### Prepaid Freight

- A 4.6% shipping and handling fee will be applied to all prepaid orders. Prepaid rental pumps will be exempt from this charge and will not be charged freight.
- Your Medela Customer Service Representative will calculate and add the shipping fee onto your order and process as usual.
- In January and July, Medela will advise you of the accrual amount of these charges for the previous six months.
- The amount can then be used to purchase Medela product per the following guidelines.
- To be eligible to use the credit, your account must be current and within terms.
- At the time you are notified of the accrual amount, there will also be an expiration date for use. This will typically be a two month period of time. If the accrual is not used by this date it becomes null and void.
- The accrual amount can be used on a single order only within the effective time period.

BiliBed Phototherapy Unit w/hour meter (0383016)* .....	\$1,260.00 .....	\$105.00 .....	.20% .....	\$15.00

The Prepayment Plan is available to all breastpump rental stations choosing to prepay all their pumps. All Medela breastpumps are available under the Prepayment or Flat Rate Plans. Rental Stations must select either the monthly flat rate or prepaid plan on a 1-year term, for all their pumps. Pumps and scales cannot be mixed between flat rate and prepaid. The Loss/Damage Waiver must be prepaid at the same time you prepay pumps. Term rates for the waiver are shown above. Medela will not grant refunds for prepaid pumps returned early by rental stations.

If a rental station needs more rental pumps during the prepayment period, the rental station must prepay when placing the order for the additional pumps through the end of the term. Example: A rental station chooses the prepay plan on January 1. On July 1 the rental station needs one additional Symphony. The rental station prepays \$124.50 (\$19.50 x 6 months plus \$1.25 x 6 months) for the pump through the remainder of the year. The new additional pump will come up for renewal with the rest of the station's pumps on the following January 1. The \$124.50 must be paid when the order is placed.

# Breastpumping Products & Accessories

## Breastpumps are the core of a nursing product line.

In the U.S. 77%<sup>1</sup> of moms will nurse, and of those who nurse, 90%<sup>2</sup> will use a breastpump!

## What type of breastpump does a mom need?

One breastpump does not fit every mom's need or budget. Medela has designed different pumps to uniquely support every mom's nursing needs. To assist your customers in selecting a pump, Medela has placed graphs on each of our breastpump packages to help moms find the right pump. These guidelines are not only for Medela pumps but are true of all breastpumps within a given category. To best serve your customers the pumps you carry should be based on each need.<sup>2</sup>

- 45% of moms use a **double** pump most often.
- 21% of moms use a **single** pump most often.
- 24% of moms use a **manual** pump most often.
- 8% of moms use a **rental** pump most often.

## BPA-free, for the health of mom and baby.

Medela is committed to always doing what is best for moms and babies. All Medela products that come into contact with breastmilk are BPA-free. For more information on BPA and Medela BPA-free products, please visit [www.medelabpafree.com](http://www.medelabpafree.com).

Pumps shown with this symbol ⊙ feature 2-Phase Expression® technology, which is the only research-based breastpump technology that mimics a baby's nursing rhythm, delivering more milk in less time (when pumping at Maximum Comfort Vacuum™).

Look in the far left column for the circumstances that apply. Any pump marked with a ◆ symbol in that row is recommended. You can narrow your choices by considering whether you have daily or occasional pumping needs and whether you want an electric or manual pump.

