending sales. Webster's Dictionary defines "comparable" as "used to say that two or more things are very similar and can be compared to each other."

All other terms, conditions and specifications remain the same.