## Baby Scales & Accessories

Item	Article # UPC #	Item Description	Unit Dimensions Weight lbs. Unit Count	Case Dimensions Weight lbs. Case Count	Case Price
	0407001	<b>BabyWeigh™ Scale</b> - Infant scale that also automatically calculates breastmilk intake from pre- and post-feeding weights. Accurate to 0.1oz (2g) up to 12 lbs (6000g) and 0.2oz (5g) from 12-24lbs (12,000g). Converts between pounds and grams, compensates for moving baby, automatic reweigh button. AC adapter or battery operation. Includes operating service guide. One year limited warranty. <b>Available for Rental.</b>	◆ ◆ 1	9 1/4 x 11 1/4 x 22 13.0 lbs 1 per case	\$989.49  See Page 2 for Rental
	1907181	<b>BabyWeigh™ Parent's Instructions</b> - Easy-to-read booklet explains test-weighing procedures for measuring breastmilk intake. Includes forms for charting weights.	◆ ◆ 1	2 x 8 3/4 x 11 1/4 2.0 lbs 10 per case	\$10.20
	0408001	<b>BabyChecker™ Scale</b> - Infant/toddler scale for daily weight monitoring. Baby basket removes to weigh standing toddlers up to 40 lbs (20kg). Accurate to 0.5 ounce (0.01kg) for infants under 20 lbs (10kg). Battery operation. Includes operating service guide. One year limited warranty. <b>Available for Rental.</b>	9 1/4 x 11 1/4 x 22 11.0 lbs 1	◆ ◆ 1 per case	\$275.79  See Page 2 for Rental
	1907232	<b>BabyChecker™ Parent's Instructions</b> - Easy-to-read booklet explains weighing procedures for parents. Includes forms for charting weights.	◆ ◆ 1	2 x 8 3/4 x 11 1/4 2.0 lbs 10 per case	\$10.20
	3007045	<b>Scale Carrying Case</b> - Durable, nylon case for use in transporting the BabyWeigh™ or BabyChecker Scales. Adjustable shoulder/hand straps, interior pockets for paper, pen, and AC adapter storage.	◆ ◆ 1	7 1/2 x 15 3/4 x 23 1/2 5.0 lbs 1 per case	\$103.45
	5997010	<b>Scale Calibration Weight</b> - Highly recommended for all scale users. Calibration-quality 10 kg weight for use with the BabyWeigh or BabyChecker Scales. <b>Required for BabyWeigh or BabyChecker Scale Rental Stations.</b>	◆ ◆ 1	6 1/2 x 7 1/2 x 8 23.0 lbs 1 per case	\$65.59

# Medela Education

Medela offers educational programs that provide the opportunity to receive continuing education contact hours for nurses and lactation consultants. Medela has been providing education for the last two years across the country. All of the programs are developed and delivered with these goals in mind:

- Increase breastfeeding initiation and duration.
- Inform clinicians with best education, best practices and best clinical evidence.
- Utilize current research that impacts and enhances clinical practices to improve patient care.

The Medela Education Team is comprised of Master's prepared registered nurses and lactation consultants with over 40 years of combined clinical experience. In addition, Medela's extensive research program initiates and supports basic clinical research by the world's leading lactation scientists and clinical specialists. Significant breakthroughs in our understanding of the mammary gland anatomy and our concepts of milk production have come from our collaboration with Professor Peter Hartmann, PhD at the University of Western Australia. This research allows the Medela Education Team to bring you the latest research on human and breastmilk science.

The Medela Education Team looks forward to working with you to plan and implement the following programs to meet your educational needs for 2009. For more information or to schedule a program, please call 1-800-435-8316 or email: [education@medela.com](mailto:education@medela.com)

## Clinical Education Programs

Program Name	Description	Hrs.
<b>Composition of Human Milk: The Latest Scientific Findings</b>	This program reviews the incredibly complex nature of unique components in human milk which are precisely engineered to provide optimal nutritional, protective, and developmental outcomes for the human infant. Important new research and discoveries which impact short and long-term health outcomes are discussed.	1.0
<b>Challenges of the Late Preterm Infant</b>	This program provides data on the specialized needs, vulnerabilities and care management of babies born between 34 and 37 weeks gestation. The challenges of breastfeeding the late preterm infant are discussed and strategies for maximizing breastfeeding support and minimizing complications are presented.	1.0
<b>Breast Anatomy and Breastshields</b>	Explore the recent research and findings regarding anatomy of the lactating human breast from Donna Geddes, PhD. Numerous video clips demonstrate criteria for clinicians to ensure the correct breastshield size for mothers using a breastpump in order to maximize milk yield and supply.	1.0
<b>Essential Breastfeeding Management</b>	One-hour program developed for all clinicians who work with breastfeeding mothers and babies. This program presents a brief overview of updates regarding current best practices for breastfeeding management in the hospital. This program is easily presented on the nursing unit for staff convenience.	1.0
<b>How Breastfeeding Works: What Research Tells Us</b>	The latest research describing the physiologic action of breastfeeding through infant feeding patterns, changing milk volumes, varying infant appetites and how lactation is maintained. Content is valuable for clinicians who provide breastfeeding instruction and guidance.	1.0
<b>The Birth Process and Beginning Breastfeeding: The First 24 Hours</b>	Designed for nurses and other health professionals who care for mothers and babies throughout the labor/birth process and into the first 24 hours of life. Reviews the evidence supporting important labor/birth and early postpartum practices that improve the stabilization of the newborn and affect the short and long-term success of breastfeeding. Preventing hypoglycemia, improving temperature stability, gut colonization, immune system development, and decreased incidence of hyperbilirubinemia are discussed.	1.0
<b>Value of Human Milk for Mothers, Infants and Society</b>	Discover the incredible value that human milk provides. Explored are the many benefits and value that human milk provides to the infant, mother, hospital, and society. Also addressed are the risks associated with not providing human milk.	1.0
<b>Answering Common Breastfeeding Questions and Helping Mothers Overcome Difficulties</b>	Mothers frequently have questions and sometimes encounter challenges when they begin breastfeeding. This program addresses breastfeeding management issues such as latch-on difficulty, nipple soreness, engorgement, milk supply issues and other common challenges. Evidence-based solutions are discussed through the use of questions, answers and case studies.	1.5
<b>Optimizing Weight Gain Through Human Milk Management</b>	Discover how to scientifically manage human milk feedings while increasing infant weight gain. Emphasis is on the measurement of human milk caloric content and feeding practices. Case studies of infants in the NICU and outpatient settings are presented, demonstrating the significance of human milk caloric content validation.	1.5
<b>Alternative Feeding Strategies for Infants with Special Needs</b>	Discusses options and the use of alternative feeding devices available to ensure that babies with special needs can receive human milk even when unable to feed at the breast. This program addresses the unique needs of families who are in crisis and provides clinicians with skills and tools to help these special babies get the best start in life through the use of human milk.	1.5
<b>Hyperbilirubinemia in the Breastfeeding Newborn</b>	Designed for nurses caring for infants at 35 weeks gestation or more who are at risk for hyperbilirubinemia. The program reviews the etiology, risk factors and screening guidelines for hyperbilirubinemia as well as differentiating pathologic and physiologic jaundice, and breastfeeding and breastmilk jaundice. In addition, the program reviews nursing responsibilities regarding evaluation, assessment, and utilization of nomograms from the AAP guidelines. An emphasis on accurate lactation support and discharge planning is also included.	1.5

### Clinical Education Programs

Program Name	Description	Hrs.
<b>Preserving Breastfeeding Through Breastpump Technology and Research</b>	A review of the evolution of breastpumps, breastpump technology and research. Time is provided for hands-on comparison of various breastpumps currently available in the market.	3.0
<b>Evidence-Based Breastfeeding: What Clinicians Need to Know</b>	This three hour program presents evidence-based breastfeeding information for clinicians who care for breastfeeding families and want to standardize the information given in their facilities. Included are research-based updates regarding the uniqueness of human milk, reduction of short- and long-term morbidities to babies, an overview of lactation physiology, latch-on and positioning techniques, and current clinical practice guidelines for normal breastfeeding management and discharge planning.	3.0
<b>Making a Difference: Strategies to Improve Breastfeeding Outcomes</b>	This day-long overview presents information and strategies to help achieve successful breastfeeding management in WIC and other community settings. The program focuses on improving the knowledge and skills of those providers who care for breastfeeding mothers and infants before and after birth. Topics include: prenatal issues, what the new mother needs to know, prevention and management of common problems, returning to work or school, breastfeeding after the first six weeks, and providing a continuum of care throughout the mother's breastfeeding experience.	6.0
<b>Breastfeeding Management for In-Hospital Clinicians: Improving Outcomes</b>	This day-long program is designed for hospital-based nursing staff to improve their knowledge and skills regarding lactation management issues. Evidence-based practices which improve outcomes will be reviewed. Key information includes initiation and early management practices, assessment skills, common challenges, maternal and infant complications, early pumping issues, medications and discharge planning.	6.0

### NICU Clinical Education Programs

Program Name	Description	Hrs.
<b>The Late Preterm Infant: Optimizing Care for infants at Risk</b>	An overview of preterm and late preterm birth statistics as well as the epidemiology associated with these infants. Includes a review of definitions associated with the most recent finding regarding the care of the late preterm infant. Identifies morbidities, mortality, trends and the physiological differences between late preterm and term infants. Included are lactation risks associated with these vulnerable infants as well as the economic impact of infants that are born too soon and discharged too early. Included are case studies that show the impact of appropriate and inappropriate care in the hospital, at discharge and follow-up.	3.0
<b>The Role of the NICU Nurse in Providing Human Milk: Changing Old Attitudes</b>	Conflict and stress related issues for the NICU nurse with regard to providing human milk for preterm infants. Significant research regarding the benefits of human milk for preterm infants is included. Understanding the value of human milk and its impact on these vulnerable infants as well as incorporating best practices in the first 100 hours emphasizes that the responsibility lies with all health care providers to support provision of human milk. Several scenarios are presented describing how attitudes can affect behaviors.	3.0
<b>Trends in Neonatology and the Impact on Human Milk</b>	Explores the history of Neonatology from the early 20th century to present time with an emphasis on how the health of newborns can impact the future of our country. Included is the beginning of Apgar scoring, mortality of preterm infants in the 1960's, assisted ventilation in the 1970's, surfactant in the 1980's and the age of the "micropremie" in the 1990's. Also discussed is the current climate of genomic and assisted reproductive technology. The history of breastfeeding rates and practices are discussed to parallel advances in technology. The program concludes with an overview of how costs of short and long-term care when providing human milk can impact conventional NICU charges.	3.0
<b>Families in Crisis</b>	A review of the parent's, family and professional's perspective regarding the stay in the NICU. Included in the program is the impact of the infant's medical status on family dynamics, especially the mother-infant relationship. Developmental and situational stressors, psychosocial demands and ineffective coping are discussed. Psychological tasks for the mother and family are included. Explores the health care provider's role regarding advocacy, education, ethics and grief. The role of human milk in nutrition, early enteral feeds, skin-to-skin care and transition to the breast are included. The roller coaster ride in the NICU is explored in poignant detail from several mothers' and families' perspectives.	3.0

### Program Pricing (Choose one that best fits your facility.)

## Education Materials

Item	Article # UPC #	Item Description	Unit Dimensions Weight Unit Count	Case Dimensions Weight Case Count	Case Price
<b>UPDATED</b> 	1908053	<b>Textbook of Human Lactation</b> - Hale & Hartmann's Textbook of Human Lactation is a compilation of chapters on the science of human lactation. Written by the foremost scientists in their fields, these chapters cover everything from the composition of human milk to why breastfed infants need supplemental vitamin D, to how a variety of medications impact the breastfeeding couple.	◆ ◆ 1	◆ ◆ 1	\$89.95
<b>UPDATED</b> 	1907248	<b>Medications and Mother's Milk</b> - This newest 2008 (13th edition) has been updated to include more than 127 new drugs for a total of more than 868 drugs, vaccines, vitamins, viral syndromes, and other substances. Includes hundreds of updates to drugs and tables on radioisotope agents and cold and cough remedies.	◆ ◆ 1	◆ ◆ 1	\$39.95
<b>NEW!</b> 	2001922	<b>Infant Suck CD-ROM</b> - Donna Geddes, PhD from the University of Western Australia has used the latest ultrasound technology to capture the science of the infant suck for the first time ever. This evidence-based CD provides her revolutionary discoveries. May be used and incorporated into training material.	◆ ◆ 1	◆ ◆ 1	\$49.95
<b>NEW!</b> 	Coming Soon	<b>Human Milk Composition CD-ROM</b> - A historical view of breastmilk. Described is where breastmilk comes from, the different components it contains, and how it is living, ever-changing, and tailor-made for infants. Also included is the latest groundbreaking breastmilk research from Dr. Mark Cregan.	◆ ◆ 1	◆ ◆ 1	\$49.95
<b>NEW!</b> 	1907746	<b>Breast Anatomy CD-ROM</b> - Using the latest ultrasound technology Donna Geddes, PhD was able to look inside the human breast and make revolutionary discoveries that will change medical text books! Includes a comprehensive anatomy presentation for self-education along with free downloads of the breast anatomy in 2D and 3D. Use these to create your own training materials!	◆ ◆ 1	◆ ◆ 1	\$19.95
	67109	<b>Human Lactation</b> - "The Science of the Art" CD-ROM. Insights into breast physiology and breast expressions and development of the Symphony® breastpump. By Professor Peter Hartmann, PhD.	◆ ◆ 1	◆ ◆ 1	\$49.95
	1547553	<b>Breastmilk Pumping Log</b> - Medela's mom-friendly breastpumping log contains helpful tips, motivation and definitions to help mom successfully provide the benefits of breastmilk to her baby.	◆ ◆ 1	◆ ◆ 100 per case	\$180.00
	1547556	<b>Breastmilk Pumping Log</b> - Spanish.			
	1900502	<b>Cleft Lip/Palate Booklet</b> - Give Us a Little Time informative booklet by Christa Herzog-Isler, IBCLC and Klausonigmann, MD.	◆ ◆ 1	◆ ◆ 1	\$1.90
	1547514	<b>Breastmilk Storage Guidelines Magnet</b> - Quick, at a glance, well-baby storage guidelines for moms.	3 1/2 x 4 ◆ 1	◆ 3.0 lbs 50 per case	\$17.95 <b>Case Qty Only</b>
	1547566	<b>Breastmilk Storage Guidelines Magnet</b> - Spanish.			
	8247002	<b>Breast Anatomy Balloons</b> - For use as a teaching tool. Pink balloons with the drawing of the new breast anatomy introduced in 2006.	◆ ◆ 1	◆ ◆ 10 per case	\$4.00 <b>Case Qty Only</b>
